1) You didn't have to quote all of that just to say so.
2) What surprises me is that this was circulating in the 1980's and is
still going strong.

Ohio/Penn DX Special Bulletin No. 893.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 893.2
BID: $OPDX.893.2
January 26, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K4UEE and W0GJ for the following DX information.

The following press release was provided by Bob Allphin/K4UEE and Glenn Johnson/W0GJ.

Desecheo 2009 Press Release # 4
January 26, 2009

FOR IMMEDIATE RELEASE

We have reserved the special call sign K5D for our upcoming Desecheo operation. The operation will begin late in the day on Feb 12th.

QSO philosophy...because Desecheo is so very rare (#6 worldwide, #3 in Europe and # 2 in Asia) there are many, many hams worldwide that need KP5 for an all-time new one. Therefore, we are asking that you not contact the Dxpedition on any band/mode that you have confirmed from a previous DXpedition. This will allow the people who really need a new DXCC entity a better opportunity to get through the pileups.

Our objective is not to establish a world record for contacts...there will be no "greenies", no boxes to check, no competitions for most band/mode QSOs, no certificate or awards for contacting the Dxpedition more times than anyone else. So, if you have KP5 already confirmed on a particular band/mode, we respectfully ask that you exercise restraint. If, late in the DXpedition, we are calling CQ for contacts, we will welcome your call.

The team has encountered higher expenses than anticipated. These mainly involve the transportation and feeding of other personnel that will be traveling to the island with us. Approximately ten other personnel will share our campsite and facilities for the duration of the DXpedition. They will be on Island with us to provide security and carry out field research. Therefore, we ask that you consider a contribution to the

DXpedition to help with these incremental expenses. Just go to www.kp5.us
and click the button that reads" How you can Help".

We are all counting the days until we assemble in Puerto Rico on Feb 7th.

Bob Allphin- K4UEE
Glenn Johnson-W0GJ
K5D co-leaders

I'd prefer a modern SDR radio, as opposed to the old analog ICOM, if I wanted a panoramic display. This also costs $500, and it's a better HF receiver and has a much better spectrum display.

well I am only a little worried about private wireless

as to her being a ham that is good and bad

good that she is not in already with with clique in the ARS

bad of course in that she does not understand us hams yet

What clique? At one point, FCC had lots of hams who knew how radio worked
technically. It has been steadily re-populated with lawyers lately, who are
playing up to commercial interests so they can leave for lavish consulting
jobs.

Most 2 meter ht's can be modified for use on the marine freqs. You want find one that come "stock" with those freqs included, except perhaps for receive only.

With a simple mod, many ht's can be made to transmit and receive on the marine freqs.

James

I don't consider surface mount board level mods to be "simple". One slip and you have a paper weight.

Of course simple and easy would be the best reason for outlawing ham radios altogether. You don't mind people running out to buy ham radios to (try to) use for commercial purposes?

I remember showing up on a 2m repeater asking for road assistance, and some unidentified station jumped all over me for "not using proper police procedures". It sure ain't what it used to be 25 years ago.

How can you monitor the harbor calling frequency while chatting on 2m? answer: Have another radio to do what it was meant to do. And make sure the mics don't get mixed up.

Incidentally, all marine frequencies are monitored by Coast Guard, assistance contractors and even satellites for emergency traffic. If you are on land goofing around and don't hear an emergency going on out at sea, they can hear you. I know of someone doing 5 years in Fed pen for just such a situation after 6 months in custody during trial preparations and 30 minutes of jury deliberations. He can never be caught in possession of a radio ever again.

Muuttuva Mars

Kauan sitten Mars on ehk&#65533; ollut tyystin toisenlainen maailma kuin se on nyt. Tihe&#65533;mpi kaasukeh&#65533; ja l&#65533;mpim&#65533;mpi ilmasto on mahdollistanut veden esiintymisen nestem&#65533;isess&#65533; muodossa pitk&#65533;&#65533;n, ehk&#65533; satoja miljoonia vuosia. Nykyisess&#65533; Marsissa on vain hyvin s&#65533;ilyneit&#65533; j&#65533;lki&#65533; menneiden aikojen vesist&#65533;ist&#65533; ja nestem&#65533;ist&#65533; vett&#65533; on en&#65533;&#65533; syv&#65533;ll&#65533; ikiroudan alapuolella -----

*Otin p&#65533;tk&#65533;n lainaksi osoittaakseni sit&#65533; mekaniikkaa joka Marssin, kuin Maan alati muuttuvia vesitaseita on aikain saatossa muljaillut. T&#65533;&#65533;ll&#65533; tosiaan esitettiin, ettei Marssissa ja lukuisissa muissa paikoissa olisi vett&#65533; jossain muodossa. Kuten havaitsemme Marssissa on ollut vett&#65533; siin&#65533; kuin Maasa. Mutta koska s&#65533;teilyss&#65533; vesi ionisoituu ja happi muuttuu jopa typeksi on vesi kaasuuntunut/kaasuuntumassa ionisoitumalla ja paljon h&#65533;vi&#65533;m&#65533;ss&#65533; avaruuksiin kaikialla. Joka tapauksesssa yh&#65533; siis Marssissa j&#65533;&#65533;t&#65533; ja vett&#65533; l&#65533;ytyy, kuten artikkeli kiistatta osoittaa!

Nykyinen Mars ole ehk&#65533; edes pahin mahdollinen. Marsissa on ilmeisesti kylmempi&#65533; ja l&#65533;mpim&#65533;mpi&#65533; jaksoja kuten Maassakin. Viimeisin j&#65533;&#65533;kausi oli Marsissa pari miljoonaa vuotta sitten. Silloin j&#65533;&#65533;tik&#65533;t levitt&#65533;ytyiv&#65533;t napa-alueilta aina 30. leveysasteelle saakka, joka maapallolla vastaa Egyptin pohjoisosia ja etel&#65533;ist&#65533; Brasiliaa. T&#65533;ll&#65533; hetkell&#65533; Mars on ilmeisesti matkalla kohti l&#65533;mpim&#65533;mpi&#65533; aikoja, jotka ennen pitk&#65533;&#65533; vaihtuvat v&#65533;&#65533;j&#65533;&#65533;m&#65533;tt&#65533; taas j&#65533;&#65533;kauteen.

*Sulavanakuvia siel&#65533; on jo jonkinajan saanut n&#65533;hd&#65533; mm. NASA:n kuvastoissa.

Toisin kuin Maassa, Marsissa j&#65533;&#65533;kauden syyn&#65533; on napojen ajoittainen l&#65533;mpeneminen, joka johtuu planeetan py&#65533;rimisakselin huomattavasta, jopa kymmenien asteiden heilahtelusta.

*Puuttuu vakauttavan hyrr&#65533;voiman massiivikuu Maan tapaan siis.

Napaj&#65533;&#65533;tik&#65533;iden hiilidioksidi ja vesih&#65533;yry vapautuu kaasukeh&#65533;&#65533;n, kulkeutuu kohti viilenev&#65533;&#65533; p&#65533;iv&#65533;ntasaajaa ja h&#65533;rmistyy takaisin pintaan. Se muodostaa joidenkin metrien paksuisia kuura- tai lumikerrostumia, joiden seassa on runsaasti p&#65533;ly&#65533;. Kun kerroksen yl&#65533;osien j&#65533;&#65533; sublimoituu takaisin vesih&#65533;yryksi, j&#65533;ljelle j&#65533;&#65533;v&#65533; p&#65533;lykerros toimii eristeen&#65533;, joka est&#65533;&#65533; kaikkea j&#65533;&#65533;t&#65533; sublimoitumasta. J&#65533;&#65533;kausi alkaa kuitenkin hellitt&#65533;&#65533; otettaan, kun napaseudut j&#65533;lleen viilenev&#65533;t ja sitovat hiilidioksidin ja vesih&#65533;yryn suurimmaksi osaksi takaisin j&#65533;&#65533;tik&#65533;ihin.

Vaikka Mars on osoittautunut monessa suhteessa sittenkin samanlaiseksi planeetaksi kuin Maa - ainakin kaukaisessa menneisyydess&#65533; - onko se ollut riitt&#65533;v&#65533;n samanlainen el&#65533;m&#65533;n synnyn kannalta? Vai onko Mars vain eloton, ruostunut j&#65533;&#65533;pallo?

It's not quite that bad. Use MagEyes (or something similar) with lots
of light, have a fast recovery soldering station, and a steady hand and
SMT isn't so terrible.

If it were a simple mod, then it would be simple for the FCC to send the manufacturer a Notice of Liability and confiscate all inventory or force them to remanufacture and resubmit to the approval process like they did with Kenwood.

Don't forget ESD and warranty. Going out and getting a service monitor so you can check the tuning and modulation that was optimized for 144-148 at the factory is an added expense when you could have bought a marine radio for less. Some radios, most notably VHF models, lose performance out of band. Do you need a marine radio? Buy a better marine radio. If you don't need a marine radio why hack your ham radio. The price is about the same and operationally, you can't be both places at the same time when you need to.

I do surface mount work too but there is nothing to be gained with the mod unless you're MARS, CAP, a jammer, or a kid with a new toy.

Then there was the other issue brought to light with a recent rail disaster, where an engineer was fooling around texting when he should have been paying attention to driving the train so he wouldn't have run a red light and ran head on into another one.

Think ahead.

1340. Ham Radio WWPMC Contest

Dear colleagues radio amateurs!

I am addressing you as a member of managing committee of Radio Club Slovenj Gradec - S59DCD. I would like to introduce to you our project and provide some promotional material and kindly ask for you help in promotion.

Our project is a brand new World Wide HF contest. We dedicated it to a noble idea of PEACE MESSENGER CITY association, which was founded within organization of United Nations. We named our project World Wide Peace Messenger City Contest - WWPMC.

Please, find attached short introduction of our club, introduction of IAPMC, and an explanation of PMC contest idea. We do heartily hope that you will find our idea interesting and persuasive in the way, that you will get your hands on mikes and keyers and joins us on the air.

We would like to kindly ask you for help in spreading the news about our new contest among radio amateurs in your district and your country by publishing this article in any possible way (printed publications, web sites, internet forums, discussion groups, mailing lists etc.) We hope we will meet amid a large concourse of contesters.

We are looking forward to meet you and your fellows' radio amateurs in WWPMC contest.

Reply to this mail is not necessary, but it would be appreciated.

With best regards from Radio club Slovenj Gradec - S59DCD!

Zvone BURJA - S56GTA

Member of managing commitee

www.S59DCD.si

info@s59dcd.si

P.S.: Since there are all members of this project working on promotion campaign it is possible that you will receive this invitation more than once. For such instance I would like to apologize if that should cause any troubles. Such incident is not intentional or made on purpose.

Thank you for your understanding!

That is a flaw in Metrolink. Never use a human as a potentially fatal
single point of failure. I wasn't speaking in favor of the modification.
I was merely pointing out that soldering stations and stereo
magnifiers have kept me relevant.

I use a jewelers loupe, so I have to be more careful not to put the iron up
my nose!

The trouble with Metrolink is that they are doing business in California, so
merit has more to do with politics than skill. You have to be incompetent
so no one will suspect you got there on your own power. This is likely to
become more nationwide. For an accurate picture, see the movie "Idiocracy"
by the guy that did "Office Space". Only the name calling is changed. We
are manure for the revolution.

There was a time when there were skilled people, and we could do great
things, but this nation has become demoralized, and is in the
destabilization phase. It might be too soon for the crisis stage though,
because the military is still viable and moral even with our new C-C. The
population of the US is very great, so it is very difficult to kill enough
of them fast enough before the idealistic idiots counter revolt when they
finally realize they are being played for their own destruction. Other
schools of thought believe demoralization is so complete that the idealist
would cling to their programming despite the reality of their own
observation, just as so many Jews in Auschwitz waited in line to be
executed.

The plan (from the 70's) is outlined here by a defector, complete with
explanation of terms. See how much of it you can recognize today:

I stole nothing, your blog domain was available because you even admit
that you lost it during the conversion to the new blogger. Still
afraid to admit your stupdity, fumble fingers.

>you stole data and credit and phone
>info from my wifes amazon account etc
>
I've stole nothing, I never have had your phone number, nor do I want
it, and no data was stolen. You can't steal anything that YOU and
YOUR WIFE put out there in the public domain, if you don't want your
lives on parade for everyone to see, I suggest that you leave other
folks alone and stop posting your personal information all over the
internet.

Here folks, this is what Mark Morgan KB9RQZ has been ranting and
raving about for three years, this is why he continues to flood and
try to destroy our news group.

http://74.125.95.132/search?q=cache:YuWvI1XZpKcJ:www.amazon.com/gp/pdp/profile/A30EY9HRJ2X
K0X+GAVRIELAH+amazon&hl=en&ct=clnk&cd=1&gl=us

There was also a wedding registry which refuted his "I have so many
friends" claim, but he has removed that from the net.

And Mark why are you Xposting to the CB group?
>
>
> > Neverthelesss, why are you trying to engage me in conversation?

You can't expose someone with your unproven lies and accusations. You have yet to provide one iota of evidence to support your claims, so until that day comes, you are nothing more than a liar and a poor one at that.

He did Beavis and Butthead before that. His name is Mike Judge. He
used to play bass for Anson Funderberg [sic]

Legally, nobody is KB9RQZ, those particular letters and numbers have
zero meaning on the internet. And yes I made a point that it took you
over a year to admit that you lost the domain by your own doing. If
you had admitted right off I would have released it back to you
sooner, but your apparent lunacy prevented that.

I don't need to change, I need you to leave me to hell alone,
something that you can't seem to handle.

And show me where I have controlled you or your writing? I have the
right to disagree and state I don't like your comments or you
commenting to the threads I start. but I have never controlled you.
Get a Life

Get over the past

Move on on your own if you can, or go to counseling. Get over it.

What, so you are taking credit for the conspiracy? Quite true it is the
work of the devil. But he can only revel in his own tortured mind. Can
never build anything only destroy.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 894
BID: $OPDX.894
February 2, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, ARRL Web Page K1XN & GoList, NC1L, NJ1Q, NG3K, N4AA & QRZ DX, K5XK, K6EID, WB6RSE, AF8C, N7WO, K8YSE, NE8Z, KB9LIE, DX-IS News Site, Pete's-DX-Newsdesk, 4L5O, DK8JB, DL7MAE & The DX News Letter, EA4ATI, F5NQL & UFT, F6AJA & Les Nouvelles DX, GW0ANA, HP1AC, I1JQJ/IK1ADH & 425 DX News, IK7JWX, PA4JJ, PA5BW, RSGB IOTA Web Site, VA3RJ & ICPO, VK2IA and ZL2AL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th/January, through Sunday, 1st/February there were 221 countries active. Countries available: 3A, 3B6, 3B8, 3DA, 3V, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FT5W, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TN, TR, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VP2E, VP2V, VP5, VP6, VP8, VP8/g, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B7, ST. BRANDON ISLAND (Update). Ron, K5XK, updates OPDX that Rachid, 3B8FQ, has license in-hand, and expects to activate St. Brandon Island (AF-015) for almost two weeks between Friday, January 30th and Thursday, February 12th. The callsign will be 3B7FQ. This will primarily be a working trip for maintenance on the meteorological station on St. Brandon,

with on-air operations as time allows. Rachid expects that the 30/20/17 meter bands to be the most productive but will try all bands, 80-10 meters. Rachid will use CW and SSB. On CW, look for Rachid near the bottom of the band, "on the 8's" such as 10108, 14008, and 18078 kHz. He will be using only 100 watts and a G5RV antenna. He also plans to be active later in the year as 3B9FQ (from Rodriguez Island) while on holiday in July. QSL 3B7FQ, 3B8FQ, 3B6FQ and 3B9FQ via K5XK per instructions on QRZ.com.

5H, TANZANIA (IOTA Op). Just a reminder that Sigi/DL7DF and his XYL Sabine will be on holiday in Zanzibar (AF-032), February 3-13th. Look for Sigi to sign 5H1DF and be active on 160-10 meters using CW, SSB, RTTY and SSTV as often as possible. His equipment consists of a trans-ceiver, a linear TY900, a 18m Lowband Vertical, a Vertical R7, as well as a laptop computer. QSL via DL7DF, by the German QSL Bureau (DARC) or direct to: Sigi Presch, Wilhelmsmuehlenweg 123, D-12621 Berlin, Germany. For updates and more details, visit: http://www.dl7df.com/5h/index.html

ANTARCTIC ACTIVITY WEEK NEWS.....
PLEASE REMEMBER - Stations that are active and signing "/ANT" may NOT be in the Antarctic!

Just a reminder that the Worldwide Antarctic Program's (WAP) 6th Antarctic Activity Week (AAW) will take place between 0000z, February 16th and 2400z, February 22nd. For details, see: http://www.waponline.it This year's WAP AAW event is in collaboration with Italian Air Force, the National Antarctic Museum (MNA-Genova) and the Italian Ham Radio Association: ARI Mondovi, ARI-Genova and ARI Massa-Carrara. The AAW is an unique world-wide event where Hams are "celebrating and working to improve Worldwide interest around the Antarctic Continent and its related matters, to understand and share what the Nations and Organizations are doing to study and protect this still non contaminated corner of the world and share from there, a message of peace." Gianni, I1HYW, states (edited), "A number of operators (see list below) will be activating radio stations from at least 13 countries world-wide. The aim of AAW (also next March 1st, will see the end of the International Polar Year), is precisely that of gathering international scientific activities and the Ham's AAW, with particular reference to logistic and weather-related aspects, developed jointly with the major world-wide scientific organ-izations and international scientific community in a climate of mutual practical data sharing, with respect of the economic forces and logistic elements vital to the continuation of scientific research in a corner of the world which harbors the very secret of our existence."
The AAW is celebrated every year during the last week of February, and it also coincides with Argentine's celebration of their Antarctica Day (see http://www.marambio.aq) on February 22nd. As of print time, the following stations are expected to be active during the AAW event:
WAP-002 IR1ANT via I1HYW WAP-128 DA0ANT via DC2SF
WAP-025 II5ANT via IZ5BTC WAP-130 IR2WAP via IK2FIQ
WAP-030 II2ANT via I2JJR WAP-148 VA3AAO via VE3XN

WAP-126 OE3AGA/AAW via OE3AGA

For an updated list, please visit the WAP Web page at:
http://www.waponline.it/Default.aspx?tabid=113

* Phil, K6EID, from Marietta, Georgia, informs OPDX that he will be signing K4A for the AAW. He wants to remind everyone that in the past many of the AAW operators append "/ANT" to their callsign for AAW. He has refused to do that because Russian hams have used "/ANT" while they were in Antarctica, and he doesn't want to mislead anyone. It is possible that many of the newbie hams can be fooled by this, thinking they are working Antarctica. So, please remember that during the AAW there will be a lots of stations with zany callsigns operating, and some will inevitably append "/ANT." They are not in the Antarctica, they are in the home country indicated by the prefix. There are no current Antarctic stations signing "/ANT". Most of these special event station callsigns will issue a special QSL, but they are not the Antarctica!

C2, NAURU. Dani, EA4ATI, who is now active as 9M2TI from Malaysia, informs OPDX that he is preparing for a DXpedition (with a team of operators) to activate Nauru in the Pacific sometime in May. The callsign will be C21TI. Travelling through Australia to get to Nauru, tentative dates will be either from May 3-17th (after the cyclone season) or May 16-30th. Dani states, "I am preparing the logistics with a friend from Nauru that I met in Malaysia during a ITU workshop last November, but we will probably stay in the Od'N Aiwo Hotel." This is the same location that previous DXpeditions to Nauru have used (such as C21BH, C21SX, C21XF, etc). The composition of the team is not finished yet, but Dani is looking for CW, SSB and RTTY operators. Ruben, C21RK, was mentioned as part of the team. Activity will be on all HF bands including 60m and 6m. The suggested frequencies mentioned (as of now) are:
CW - 1825.5, 3505, 7005, 10110, 14025, 18075, 21025, 24895 and 28025
SSB - 1825.5, 3799, 5371.5, 7065, 14195, 18145, 21295, 24945 and 28495 kHz

6m - 50.115 MHz (CW/SSB)
They currently have two transceivers with HF amplifiers and will use a yagi beam antenna for 20/15/10 meters and several dipole antennas (ed. they are looking for additional antennas). Dani mentions that they will have a satphone for data connection. QSL will be via EA4ATI. A Web page has been created for the DXpedition (still not finished) at: http://c21ti.madrono.net/index.php?newlang=3Denglish
A study of propagation with a proposed band plan for the DXpedition will be posted on their Web page. This study will be done by the Technical University of Malaysia. They have not yet estimated a QSO target, but it will not be less than 20,000. The estimated budget for their DXpedition is 14,500 USDs and the team is looking for funding as well as more operators. If interested in helping, see details on the Web page. ADDED NOTE: You may know Dani, EA4ATI/9M2TI, from the following operations: XT2ATI, XT2TI, HP2PL, Z39A, 6W1EA, 6W1/EA4ATI, HP1/EA4ATI, HI5/EA4ATI, HI3CCP, HI3C, 3XY9B, etc.....

C6, BAHAMAS. Operators Bob/N4BP (C6AKQ) and Kevin/K4PG (C6APG) will once again be active between February 18-22nd. Look for them to be active on 30/17/12 meter bands between antenna jobs. Bob and Kevin currently plan on operating 160 meters and either 40 or 80 meters in the ARRL DX CW Contest (February 21-22nd). Kevin states, "There is no third person with us this year. Not too late! Please look for us; we need the work! Thanks." QSL to their home callsigns, direct or by the Bureau.

C6, BAHAMAS. Operators Mark/NA6M, Renee/N5RNA, Craig/W5TSN, Scott/K2CK and Pete/K9OWQ will be active as C6AMS from New Providence (Nassau, NA-001, WLOTA LH-1115), June 1-14th. Activity will be on 160-10 meters using CW, SSB and digital modes. QSL via NA6M, direct only. Updates and more information can be found at: http://www.c6ams.com

EA8, CANARY ISLANDS. Simon, M0VKY, will be active as EA8/homecall from Lanzarote Island (AF-004, DIE S-007, WLOTA LH-0099) between March 31st and April 5th. Activity will be on 40/20/15 meters using a FT-857D and 1/2 wave dipoles. QSL via his home callsign, direct or by the bureau.

ES, ESTONIA. Operators Juri/ES5GP, Toomas/ES5RY and Vilnis/YL2KF will be active as ES5Q during the CQWW WPX RTTY Contest (February 14-15th) as a Multi-Single entry. QSL via ES5RY.

FP, ST. PIERRE AND MIQUELON (NA-032). Operators Paul/K9OT and Peg/KB9LIE plan on operating from Miquelon Island as FP/homecalls, July 10-18th. They will also participate in the IARU HF World Championship Contest (July 12-13th). Activity outside of the contest will be on 160-6 meters using CW and SSB. Paul/K9OT prefers CW on 30 meters and down, while Peg/KB9LIE likes SSB, especially on 17, 20 and 40 meters. Location will be Room 5 at Motel de Miquelon (formerly Maxotel). QSL direct with return postage; bureau and LoTW okay. No eQSL. Their Web site is at: http://hamradio.pnpfarms.com

FT5W, CROZET ISLAND (Update). Reports indicate that Florentin, F4DYW, was heard as FT5WO this past Sunday, on 14222 kHz between 1445-1640z.

Signal reports were very weak. Remember, he will stay there until the end of November 2009, and will return back home in early 2010. QSL via F4DYW, direct or by the bureau after he returns back home. Look for updates on: http://f4dyw.free.fr/index.php?langue=fr&contenu=ft5wo.html

FT5W & FT5X, CROZET AND KERGUELEN ISLANDS. Gildas, TU5KG, is once again sailing in the Southern Indian Ocean on a fishing boat. As he sails around the Crozet region between now and March 7th, there is a possibility that he may land on Crozet and operate as FT5WP. Also, beware that Gildas is expected to sail around the Kerguelen region between March 10th and April 15th. Again, he may be active from Port aux Francais possibly on March 7th. A stop on Kerguelen at the beginning of March is necessary before the return trip. PLEASE pay attention to his callsign. He may be signing as maritime mobile "/mm". QSL via F4EFI, by the REF Bureau 29 or direct.

FW, WALLIS & FUTUNA ISLANDS (Update). Eli, HA9RE, and a team of operators are now active from Wallis Island as FW5RE until about the end of February. Activity will be on 160-10 meters, including 30/17/12 meters, using CW, SSB and RTTY. Two stations will be on the air. The group has been very active on the lower bands. QSL Manager is HA8IB. A Web page is up and running now with updates, pictures and a log search at: http://www.ha0du.com/index.php

GD8/GT4/GT6, ISLE OF MAN. Members of Barry Amateur Radio Society (BARS) from South Wales will be going on a expedition to the Isle of Man from Saturday, March 28th to Saturday, April 4th. The team will consist of Glyn/GW0ANA, Curtis/MW0USK, Franz/DJ9ZB, Jan/DJ8NK, Thomas/DJ6OI, Alois/ DL8RBL and Yasu (a JA DX operator), Lois/MW3LOI (YL) and their wives & partners. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. The 6 meter band will be monitored for openings. The callsign to be used during the CQ WPX SSB Contest (March 28-29th) will be GD8K. The callsign OUTSIDE of contest will be GT4BRS (Please note the GT prefix is special callsign for the Isle of Man. GW0ANA states, "Remember TT Races on IOM".) The callsign for the DATA Modes (RTTY, PSK31) will be GT6BRS. All QSL cards are via the QSL Manager GW0ANA, by the Bureau or direct. For direct cards only use one IRC or 2 USDs.

H40, TEMOTU PROVINCE. Operators Siegfried/DK9FN, Bernhard/DL2GAC/H44MS and Herrmann/DL2NUD will be active (possibly as H40FN, H40MS and H40??) between March 2-16th. Activity will be on 160-10 meters and 2m EME. Look for Siegfried/DK9FN to operate only CW, Bernhard/DL2GAC on SSB and Herrmann/DL2NUD on 2m EME. QSL Manager for H40FN is via HA8FW (Siegfried states that all QSOs will be confirmed automatically via the MRASZ QSL Bureau by QSL card when he returns home). QSL the other callsigns via their home callsign. For more info, pictures of DK9FN's last operation from Temotu and possibly updates, visit DK9FN's Web page at: http://hari-ham.com/h40fn

H81, PANAMA (Lighthouse Activity). Members of the Radio Club of Panama (HP1RCP) and Panama Canal Amateur Radio Association (PCARA) will be activating Miraflores Lock's Lighthouse (PAN-030) in the Panama Canal using the special callsign H81L between February 14-15th. Activity will

be on all bands and modes. QSL via HP1RCP. Visit the following Web page to see a picture of the lighthouse at: http://www.geocities.com/canallights2000/miraflorespics.html

HC, ECUADOR. Dr. Rick, NE8Z, tells OPDX that he will once again be heading south to Ecuador and plans to be active with the following callsigns from various locations as follows:
HC1MD/HC4 - February 20-27th; QTHs: Same & Tonsupa, Esmeraldas Province (Pacific beach homes)
HC1MD - February 28th-March 8th; QTH: Tumbaco, Pichincha Province
Activity will be on 160-10 meters using CW and SSB. QSL via K8LJG: John Kroll, 3528 Craig Drive, Flint, MI 48506 USA. Rick suggests to view the the HC/Ecuador and HC8/Galapagos DX-Diplomas on the following Web page at: http://webpages.charter.net/ne8z

HI, DOMINICAN REPUBLIC. Operators Edwin/HI3K, Tino/HI3CCP and Andy/VE9DX will be active in the ARRL DX SSB Contest as HI3K (March 7-8th) from Lomas del Toro in Santiago (Lomadeltoro Contest Team's HI3CCP station): http://www.lomadeltoro.com

IOTA NEWS.....
AF-019. (REAL EARLY ANNOUNCEMENT) Operator Luigi, IK8HCG, will be active as IG9R from Lampedusa Island, African Italy, during the next CQWW DX SSB Contest (October 24-25th). QSL via IK8HCG.

AS-115. Rene, DL2JRM, will be active as TA0/DL2JRM/p from Kekova Island, Turkey, February 23-25th. Activity will be on 40-10 meters CW. QSL via his home callsign, direct or by the bureau.

EU-029. Ben, DO1BEN, will be active as OZ/homecall from Lolland Island (DIA SJ-015), April 9-17th. Activity will be on all HF bands using SSB and sometimes digital modes. Location is 5 meters from the Baltic Sea. QSL via his home callsign, by the bureau or direct.

EU-146. Rene, DL2JRM, will be active as PA/DL2JRM/p from Schouwen Duiveland, February 14-15th. Activity will be on 80-10 meters CW. QSL via his home callsign, direct or by the bureau.

NA-102. Iiario, IV3CGJ, will be active as FB/IV3CGJ/p from Marie Galante Island (DIFO FG-008, WLOTA LH-4241), Guadeloupe, February 13-24th. Activity will be holiday-style on 80-10 meters. QSL via his home callsign, direct or by the bureau.

J7, DOMINICA. John, K3TEJ, will active from here between February 11-27th. Activity will be on CW and RTTY with a focus on 160/30/17/12 meters. He will also be in the CQWW WPX RTTY Contest (February 14-15th) and the ARRL DX CW Contest (February 21-22nd) as Single-Op/All-Band entries signing J7N for both contests. QSL via K3TEJ.

JD1/M, MINAMI TORISHIMA (OC-073). Operators Masa/JA6GXK (JD1BMM) and Kingo/JK1PCN (JD1BND) are now active until February 9th. Activity will be limited because they are on a business trip to the island, so they

will be active during their little spare time. Over the past week Masa was on 160/80/40 meters. QSL JD1BMM by the JARL Bureau or direct to: Masafumi Ishihara, 2-305 Loran, 2-5-35 Miyazaki, Chuo-ku, Chiba, 260-0806 Japan). QSL JD1BND by the bureau to JD1BND.

KH4, MIDWAY ISLAND (Amateur Radio Operations to Begin Again). The ARRL Web page reports, "The U.S. Fish and Wildlife Service (USFWS) announced on Monday, January 26th, that they would once again allow Amateur Radio operators the opportunity to operate from Midway Atoll. This is the first time that USFWS has allowed amateurs to operate from the wildlife refuge since 2002. The USFWS started a program earlier this month to encourage visitors to experience Midway's wildlife, history and culture, as well as non-wildlife-dependent activities -- including Amateur Radio. To ensure the safety of the wildlife on the Refuge, the USFWS said that Amateur Radio operations will be permitted for two weeks only, from October 5-19th, 2009. 'Radio operation will be allowed only within a designated area on the north side of Sand Island and the use of portable generators will not be permitted,' said Midway Atoll Refuge Manager Matt D. Brown. 'There is 120 V power available at the operation site. Any modifications to the island power grid/infrastructure must be approved in advance and be paid for entirely by the radio operators.' All participants will be required to attend a refuge orientation shortly after arrival that is designed to enhance visitor safety, wildlife protection and overall enjoyment of the wildlife refuge." To read the complete press release, go to: http://www.arrl.org/news/stories/2009/01/27/10596/

NAQCC PRESS RELEASE (Preserve and Encourage CW Activity in 2009!!).
New Years 2009 may have come and gone, but it's never too late to resolve to help preserve and encourage CW activity across our amateur bands. To celebrate the new year, come and join the NAQCC (North American QRP CW Club), a club for any and ALL CW enthusiasts around the world.
Our members include "Big Gun" contesters, hard-core QRPers, experimenters, ragchewers and SWLers; young and old alike. As different as we may be, we all share one thing in common, and that is our love for CW.
We welcome all who want to help support CW and have at least some interest in using QRP from time-to-time. Our club runs monthly sprints and challenges. Plus we sponsor some additional special on-air activities during the year.
Membership is FREE and once you join you're automatically a lifetime member! So sign up today and help us keep CW alive and well.
Visit our web site at http://www.usatek.net/~yoel/. You'll find info on all of our various activities plus an online membership application.
We look forward to your support and hope to soon see your call added to our membership roster.... 73, Paul/KD2MX, NAQCC Membership Recruiter
On behalf of: Tom, WY3H - NAQCC President
John, K3WWP - NAQCC Vice President
Larry, W2LJ - NAQCC Asst. Publicity Director
Dave, VA3RJ/VE3JDR - NAQCC Publicity Officer

PJ2, NETHERLANDS ANTILLES. Jan, PA4JJ, informs OPDX that he will be on a short holiday trip to the Island of Curacao (SA-006, WLOTA LH-0942) and will be active as PJ2/PA4JJ. He will leave Amsterdam on March 30th and expects to be on the island until April 11th. Jan states that he will be the only ham in a party of 4, so he will try to be active as much as he can. Activity will be on all ham bands with a focus on 30/17/12 meters and the DIGI modes (RTTY and/or PSK31). QSL cards are direct to PA4JJ. If Jan has access to the Internet, he will provide an online log on his Web site (or as soon as possible after his return home) at: http://www.pa4jj.nl/html/pj2_pa4jj.html

PJ2, NETHERLANDS ANTILLES (Update - Referendum on Curacao). Hans Timmerman, PB2T, President of the European DX Foundation (EUDXF), reported on the EUDXF Web page on Friday, January 30th: "Where I had the impression that Curacao had a clear position on its future political status it appears that another referendum will be necessary to decide on the future of this island. On Curacao a committee has been installed that will lead a referendum that addresses the planned political change. On February 2nd, 2009, at the latest, this committee will propose the date for the referendum and it will propose the exact question for the referendum. A final decision will be taken by the local government of the island. In the meantime the chairman of the committee stepped down because he appeared to be too controversial. To be continued...."

QSL INFO AND NEWS.....
LOTW REACHES 200 MILLION QSOS! "The ARRL Letter" reports that on January 16th, the "Logbook of The World" (LoTW) hit the 200 million mark during the upload of four years' worth of logs (about 25k QSOs), by Vic Kean Jr., K1LT, of Carroll, Ohio. To celebrate Kean's submission of the 200 millionth QSO, the ARRL has awarded him lifetime free LoTW credits and free ARRL Awards as he qualifies for them. Read the complete press release at: http://www.arrl.org/news/stories/2009/01/22/10576/?nc=1

LOGBOOK OF THE WORLD NOW EASIER THAN Ever! Bill Moore, NC1L, ARRL Awards Manager, reports: "In order to better accommodate new users as well as existing account holders, ARRL's Logbook of The World (LoTW) has been updated. According to ARRL Membership and Volunteer Programs Assistant Manager Norm Fusaro, W3IZ, these improvements were made based on tracking Manager LoTW help questions and listening to users. 'Through the efforts of Membership and Volunteer Services Dave Patton and Information Technology Manager Jon Bloom, we have also added an automated results table on the LoTW Users Home Page that lists members in numeric order who have achieved the Triple Play Award,' said ARRL Chief Operating Officer Harold Kramer, WJ1B. 'IT personnel have also fixed a number of long standing issues with Logbook in recent weeks, and some additional enhancements are underway.'
Some things that have been added:
* An LoTW User's Corner that includes quick links to log onto your account, save or renew a certificate and ways to address PC failure.

* The GET STARTED section <http://www.arrl.org/lotw/start.html> has been simplified with links for each of the four steps in the

certificate process.

* LoTW instructions are now available in nine languages: English,
Dutch, French, German, Italian, Russian, Slovenian and Spanish.
Options to select a language have always been available, but they
have now been moved up front to the GET STARTED page. The languages
are identified with icons of flags to represent each language.

* The GET STARTED pdf file has been updated to include new screenshots
and refinement of some of the processes.

* The software download section now consists of only three icons
representing the three operating systems for which software is
available: Windows, Mac and Linux. The user simply selects their
operating system and they are redirected to the download specific
to their system.

* A new link has been added for QSL Manager, Club Calls and DX-
peditions. This link gives details on establishing an account for
these special operations and includes a section for 1×1 call signs.

* A new PowerPoint overview is available from the LoTW site. This
presentation has also been added to our multimedia library.
<http://arrl.org/multimedia>
The program is an overview of LoTW and what users can expect from
the service. There are screenshots of LoTW pages, as well as a
condensed version of the certificate and award application process.

With more than 200 million QSOs submitted, ARRL's Logbook of The World
system is a repository of log records submitted by users from around the
world. When both participants in a QSO submit matching QSO records to
LoTW, the result is a QSL that can be used for ARRL award credit. Yaesu
is the principal sponsor of the LoTW Web site."

NOT THE QSL MANAGER. Alfredo, IK7JWX, reports that he is NOT the QSL
Manager for ZA1KP. QSL ZA1KP only direct to: Miftar Fana, Klub Partizani,
P.O.BOX 1439, TIRANA, Albania.

QSL MANAGER NEEDED. Omar, 4L5O, from Tbilisi, informs OPDX that he is
looking for or is in need of a QSL Manager in the USA. If interested
in being his QSL Manager, please contact him at:
4L@caucasus.net -or- OMARI@rustavi2.com

SILENT KEY. It was reported by Ben, PA5BW, that Solofo Randrenjason, 5R8ET, became a "Silent Key" (SK) unexpectedly in the hospital on January 19th, "during a more or less routine surgery". Ben states, "Solofo was my colleague and later even my 'second man' at the Radio Netherlands shortwave station in Talata Volonondry in Madagascar, where I worked there back in 1993-1995. Together we started the Madagascar Amateur Radio Association in 1995. His keen interest in radio and shortwave lead to his amateur radio license in 1994, using a simple transceiver borrowed from visiting Japanese hams and a homebrew dipole antenna. Solofo was the first local ham to obtain an amateur radio license. All licensees before that were foreigners that traded in their foreign calls for a local ham radio permit. Several other local hams were to follow him which led to the first ever 5R8 Ham Dinner in Antananarivo in 1995, counting nine (!) 5R8 hams on 10 square meters. The highest 5R8-concentration ever. I remember Solofo as a very friendly and kind man, a real friend (and a very loyal one) and a committed amateur radio DXer. For me it is very hard to understand that I will never meet him again. The world will be a little bit colder without him. Our hearts go out to those that are left behind: his family, his colleagues at the radio station, his fellow radio amateurs."

TOP BAND DINNER ANNOUNCEMENT. Steve, WB6RSE, reports: "Registration for the Top Band Dinner at the 2009 Visalia International DX Convention is now open. First come, first served." The dinner will be held Friday, April 17th, at the Holiday Inn Visalia - Birch Room (6:30 PM No-host Bar, 7:15 PM BBQ Buffet Dinner). The program will be "Top Band from KP5, Desecheo, February 2009" by Glenn Johnson, W0GJ, Co-leader, Desecheo DXpedition. Door Prizes! Thanks to these fine organizations for their generous donations: ARRL, NCDXF, Idiom Press, CQ, QRZ-DX, Yaesu, Water-proof Log Books, The Daily DX, Photoqsls.com .... AND ..... from Array Solutions - their new Beverage transformer system: http://www.arraysolutions.com/Products/singlewirebeverage.htm#top%20of%20page
Dinner will be "Miner 49er BBQ Buffet" (COST IS 36 USDs/per person - includes, all taxes, gratuity, and room charges AND Door Prize eligibil-ity). TO REGISTER: Send an E-mail to Steve, WB6RSE, to check on availa-bility and indicate the number of registrations you want. Send an E-mail to: wb6rse1@mac.com
You will receive a return E-mail with additional information and registra-tion details. Last year's event was a sellout. Advanced registration is absolutely required. Registration at the door will be very limited IF any! REGISTER EARLY!

TOP TEN MOST WANTED. Jean-Michel, F6AJA, informs OPDX that the Les Nouvelles DX Web page has an interesting listing of the QSL cards of past operations from the entities mentioned in "The DX Magazine's" -- "2008 MOST WANTED SURVEY". QSL cards of the "Top Ten Most Wanted" can be viewed

at: http://www.lesnouvellesdx.fr/galerie/galerie.php?page=listtopten
You will find more than 300 cards for the "Top Ten" entities for the last 5 years (2004 to 2008). If you don't speak French, you can use the automatic translator (see on the left side of the page).

V3, BELIZE. The "two contests in two weeks team" is at it again. As part of their "Adventure Before Dementia" program they are returning to Belize, this time with two other operators to help share the insanity. Phil Yasson, AB7RW/V31RW, and his XYL Barbara, AC7UH/V31UH, will join Rick, KT7G/V31TB, and Jake, N7WO/V31WO. The group will be active from February 10th to 24th. During the CQWW WPX RTTY Contest (February 14-15th) they will use V31TB (QSL via KT7G) and for the ARRL International DX CW Contest (February 21-22nd) they will use V31WO (QSL via N7WO). Outside the contests, QSL via the operator's instructions. Activity is planned for 160-15 meters including WARC bands.

VK9C, COCOS-KEELING ISLAND (OC-003). Bernd, VK2IA, will once again be active as VK9AA between March 14-27th. Activity will be on 160-10 meters using CW and SSB. QSL via DL8YR (QRZ.com).

YN2/H7, NICARAGUA. Andrei, NP3D, will be active as H7/NP3D and YN2/EW1AR between February 11-15th. Activity will include the CQ WW RTTY WPX Contest (February 14-15th) and he will sign YN2S for the contest. QSL direct to NP3D. QSLs are also "OK" via W3HNK and RW6HS.

YN, NICARAGUA. Eric, K9GY, will be active possibly as YN2/K9GY from Octavio's, YN2N, QTH in Grenada, during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign, direct or by the bureau.

YW0, AVES ISLAND (Update). The 4M5DX Group will once again activate Aves Island (NA-020) in March for one week. A team of more than 15 operators (team almost complete) will be active on 160-6 meters using CW, SSB and RTTY. The logistic support is ready (transportation will be made by the Venezuelan Navy. QSL via IT9DAA, either direct, by the bureau or LoTW. The QSL Manager is authorized to receive any donation. For updates, visit the DXpedition's Web page at: http://yw0a.4m5dx.info

ZL7, CHATHAM ISLANDS (Update). Lee ZL2AL, informs OPDX that a team of 9 operators will be activating Chatham Island as ZL7T during March from the fabulous Chatham Fishing Lodge in the fishing village of Kaiangaroa on the far Northeastern tip of the island. The operators are: Lee/ZL2AL, Morrie/ZL2AAA, Lee/ZL2LE, John/ZL1BYZ, Mike/ZL2CC, Phil/ZL2RVW, Mark/ZL3AB, Wayne/ZL2WG and John/ZL1ALZ. The pilot station will be Duncan/ZL3JT. The four station setup will operate 160-10 meters, using CW, SSB, RTTY and the PSK modes. Operations will be on between March 6-11th. Donations would be appreciated. The ZL7T Web site is available at: http://www.zl7t.com
A logsearch will be available on the team's return. Logs will be uploaded to LoTW within 6 months. QSL via ZL2AL, by the Bureau or direct (CBA or QRZ.com).

ZP6, PARAGUAY (Possibly CX). Witek/SP9MRO and XYL Danuta/SP9SX will be here between February 21st and March 3rd. Activity will be holiday style (mainly on the weekends and local night hours) with operations on CW, SSB and RTTY using the callsign ZP6/SP9MRO. They also plan to go to Uruguay (CX) between March 4-14th.

ZS8, MARION ISLANDS. Very few QSN reports on Petrus, ZS8T, this past week. BEWARE OF PIRATE ACTIVITY! However, the very first portion of QSOs logged by Petrus (as of January 25th) are now available at:
http://zs8t.net/online-logsearch/
Also available are sound clips of Petrus on the Web page listed below. For updates and official announcements of the ZS8T operation, please visit the Web site at: http://zs8t.net

1406. OT: Does HDTV require a new transmitter final?

Newsgroup: rec.radio.amateur.misc
Date: 2009-02-02 19:19:37 UTC
From: Wayne <nospam@invalid.com>
Message-ID: <20090202-191937.949.0@Wayne.news.motzarella.org>
Source record: 7219

OT I know, but some of you guys will know...

Does the conversion to HDTV require a new transmitter final amp at the TV station?

I know some frequencies are changing, and all the low level is changing drastically, and no FM audio, and changeover surely cannot be done overnight with flip of a switch at 12:01 AM, and they are running both services now (typically low power HD) - but otherwise, does the station have to buy new a new transmitter final when the day comes?

Both HD and SD are "some form" of SSB, so probably a class B final. Duty cycle surely varies, but the final amp should not care what the signal is, right? Is it possible to simply switch the feed from the low power HD to the old high power SD transmitter, and go with it? Or is a new purchase required?

Can anyone add details about this? Is a new transmitter final amp actually required for HDTV? I assume the coax feed and tower antenna can be the same, on same frequency.

>>>>circuits would probably fix it, but there is not alot of space inside
>>>>the amp to work with.
>>>
>>>
>>>The reason for this problem is obvious -- the output impedance of the
>>>amp is not even close to 50 ohms. It's that simple.
>>>
>>
>>Actually the other guys were correct. I ran an experiment using a
>>Barker and Williamson low pass filter with a 32 MHz cutoff.
>>
>>With the set-up below the SWR went high when the amp was turned on.
>>
>>RADIO===>AMP===>SWR METER====>ANTENNA
>>
>>With the set-up below the SWR stayed at 1.1:1 with and without the amp
>>on.
>>
>>RADIO===>AMP===>LOW PASS FILTER===>SWR METER===>ANTENNA
>>

>>Also the output of the amp showed about 110 watts without the low pass
>>filter installed, but with the low pass filter installed and the watt
>>meter connected after the low pass filter the output showed about 75
>>watts. That means about 30 watts was being transmitted above 30 MHz
>>even through the fundamental was at 28 MHz.
>>
>>I doubled the value of the capacitors going form the transistor
>>collector to ground, and the SWR dropped to 1.5:1 with the amp on and
>>1.1:1 with the amp off. Then I add 470 pf capacitors from the
>>transistor base to ground and the SWR with the amp dropped to 1.3:1
>>with the amp on.
>>
>>Re-inserting the low pass filter in between the amp and the SWR meter
>>showed 1.1:1 with and without the amp on, so some harminoc content was
>>still be transmitted but to a lesser extent.
>>
>>A lack of working space inside the amp case made it difficult to
>>install a pi-network on the input and output side of the transistor
>>finals.
>>
>>RESOLUTION: The SWR increased was caused by harmonics above the
>>fundamental frequency, and they were outside the bandwidth of the
>>antenna.
>>
>>Lessons learned....
>>
>>1) Just because your amp shows 100 watts output does not mean that 100
>>watts is being transmitted on the frequency you are on. It may be
>>less, and if the amp is poorly designed it could be alot less.
>>
>>2) If your SWR goes up when you turn an amp on it could be because
>>your amp has increased the harmonic output of your transmitted in a
>>non-linear fashion.
>>
>>3) If installing a low pass filter between your amp and the watt meter
>>causes the wattage displayed on the watt meter to drop it is probably
>>because you amp is wasting power on frequencies far above your main
>>fundamental frequency.
>>
>>
>>4) If you go to the trouble of re-designing the Palomar Elite 300 amp
>>and clean up all the dirty output your real output power on the
>>frequency you are listening to will only be about 70 watts RMS tops,
>>and even then you are over driving the amp.
>>
>>..and lastly...
>>
>>The Palomar Elite 300 is a poorly designed piece of crap. Don't buy
>>one.

What is "oyuo" "noting" "cognat" and "cancled"? It would be nice if
you could actually write something that came somewhere close to making
sense.

Hey, even cheap hams can afford dictionaries now.
They are available on the web at no charge.
Also many programs have a spell checker......

Debbie

I had forgotten to post this, but I DID get my Freedom of Information Act request...82+ pages from the Federal Communication Commission (FCC)

So far, the ONLY evidence the FCC had, which isn't really evidence is comments made on the internet. The FCC DID NOT as I predicted do a field strength measurement of the station, thus the FCC does not have shit. I am further pushing with my lawyer to have BOTH warning letters tossed out, based on lack of REAL evidence.

Shall I post the CB transmissions of the black erson on CB here?

Definitely not better etiquette.

Unlwss he is a white cber posing as a black cber.

He claims to be black.

Of course it's not wheter the person is white,black, or anything else.

There are cb idiots of all colors.

And some ham idiots of all colors.

I didn't really think 2 meters is starting to sound like CB as others
claimed.

However, it turns out that I just wasn't listening enough.

For the first time I can ever remember in decades of listening, the
other night I heard two hams giving each other smokey reports on 2
meters.

It's not because of the elimination of cw testing.

Hams giving each other smokey reports is what you get when you tell certain people to get a ham license instead of illegally operating on the freeband.

Actually, I don't know if the hams giving each other smokey reports
ever operated illegally or not. They might have always operated
legally. And I don't really care if hams give each other smokey
reports or not.

However, I do think it's kind of dumb to give and ask for smokey
reports on 2 meters when the majority of 2 meter ham operators seem to
be
either involved in some kind of law enforcement or actually are law
enforcement officers also.
I
t's sort of like the old song "CB Savage".

Actually, I don't know if the hams giving each other smokey reports ever operated illegally or not. They might have always operated legally. And I don't really care if hams give each other smokey reports or not.

However, I do think it's kind of dumb to give and ask for smokey reports on 2 meters when the majority of 2 meter ham operators seem to be
either involved in some kind of law enforcement or actually are law enforcement officers also.
I
t's sort of like the old song "CB Savage".

The blame lies with ARRL and flaky VEs that hang out at Radio Shack and truck stops and either entice or club and Shanghi kids and CBrs with the idea that if you give them a ham license they will instantly be hams. Without even having to unlearn bad habits and learn new ones. The end result is you wind up with anarchist infiltrators with a license to hate hams.

As if you could elect Bevis and Butthead for President and they will instantly grow up when they hear the morning briefing.

The FCC claims that it could use material that came off the internet
stems from a case back in 1947, this however was later overturned by
the FCC and the Federal Courts.

SB DX @ WW < KB8NW $OPDX.894.1
Ohio/Penn DX Special Bulletin No. 894.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 894.1
BID: $OPDX.894.1
February 6, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K4UEE and W0GJ for the following DX information.

The following press release was provided by Bob Allphin/K4UEE and Glenn Johnson/W0GJ.

Desecheo 2009 Press Release # 5
February 6, 2009

FOR IMMEDIATE RELEASE

Today several team members leave their homes and start their journey to Desecheo via Puerto Rico. The entire fifteen man team will assembled by Saturday evening in San Juan. Sunday morning will be devoted to the required UXO (unexploded ordnance) training and afterward the team will travel to Rincon, Puerto Rico, the closest landfall to Desecheo. The Lazy Parrot Hotel will be the team headquarters for the following 4 days.

All equipment and antennas that we shipped have arrived and are in storage. Most of our infrastructure supplies and equipment has been purchased locally is also in our storage facility.

The team will spend Monday through Wednesday completing team training, finalizing assignments, testing generators and pre-assembling antennas. The remaining shopping will also be completed.

The SUP (Special Use Permit) will be presented to us in a special ceremony scheduled for Monday night. With that in hand, we will finally be ready to activate the #6 most wanted DXCC entity from February 12th-26th. We hope to be QRV late in the day on the 12th, weather depending.

Visit the new K5D Store (the button is about 2/3 down on the Welcome page) on the our website: www.kp5.us There is a good selection of memorabilia including nice polo shirts, t-shirts, caps, mouse pads, and mugs.

Financial support is being sought and very welcome. The ﷺHow you can helpﷺ tab on the website makes it easy. For larger contributions; they can be made tax-deductible (consult your tax advisor) if directed through the Northern California DX Foundation. Details are found on our website.

CU in the pileups,
Bob Allphin, K4UEE
Glenn Johnson, W0GJ

WTF...The internet wasn't around in 1947! ??!?!?!?
They're we-todd-ed. But we already knew that.

1587. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.misc
Date: 2009-02-07 07:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1233990300@panix.com>
Source record: 7150
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.1 2007/09/29 18:42:47
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.
```

The FCC is was using a broad definition of it's Character
Qualification, However, just recently the new Special Council for
Amateur Radio Enforcement stated in an email that the FCC has no
jurisdiction over the internet, and anything that posted and written
has nothing to do with them.

Rec.radio.cb and rec.radio.antenna - the groups that you added - have
both been removed from the newsgroups list, scumbag.

Impersonating Dan Jeswald is of course the act of a bottom feeder, but
you're quite used to that role by now. There is nothing too low for
you, Crazy Man, because you need professional help in the worst way.

I hope you get that help soon, preferably in an institution.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 895
BID: $OPDX.895
February 9, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, K3CT, K3TEJ, NG3K, N4AA & QRZ DX, K6AM, K8YSE, N8OFS, KK9A, W9KNI, DX-IS News Site, Pete's-DX-Newsdesk, DJ7IK, DK8JB, DL7MAE & The DX News Letter, F5NQL & UFT, F8DVD, HA5BWW, I1JQJ/IK1ADH & 425 DX News, LU4DXU, OE1WHC, PA4JJ, PY2SEX, RSGB IOTA Web Site, SP5UAF and VA3RJ & ICPO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st/February, through Sunday, 8th/February there were 220 countries active. Countries available: 3A, 3B6, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, FT5W, FW, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V8, VE, VK, VP2E, VP2V, VP5, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8 & 3B9, MAURITIUS AND RODRIGUES ISLANDS. Polish operators Piotr/SP2JMR and Slavo/SP2JMB will be active as 3B9/homecalls from the Rodrigues Island (AF-017) between April 1-8th. After this operation they will then be active as 3B8/homecalls from Mauritius (AF-049) between April 9-17th. Activity is expected to be on all bands using CW and SSB.

3D2, FIJI (Also T2). Operators Bill/N7OU and Bob/W7YAQ are expected to be active this week as 3D2OU and 3D2NB, respectively, from Nadi, Viti Levu Island (OC-016, WLOTA LH-0055), between February 11-16th. Activity will be 160-10 meters, mainly CW but with some SSB and RTTY. QSL via their home callsign. They will leave Fiji and head to Tuvalu. Callsigns will be announced later, but they will be there between February 17th and March 2nd. Their activity on the island will include the ARRL DX CW Contest (February 21-22nd) as a Multi-Single entry.

4S, SRI LANKA (AS-003). Stavros, 5B4AFM, will be active as 4S7FMG between February 9-12th. Activity will be holiday style on 40 and 30 meters using only 100 watts into a vertical on CW and SSB. QSL via M0BBB.

6V,SENEGAL. Belgian operators Patrick/ON4HIL and Guido/ON4BAG will be active as 6V7P and 6V7O, respectively, between February 22-28th. Their QTH will be Le Calao about 70 km from Dakar. Activity will be on 160-6 meters using SSB and digital modes (RTTY, PSK31). Suggested frequencies are: SSB - 1844, 7090, 14245, 18160, 21295, 24985, 28475 and 50150 kHz
RTTY - 7040, 14085, 21085 and 28085 kHz
QSL via their home callsigns, by the bureau or direct (QRZ.com). They have a blog page at: http://www.bloggen.be/6v7o_6v7p

8Q, MALDIVES. Stavros, 5B4AFM, will be active as 8Q7FM from Lhaviyani Atoll (AS-013) between February 13-19th. Activity will be holiday style on 40 and 30 meters using only 100 watts into a vertical on CW and SSB. QSL via M0BBB.

ANTARCTIC ACTIVITY WEEK EVENT NEWS (February 16-22nd). In commemoration of the 6th Antarctic Activity week, Francois, F8DVD, will be using the special callsign TM8ICE between February 8-21st. The WAP reference number is 154. The activity will take place from his home QTH in Macon, the eastern part of France. A special color QSL card showing the TARA polar vessel will be issued. QSL via F8DVD, by the Bureau or direct to: Francois Bergez, 6, Rue Liberte, F-71000 MACON, FRANCE.

PLEASE REMEMBER - Stations that are active and signing "/ANT" may NOT be in the Antarctic!

C3, ANDORRA. Operators Finn/OV8FM and Martin/5P1M will be active as C3/OV8FM and C3/5P1M, respectively, between February 10-13th. Activity will be on 40 and 20 meters using SSB, SSTV, RTTY and PSK31. QSL via OV1A.

C6, BAHAMAS. Operators Frederick/K9VV, Henry/N6NC, Victor/WA0USA and Brian/KP2HC will be active as C6AKU from Freeport during the CQWW WPX CW Contest (May 30-31st) as a Multi-2 entry. QSL via K5WW or the LoTW.

CANADIAN SPECIAL EVENT CALLSIGNS. To celebrate 50th anniversary of the opening of the St. Lawrence Seaway, look for Canadian amateurs to use the following prefix between April 1st and May 31st:
XL -> VA XN -> VO
XM -> VE XO -> VY

CN, MOROCCO. Russell, G5XW, will once again be in CN-land between February 13-23rd. He will spend 4 days in Meknes then 6 days in the Middle Atlas

Mountains. This is another backpacking type holiday, but he plans to be active as CN2XW using only 100 watts into some sort of wire vertical/dipole. He may experience some sudden power outages. QSL via G5XW.

CT3/CT9, MADEIRA ISLANDS. A group of German operators will be active as CT9L during the ARRL DX CW Contest (February 21-22nd) as a Multi-2 entry. QSL via DJ6QT. Operators mentioned are: Walter/DJ6QT, Falk/DK7YY, Wolfgang/DK9VZ, Ulf/DL5AXX, Tom/DL5LYM and Frank/DL8WAA. Outside the contest, operators will probably sign CT3/homecall. QSL via their home callsigns. PLEASE NOTE: DJ6QT and DK7YY will be active between February 17th and March 10th. The rest of the team leaves February 24th.

CT3/CT9, MADEIRA ISLANDS. A group of German operators will be active as CT9L during the ARRL DX SSB Contest (March 7-8th) as a Multi-? entry. QSL via DJ6QT. Operators mentioned are: Adam/DJ0IF, Walter/DJ6QT and Falk/DK7YY. Outside the contest operators will probably sign CT3/homecall. QSL via their home callsigns.

D4, CAPE VERDE. A group of German operators from Bonn and Potsdam will be active from Sal Island (AF-086) between March 11-25th. Each operator will have their own callsign. Activity will be on 160-10 meters using CW, SSB, RTTY, PSK31, Hell, Amtor and SSTV. They plan to have 7 stations with 100 watts and vertical antennas. Operators mentioned (with their callsign) are: Helmut/DL3KBQ (D44TXQ), Holger/DL1COP (D44TXP), Jurgen/DJ2VO (D44TXO), Gerd/DG3KAF (D44TXF), Henry/DL2RSI (D44TXR), Peter/DH2KI (D44TXI) and Franz/DL3PS/HB9EHQ (D44TXS). QSL via their home callsign, except D44TXS via HB9EHQ.

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following operations are approved for DXCC credit:
A5100A - Bhutan; 2008 Operation
T6EE - Afghanistan; Additional documentation has been received to include 2006 and 2007 operations. If you had a QSO rejected for these dates, send a note to dxcc@arrl.org to be placed on the list for an update.
TT8HA - Chad; Operations for 2007 and 2008
TT8SK - Chad; Operations for 2008 and 2009
TN5SN - Republic Of The Congo; Current operation effective October 2008
ZA/F4DTO - Albania; 2008 Operation
ZA0/I0SNY - Albania; 2008 Operation
ZA0/I8LWK - Albania; 2008 Operation
ZA0/I8YGZ - Albania; 2008 Operation
ZA0/IK2AQZ - Albania; 2008 Operation
ZA0/IK7JWX - Albania; 2008 Operation

ADDED NOTE: The URL for the DXCC blog has changed. Please point your browser to this address, also, the site has been renamed Century Club Awards Web log to reflect all ARRL awards and certificate programs: http://www.arrl.org/blog/Century%20Club%20Awards

E44M WRAP-UP. The E44M team made 29170 QSOs (CW/10489, SSB/16856, RTTY/1790, PSK31/34 and SSTV/1). A short 4 minute video is now available on

their Web at: http://www.dxcoffee.com/e44m/

FR, REUNION ISLAND. Cedric, F4EGZ, will be active as FR/F4EGZ during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (40m)/ Low-Power entry. He will use a vertical antenna with only 100 watts.

FW, WALLIS & FUTUNA ISLANDS (Update). The Hungarian team of Eli/HA9RE, Laszlo/HA0NAR and Sara/HA9SDA, active as FW5RE, continue to please many low band operators on 160/80/40/30 meters. There has been some activity over the past weekend on 17 meters CW and 20 meters CW/RTTY. The team will be there until about the end of February. QSL Manager is HA8IB. A Web page is up and running now with updates, pictures and a log search at: http://www.ha0du.com/index.php

GB50, ENGLAND (Special Event). Operators Tim/G4STH and his XYL Hazel/G4YLO will be active as GB50BH between now and March 3rd. Their activity is to commemorate the 50th anniversary of the death of the singer Buddy Holly. Activity this past week has been on 80 meters SSB between 1700-1730z around 3777 kHz. QSL via G4STH, direct or by the bureau.

HA130, HUNGARY (Special Event). Members of a high school radio club called "Puskas Tivadar" (HA5KHC) in Budapest will activate HA130HALLO until March 31st. Activity is to celebrate the 130th anniversary of first appearance of the telephone in Hungary. Operations will be on all bands, mostly on CW, but some activity on SSB, PSK and RTTY. QSL via HA5KHC, by the bureau. No e-QSL please. Listen for details on how to receive a special HA130HALLO memorial diploma.

IOTA NEWS.....
NA-092. Fred, N5IVZ, plans to activate South Padre Island (USI TX-007S, Cameron County, Texas), on February 28th (1400-2300z). There was no mention of a special callsign. This is a special IOTA operation to celebrate 90 years of the U.S. Coast Guard in the Rio Grande Valley of South Texas and to honor the U.S. Coast Guard Auxiliary service of the present, past and future Guardians of the Sea. QSL via his home callsign, direct only.

NA-191. (Update) Operators Klaus/DK6AO, Gunter/TI7WGI, Andy/DH8WR (EA2CRX), Norbert/DL2RNS, Rene/DL2JRM and Daniel/DL5YWM will be active as TI7*** (TBA) from San Jose Island (Guanacaste Province), Costa Rica, between April 17-20th. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK31. QSL via DK6AO, direct or by the bureau. For updates and more info, please visit their Web page at: http://ti7.info

OC-135. By the time you read this, Jerry, P29ZAD, should be active from Buka Island, Soloman Islands, until February 27th. He is there working just North of Buka Town. If possible, Jerry will operate if he has time. QSL via NI5DX, direct or by the Bureau. For more information, please visit Jerry's Blog at: http://p29zad.blogspot.com

SA-080. Operators Orlando/PT2OP and Marcelo/PY6KW will activate Tinhare Island (DIB BA-05), Brazil, between February 20-24th. Look for PT2OP to use the special callsign PX6T, while PY6KW will use homecall/p or possibly a special callsign. PLEASE NOTE: This operation will also count for the Lighthouse of Morro de Sao Paulo (DFB BA-06, ARLHS BRA-157). The team will also activate Boipeba Island (DIB BA-04) in the same island group between February 25th and March 1st. PT2OP will use the special callsign PX6B, while PY6KW will use homecall/p or possibly a special callsign. Activity on both islands will be mainly 40 and 20 meters SSB using only 100 watts into a G5RV antenna. QSL PX6T and PX6B via PT2OP. QSL PY6KW/p via his home callsign.

J7, DOMINICA (Update). John, K3TEJ, will be active as J7N from Dominica (NA-101) between February 11-27th. Activity will be on CW and RTTY with participation in both the CQWW WPX RTTY Contest (February 14-15th) and the ARRL CW DX Contest (February 21-22nd) as Single-Op/All-Band entries. Outside of the contests he will focus on 160/30/17/12 meters. QSL via K3TEJ.

KH4, MIDWAY ISLAND. There seems to be an announcement of a possible operation as K4M between October 5-19th. More details are forthcoming.

KP2, U.S. VIRGIN ISLANDS (NA-106). John, K3CT, will be active as KP2/K3CT between February 18-25th. QSL via his home callsign. Activity will include the ARRL DX CW Contest (February 21-22nd) using the callsign KP2M (QSL via AI4U). Outside of the contest activity will have an emphasis on 30/17/12 meter bands.

KP5, DESECHEO ISLAND DXPEDITION (Update). The Documentary Archive Radio Communication provides, on its Web site <http://www.dokufunk.org>, another special (third) exclusive interview with Co-Team Leader Glenn Johnson, W0GJ, on the coverage of the upcoming K5D Desecheo (KP5) DXpedition. This interview has the latest information on the upcoming operation scheduled for February 12-26th. Listen to the interview at: http://www.dokufunk.org/desecheo
Remember, for updates visit the KP5 Web page at: http://www.kp5.us
Look for K5D this week... Good luck in the pile-ups!

P4, ARUBA (Update). John, KK9A, informs OPDX that he will be in Aruba between February 28th-March 9th and March 25-30th. He plans to be active as P40A again and do a casual effort in the CQ 160-Meter SSB Contest (February 27th-March 1st) as a Single-Op entry. He will also be in the ARRL DX SSB Contest (March 7-8th) and the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry. John states that he will not be very active outside the contests but will likely spend sometime on 40 meters CW. QSL via WD9DZV.

PJ2, NETHERLANDS ANTILLES (URL Change). Jan, PA4JJ, informs OPDX that he will be on a short holiday trip to the Island of Curacao (SA-006, WLOTA LH-0942) and will be active as PJ2/PA4JJ. He will leave Amsterdam on March 30th and expects to be on the island until April 11th. Jan states that he will be the only ham in a party of 4, so he will try to

be active as much as he can. Activity will be on all ham bands with a focus on 30/17/12 meters and the DIGI modes (RTTY and/or PSK31). QSL cards are direct to PA4JJ. If Jan has access to the Internet, he will provide an online log on his Web site (or as soon as possible after his return home) at: http://www.pa4jj.nl/html/pj2_pa4jj_log.html

PY2, BRAZIL (New Callsign and City). Alex, PY2SEX (aka PY1KS), informs OPDX that he has moved from Campinas to Sao Paulo because of a new job and is back on the air trying to work the new "Triple Play Award" (TPA). He states that he will be on every night on 20 meters calling CQ on RTTY or PSK31. Alex states, "Whatever digital mode and of course if someone wants to go to another mode, I will glad to do that." Also, look for him to be in the ARRL DX CW (February 21-22nd) and PHONE Contest (March 7-8th) to improve his achievement for the TPA. QSL via his home callsign, by the Bureau, direct (see QRZ.com) or LoTW.

QSL INFO AND NEWS.....
NEW QSL MANAGER. With the passing of Ted/DL4DBR (see below under "Silent Key"), Tom, SP5UAF, reports, "For many years Ted was the QSL Manager of Mirek, VK6DXI/SP5IXI, for numerous Mirek's calls. Mirek is a good friend of mine and we are in touch via E-mail all the time. I will be the QSL Manager for his calls 7X0DX and 9M8DX - for past and possible future activities. If you sent your QSL via DL4DBR for the latest 7X0DX activity (September 2008) and still have no answer, please QRX. Teddy, DL4DBR, was very ill during his last weeks and was not able to take care of the QSLing. As soon as possible his wife, Renia, DL3DBR, will send us QSL documents from the last period of time. So from now on, QSL info for 7X0DX and 9M8DX is via SP5UAF. OK to QSL via Polish QSL Bureau, or direct (if you prefer) to: Tomasz Barbachowski, Zeromskiego 10, 05-070 Sulejowek, Poland."

QSL-Routes of Brazil can be found on:
http://www.radioamador.org.br/qsl-busca/qsl.htm

HAVE PATIENCE! More QSL cards are still being received for the many UA4WHX operations. Vlad is still sending them out.

QSLS VIA LOTW: 4A1DXXE, 9M6XRO, 9M6XRO/p, 9M8Z, A25OOK, D4C, F5IN, F5UTN, F6BEE, GM0VRP, GM3MZX, HB9FAP, HI3TEJ, HK0CW, KP4ED, LY9Y, NP2KW, OK1FAK, OX3DB, PA5O, RV6FG, SK3W, SV9CVY, TK5EP, UZ7U, V8FRO, VK9DWX, YB4IR, YS4/K9GY, YS4RR, YV4A, ZD8UW and ZF2XD

QSLS RECEIVED VIA MAIL: 3B8GT, 4A3A, 4W6R, 5R8IC, 8P5A, A25/DL7DF, 9L1X, AM5KB, C57R, CE0Y/N6NO, DU1ZV, E76AQ, EA6VQ, EL2DX, ER/RW3AH, FO/DJ7RJ, FY1FL, GW3YDX, H44MY, H44TO, HK3CQ, HP1/LA5IIA, J3/DM2AYO, KP2/NY6X, KP2/W3AVO, OM7CW, PJ2T, PJ7/W6JKV, S53MM, SV9/DL5AXX, T04X, V31XX, VU4RG, VU4MY, VU7SJ, XU7ABN, YU1AB, YW1TI, Z360M, ZK3AH and ZY0K

QSLS RECEIVED VIA THE BUREAU: 4O60BH, 6K5VRQ, 6L0NJ/4, BX1AD, DK1YF, DR1A, EM10KDR, ER10KDR, ET3JA, J3/S50B, OG5M, OL30SPACE, S51FB, UP21B, UR5LCV, VU7MY, VU7RG, YQ90U and Z360M

SILENT KEY. Tom, SP5UAF, informs OPDX that Tadeusz "Teddy" Barczyk (DL4DBR, ex-SP9ERC) became "SK" on January 2, 2009. Tom states, "We lost a very good friend and solid QSL Manager." For more info, please visit: http://www.qrz.com/dl4dbr
OPDX and its reader would like to send out our deepest sympathy to the family and friends of Dl4DBR. ADDED NOTE: See "QSL INFO AND NEWS" above (under QSL Manger "SK") for details on QSLing changes.

SPECIAL EVENT (6m Op). Andy, N8OFS, will be active as N8O "portable caboose" from Jefferson, Ohio, between June 13-15th, during 1800-0300z. Activity is to celebrate the 25th anniversary for the Ashtabula Carson & Jefferson Railway (AC&J). Look for him to be on FM (52.525, 51.500 and 50.300 MHz) and USB on 50.200 MHz. QSL via N8OFS: Andy Sargent, PO Box 517, Jefferson, OH 44047. For more details about the railroad, visit the Web page at: http://www.acjrscenic.net/history.htm

V2, ANTIGUA (NA-100). Peter, G3TKK, will be active as V25TK between February 27th and March 12th. Activity will be holiday style on 40-17 meters using CW. QSL via G3TKK, direct or by the Bureau.

V5, NAMIBIA. Klaus, DJ4SO, will once again be active as V5/DJ4SO between February 14th and March 12th. Activity will be on 160-10 meters using mostly CW and RTTY/PSK31. QSL via his home callsign, direct or by the bureau. His logs will be uploaded to LoTW.

V8, BRUNEI DARUSSALAM (OC-088). Just a reminder that Sam, G4OHX, will be active as V8FHX between February 11-23rd. QSL via his home callsign.

VK9X, CHRISTMAS ISLAND. Haru, JA1XGI/W8XGI, has changed his trip to the Pacific and will go to Christmas Island (VK9) instead of Central and Western Kiribati (T31 and T30) in November. Look for him to sign as VK9XGI between April 4-11th. Activity will be on all bands, including the lower bands, using CW and the digital modes. QSL via JA1XGI, by the bureau or direct.

VY, CANADA. Operators Jeff/N1SNB and Flex/DL7FER will be active from VY2TT QTH as VY2/N1SNB during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Multi entry.

WAAB AWARD AVAILABLE. The radio club "Rio de la Plata" began issuing the W.A.A.B. (Worked Argentine Antarctic Bases) to radio amateurs and SWLs as of April 1st, 2008. To get the award the applicants must show they have worked and confirmed by QSL cards, at least 3 different Argentine Antarctic Bases. Contacts can go back as far as November 9, 2001. The current list of active Argentine Antarctic Bases are:
LU1ZA S.Orkney LU1ZD San Martin LU1ZS Camara
LU1ZAB Matienzo LU1ZG Belgrano II LU1ZV Esperanza
LU1ZB Melchior LU1ZI Jubany LU2ZD Primavera
LU1ZC Deception LU1ZR Petrel LU4ZS Marambio

The W.A.A.B. award is available by E-mail requests to the Award Manager Horacio Ledo, LU4DXU - lu4dxu@hotmail.com or P.O.Box # 22, Martinez (1640) Buenos Aires, ARGENTINA. He can also supply the rules and fees for the award or visit the following Web page at: http://www.waponline.it/WapAwards/tabid/61/Default.aspx

YN2, NICARAGUA (Update/Callsigns). Operators Stan/AC8W (YN2WW), Hank/K8DD (YN2DD), Jim/KB8TXZ (YN2TX) and Lee/N8LJ (YN2LJ) will be active for one week between February 17-24th. Their activity will include the ARRL DX CW Contest (February 21-22nd) using the callsign YN2DD. Emphasis will be on 160/80 meters and 30/17/12 meters. QSL via info on QRZ.com.

YN2/H7, NICARAGUA. Jeff, N1SNB, will be active from here between March 5-9th for ARRL DX SSB Contest (March 7-8th) from the QTH of Octavio, YN2N. He hopes to sign YN2NB during the contest and H7/N1SNB outside of the contest. He will enter ARRL DX SSB as a Single-Op/All Bands/possibly High-Power or Low-Power (TBD). QSL via his home callsign.

ZF, CAYMAN ISLANDS (Update/NA-016). John, K6AM, will be active as ZF2AM between February 18th and March 4th. He will also be active during the ARRL DX CW Contest (February 21-22th) as a Single-Op/All-Band/High-Power entry, and also the CQ 160-Meter SSB Contest (February 27th-March 1st) as a Single-Op/High-Power entry. John informs OPDX that he will be doing mostly antenna work outside of the contests, but may get on the WARC bands or even 6 meters a bit as time permits. QSL via K6AM, direct or by the Bureau or LoTW.

ZS8, MARION ISLANDS (News). As warned last week, BEWARE OF PIRATE ACTIVITY! The ZS8T Web states, "The ZS8T team would like to report that all DX posts posted on Feb. 2 are 100% bogus. Petrus wasn't operating that day at all. We would also like to inform the Ham Radio Community that 14.300.00 is NOT ZS8T's operating frequency, and that he will tune any other legal clean freq. to operate on 20m." Also, mentioned this week (on February 7th), (edited) "QSL cards for ZS8T are ready to be printed next week. We are proud to present the card which will be received by all stations who managed to contact Petrus on Marion Island. The card has been designed by Stan, SQ8X, and will be printed/sponsored by Emil, LZ3HI. We expect first cards to be sent as soon as mid February." The QSL can be viewed at:
Front - http://zs8t.net/wp-content/uploads/zs8t_front_small.jpg
Back - http://zs8t.net/wp-content/uploads/zs8t_back_small.thumbnail.jpg
Pictures on the QSL were taken by Nico de Buyrn (another scientist working on Marion Island) who has been generously contributing to the ZS8T site several times. For updates and official announcements of the ZS8T operation, please visit the Web site at: http://zs8t.net

SB DX @ WW < KB8NW $OPDX.895.1
Ohio/Penn DX Special Bulletin No. 895.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 895.1
BID: $OPDX.895.1
February 9, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network and the KP5 Web page for the following DX information.

Update on the K5D DXpedition.............

February 8, 2009
Everyone arrived safely in San Juan PR yesterday; the last group at about
midnight. Last night we executed a contract for a helicopter to transport
our heavier items including transceivers, amps, generators and shelters.

Fifteen Team Members plus a half-dozen USFWS personnel completed UXO
(UneXploded Ordnance) training this morning.

Today was spent transiting from San Juan to our team HQ hotel in Rincon PR.
On the way, we stopped at the Arecibo Radio Telescope (http://www.naic.edu),
visit courtesy Angel, WP3R.

More news posted here (http://www.kp5.us/) as it becomes available.

Here are some photos taken today from Rincon; click HERE.
http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/feb08.htm

---
Operating Modes and Frequencies
These are planned bands, modes and frequencies. Of course these may
get adjusted because of QRM:

BAND CW SSB RTTY
---- ------------ --------- -------
160m 1826 up or dn 1843.3 up --
80m 3523 up or dn 3781 up or dn 3589 dn
40m 7023 up 7084 up or dn 7089 up or dn
30m 10106 up -- 10149 dn
20m 14023 up 14190 up or dn 14089 dn
17m 18072 up 18165 dn 18108 dn

15m 21023 up 21295 up 21089 up
12m 24892 up 24987 dn --
10m 28023 up 28470 up 28089 up
6m 50106 up 50130 up

Special Notes:
160m CW: RX - JA -10 kHz; Rest of the world up

80m CW: RX - Rest of the 3525 and up
JA - 0830z QSY ti 3502 and listen up

75m SSB: RX - Americas 3800 kHz and above; Rest of the
world 3799 kHz and below
JA WINDOWS - 3704-3716, 3747-3770 and/or 3793-3805

40m SSB: RX - Americas 7228 kHz and above; Australia 7103 kHz
and above; Rest of the world down

40m RTTY: 7089 will be good for NA, but EU has a hard time hearing
above 7070. They might want to transmit 7050 or so IF they
don't QRM their 40m CW operations
JA RTTY WINDOW: 7025-7045

KP4-5 SSB Transmit windows: 7075-7099, 7125-7300
[They might need to transmit SSB on 7295 (listen down) if
interference with CW on 40m]

Note: On 6m there will be only CW/SSB operations.

Note: They are fully aware of the (U.S.) bands plans and they will
also listen above 14225 kHz.

Caribbean and Puerto Rico Special notes:
- 2m simplex 146.52
- 6m simplex 50.120 for KP4 & Caribbean
- 10m simplex 28.315 for KP4 & Caribbean
- 40m daytime 7.095 for KP4 & Caribbean

1643. Mark's recent Teranews spams propagate through highwinds-media.com

Newsgroup: rec.radio.amateur.misc
Date: 2009-02-10 19:44:59 UTC
From: DeLorean <delorean@nim.bstrs>
Message-ID: <OOL8CCCFb23668.7C31856996@nim.bstrs>
Source record: 6906
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.cb

Teranews is now using highwinds-media.com to carry their Usenet traffic.
That means we may have a much better chance of stopping Mark's spam than
we had with Teranews itself. The Usenet abuse policies can be read at

http://support.highwinds-media.com/aup.php

where it will be seen that Mark (posting as k3vr) is in violation.
Please help us by sending some of Mark's spams back to
abuse@highwinds-media.com, OR by going to the web page at

http://support.highwinds-media.com

and clicking on "abuse." There you will find a form for filling in
details about messages with violate their Usenet AUP.

Thanks to all who are helping,
DeLorean

1686. Ohio/Penn DX Special Bulletin #895.2

Newsgroup: rec.radio.amateur.misc
Date: 2009-02-10 23:42:38 UTC
From: Tedd Mirgliotta <kb8nw@barf80.nshore.org>
Message-ID: <MPG.23fbdae3851a09c498974b@news.cle.sbcglobal.net>
Source record: 6949
Cross-posted to: rec.radio.info,rec.radio.amateur.misc,rec.radio.amateur.dx

SB DX @ WW < KB8NW $OPDX.895.2
Ohio/Penn DX Special Bulletin No. 895.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 895.2
BID: $OPDX.895.2
February 10, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network the KP5 Web Page and VH2HV for the following DX information.

JIM SMITH VK9NS (SK).....
Bruce (G3HSR) reports (via VK2HV): It is with deep sadness that I inform you that Jim (VK9NS) passed peacefully away on Norfolk Island at 15:40 local time on 10 February 2009 after a short illness.
Jim is survived by his wife Kirsti (VK9NL) and his four children: Bruce (G3HSR), Stuart, Sheena and Fraser (all living in the UK).
Jim's contribution to Amateur Radio, DX-ing and IOTA is inestimable. He will be sadly missed. Further information and condolences can be sent to Kirsti at jimkirsti@in.net.nf

FROM THE EDITOR (by KB8NW): After coming home from work today, I was shocked when I read my very first E-mail about Jim. Dxers throughout the world have lost one of their greatest icons in DXing. Noted for his DXpeditions to rare place, the "Heard Island DX Association" <http://www.hidxa.nlk.nf>
and keeping Norfolk Island active on the air, Jim will surely be missed. Many will probably remember Jim for his famous 1983 VK0JS Heard Island DXpedition (along with his wife Kirsti/VK9NL signing VK0NL). If you are new to DXing and do not know about Jim, please take a few minutes to visit the Web page above and learn about this DX legend.
OPDX and its readers would like to send out our deepest sympathy to Jim's wife Kirsti and his four children Bruce/G3HSR, Stuart, Sheena and Fraser. Jim's signal will surely be missed on the air.

K5D DXpedition Update
Dated - February 10, 2009

The K5D Team continues to prepare for its early Thursday AM departure for Desecheo Island. Last night the team met and had dinner with USFWS

participants, law enforecement personnel and members of the field research team. Due to continued questionable weather (which for some weeks has included large waves, dangerous surf, high winds and rain unusual for this time of year), the Team has made an important strategic decision.

For safety reasons, all personnel and equipment will be transported to Desecheo Island by helicopter. The possibility of Team members and crew members being injured, vessels being damaged and equipment being lost during a sea landing was too great a chance to take.

Today, all of the equipment, supplies, antennas, generators, food, shelters, tables, chairs and so forth were unloaded from the storage facility and loaded into a large moving van for transfer to the helicopter pad.

Tomorrow, representatives of the helicopter company will meet the Team, examine the cargo and prepare it for transit via sling load on Thursday morning. A second helicopter will ferry personnel. Because we're limited to only fourteen days on the island, doing it this way will allow us to get on the air sooner, stay on the air longer -- and all with a higher degree of safety.

The Team has voted, if necessary, to contribute more money of their own to help contain these incremental costs.

If you're inclined to contribute more to help, it would be appreciated. To contribute, click HERE.

What a bunch of losers. Do they really expect us to cut and paste
every separate detail of the message into a separate field, for each
of those abusive messages?

Why can't a full paste of the headers into a single field suffice?

I find that it's easier to email them to abuse@highwinds-media.com.
You'll get a canned response within an hour. The response claims that
their people will investigate the complaint and then *may* get back to
you later.

Thanks for helping out. I'm sure that complaints from multiple people
will carry a lot more weight than those of a single person.

K5D DXpedition Update
February 12, 2009

Per Glenn W0GJ: 1600z: "About half done moving gear to island. Things going well. Very, very HOT!"

At 1240Z the first helicopter with five Team Members aboard took off from Rincon and a few minutes later landed safely on Desecheo Island. The K5D Desecheo 2009 DXpedition is officially ON!

QRV (single transmitter only) still planned near 0200Z tonight.

K5D DXpedition Update
February 12, 2009

February 12, 2009
Per Glenn W0GJ and Bob K4UEE @ 23:45Z: "Heavy winds during the day delayed
several helicopter flights so we're running quite a bit behind schedule.
For example, we had to wait until the last helicopter trip to begin
erecting shelters. We're all exhausted and have quite a bit of
infrastructure work yet to do (in the dark). Regrettably, this will
delay our planned QRV until (hopefuly) near 1600Z tomorrow (Friday).
We're sorry to disappoint those expecting us on the air tonight.

As of 0800 hrs EST today, these are the Google accounts of Mark's which have been nuked. There are many more to go, but steady progress is being made thanks to the efforts of several people. Mark has also been blocked by got.net / Giganews recently.

GOOD WORK!

I'll give a dollar and seventy-five cents, cash money, for the person who sends a letter to WalMart to complain about Todd treating customers rudely.

Cash money. This isn't a joke.

Yup...caught Mark in yet another of his many lies.
He claimed that he was drafted into the Army as
1: A Lt. Colonel.
2. As a Second Lt.
3. Served in the Chemical Corp

the rest is pure bull hockey...

Now he claims to have served in Vietnam.

The last ten Marines were airlifted from Nam in 1975 as Saigon fell.

If Mark is 40 years old as he said in 2006, then that means that he was born
in 1966.
That would have made Mark NINE YEARS OLD when the last Marines were leaving
Vietnam.

And that, my friends, equates to Mark C. Morgan being one huge liar.

I'm glad that my wife doesn't read this group.

But why me, Todd? Your blog disappeared without any action on my part, since I'm only focused on putting an end to Mark the Spammer's floods. Even if my wife shoots me, your blogs will continue to be yanked by Google because, for the first time in years, it looks like Google cares.

Also, consider the fact that Mark's disappearing Google accounts are the result of multiple new complainers who have gone into action. Mark made the mistake of expanding his floods into additional newsgroups such as rec.radio.amateur.antenna, rec.radio.amateur.dx, etc., and that was a fatal mistake. The amateurs who frequent those groups haven't yet become complacent, and they are fighting back. I know the true identities of several of the complainants, and only one of them posts in RRAP.

I'll bet that your case is similar. It could even be someone from the FCC who finds your threats to blow them up to be distasteful.

Ya think?

In the meantime, remember that Pi is approximately 3.1459265, and that at 18:31:30 hours EST last night it was 1234567890 seconds past the unix epoch.

May the script be with you,
DeLorean

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th/February, through Sunday, 15th/February there were 224 countries active. Countries available: 3A, 3B6, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7O, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, FS, FT5W, FW, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, KP5, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV9, T2, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZF, ZL, ZL9, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5C, MOROCCO (IOTA Op). Alfredo, IK7JWX, informs that he is preparing for a DXpedition (with 9 operators) to activate Mogador Island (AF-065) in April. Activity will be on all HF-VHF bands and all modes. More details should be forthcoming. UPDATE! Alfredo, advises OPDX that the DXpedition will take place between April 18-26th. Look for the following operators

(with callsigns to be active: Oscar/IK2AQZ (5C2A), Carlo/IK6CAC (5C2C), Ernesto/I2FUG (5C2F), Del/IZ7GWZ (5C2G), Alfredo/IK7JWX (5C2J), Leo/I8LWL (5C2L), Simon/IZ7ATN (5C2SG), Pino/I8YGZ (5C2Z) and Nicola/I0SNY (5C2Y). QSL via their home callsign. ADDED NOTE: Some of the reference numbers to be activated during this operation are:
Mogador Island - AF-065; WW.Loc. IM51CM; ITU 37; CQ 33
Essaouira Island - WW.Loc. IM51CL
ARLHS Lighthouses (callsign/m):
MOR-019 Cape Sim-Essaouira; WW.Loc. IM51CL
MOR-036 Sidi Magdul-Essaouira; WW.Loc. IM51BJ
MOR-040 Grand Jetee-Agadir; WW.Loc. IM50EJ
Activity will be on all bands (HF-VHF) and modes (CW, SSB, RTTY PSK31). The group is looking for sponsors and donations. If you can help, please contact Alfredo, IK7JWX, via E-mail at: ik7jwx2003@yahoo.it

5X, UGANDA. Nick, G3RWF, will once again be active as 5X1NH. He will be in Fort Portal in western Uganda starting March 11th for about two months. Nick informs OPDX that he bought a (U.S.) vertical for 40 and 80 meters, so he feels that he will do a bit better on those bands this time. However, he will not have a 160 meter antenna (states, "there is simply not enough room for an antenna, unless I visit my friend 5X1GS and use his antennas - which I might well do."). He also mentions, "I prefer CW but I have now worked over 20k CW QSOs, so I have it in mind to work some data (RTTY and PSK31). Will work SSB whenever signals are good enough." Nick informs that one of the problems in 5X is unreliable power (it is difficult to promise that there will be power at any particular time). He plans to buy or rent a car battery this trip because he will not have a vehicle to tap into. Since he is doing voluntary work there, look for Nick on the air mainly during the early mornings, evenings and weekends. QSL via G3RWF.

9K48, KUWAIT (Special Event). Members of the Kuwait Aamateur Radio Society will activate the special callsign 9K48NLD from their K2RA Headquarters [PLEASE NOTE: Not from IOTA AS-118 as initially planned.] between February 25-26th. Activity is to celebrate Kuwait's National Independence and Liberation Day. Look for them to be on 40 and 20 meters using CW and SSB. QSL via 9K2RA. Visit their Web page at: http://www.KARS.org

ANTARCTIC ACTIVITY WEEK EVENT NEWS (February 16-22nd). PLEASE REMEMBER - Stations that are active and signing "/ANT" may NOT be in the Antarctic!

ANTARCTIC OP & CRUSIE. By the time you read this, Mehdi/F5PFP and Jean-Pierre/ON7ZM should be getting ready for their expedition to the Antarctic peninsula. Their sailboat is expected to leave Ushuaia on Wednesday, February 18th, depending on the weather conditions. They plan to visit several Antarctic bases which include the South Shetland Islands (AN-010), Palmer Archipelago (AN-012) and the Antarctic mainland (AN-016). According to Mehdi, both Jean-Pierre and himself will mainly be active on 20 meters SSB (14315 kHz), with some activity on 40/30/17 meters. [90% on SSB, 10% on CW, 80% on 20m] They plan to have one station continuously on the air with a trapless vertical using 500 watts and another station sporadically active using a trapless vertical and 100 watts. Operating times are between

1800-2200z, earlier and later when it is possible. Callsigns mentioned are CE9XX, FT5YJ and VP8DLM. Expedition will last through March 17th. QSL via F5PFP, by the bureau or direct: Mehdi Escoffier, Les Closures, 38440 Saint Jean de Bournay, FRANCE. You can download and see the route of the sailboat on GoogleEarth at:
http://www.french-polar-team.fr/Antarcticexpedition2009/maps.html

AU30, INDIA (Special Event). Dutta/VU2DSI and friends Suhas/VU2SMN, Manju/VU2SMS and Ronald/VU2ROE will operate with special event callsign AU30SHI between 1830z, February 21st and 1829z, February 22nd. Activity is to commemorate the birth date of the Great Emperor Cnatrapati Shivaji (1627-1680). Operations will be from Shivneri Hill Fort near Junnar in Pune District, Maharashtra, India, birth place of Shivaji. Suggested frequencies are: 7070, 14250, 14215, 21280 and 28290 kHz. QSL via VU2DSI.

C3, ANDORRA. We have been informed by several sources that "the Andorran Radioamateurs Union (URA) reminds that the local administration has not implemented the CEPT Recommendation T/R 61-01. Therefore any C3/homecall activity should be regarded as illegal." An up-to-date list of licensed amateurs can be found at: http://www.ura.ad

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry. QSL via W7EJ.
See the station from CN2R at: http://www.arraysolutions.com/Users/cn2r.htm

DAYTON HAMVENTION NEWS (Top-band Dinner). George/K8GG and George/W8UVZ report: "All 160 meter band enthusiasts are cordially invited to the Top Band Dinner on Friday evening of the 2009 Hamvention in Dayton. This annual event brings together 160 meter operators from around the world for food, drink and camaraderie. We will, again, be at the Barnsider Restaurant - same location for the past three years. Here are the particulars:
Date: Friday, May 15, 2009
Time: Social Hour 6:30 PM (Cash bar)
Dinner: 7:30 PM
QTH: The Barnsider Restaurant (Near Hamvention Arena),
5202 N Main Street, Dayton, Ohio -- (937) 277-1332
Located on Route 48 just north of Needmore Ave
Fare: Salad, roll and butter, dinner entree, dessert & beverage
Choose from Chicken, Fish, Pork or Beef entries - selected from restaurant server. This is a plated dinner - not buffet.
Cost: 29 USDs, mailed in advance. Includes complete dinner, taxes and gratuity. Price has been the same for last 4 years. Please note that all reservations need to be paid in advance, both USA and overseas.
Program: We'll have a presentation by one of the K5D - Desecheo Island Ops on their low-band operation.
Reserve: Now via email, snail mail and pay cost in advance (due before 4-25) to: George Guerin, K8GG, 14322 A Drive North, CERESCO, MI 49033 -- Email: k8gg@arrl.net or gmguerin@voyager.net
We are looking forward to another great gathering of Top Band enthusiasts."

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following operation is approved for DXCC credit:
TT8JT - Chad; 2008 Operation

E5, SOUTH COOK ISLANDS. Tim, NL8F/VK4COF, will be active for 14 days from Rarotonga Island (OC-013) sometime between March 21st and April 4th. Activity will be on 80/40/20/15/10 meters SSB and possibly 17 meters. QSL Manager for this operation is K8NA.

EG3, SPAIN (Special Event). Special event station EG3LB was on the air this past weekend to celebrate the 200th anniversary of the birth of Louis Braille, inventor of the Braille system for blind. This station will also be in the air February 20-22nd and February 27th-March 1st. Activity will mainly be on CW and the Digital modes (RTTY/PSK). The bands may vary; operations over the past weekend were on 40 and 20 meters. A special QSL will be issued commemorating the event. QSL via EA3RKR, by the Bureau or direct (QRZ.com). SWLs can also send for QSL but should send a report for listening to a complete data QSO. More information is available on the Web at: http://www.gratisweb.com/ea3rkr

FG, GUADELOUPE. Pat, F4EBT, will be active as FG/F4EBT from the area of Sainte Rose on north Basse-Terre Island (NA-102) in the Guadeloupe Island group between March 21st and April 11th. Activity will a "holiday style operation", SSB only on 80/40/20/17/15/12/10 meters using a TS-50 w/100 watts into a FD4 Multiband antenna.

FR, REUNION ISLAND (Update/Change). Cedric, F4EGZ, will be active as FR/F4EGZ during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op entry. He informs OPDX that he will be there for 3 weeks but will only be on the air for the contest. During the contest, he states he will be active only on 20 meters band with a moxon antenna using 500W. However, he also states that at the beginning (of the contest) he will be active on 40 meters but does not think there will be a large open window to Europe and USA.

GB6, ENGLAND (Special Event). Martin, G3VOF, informs that he and six other operators will be putting GB6GEO on the air again this year during the European Geo Parks Communication Event which takes place on Saturday, May 23rd and Sunday, May 24th. Activity will be from Cavern in Torquay, right in the heart of the English Riviera Global Geopark. This callsign (along with many others) will be going on the air bringing awareness to the beautiful "Geo Parks" in the UK and around different parts of the world. Suggested frequencies are: 3680, 7080, 14180, 21180 and 28180 kHz. If you live in France, Spain, Italy, Austria, Romania, Czech Rep, Norway, Brazil, or China and are interested in participating in this event plus can obtain the special "GEO" suffix, please contact Martin as soon as possible via E-mail at: martin@riviera.fm
For more details, see GB6GEO at: http://www.qrz.com/callsign/GB6GEO

IOTA NEWS.....
AS-056. This one was received late for this week's bulletin, but worth mentioning. Activity this past weekend by Joe, JA4PXE, as JA6PXE/6 was from Danjo-Archipelago a rare IOTA. This is

a very narrow sheer rock or steep rocky island located 130
miles west of Kyushu Island in the South China Sea. Joe was
only on 40 meters CW using an IC-703 running 10 watts into
a Inverted V antenna. QSL via his home callsign, direct or
by the Bureau.

EU-008. Operators Doug/GM0ELP and Simon/M0GBK will be active as MM3T
from the Isle of Skye (IOSA NH07, SCOTIA CN14, WW Loc. IO67QN),
Inner Hebrides), during the RSGB IOTA Contest (July 25-26th)
as a Multi-Op/All-Bands/Low-Power/Mixed/Assisted/Expedition/
24-hours. QSL only via eQSL. Visit their Web site at:
http://freespace.virgin.net/douglas.maxwell/MM3T/mm3t.htm

OC-164. John, VK6HZ, will once again be visiting Rottnest Island this
year. Dates of operation will be March 3-9th. Operation will
be holiday style (he states "in between beer, swimming and,
of course, quality time with my family!) Equipment will be
IC-7000 running 100w into a Buddipole, running all modes.
QSL via VK6NE. Online log will be available after the trip
at: http://www.vk6hz.com
All logs will be uploaded on LoTW.

KH6, HAWAII. Bill, AC0W, will be operating KH6/AC0W during the ARRL
International DX Phone Contest (March 7-8th) from OC-019. Activity will
be on 80-10 meters. There is a possibility of some operations a few days
before and after the contest, as time allows. QSL LoTW and AC0W.

KP5, DESECHEO ISLAND DXPEDITION (News/Update).....
* The K5D DXpedition to Desecho Island is now on the air until February
26th. Activity will be on 160-6 meters using 6-8 stations on CW, SSB
and RTTY. QSL via N2OO.

* UPDATE February 14, 2009 (2330z): "Because of higher-than-expected winds
which delayed helicopter trips, we were unable to complete our full
setup on Thursday. At this writing, those problems are behind us and
the camp and all antennas are in place and working.
The QSO count is just under 10,000 in the first 24 hours with only
two stations operable for most of that time. We now have five stations
on the air hoping for two or three more tomorrow. We have no internet
connectivity as our satellite link and our 900 MHz terrestrial link both
failed. We have a plan that should get them both working in a day or
two. In the meantime, no logs have been uploaded and, of course, no
photos. When the links are working you'll learn about it here.
The Team is in high spirits and the weather is good now, nice breeze,
calm seas but hotter than expected.
Last night we were forced to move our 40M operation away from our
planned frequency. This was because of the RTTY contest which wiped
out most of the band for us below 7.1MHz. The contest ends tomorrow
and we expect much better 40M performance especially to Europe.
We're sensitive to the fact that some EU countries/amateurs cannot
transmit above 7.1MHz; this problem will self-resolve when the RTTY
contest ends late tomorrow." (KP5 Web page)

* ACTIVITY ON THE BIRDS. Thanks to the support of AMSAT-NA, the team is equipped with a Kenwood D7 HT and Arrow antenna, as well as training on using the FM satellites. Satellite operation is not expected to begin until the second half of the DXpedition, and then only on an as available basis. A second repeater on AO-51 (145.88/435.150) will be activated on February 16th and reserved -only- for contacts with K5D while within sight of the island. K5D may be active on either AO-51 repeater, SO-50 or the ISS voice repeater modes if available. Users attempting contact with K5D should be aware the the DXpedition does not wish to exchange grid squares during the QSO in order to allow more operators the chance for a QSO. Their grid square is FK68, same as most of Puerto Rico. Please be courteous and limit yourself to one QSO.

* ONE LESS OPERATOR. OPDX was informed that Brad Farrell, K4RT, did not make the trip due to a family illness.

* Remember, for updates visit the KP5 Web page at: http://www.kp5.us

MAJOR PACIFIC DXPEDITIONS (Not One, But Two!). Well-known DXpeditioners Hrane/YT1AD (Team Leader) and David/K3LP (Co-Team Leader) are in the process of organizing two (2) upcoming South Pacific DX-Peditions:
1 - Tokelau Island (ZK3) and Central Kiribati (T31, Ex-Canton Island), planned for April 2010 or end of September 2010
2 - Conway Reef (3D2C) planned for the end of September 2011

On the most wanted list, Tokelau Island (ZK3) ranks #47, Central Kiribati (T31) ranks #27 and Conway Reef (3D2C) ranks #22.

Hrane/YT1AD and Miki/YU1DW will travel between April 20th and May 7th (2009), in the South Pacific islands to organize these DXpeditions.

Hrane and Miki will be active from the following islands. The schedule will be as follows:
April 22nd - Samoa; callsigns 5W8A (YT1AD) and 5W0DW (YU1DW)
April 22-24th - American Samoa; callsign KH8/N9YU (YT1AD)
April 25th-May 4th - Fiji; 3D2AD (YT1AD) and 3D2DW (YU1DW)
April 27-29th - Western Kirbati; callsigns T30M (YT1AD) and T30DW (YU1DW) on Tarawa Island

More information will be forthcoming soon in March 2009 on the following Web page at: http://www.yt1ad.info/t31

OA, PERU. Operators Daniel/DL5YWM and Rene/DL2JRM will be staying in Lima between April 7th and the beginning of May. In their spare time they will operate as OA4/homecall mainly on CW with the focus on the lower bands. During this stay, they will make a small detour to Costa Rica to participate in the German DXpedition to San Jose Island (NA-191, in the Guanacaste Province), between April 17-20th. See OPDX.895 or visit the Web page: http://www.ti7.info
Any activity from Peruvian IOTAs will be decided "last minute".

P4, ARUBA (SA-036). Andy, AE6Y, will be active as P49Y during the ARRL DX CW Contest (February 21-22nd) as a Single-Op/All-Band entry. QSL via

AE6Y.

PACIFIC TOUR. Operators Minekazu/JA2NQG (SSB) and Yuji/JH2BNL (CW/RTTY) will be active from the Western Pacific during March from the following islands and IOTAs. Their schedule and callsigns are as follows:
March 4-6th - Chuuk Island (OC-011); Micronesia; V63AR and V63WW
March 6-9th - Pohnpei Island (OC-010); Micronesia; V63AR and V63WW
March 9-11th - Kosrae Island (OC-059); Micronesia; V63AR and V63WW
*Also, callsigns V63C, V63P and V63K will be active during these dates.
March 11-14th - Majuro Island (OC-079); V73J and V73M
March 14-16th - Palau Island (OC-009); T88CD and T88WW
March 17-19th - Guam (OC-026); NH0AA and AH0F/KH2

QSL V63AR, V73J, T88CD and NH0AA via JH2BNL.
QSL V63WW, V73M, T88WW and AH0F/KH2 via JA2NQG.

QSL INFO AND NEWS.....
QSL ROUTES by Johannes, DK8JB:
7N4OGU via 7J1ADS AO3RKR via EA3RKR
9W2KGV direct DF2UT via 7J1ADS

4L1DA QSL STATUS. Joe, W7LPF, QSL Manager for 4L1DA, informs that almost 6 pounds of QSL cards were sent this past week to the Bureau for David/4L1DA. He states, "I am sorry for the delay, but the health had a 'blip' [wrong medicine given to me after hernia operation - that almost took out my liver!!]. I am getting back to normal [?] - and should have the backlog caught up by the end of the month. Please - if you are waiting for a card from 4L1DA - send me an E-mail and I will advise if it is 'in the mail to buro' - no need for more dupes. Again, my apologies to all." Joe's E-mail address is: ottuser@comcast.net

Buzz, NI5DX, is pleased to announce that he is now the QSL Manager for John Lee, 9M6JC. John has sent Buzz his log file, and Buzz will be able to answer all requests for cards from contacts made with 9M6JC. There will be a delay in sending out cards until 9M6JC sends some blank cards to NI5DX. New cards will be ordered shortly and will take about 5 weeks to arrive after the order goes to the printer.

9V1YC QSL STATUS. Floyd, N5FG, reports that the QSL Mnager Joe, N5ID, has been in the hospital since November 4th of last year. So, Joe has asked Floyd to spread the word that he is getting better and hopes to be home in the next couple of weeks. He asks patience on getting a 9V1YC QSL from him until he is back on his feet.

LOG & VIDEO ONLINE. A video for last Sunday's CS6A operation from Rosario Island (DIP AL-19) is now online at: http://algarvestar.no.sapo.pt
Log for this activity and many other CTs and CUs (portable, lighthouses, etc...) operations are online at: http://logonline.no.sapo.pt

QSLS VIA LOTW: 5K0CW, C6APG, CT1ILT, CU2JT, J88XF, JA8BNP, KL5DX, KL7J, LY9Y, ON6AB, R1FJT, RU0AW, TF3SG, VK9DWX, VP8CMH/MM and ZC4VJ

QSLS RECEIVED VIA MAIL: 3A2MD, 4W6R, 4Z5J, 6V7D, 7W0AD, 7Z1SJ, BD7MVZ, BG7MVZ, C21XF, C57R, C6AXD, CW2C, EK3SA, ER4ER, FJ/G3TXF, FM1HN, HH4/AF4Z, HI3TEJ, HI8ROX, HI0C, HQ8R, HQ9R, JT1Y, JX9JKA, KG4SS, KL7J, ON4IQ, OZ1AA, P40W, R1FJT, T88CJ, TF3CW, VK9DWX, VU4MY and ZP0R

QSLS RECEIVED VIA THE BUREAU: None reported this week!

S0, WESTERN SAHARA. An international team of operators (known as the Tifariti Gang) composed of Juan/EA1CJ, Agustin/EA1KY, Roberto/EA2RY, Gerard/EA3EXV, Antonio/EA5RM, Manuel/EA7AJR, Bernard/F9IE, Fabrizio/IN3ZNR, Valery/UT7CR and Dimitri/UY7CW will be on the air from Western Sahara from April 12-17th using the callsign S04R. Activity will be on all bands from 160-10 meters using CW, SSB and the Digital modes. QSL via EA5RM. Ruben, EA5BZ, will be the pilot station. Look for additional information to become available on the S04R Web site at: http://www.dxfriends.com

TP60, FRANCE. To celebrate the 60th anniversary of the Council of Europe, there will be four TP60CE operations planned during 2009. The first operation will take place for three days between February 27th and March 1st. Activity will be on CW, SSB, RTTY and PSK. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

TU, COTE D'LVOIRE. Paolo, F8ENY, will be active as TU/F8ENY from San Pedro between February 16th and March 2nd. Activity will mainly be on 20 meters.

V4, ST.KITTS AND NEVIS. Mark, K0EJ, will be active as V49A during the ARRL DX CW Contest (February 21-22nd) as a Single-Op/All-Band/Low-Power entry. Look for activity outside of the contest (signing V44/K0EJ). QSL via V44NK.

VISALIA DX CONVENTION (IOTA Dinner). The 14th Annual Islands On The Air (IOTA) Dinner will be held on Friday, April 17th, in the Plaza Room of the Holiday Inn Hotel and Conference Center, 9000 W. Airport Drive, Visalia, CA 93277, in conjunction with the 60th annual Visalia International DX Convention. The Convention Web site is:
http://dxconvention.org/
This dinner is open to all who are interested or active in the IOTA program, or would like enjoy a meal and see what some real Island expeditions look like. The program agenda is as follows:
1730-1830 Doors open, socializing and eyeball discussions
(Drinks available on order)
1830 Dinner served, buffet style -- Welcoming/Introductions
1845 IOTA Programs begin
G3ZAY - ZD8UW, and the RSGB IOTA Program Overview
K9AJ - Rockall, EU189 and KD6WW, NA-229
AD6E, K6MYC and W5GAI - P29NI, OC-041 & 0C-181
N3QQ, EX UL7BEF & UA9OPA - KL7DX, NA234 (New)
2200 Closing
The dinner will be served buffet style in the Birch Room at a cost of 31 USDs per person, payable at the door, cash only, (service charge and tax included). The buffet menu will contain entree choice of beef and chicken along with salad, vegetables, dinner rolls, dessert, and a beverage

(coffee, ice water, or ice tea). A vegetarian meal is available with two weeks notice. Wine and liquor can be purchased separately.
Reservations are not required but we'd like to know if you are attending. There is buffet service for 60 persons. Admission is free for those wishing only to watch the programs without dinner. As usual, seating will be "first come, first seated".
The Holiday Inn is sold out of rooms. If you are attending from overseas, contact the Conference committee, they often have rooms reserved for DX attendees. For additional information regarding this event, please contact:
Ray Benny, N6VR, IOTA Dinner Coordinator,
home phone - 805 649-9696 or rbenny@sbcglobal.net
-- or --
Will Costello, WC6DX, home phone: 831 375-8133 or wc6dx@sbcglobal.net

VK9NS (SK) TRIBUTE. The Documentary Archive Radio Communication (DARC) Web page now provides on its site "A Tribute to Jim B. Smith, VK9NS" at: http://www.dokufunk.org/vk9ns
On the page there is a great collection of QSL cards from many of the DXCC entities he activated.

VK9X, CHRISTMAS ISLAND (Update). Haru, JA1XGI/W8XGI, informs OPDX that his callsign will be JA1XGI/VK9 instead of VK9XGI as first announced. Activity will take place between April 4-11th, on all bands including the lower bands using CW and the digital modes. QSL via JA1XGI, by the bureau or direct.

VP9, BERMUDA (NA-005). Doug, KF4VTT, will be active as VP9/KF4VTT from June 11-17th. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. QSL via his home callsign, by the LoTW, Bureau or direct.

Z30, MACEDONIA. Members of the Macedonian Telegraphic Group (MCWG) will be active with the special callsign Z30MCWG between February 20th and December 31st. The activity will be mostly on CW on all HF bands. QSL via Z35M (Secretary of the MCWG) to the address: Vladimir Kovaceski, Sava Kovacevic 47 g / 55, Skopje 1000, Republic of Macedonia.

You idiot!

Why don't you learn to spell and type properly, or at least proof read what
you've wrote before sending.

This just shows how lazy and stupid you are.

Shaun

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 896.1
BID: $OPDX.896.1
February 18, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and the OH2BN for the following DX information.

For immediate release:

February 18, 2009

JOIN A DIFFERENT KIND OF AMATEUR RADIO COMPETITION

There is no doubt that our time-honored hobby is going through turbulent times with the intake of new hams decreasing in many countries. The overall Amateur Radio population has diminished dramatically.

As an independent body, the group at Radio Arcala, OH8X is poised to try some new methods to attract young people congregating in many non-traditional hangouts such as Virtual World on the internet. The Arcala radio station is the first-ever amateur radio station to be active in Virtual Reality. Millions of computer-minded youngsters gather there daily in an easy-going leisure mood.

The overall Radio Arcala strategy is spelled out on the OH8X Webpages but one of the key buttons - ON YOUNG PEOPLE'S TERMS - is still to be drafted.

See http://www.radioarcala.com

We now challenge members of our fraternity of all ages to draft the text for this button in a way that is both appealing and informative enough to encourage today's youth to take the step we once took.

CONTEST OUTLINE

Consider yourself as another 18-year old enthusiastic ham of today. Challenge yourself to talk to a bunch of young people ranging from 15-20 years of age in a large room with the occasion devoted only to yourself. Your mission is to tell them about the excitement of being an amateur radio operator today and why those in the audience should join our ranks.

Draft your paper/talk to be no more than 250 words in length in English or Spanish.

Remember a few things:

1: These people have many other tempting options to occupy their youthful and modern mind and time.

2: They can take only a certain amount of history at once. Be balanced.

3: Consider that one of the current obstacles is the license exam; it is an entry barrier not found with many other hobbies. Address that issue, too.

4: Remember that electronics has become a highly complex science and that experimentation may not exist as an option the way it did before.

5: Find the most positive and truly unique features that Amateur Radio has. Highlight the positive and truly unique features of Amateur Radio.

6: And finally, take this not only as a fun game but consider that, indeed, the future of this hobby is in the hands of people like you.

Deadline:

Please submit your paper by email no later than March 15, 2009 to oh8x@sral.fi (English) or yv5amh@iaru-r2.org (Spanish).

More than one text can participate and more than one submission can be selected, if seen practical.

The body to review the not-to-be-disclosed papers with their national focus group is composed of the following individuals: Hans Blondeel Timmerman, PB2T, IARU Region 1, (Chairman); Reinaldo Leandro, YV5AMH, IARU Region 2; Dave Sumner, K1ZZ (ARRL); Olaf Lundberg, G0CKV (for RSGB); Tonno Vahl, ES5TV, (ERAU); Hans Johansson, SM0IMJ (SSA) and Juha Hulkko, OH8NC and Martti Laine, OH2BH (Radio Arcala).

Prizes:

In addition to the award of first, second and third prizes in the form of three (3) amateur radio contest-like plaques, the winning text will be made available to a large group of people in Virtual Reality. You will be invited to be part of a Radio Arcala working group drawing up a next-generation recruitment campaign. Your work will be featured in national magazines by the above jury plus on the DX Summit and the Radio Arcala Website. You will be pleased with your achievement. Be aware that the review committee can for editorial reasons make style changes to the text before publication.

Note for editors:

By sending a note to Radio Arcala at oh8x@sral.fi
you can obtain high-resolution pictures taken from the virtual space at the first amateur radio station there - OH8X. Please note that the pictures are high-resolution, 6.5MB each, and assume an address that can receive such files.

1802. Hack a DTV antenna for dual directions?

Newsgroup: rec.radio.amateur.misc
Date: 2009-02-22 23:00:44 UTC
From: Esther & Fester Bestertester <not@me.really>
Message-ID: <0001HW.C5C7191C011A1E44B01AD9AF@news.sf.sbcglobal.net>

I've got this antenna:

<http://www.hdtvprimer.com/ANTENNAS/cm4228.html>

From my location the 2 largest DTV transmitter clusters are approximately 60 degrees apart.

How effective would it be to modify this antenna such that each of the 2 bays pointed to each transmitter cluster?

Yes, I know it's probably best to buy 2 antennae and couple them, but funds are really scarce and I've got time on my hands.

1. Would it work?
2. What are the practical down-sides (engineering blasphemies aside)?

I know this is not an elegant solution, so if your only comment is to say this, please resist.

Thanks.

I'd think you'd really sacrifice the VHF hi-band coverage if you do so. Do you, or will you, have and digital stations that will remain in the VHF band?

Can't find an old Tenna-Rotor for cheap? Me neither.

Hate to suggest hacking up your antenna but sure, I think you could
'bend' it down the middle 60 degrees and accomplish that.

In the analog days that might have resulted in terrible ghosting but the
latest 8VSB technology can operate even with a multipath signal at 1-2db
down.

(That also means that if you have a 2004 vintage DTV or DTV converter it
might not work if multipath comes into play)

Second idea. If you are in a fairly strong reception area why not
simply build a pair of homebrew antennas before hacking up your good
one? There's some plans on the web, one notorious one is on YouTube
with DIY instructions.

-Bill

I think hacking an antenna so that half is pointing in one direction
and half 60 degrees awy would be worse than just pointing the antenna
half way between the two TV clusters.

Jimmie

Well, if funds are tight, and you have time, build two of
these antennas designed by Kent Britain. They'll work
better than the antenna you cited (for UHF), and also
have the benefit of being 75-ohm impedance.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th/February, through Sunday, 22nd/February there were 227 countries active. Countries available: 3A, 3B8, 3D2, 3V, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FS, FW, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, KP5, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4L0, GEORGIA. Members of the Mamuka Contest Club will activate 4L0G in the CQ 160-Meter SSB Contest (February 27th-March 1st) as a Multi-Single entry. Operators mentioned are: 4L5DJ/Shota, 4L2M/Mamuka and 4L4CC/Levan. They will use a TS-950SDX w/1KW PA into a full size Delta loop and Vertical; RX Antenna 2 beverages. QSL via EA7FTR (UA9LP for Russia;

UT7QF for Ukraine).

4M, VENEZUELA. Operators Jose/YV5TX, Werther/YV5MSG and Alexis/YV5SSB will be active as 4M5DX during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single/High-Power entry. QSL via IT9DAA.

7Q, MALAWI. QSL Manager Allan, G0IAS, will be active as 7Q7AH with Harry, 7Q7HB (G0JMU), on the southern shore of Lake Malawi for one month starting February 23rd. Allan informs OPDX that he will be taking an amplifier and a wire antenna for Top-Band with him which should be a little better and stronger for this band. However, he mentions that this is the rainy season, with lots of lightning storms around the Lakeshore so please don't expect miracles. Harry is already fairly active on RTTY and PSK31, but 7Q7AH hopes to fill some gaps when Harry is busy. There is also a chance that John, 7Q7JL, will also visit the shack to transmit if the roads are okay to drive on between the Lakeshore and Blantyre. QSL route is to G0IAS, DIRECT ONLY, with sufficient funds for card return. NO return postage... NO return card. Allan states, "Sorry people but postage is expensive in the UK...and the managers pockets are only so deep.!"

8Q, MALDIVES (AS-013). Tom, PF4T, will be active as 8Q7TB from Embudu between June 8-25th. Activity will be on 40 and 20 meters using SSB. QSL via PF4T, direct to: Tom Braam, Hondsrug 210, 8251 VB Dronten, The Netherland. PLEASE NOTE: Include a self addressed envelope with or 1 Green Stamp if you are in Europe. If outside Europe, please include 2 Green Stamps, as one is not enough to cover postage.

B1, CHINA. Ed, N1UR, will be operating as B1Z from the Beijing DX Club Contesting station during the CQ-M Contest (May 9-10th) as a CW/SSB entry. QSL info TBD. More details later.

C6, BAHAMAS. Harry, W6DXO, will once again be active as W6DXO/C6A from South Andros Island (NA-001) between March 1-7th. Activity will be holiday style operation with focus on 30/17/12 meter bands as propagation allows. QSL Manager is KF6JOQ (direct).

CT7, PORTUGAL (Special Event). Members of the Algarve STAR DX Team will activate the special callsign CT7FFC from Sapal Castro Marim Natural Reserve (DPRN FF-22, valid for DPRN - Portuguese Natural Parks, Natural Reserves and Protected Landscapes Award <http://www.algarvedx.com/dprn>), March 1st between 0700-1300z. They will be on the air with 2 stations running 40m and 20m SSB and CW. Team consists of: Rui/CT1ERY, Toze/CT1GFK, Al/CT1GPQ, Mike/CT1IUA and Rui/CT2IHP. QSL via CT1GFK, direct or by the bureau, request via E-mail to: cu8at@algarvedx.com

D4, CAPE VERDE. Operators Fabio/I4UFH, Cortes/IZ4DPV, Vittorio/I4YSS and Antonio/CT1DVV will be active as D4C during the CQ World Wide WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via IZ4DPV. For the latest information, check the D4C Web page at: http://www.d4c.cc

ED5, SPAIN. Members of the Torrent Contest Club will activate ED5T during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single entry. QSL via EA5ELT. Operators mentioned are: Juan/EA5GIE, Jose/EA5GS, Duncan/EA5ON,

Antonio/EA5DF, David/EC5KXA and Vic/EA5KV.

FG, GUADELOUPE. Nicolas, F5TGR, will be active as FG/F5TGR from March 14-28th. Activity will be active on 40-10 meters using CW and SSB. QSL via his home callsign.

FH, MAYOTTE. Remember to look for Phil/G3SWH and Richard (Dick on CW)/G3RWL to be active from Mayotte this week between February 26th and March 5th. Mayotte counts as AF-027 for IOTA purposes. Both operators will use the single callsign of FH/G3SWH. Their activity will be mainly on CW on all bands 80-10 meters. There may be some 160 meters CW activity, but this will be entirely subject to QRN, antenna space and local site conditions, so there are no promises. Richard may also operate some RTTY towards the end of the trip. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many bands as possible. QSL via G3SWH, either direct with SAE and adequate return postage (recommended), via Phil's Web site for a bureau reply or via the bureau. There is more information at:
http://www.g3swh.org.uk/mayotte.html

FM, MARTINIQUE. Dim, UT5UGR, will continue to be active as FM/KL7WA until February 24th. He was active in last weekend's ARRL DX CW Contest as FM5KC. QSL via UT5UGR.

FR, REUNION ISLAND. Stephane, F5UOW, will be active as FR/F5UOW from Boucan Canot (near St. Gilles les Bains) between March 8-22nd. Activity will be holiday style, mostly CW on 20 meters. QSL via his home callsign.

IOTA NEWS.....
EU-006. Members of the Galway Radio Experimenters Club will activate EJ4GRC from the Island of Inishmore (WAB Square L71) between 1200z, March 17th and 1200z, March 18th. Activity will be on all bands and modes. Visit their Web site at:
http://www.galwayradio.com

EU-008/
EU-010. Paul, M3KBU, plans to be active as MM3KBU/p from the Inner (EU-008) and Outer (EU-010) Hebrides between August 1-16th. Activity will mainly be SSB on 14260 kHz (+/-). Check QRZ.com under MM3KBU for updates and times. QSL via M3KBU, direct or by the bureau. Islands currently mentioned are as follows:
Inner Hebrides (EU-008)
Skye (IOSA NH07, SCOTIA CN14)
Raasay (IOSA NH10, SCOTIA CN24)
Outer Hebrides (EU-010)
Baleshare (IOSA OH26, SCOTIA HI11)
Benbecula (IOSA OH04, SCOTIA HI08)
Berneray (IOSA OH05, SCOTIA HI15, WLOTA LH-0756)
Eriskay (IOSA OH09, SCOTIA HI05)
Grimsay (IOSA OH27, SCOTIA HI10)
North Uist (IOSA OH02, SCOTIA HI13)

South Uist (IOSA OH03, SCOTIA HI06)

EU-090. A team of 7 members of IOCA Group (Sven/DF9MV, Daki/9A2WJ, Franjo/9A2MF, Boki/9A3KB, Matt/DL5MFL and Dado/9A3TA), with Emir/9A6AA as team-leader, will be active as 9A0CI from "Vela Palagruza Island/Lighthouse" (CI-084, LH-0057, CRO-012) between May 8-16th. Activity will be on 80-10 meters using CW, SSB and the Digi-modes. QSL via DE0MST, by the DARC Bureau or direct to: Manfred Stippschild, Sylvensteinstr. 9, D-83661, Lenggries, Germany. They also expect to operate SSB as 9A/homecall and homecall/p from "Mala Palagruza Island" (EU-090, CI-461) and, for the first time, from "Rock of Kamik Od Tramuntane" (CI-960). QSL via their home callsigns. More details are available at: http://www.inet.hr/9a6aa/iocaplan.htm

NA-186. Cezar, VE3LYC, is planning a DXpedition to one of the most wanted IOTAs in the world called Fox Island. Cezar states, "This group sits on the #1 position on the NA-IOTA Most Wanted list with only 3% of the IOTA members having it confirmed. The only activation was back in 1993, for only a few hours. Several years ago Fox Islands had been designated polar bear resting site in the Churchill Wildlife Management Area and became off limits for the public. This past Thursday (Feb. 19th), I had finally been informed that a permit had been issued for my DXpedition, and I will be able to travel to the islands between March 31st and April 3rd. Note that I have also requested a special callsign from Industry Canada, but their evaluation is likely to take a little longer. I will travel with two professional guides who will provide transportation to the island by snowmobiles, bear watch and safety, as well as all logistical support required for such an operation. Outside temperature at that time of the year is expected to be around -10 C. If I'll be able to obtain the special callsign, I will set up a page at QRZ.com where I will update everyone on what follows." Costs of this operation are very high and Cezar is seeking any possible support from both group and individual donors. Cezar states, "Any donation will be truly, very much be appreciated. There are two things that I will include later on the QRZ.com page. First, about the QSLing. Those who choose to mail direct requests should check the cost of mail from Canada to their QTH. QSL requests received with insufficient return postage will be automatically sent via the bureau. Secondly, I will be camping in total wilderness without internet access on the island. As such, DX Cluster posts addressed to me as criticism or requests are useless. I am determined to give all parts of the world a chance, and I ask DXers to respect my direct calls."

J8, ST. VINCENT. Dave, G3TBK, is once again active from here as J88DR. He was in last weekend's ARRL DX CW Contest but is also expected to be in ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band/Low-Power

entry. Activity outside of the contest will be on all HF bands, especially 30/17/12 meters, but mostly on CW. QSL via G3TBK, direct or by the RSGB Bureau.

JD1, OGASAWARA. Operators Hide/JM1LJS and Hiroyuki/JG7PSJ will be active as JD1BLK and JD1BMH, respectively, from Chichijima Island (AS-031) between April 29th and May 12th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via their home callsigns.

KG4, GUANTANAMO BAY. Dan, W0CN, will be on a short work assignment and active as KG4CN from Guantanamo Bay, Cuba (GITMO, IOTA NA-015, Grid FK29), from February 26th until March 9th. Activity will be on 160-10 meters, mostly SSB and some CW. Also, look for Dan to be operating in the ARRL DX SSB Contest (March 7-8th). QSL to W0CN (LoTW/direct/Zero-Bureau).

KP5, DESECHEO ISLAND DXPEDITION (News/Update).....
* The K5D DXpedition to Desecho Island continues to be on the air until February 26th. On February 20th, "Group #2" left the island and was replaced by "Group #3". "Group #1" will be staying during the whole K5D operation. Pictures of the groups as follows:
#1 http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/group1.htm
#2 http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/group2.htm
#3 http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/group3.htm
The team has fought hot weather, high winds and seas which cause them to lose several antennas on the beach due to guy-points being washed away, but the DXpedition continues to operate effectively. Plenty of new pictures are being added daily to the DXpeditions Web site and the K5D QSO count keeps climbing high. As this was being written (Sunday at 1823z), the K5D QSO count was just under 86k contacts (+41k/CW, +38k/SSB and +5k/RTTY). This count does not include QSOs being made on the satellites. Remember, online logs at available at: http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/lookup.htm
Activity will continue on 160-6 meters using 6-8 stations on CW, SSB and RTTY. QSL via N2OO. Remember for updates/logs/pictures, visit the KP5 Web page at: http://www.kp5.us

MJ, JERSEY. Operators David/G3NKC, Dave/G4BUO, Martin/G4XUM and Phil/GJ4CBQ will be active as MH4K during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via G3NKC.

P4, ARUBA (Change of Plans). Andy, AE6Y, will be active as P49Y during the ARRL DX SSB Contest (instead of the CW Contest -- March 7-8th) as a Single-Op/All-Band entry. QSL via AE6Y.

PJ7, ST. MAARTEN. Bil/W8EB and his wife Dorothy/W8DVC will be here between February 22nd and March 19th. Activity will be on 160-10 meters, CW, SSB, RTTY and PSK31 as PJ7/W8EB and possibly PJ7/W8DVC. Operations will be limited because he is on holiday. Bil will operate in the ARRL DX SSB Contest (March 7-8th) as PJ7B, and as a Single-Op/All-Band/Low-Power entry. This will be Bil's 14th consecutive ARRL DX SSB Contest participation from St. Maarten. Also look for him to be in any RTTY contests. All QSL requests go to W8EB. Visit their PJ7B Web site at: http://www.qsl.net/pj7b/

QSL INFO AND NEWS.....
QSL ROUTES by Johannes/DK8JB and Tedd/KB8NW:
CM8CAD via QRZ.com address
CO8LY via EA7ADH
CO8TW via HB9SVT
J88DR via G3TBK
P40LE via LoTW or direct to K2LE
P40R via N4RR
RW2F via DK4VW
VP2VES via AK0M

HK1AT QSL STATUS. The HK1AT Team reports that there was a mistake in the printing of the QSL card and the name of the island (Mucura Island, IOTA SA-078) was omitted on all the QSLs confirmed so far. The team has proceeded to solve this problem and all those QSLs already confirmed, will be resent and with a new QSL with all the necessary data.

NEW QSL MANAGER. Nenad, VE3EXY, announced that he is now managing VE1OTA QSLs for "NEW" activations (all QSOs after January 2009). VE1VOX will still handle his own cards as well as OLD VE1OTA activations (all QSOs before January 2009). For more details, see QRZ.com.

NEW QSL MANAGER. Joe, W3HNK, is now the QSL Manager for SV0XBM/9.

TO3R QSL STATUS. Alex, RW3RN, states that he has received the TO3R QSLs from the print. Look for them to go out soon.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: 3B8CF, 5N/LZ1QK, 9M6/N2BB, BG1DRJ/2, C94KF, E51KAJ, E51QQQ, EY8/K4ZW, FO/KH0PR, H40MY, HI3T, JX9JKA, T77C, TR50R, TT8JT, VP6PR, VP9GE, VU4RG and ZB2FK

QSLS RECEIVED VIA THE BUREAU: 3DA0ZO, 5B/LZ2HM, 8R1K, 8S5LH, 9A7W, 9A9Z/P, A25HQ, BL7IN, C50C, C91KDJ, DF0CHE/LH, DF1KSP, DF1RA, DF1VB, DF2CH, DF0CG, DJ1HA, DJ4GJ, DJ5KK, DJ6OL, DK0MA, DK1ZH, DK2YCT, DK4QT, DK5KN, DL0RS, DL0SHW, DL1DBR, DL1EST, DL1PR, DL3HH, DL4DBM, DL6ABN, DM4NF, DO6RO, DO7DP, DP4P, DR1A, E51WWA, EU5ROPE, EV9P, F8KTH/P, HB2008FS, HB2008ND, JW8BCA, OZ/DL1TM, PA5DD/P, RA3RGQ/1, RA6CY, S58AL, SD3A, SG5X, SK7L, SL1HF, SU8DLH, T6EE, TK/HA4XG, UA6AF/P and VP2EFB

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F in the CQ 160-Meter SSB Contest (February 27th-March 1st) as a Multi-Op entry. QSL via DK4VW.

S9, SAO TOME (AF-023). Georg, DK7LX, will once again be active as S92LX from June 13-27th. Activity will be on 80-10 meters CW only. He plans to have a Web site available which will include an online log search. QSL via his home callsign, direct or by the bureau.

SPECIAL EVENT. Look for special event stations to be active with the "1658" within their callsigns on February 26th. Activity is to celebrate the "Treaty of Roskilde" when the three most southern provinces of Sweden [Skane (Scania), Blekinge and Halland] became under Swedish rule after

more than 800 years of Danish rule. Working these stations is good for the "Roskilde 1658 Award". To qualify for the award you must work two Swedish award callsigns with 1658 in the call, or OZ1658ROS and one Swedish award callsign. During the rest of the year four Swedish award callsigns or three Swedish award callsigns and OZ1658ROS are needed. The award is also available for SWLs. All callsigns, maybe with the exception of SH1658DK, will be active sometime during the day on February 26th. Most activity will take place after work hours, that is around 1600z or later, on 80m and 40m. Some stations will be active on 20m and other DX bands around 0800-1500z, if conditions permit. Also, SB1658OZ will be active on PSK31 near 14070 kHz on February 26th, if conditions permit. This station is situated in the province of Blekinge, and is also valid for the very rare "Lan K" for the national WASA/HASA awards issued by their IARU organization, SSA. Only a handful of hams are active on the HF bands from the county of Blekinge. "Roskilde 1658 Award" was presented in the February 2009 issue of CQ Amateur Radio. Check out their activities calendar on the Roskilde award's Web site for complete information at:
http://www.sk7bq.com/roskilde
The calendar will list all callsigns that will be active with their approximate dates/times and frequencies. The calendar is updated continuously when new activities are announced. An online log is available as well. It is updated at least every month if there has been activity with the callsigns. It will also tell you if you have qualified for the award.

SV9, CRETE (EU-015). Willi, DJ7RJ, will be active as SV9/DJ7RJ between February 25th and March 15th. Activity will be on 160-10 meters, using CW and SSB. QSL via his home callsign, direct or by the bureau.

T2, TUVALU. Operators Bob/W7YAQ and Bill/N7OU are now active on Tuvalu as T27A and T27OU, respectively, until March 2nd. Both operators were active this past weekend as T27A in the ARRL DX CW Contest as a Multi-Single entry. Look for activity this week on 160-10 meters, mostly CW, some RTTY. QSL via their home callsign.

TA, TURKEY. Members of the Telsiz ve Radyo Amatorleri Cemiyeti Mustafakemalpasa Subesi (TA3KZ) and the Balkan Contest Club (LZ1KZA) will activate TA3KZ from small village Tirnova near Mustafakemalpasa (QTH Loc:KM49FV) during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via TA3KZ, by the Bureau or direct.

V3, BELIZE. Gerd/DJ4KW and Gisela/DK9GG will once again be active as V31YN/p and V31GW/p, respectively, from Blue Marlin Lodge on Southwater Caye (NA-180), between February 26th and March 3rd. Activity will be on all bands and modes. QSL via their home callsigns, direct or by the bureau or LoTW.

VP2M, MONTSERRAT (NA-103). Operators Mike/W1USN, Scott/W1SSR and Bob/AA1M will be active between February 25th and March 7th. Their callsigns have not yet been assigned, but they have requested VP2MPR (W1USN) and VP2MPL (AA1M), if not, VP2M/homecall. Activity is planned for CW, SSB and PSK-31. QSL via their CBA.

VK9M, MELLISH REEF. Operators George/AA7JV and Tomi/HA7RY will be active as VK9GMW in what they call "another low-key, simple DXpedition", from Mellish Reef between March 22nd and April 6th. Please note that the dates are approximate and may change due to weather. The operation will have a strong low-band focus, although VK9WMW will operate on all HF bands. QSL will be via HA7RY, by the Bureau or LoTW or direct to: Tamas Pekarik, Alagi ut 15, H-2151 Fot, HUNGARY. After VK9GMW has gone QRT, they will launch an "Online QSL Request Service" (OQRS) on their Web site. If you want to receive your QSL via the Bureau, please use that form to request the card. They will check your QSOs against the log and send your card to you via the Bureau. This method will allow them faster processing, helps them protect the environment, and you will receive your VK9GMW card faster. For more information, please visit the VK9GMW Web page at:
http://www.vk9gmw.com
For donations, please access: http://vk9gmw.com/support.html

ZF, CAYMAN ISLANDS (NA-016). Bob, K3UL, will once again be active as ZF2UL between February 27th and March 7th. Activity will be mainly CW, "holiday style" on 160/80/30 meters. QSL via his home callsign.

ZP0, PARAGUAY. Tom, ZP5AZL, plans to be active as ZP0R during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band entry. QSL via ZP5AZL. Visit Tom's Web page at: http://www.qsl.net/cx6vm/ZP5AZL

ZY0, FERNANDO DE NORONHA. Operators Anderson/PY2TNT, Fabio/PY2AAZ/AC2AC, Alex/PY2WAS and Bob/N6OX will be active as ZY0F from Fernando de Noronha Island (SA-003), from June 10-15th. Activity will be on 160-10 meters including 60/30/17/12 meters (60m under temporary licensed granted by the Brazilian Government) using CW and SSB. QSL via PY2WAS, by the bureau or direct. This DXpedition is sponsored by Spiderbeam Antennas. Also, see ZY0F on QRZ.com.

hacksaw the top and bottom angle bars to just break the lip that
extends out from the mast (rather than lays against the mast).

Bend the angle bars and screen 60 degrees along the length of the mast
so that each side points towards the separate transmitter clusters.
(Giving the appearance of a ship prow pointing halfway between the two
clusters.)

Effectivity? You lose up to 3dB gain; your nulls fill in somewhat;
you don't spend any money.

If I DIY, I'll need only one; I'll keep the 4228 and couple it with the DIY.

How do I couple two antennae onto one cable?

Thanks.

If you can stand a loss of 3dB, I reckon that should work OK.

As you increase the angle between the two parts of the antenna, the
presently 'pointed' polar diagram will broaden and flatten, then it will
start going heart-shaped (with an increasingly deep null in the centre).
The only downside is that, when you are looking at one transmitter, you
will be picking any reflections coming from the direction of the other.
But, being digital, you will probably get away with it.

Just one point: I'm wondering if, for the highest gain towards each
transmitter, the bend should be 60 degrees - or maybe something a bit
more would be better?

TV splitter. Any place such as Best Buy, Wal Mart, Radio Shack should
have them. Normally used to split one antenna to two TVs. Just reverse
it and put it up by the antennas. This will "combine" the two antennas
and send the signals down one coax to the TV.

==========================================
Have a Time Warner labeled cable TV splitter here: 5 -1000 MHz with
F-type female connectors. Attenuation 3.5 dB applicable to each channel
Ex US fleamarket

Frank GM0CSZ / KN6WH
```

If it had been for analogue, I would have said no, no, no, no, no, no -
never EVER use a wideband splitter to combiner two antenna feeds. When
you are looking at one transmitter, you will be picking any reflections
coming from the direction of the other. However, as this is digital, you
may get away with it (just like bending the antenna to obtain two
lobes).

However, you are far, far better off with a separate feeder and a 2-way
A/B switch. They are only a few dollars each.

And then, what? Walk to the switch to throw it from A to B or vice-versa
every time you zap to another channel?
That does not sound like "better off" to me...

Better in the sense of being there to throw the switch, maybe. But I've got a programmable-event DTV converter box which allows me to record shows automatically. The antenna set-up needs to be automated.

Thanks.

Some DTV converter boxes support the CEA-909 or CEA-909A "smart antenna" interface, which allow a command to be sent to the antenna to change the antenna's behavior (directionality, frequency setting, etc.). A good DTV converter will identify the best antenna setting for each channel (I imagine this takes place during the initial scan-for-channels process) and will switch the antenna system each time it tunes to a new channel. In CEA-909A, the signalling can be done over the same coax cable which carries the antenna signal; the older CEA-909 requires a separate control cable.

Not all converter boxes support this feature, and of course you need to have an antenna which has Smart Antenna support.

Unfortunately, the Smart Antenna specs are not freely available... a hardcopy or download version costs somewhere in the neighborhood of $70. I don't know if anyone has reverse-engineered the data format.

Well, if you put a smallish bend in the antenna of (say) 10 degrees, you
will still have one lobe, although it wider and the gain will be lower.
Only when you increase the bend to (maybe) 20 degrees will you start to
get two separate lobes.

I'm somewhat guessing, but I reckon that the angle between the two lobes
will continue to be less than the angle of bend until the bend is
considerable - and possibly more than the 60 degrees between the
transmitters. Eventually, the angle between the lobes will 'catch up'
with the angle of the bend - but maybe only when the bend is a full 180
degrees.

So, for the two lobes really to be 60 degrees apart, maybe the bend will
have to be (say) 65 degrees? What do you reckon?

Hi Ian,

That sounds more reasonable, but I would suspect that when the hammer
is swung, that 5 degree slop will par for the course. It will take
more sophistication to peak both clusters independantly to prove your
point, but it could well be.

I thought I wasn't talking total rubbish (like I usually do).

Unfortunately, I've just spotted a problem with bending the antenna. If
you cut partially through the two angle bars to weaken them, and then
bend them and the reflector backwards by 60 degrees, the 'feeder' which
joins the two halves of the antenna will have to be stretched - and you
won't be able to do that. You would have to replace it.

Nah... It would be silly to ruin a handsome antenna. Far better to put
up a separate antenna and feeder, and use some sort of A/B switch at the
TV end.

Hey OM
I guess nobody here is a youtuber? I seen on youtube a guy has a 4 bay
bow tie, shows how to make one for chump change. Like 5 steel wire
coat hangers and a 2 ft 1X2 and some screws, and a balun transformer.
I saw it on youtube he makes a 4 bay bow tie antenna in under 5
minutes. It doesn't have a screen reflector, it's more like
bidirectional, well almost.

You can't; one is 75 ohms and it looks like the one you have
is 300 ohms. You'd need a balun on the 300-ohm bowtie antenna to
make it 75 ohms, and then use a TV combiner/splitter to
combine the two antenna feedlines down to one single
feedline.

I don't see that one, but this one has several possible configurations, one
of which includes multiple bays aimed in different directions:

Umm .....
I've skipped through the video, so maybe I've missed one or two key
facts. However:
1. Are there three identical antenna, each pointing 120 degrees apart,
each with its own feeder, or
Are all three combined to make an approximately omnidirectional antenna?
2. The reflector seems to be far too close to the active elements. I
would have expected it to be a quarter wavelength away.

Sorry, that was a little American-centric comment (must remember: Imperial Measurement System is not universal...)

The most basic standard lumber used in construction in N. America is the 2x4 stud (2 inches x 4 inches cross-section, available in 8, 10, 12, 16, and (I think) 20 foot lengths).

This is what the guy building the antenna is using as the structural wood members.

Actually, dimensional lumber has shrunk over the years just like candy bars and dollars. Only in very old houses will you find 2 X 4s that are 2" X 4". I'm getting pretty geezerly, and it was before my day -- they were down to 1-5/8" X 3-5/8" at the earliest I can remember. Now a "two-by-four" has shrunk to 1-1/2" X 3-1/2". When they get down to 2 X 4 cm, we can finally go metric without having to do any conversions. Maybe when they get down to 1/4 X 1/2 inch they'll get revalued like a peso?

What are the critical dimensions? If one wanted to use better materials (plastic rather than wood for the base; aluminum tube rather than wire), how does one calculate the dimensions?

I mean, "about 2 inches down" and "about 5-3/4 inches between elements", and "tips about 3 inches apart" are the results of some calculations. What are the calculations that determine these dimensions for this style of antenna?

Thanks,

All dimensions will be approximately +/- 0.001".

Seriously, when the antenna simply gets dumped behind the TV set, do you
really think that any of the dimensions will be very critical?

If one were to build something to better specs, with better materials, in a
much better location (not dumped behind anything)?

I presume there's antenna design formulae that result in the proper
dimensions for this type of antenna. Where can I find this information
(preferably on-line)?

With my Google criteria, I don't find much that's useful.

Thanks.

The following may be useful:

http://www.digitalhome.ca/ota/superantenna/index.htm

Single- and double-bay Gray-Hoverman UHF antennas, which can be built
using either of several styles of reflector - a full screen, a split
screen, or a set of collinear rods.

When I lived in the Air Force barracks a guy bought a very similar
antenna at Radio Shack. This was after cable had been removed because
so many people were stealing it.
Anyway it didnt take long before everyone started building their own
antenna copied from the RS one. The stock of brazing rods at the
motorpool was depleated very quickly.

Funny thing, I was accused of stealing cable though I wasnt hooked up
to it. I was able to demonstrate to the First Sargent that I could
receive Cable TV just off of the leakage from the system and argued
that the Cable company had the responsibility to prevent radiation
from their equipment. He agreed. What I learned was really happening
was that the guy in the room next to me had his rabbit ears connected
to the cable input of his TV and was broadcastinig it. About 10 rooms
could clearly pickup the signal from this. Unfortunately several
people had simply made illegal connections to the cable system. I
understand that the same thing is happening now with internaet service
in the barracks. My nephew tells me that it has been forbidden to have
a wireless router in the barracks for ths isame reason.

I see the 300 ohm feedpoint for the single bay but the double bay is a
little different. I can see something's attached to the two bars that run
vertically and join the antennas (in the photo that shows the double bay
with PVC frame), but I can't tell if there's a balun there. Do we know what
the impedance is at that point?

I may need to try reaching the people who did the web page. Thanks.

Given that the presumed bandwidth of the antenna ranges from 470 to 700
Mhz (not counting any VHF bonus) I figure there's no specific impedance
other than 'ballpark'.

I don't think there's anything wrong with the materials. It's basically
a sound design. It's just that (unless I'm very much mistaken) the
elements need be around a quarterwave in front of the reflector (more
like 6 inches instead of the less than 2 inches shown), and you need to
mount the antenna 'in the clear', and point it towards the transmitter.
Obviously, with these materials, the antenna is best suited to mounting
in a loft, provided that the roof tiles and lining are adequately
transparent to UHF RF.

Here in Britain it is illegal to 'tap' an individual's or
organisation's/company's Wifi for Internet Access without permission,
however with consent of the Wifi router owner it is permitted.
I know that for example in the Netherlands (usually large)houses are
often occupied by up to 20 students . With 1 Hi-speed /unlimited
download (A)DSL connection , they all share that 1 connection.
They don't need an e-mail address from the ISP but have one or more from
Google or Yahoo .

If I had a neighbour close by I would be happy to share my connection.

I don't think that this is necessarily true. There are many valid antenna designs in which the reflector spacing varies quite a lot from 1/4 wavelength.

In Yagi designs, for instance, the spacing between driven element and reflector has a big effect on the antenna's feedpoint impedance, and is sometimes set to yield a convenient feedpoint impedance match with the cable. It doesn't have all that much effect on forward gain.

With a "sheet reflector" antenna design, I suspect that the reflector spacing won't have much effect on either forward gain or on front-to-back ratio. It's entirely possible that (in this design) it was set as it was in order to result in a not-intolerable impedance match over the relatively broad range of frequencies that this antenna needs to be able to cover.

> and you need to
>mount the antenna 'in the clear', and point it towards the transmitter.

Yup, that's best.

No doubt, so I don't think a wooden antenna is the final solution. Best
check out how the scheme might work with scrap wood and coathangers and
if that works then you could upgrade to finer materials for a more
permanent solution that works in the rain.

On the other hand it may work well for you in spite of the loss in gain.

Nice idea in theory, bad idea in practice, since you can't monitor his PC.
If something illegal goes on from his computer, your IP address will be
logged as the source.

I note a valid objection to this thread going OT and will not post on it
again.

That's what spar varnish is for. Metal booms with the uninsulated
elements going through are probably more "shorted" than from wet wood!
When aluminum is out in the rain, it's just as wet as wood would be.
The water may detune it slightly. Wood can be a great choice for boom
material (with proper varnishing)...it would probably outlast an
aluminum one in a salt air environment....

In this case the wood is being used as the feedpoint insulator.

Wood is fine, it has been used for UHF colinears for decades....
The trick is to have the elements supported (in contact with
wood) at the low voltage,
high current points. CC made a colinear back in the 60s
that used good insulators, but had them on the high voltage
points, which affected the antenna's performance.

Criminal penalties apply to computer crimes that could be committed via such a shared connection. Notable are the downloading of child pornography (a five-year federal felony in the US) and the misuse of a "zombie" computer for conducting a distributed denial-of-service attack or for sending spam.

In these and other computer crimes, the shared connection is via the subscriber's IP, no matter where the misused computer is located -- in the house, in the barn, in the street, next door, etc. The authorities want to talk to YOU!

Even if the person with whom you share your connection is a model citizen, you still face a risk of misuse out of his sight.

I hope I've made my viewpoint clear.

No it hasn't. The original thread, 'Hack a DTV antenna for dual
directions?' has been hijacked, and changed to 'Sharing Internet
Connection'.

You have been replying "take it to another thread" on a post that already
has changed the subject.
When you don't consider that another thread, pity for you.

So now it is a new thread "Sharing Internet Connection". That is
what was requested. No need to put more comments about changing thread
into there.

I thought that mine did!

When the tree is collapsed, the subject is 'Hack a DTV antenna for dual
directions?' It's only when you expand it, and look 66 postings down the
tree, that you find that some idiot has changed the subject to
'Newsreaders that thread by subject'

Are there any news readers which allow you to rearrange news posts,
which have already been received, into a separate, new thread, and then
have further incoming posts automatically routed there?

My newsreader, slrn, does just that. It is starting a new thread at
toplevel everytime you change the subject.

Your newsreader is broken -- it doesn't understand threads. Here are all
the contributors to the "Hack a DTV antenna for dual directions?"
thread:

True enough if the design work has been do to ensure that the high
impedance points arent in contact with the wood.
In the concerned case this may not be and probably isnt true for all
frequencies concerned..

Glory be to God! I failed absolutely!

No, no NO! What I said was: Do NOT trust your neighbor with your Internet connection. He is not as concerned with keeping you out of prison as you would want him to be if you are a freedom-loving soul. His misdeeds (or the misdeeds of people who have access to his computer, connected wirelessly to your 802.11 Internet connection) will be blamed on you. He does the deed -- you get the beating.

If there is no life without risk, go down to the packing plant and stick your dick in the pickle slicer. Maybe nothing will happen.

;-)

Seriously, do the headers retain a record of a past thread when the subject
line is changed? I ask because I do not recall whether I did that or
whether I went to the <File> menu and initiated a <New News Message>.

When I saw the complaint about being off-topic, I really, truly, sincerely
wanted to comply with general NG etiquette (and I thought I was doing so).

I already Googled for NG etiquette and got a lot of stuff, nothing
conclusive on this subject. URLs, please. If I do wrong, I need to undo
it.

Answering my own question, for some newsreaders, a change of the subject
line DOES NOT create a new thread.

Therefore, to avoid taking the "Hacking a DTV Antenna ..." thread off-topic,
I should have posted a new message. We're all still learning.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and Bill Moore/NC1L for the following DX information.

PRESS RELEASE: From the "Century Club Awards Weblog"

Concept of Deleted Entities Reinstated
Feb 27, 2009 11:28 ET

Bill Moore, NC1L, ARRL Awards Manager, reports the following:

In 2000, DXCC program rules were modified substantially in an effort to create simplified and stronger rules that would help make DXCC work well in the 21st century while tightening the DXCC List Criteria. At the same time the DXCC Challenge Award/competition was created as part of the modernization effort. The Challenge is intended to allow for an energetic new pursuit in DXing that focuses on statistics based upon only current entities on the List. The Challenge has been highly successful.

Another change resulting from this rules modernization was a subtle change from "deleting entities" to "removing entities." The intent of this change was to no longer allow the addition of deleted entities to the Deleted Entity List. In the subsequent years since DXCC 2000 there have been few issues with this concept and resultant little attention given to the realities of the ideological change. Recently, however, since the rollout of Logbook of the World (LoTW) and various political changes internationally, it has become evident that the program should return the concept of deleting entities for mostly administrative reasons. "Removing" an entity from the DXCC system is non-trivial if not impossible. Also, the success of the DXCC Challenge and the DXCC Honor Roll have made a great game better by providing a playing field that isn't heavily biased by age.

It seems that the concept of a "deleted" entity -- one that is marked as deleted and not applicable to Honor Roll or Challenge but that still exists in the records -- is an elegant solution to the problem of changes

in entity status. Distinguishing entities that are no longer extant makes sense as a means of leveling the playing field for younger participants in DXCC, but to wipe out someone's past accomplishments altogether just seems too drastic.

At its last meeting the ARRL Programs and Services Committee decided that administratively the concept of deleted entities should be returned to the DXCC program. Necessary changes to Section II, DXCC List Criteria have been made to the rules and part 5 is renamed Deletion Criteria. The concepts for deleting an entity do not change. If an entity is deleted it will be added to the Deleted Entities List and the statistical records for DXCC participants will be adjusted accordingly, just as they had been in the years prior to 2000. The numbers shown in the individual DXCC records lists have always included the Deleted Entities. No DXCC participant needs to take any action at all.

Yes, and I screwed it up by changing the <Subject>, thinking I was creating
a new thread. However it doesn't always happen that way.

It went off topic, I followed and was called on it. The attempted "fix"
turned out to be my screw-up.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, N3SL, NG3K, N4AA & QRZ DX, W5CW, K6YP, WB6PSY, K8NA, K8YSE, N8OFS, W9VA, W0CN, DX-IS News Site, Pete's-DX-Newsdesk, 2E1EUB, 4L2M, DK8JB, DL7MAE & The DX News Letter, F5NQL & UFT, G3NKC, GI7OMY, I1JQJ/IK1ADH & 425 DX News, JR3TVH, M0URX, OM0A Contest Group, OE1WHC, RSGB IOTA Web Site, VA3RJ & ICPO and the VHF-DX-Portal for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd/February, through Sunday, 1st/March there were 224 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, KP5, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2009 INTERNATIONAL DX CONVENTION. The 2009 International DX Convention in Visalia, California, will be held April 17-19th. This is the 60th anniversary of this event which promises to be even more special this year than it has been in previous years. Special attractions this year include:

* Contest Academy by the Northern California Contest Club
* Radio Arcala Project with OH2BH & OH8NC
* Special Guest and Banquet Speaker: The Hon. J. Scott Redd (K0DQ),
Vice Admiral, U.S. Navy (ret)
* Breakfast Program: Desecheo, KP5 DX-Pedition
For complete program information, see: http://www.dxconvention.org
Hurry!! Special Pre-registration Price Ends March 20, 2009!!

2M, SCOTLAND (Satellite Op). Paul, 2E1EUB, will once again be active as 2M1EUB from March 21st for one week. He will sign 2M1EUB and be active on all the satellites from northeast Scotland. Also, look for him on 160 and 80 meters. Checkout QRZ.com under 2M1EUB for more info.

5N, NIGERIA (EME and Possible IOTA Op). Bodo, DL3OCH, who was recently active as KT3Q/4 from Key Biscayne Island [NA-141] in December, will be working from here between March 5th and July 24th. Activity will be on all HF bands (160-10 meters) plus some operations on EME. His expected callsign will probably be 5N/KT3Q. There is mention that he may also activate the Bayelsa/Rivers/Akwa Ibom etc States IOTA Group (AF-076). QSL via DL3OCH.

9M8, EAST MALAYIA. Steve, 9M6DXX, will operate as 9M8Z from Sarawak (OC-088), March 26-29th. Activity will include the CQ WPX SSB Contest (March 28-29th) as a Single-Operator/Unassisted/All-Band/High-Power entry. Outside the contest look for him to be on 40 meters SSB using a 3 element Yagi. QSL via M0URX, direct, by the Bureau or LoTW. PLEASE NOTE: QSL Manager Tim, M0URX, states, "This week 180 QSL cards have been posted by air mail from recent activities. Logs have also been uploaded to LoTW."

AH0, MARIANA ISLANDS. Operators Kuniyoshi/7L1FPU (W1FPU), Yoshiki/KH0UA and Satoshi/N2QP will be active as AH0BT during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via 7L1FPU.

BACK TO AFRICA. Tim, M0URX, reports that John, 9M6XRO, is planning once again to be in Southern Africa this year. An E-mail by John explains (edited): "I can now confirm my Africa trip dates. I arrive in Johannesburg via Kuala Lumpur and Doha on July 25th, 3 days earlier than planned. I can then help Daniel, ZS6JR, load up and move all the gear to Lesotho (7P) and get the antennas and equipment set-up before the others arrive in Lesotho on the 29th. I hope to put ZS6/GM3OOK on the air for a bit en route possibly from the 25th evening. Daniel has not yet confirmed the date we will drive to Lesotho. Looks like I will also have the option of operating from Swaziland again as 3DA0OK, but the duration and dates will depend on the logistics of the whole operation as everyone is due back in Johannesburg on August 13th. I will keep you updated on that part of the itinerary. My flight back to Borneo leaves on August 14th, once again via Doha. QSL via M0URX."

C5, THE GAMBIA. Stewart, GW0ETF, is on holiday here for 2 weeks as of February 23rd. He is expected to be active (possibly as C56/GW0ETF). No QSNs reported as this was being typed. He planned on taking his K3

for some casual operating, probably CW only, but possibly some RTTY and mainly 20 meters. QSL via GW0ETF direct only. NO BUREAU cards, but he will accept E-mail requests for Bureau QSL. His E-mail address is: gw0etf@btinternet.com

CN, MOROCCO. Hartwig, DL7BC, will be active as CN2BC during the CQ WW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via DL7BC.

EI, NORTHERN IRELAND (30m Digital). Daithi, GI7OMY, informs that EI stations will be permitted to commence operating on Digital modes on 30 meters starting March 29th. He plans to activate the club callsign MI0EPC for European Phase Shift Keying Club (EPC) on that day on 10140 kHz. QSL via GI7OMY.

FP, ST. PIERRE AND MIQUELON. Remember, Eric, KV1J, will once again be active as FP/KV1J from Miquelon (NA-032) between March 4-9th. Activity will be on 80-6 meters using CW, SSB, RTTY and PSK31. He will also be in the ARRL DX SSB Contest (March 7-8th, 2009) as a Single-Op/All-Band/Low-Power entry. Antennas will be a N1IW off-centered fed dipole (80-10m), SteppIR vertical (40-10m) and a PAR-6 Moxon for 6m. QSL via his home callsign, direct or by the Bureau. Also, LoTW or eQSL. Visit his Web page at: http://www.kv1j.com/fp/March09.html

GJ, JERSEY (EU-013). Dez, G0DEZ, will be active as GJ3WW during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Low-Power entry. This will be a holiday style operation. QSL via LoTW or direct to G0DEZ.

IOTA NEWS.....
EU-048. Operators Christophe/F5UBH, Juan/F5IRC and Karim/F4CTJ will be active as TM2HC from Hoedic Island (DIFM AT 017, DIM O25, WLOTA 0851 and DFCF 56-033), March 13-15th. Activity will be on the HF bands using CW, SSB, PSK31 and RTTY. QSL via F5IRC, direct (w/SAE and postage) or via the French REF-Union Bureau.

EU-059. (UPDATE) Col, MM0NDX, will be active as GM5A and MM0NDX/P from St. Kilda, Scotland, between July 24-27th. This will be a family holiday-style operation from the campsite in Village Bay. St. Kilda is one of only two-dozen global locations to be awarded "World Heritage Status" for both natural and cultural significance. Col will participate in the 2009 RSGB IOTA Contest (July 25-26th) as GM5A. Outside of the contest he will sign MM0NDX/P and possibly be active on 80 and 40 meters. QSL GM5A via GM4FDM and MM0NDX/P via M0URX. A Web site is now active for this activity at: http://eu059.wordpress.com/

NA-046. Members of the Fall River Amateur Radio Club and Team HAMCOW will be active during the New England QSO Party (May 2-3rd) as W1ACT/p from Martha's Vineyard (USI MA-005S, WLOTA LH-2804). Suggested frequencies are: 3540, 7040, 14040 and 14280 kHz. QSL via N1JOY: Roland Daignault, 19 Davis Rd, Westport, MA 02790-3433. For more information, please visit:

http://hamcow.net

NA-141. (Special Event) Members of the Jupiter Tequesta Repeater Group, West Palm Beach Amateur Radio Club and Palms West Amateur Radio Society are planning to activate W4K to celebrate John F. Kennedy's birthday from Peanut Island (USI FL-479, Palm Beach County, FL), May 29-30th, in 2010. Reports indicate it is from "JFK's old Cuban missile crisis bunker". Activity will be focused on HF (mainly 40/20m), 6 and 2 meters using CW and SSB. Cards are presently being designed for the event. This will be the first time Peanut Island will be activated. More information should be forthcoming.

NA-186. (UPDATE to OPDX.897) Cezar, VE3LYC, is planning a DXpedition to one of the most wanted IOTAs in the world called Fox Island. Cezar states, "This IOTA group has only been activated very briefly 16 years ago and being in demand by 97% of the IOTA members sits at #1 on the Most Wanted NA-IOTA List. He announced this past week that the callsign to be used for the DXpedition will be VY0A and has been approved by Industry Canada. He will be traveling to the island between March 31st and April 3rd. Cezar will use an IC-7000 (100w) and a multi-band vertical antenna, focusing on 20/30/40 meters, CW and SSB. Look for updates to appear on QRZ.com at: http://www.qrz.com/db/VY0A Cezar is looking for support. Costs associated with this operation are considerable, and both group and individual support are sought. To support this operation, please contact Cezar at: ve3lyc@hotmail.com

J6, ST. LUCIA (NA-108). Just a reminder that John, W5JON, will be active as J6/W5JON from Marigot Bay between March 1-11th (2009). Activity will be on 160-6 meters SSB using dipoles and 6m yagi. Also, look for activity in the ARRL DX SSB Contest (March 7-8th, 2009). QSL via W5JON.

J7, DOMINICA (NA-101). John, G3LZQ, will be active as J79WR between March 5-25th. Activity will be holiday style, but he plans to concentrate on 160 and 80 meters, and participate in the upcoming Commonwealth (BERU) Contest (March 14-15th). QSL via G3LZQ.

KG4, GUANTANAMO BAY (Change Of Plans). Dan, W0CN, informs OPDX that there is a delay in his work assignment at Gitmo -- now tentatively he is planning for April 10-20th for his KG4CN from Guantanamo Bay, Cuba (GITMO, IOTA NA-015, Grid FK29). Activity will be on 160-10 meters, mostly SSB and some CW. PLEASE NOTE: There will be no RTTY. QSL to W0CN (LoTW/direct/ Zero-Bureau).

K5D DESECHEO ISLAND DXPEDITION NOW QRT (Update). The K5D Desecheo Island DXpedition is now QRT and in the history books. Their Web states, "Every one of our goals was exceeded; most significantly, the number of QSOs." The total QSO count was 115,728! On their Web page the status of K5D log states that the last QSO was "26-Feb-2009 at 09:39:00" and the following statistics are (without Satellite QSOs):

Band SSB CW RTTY Total
---- ----- ----- ------ ------
6M 17 79 * 96
10M 163 64 2 230
12M 641 265 1 907
15M 6132 4176 443 10751
17M 12969 7191 1343 21503
20M 15702 9592 1728 27022
30M * 13452 2204 15656
40M 6791 8467 868 16126
80M 7419 8800 * 16219
160M 1984 5231 * 7215

Mode Total 51819 57317 6589 115725

In addition to the normal methods of QSLing K5D, they now are offering an Online QSL Request System (OQRS). You can request your K5D QSL one of four ways: * OQRS DIRECT <http://df3cb.com/k5d/oqrs.php> (5 USDs minimum) * OQRS BUREAU <http://df3cb.com/k5d/oqrs.php> (No Charge) * DIRECT MAIL WITH .44 cent w/SASE/$$$/IRC(S) -- PLEASE remember U.S. postage is going up in May. * VIA NORMAL INCOMING BUREAU The K5D log will be uploaded to LoTW in early 2010. For complete details about the OQRS, please click on the links above. Direct QSLs are via N2OO: K5D QSL Manager, Bob Schenck, P.O. Box 345, Tuckerton NJ 08087 USA. Remember for complete details/updates/logs/pictures, visit the KP5 Web page at: http://www.kp5.us

LT9, ARGENTINA (Special Callsign). Members of the Corrientes Radio Club (LU4LG), Villa Angela Radio Club (LU4GO) and Chaco Radio Club (LU4GF) will activate the special callsign LT9L from "Esteros del Ibera", March 21-23rd. The place of operation is the Ibera Interpretation Center, located on the shores of Lake Luna, Colonia Pellegrini, Corrientes Province. Access to this location is from the City of Mercedes, from which it is separated on about 120 km of unpaved road. The Center has a showroom with illustrative material about the history, geography and biology of the park. Activity will be on 80/40/20/15 meters using CW, SSB, PSK, RTTY and SSTV. Operators mentioned are: Ricardo/LU4GL (CW), Raul/LU1JB/L (CW), Luis/LU4LC (SSB), Juan Carlos/LU9GDN (SSB), Ramon/LU7LC (Digital) and Nestor/LU4LE (Digital). QSL via EA5FL: JOSE MIGUEL ALCARAZ Moncho, PO Box 252, 03700 - Denia, Alicante, Spain.

MJ, JERSEY (Correction). Operators David/G3NKC, Dave/G4BUO, Martin/G4XUM and Phil/GJ4CBQ will be active as MJ4K (not MH4K) during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via G3NKC.

NL8, ALASKA (Rare IOTA and USI). Tim Tillman is the only full time resident of Dutch Harbor, Alaska, Unalaska Island, (NA-059, USI AK005S, 3rd S. Central County) in the Fox Island Group and active on Amateur Radio. Tim's original callsign at NA-059 was NO7F/KL7, but he now has the callsign NL8F. NA-059 is a rare Island for IOTA, with only 26% of those participating in

the IOTA award program having it confirmed. He can sometimes be heard on 40 meters (7095 kHz after 0745z). QSL via K8NA (QRZ.com address).

OE100, AUSTRIA (Special Event). Press release by Wolf, OE1WHC, from the Documentary Archive Radio Communication, states (edited): "The 'Radio Club of America' was established in January, 1909, and issued the first ham licences in April of that year. To celebrate 100 Years of Amateur Radio, the Amateur Radio Section of ORF (Austrian Broadcasting Corporation) and the Documentary Archives Radio Communication /QSL Collection, will activate, April 1-30th, a special event station with the callsign OE100M. OE100M is an official 'International Marconi Day' station. Contacts made on Saturday, April 25th, are valid for the IMD Award. QSL via the OE Bureau or direct to OE1WHC. Cards without SASE and IRC or green stamps to cover postage will be processed via Bureau." To see the QSL, download the file at: http://www.qsl.at/down/oe100m.tif

OM0, SLOVAK REPUBLIC. The rare "OM0" prefix will be activated during the CQWW WPX SSB Contest (March, 28-29th) on 160-10 meters by the OM0A Contest Group. Five operators and one YL will enter the contest as a Multi-2 entry. Operators mentioned are: Villiam/OM0AAO, Martin/OM4AAS, Mimi/OM4AQW (YL), Igor/OM6ACI, Peter/OM6PR and Stevo/OM7KW. QSL via OM0AAO.

PA750, THE NETHERLANDS. A group of radio amateurs in the Assen region will be on the air as PA750ASN during the following periods: March 1st and April 15th, and the month of June and September. Operations will be on all bands and modes. Activity is to celebrate the 750th anniversary of Assen city located in the northeastern part of the Netherlands. Also being celebrated is the 200th anniversary (March 13, 1809) of the city's rights granted by Louis Napoleon. A special QSL card will be available on request. QSL via PI4ASN, by the Dutch QSL Bureau or direct by QRZ.com address. NO E-QSL.

PJ2, NETHERLANDS ANTILLES. It seems Bob, K4UEE, (and others) have not had enough DXing after their operation on Desecheo Island and are now heading toward Signal Point Station on Curacao (SA-006, WLOTA LH-0942) to organize a Multi-Multi contest effort as PJ2T in the ARRL DX SSB Contest (March 7-8th). Operators mentioned are (*Desecheo Team): *Bob/K4UEE, *Gregg/W6IZT, *George/N4GRN, Everett/WZ8P, David/K4SSU, Elmer/N4LR, Norman/WA4ZXV, Wayne/KU4V, Jim/W4TE, Don/N4HH, Mary/K1MMH, Harry/W4KJ, George/KI4DSO, Jim/ND4V, *Bill/N4NX, *Chaz/W4GKF and Geoff/W0CG. QSL PJ2T via N9AG or LoTW. Visit the CCC Web site at: http://www.pj2t.org

PS0, FERNANDO DE NORONHA. Operators Bill/W9VA and Jim/K9PPY will be visiting Andre/PY0FF between March 3-10th. They are going there to be active as PS0F during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single entry. QSL via LoTW, or direct to W9VA. Activity outside of the contest will be on 160-6 meters using CW, SSB and possibly some Digital modes. Bill tells OPDX that this is his 12th trip to PY0F -- his first trip was in 1988. ADDED NOTE: An E-mail address will be available with regards to suggestions to operating schedule and both ops will monitor messages at: ps0f@aol.com

QSL INFO AND NEWS.....
JS3OMH BIRD ACTIVITY. Were you lucky to work Ken/JS3OMH as JS3OMH/6 on AO-51 from a few of the Japanese islands (IOTA AS-049)? The islands were TAKARA Island (February 24-26th) and KODAKARA Island (February 26-28th). QSL via the Bureau.

NEW QSL MANAGER. Buzz, NI5DX, has assumed the duties as QSL Manager for Damian, EA8BWW.&#65533;Once logs are transferred, Buzz will be able to confirm all contacts made with EA8BWW. QSL cards will be ordered, so expect a delay of 6 weeks or more to receive your EA8BWW card.

NEW QSL MANAGER. Steve, N3SL, informs that he is now the QSL Manager for Omari, 4L5O, beginning as of 2009. Omari was very active up to 2000, until he took leave of radio for family obligations. Steve does not have access to any logs prior to Janury 1, 2009. Current logs are in hand, with a log search on QSL.NET or the N3SL Web page. Cards are on the way from UX5UO.

NOT THE QSL MANAGER. Mamuka, 4L2M, reports that as of August 2008, UA9LP is no longer his QSL Manager for Russian stations. All Russian stations should use EA7FTR's QSL service.

QSLS VIA LOTW: 9L1AB, C6APG, EF8T, F5IN, FW8DX, HB9LCW, HQ9R, HV0A, NP2KW, R1FJT, RW0A, S21VJ, SK3GM, VK9DWX, VP2ETL, XU7AAV, YN2S and ZL7/SP9PT

QSLS RECEIVED VIA MAIL: 4L8A, 7Q7HB, 7Q7JL, CE1/K7CA, CE9/K2ARB, DS1REE, ER4DX, EY8MM, HB0/DK9FEC, HK3CQ, KP2/AE6XY, LY2ZZ, OA4BHY/2, S79NS, S79NS/p, TF3SG, UK9AA, V85TT, VK9DWX, VQ9LA and YB0AZ

QSLS RECEIVED VIA THE BUREAU: 4X6HP/M, A52AM, C52C, CN2BC, CN4MC, CT3/DJ6QT, CT9L, EA5KB, EF5K, EG5Y, ER3R, EV7DP, EZ8CW, FJ/DJ2VO, HB2008EM, HB2008FS, HB2008LU, HB2008MH, HB2008OK, HB2008VC, JR7WAB, LZ08KM, MM/OQ9E/P, OE1KIDS, OE1MBB, OE2008A, OE2008C, OE2008M, OE2008MOU, OE2008PGQ, OE2008R, OE2008U, OE2008V, OE3WOB, OH0V, OX3XR, OY/DD5FZ, ST2R, SV5/DJ7RJ, TF4M, TM7RWC, TR8CA, UA2FW, UA2FX, UT4EK, VE3FJ, VP5/N1WON, VP8DLG, VU4AN and YK9SV

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F in the ARRL DX SSB Contest (March 7-8th) as a Multi-Multi entry. QSL via DK4VW.

S2, BANGLADESH (Update/Reminder). Some members of the Korea DX Club will be active as S21KD from Dhaka in the People's Republic of Bangladesh between March 7-14th. Operators mentioned are: Kim/6K5YPW, Choi/HL5FUA, Kim/6K5YPW and Yoon/6K2AVL. They plan to operate on 160-10 meters, CW, SSB and the digital modes, using three amplifiers, verticals and beams. Suggested frequencies are:
CW - 1822/1824, 3515, 7015, 10115, 14015, 18075, 21015, 24895 and 28015
SSB - 3795, 7095, 14195, 18130, 21295, 24950 and 28460
Digi - 14082, 21082 and 28100 kHz
Their main purpose for the Bangladesh DXpediton is to provide enough chances to have a QSO with Bangladesh for all DXers who need it. They hope it will be a good chance for Asia and Europe stations to work them

on all bands. Also, they will do their best to work both North and South American stations within workable band conditions. QSLs are via HL5FUA. For more details, updates and their logs, please visit the following Web page at: http://dxpedition.co.kr

TF, ICELAND. Siggi, TF3CW, will be active in the ARRL DX SSB Contest (March 7-8th) as Single-Op/Single-Band (20m) entry. QSL via LX1NO.

TT8, CHAD. Franck, F4BQO, will once again be active as TT8CF between February 27th and July 1st. Activity will be on the HF bands using CW and SSB. QSL direct via F4BQO.

V2, ANTIGUA (NA-100). Just a reminder that Peter, G3TKK, will be active as V25TK between February 27th and March 12th. Activity will be holiday style on 40-17 meters using CW. QSL via G3TKK, direct or by the Bureau.

V2, ANTINGUA. Operators Norman/K1DG, John/K1QX and Martin/W1MD (V26F) will be active as V26F during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single entry. QSL V26F via W1MD.

V85, BRUNEI. Kanzi, JA4ENL, will once again be visiting Brunei from March 6-9th. He will be active as V85NL and operate on all bands (including 30/17/12m), especially on 80/40/20m and the top bands mostly on CW. QSL via JA4ENL, by the JARL Bureau or direct.

V88, BRUNEI (Special Event). Look for special event station V88NBD25 to be active until March 10th. Activity is to celebrate 25 years as an independent and sovereign nation. To mark this auspicious and historic occasion, the Brunei Darussalam Amateur Radio Association, the organizer of this special event station, launched a temporary Silver Jubilee Award which is available to all amateur radio stations worldwide and SWLs. For details, visit the Web page at: http://www.bdara.net/calendar_special.html Also, see details at: http://www.qrz.com/db/V88NBD25

VK7, AUSTRALIA. Chris, G0WFH, will be active as VK7ACG from Tasmania between October 19th and November 17th. He will operate from the QTH of his friend Roy, VK7ROY. Activity will be on all bands, but he plans to concentrate on the lower frequencies. Chris states that a new 60 foot mast will be erected at the QTH of VK7ROY supporting antennas for 160/80/40 meters. QSL via G0WFH, by the bureau or direct. eQSLs are accepted.

VP59, TURKS AND CAICOS ISLANDS. Dave, W5CW, will once again be active as VP5/W5CW between March 24th and April 8th. Activity will be on 160-6 meters (this will include 30/17/12m) CW/SSB. He will also be in the CQ WW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry using the special callsign VP59V. QSL direct ONLY via W5CW or via PO Box 88, Morris, OK 74445-0088.

VP8, FALKALAND ISLANDS (SA-002). John, G3VPW, will once again be active as VP8KF between March 5-31st. This is about John's seventh trip to the Falkland Islands. Activity may be limited at first because he will be working at the "Stanley Ionospheric Observatory" for two weeks. However, the last 10 days are set for some DXing. He is expected to stay with

Bob/VP8LP and Janet/VP8AIB McLeod (the ones that organized the YL only VP8 operation). When active, John will be on 80/40/20/15/10 meters using CW and SSB. He will also focus on the ARRL DX SSB, RSGB Commonwealth and CQWW WPX SSB Contests. QSL via his home callsign.

VP9, BERMUDA. First time DXpeditioners John/W3MF and Bob/K3PH plan to activate VP9I for the ARRL DX SSB Contest (March 7-8th). QSL via N1HRA. They may operate outside the contest as VP9/homecalls.

YV5, VENEZUELA. Operators Suer/YY5EBV, Jose/YV5BM and Jhony/YV5KG will be active as YV5KG during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single/High-Power entry. QSL via YV5KG.

ZL7, CHATHAM ISLANDS (Update/Reminder). Just a reminder that a team of 9 operators will be activating Chatham Island as ZL7T, March 5-10th, from the fabulous Chatham Fishing Lodge in the fishing village of Kaiangaroa on the far northeastern tip of the island. The operators are: Lee/ZL2AL, Morrie/ZL2AAA, Lee/ZL2LE, John/ZL1BYZ, Mike/ZL2CC, Phil/ZL2RVW, Mark/ZL3AB, Wayne/ZL2WG and John/ZL1ALZ. The pilot station will be Duncan/ZL3JT. The four station setup will operate 160-10 meters, using CW, SSB, RTTY and the PSK modes. Donations would be appreciated. The ZL7T Web site is available at: http://www.zl7t.com
A logsearch will be available on the team's return. Logs will be uploaded to LoTW within 6 months. QSL via ZL2AL, by the Bureau or direct (CBA or QRZ.com).

FYI,

There is a sociological phenomenon called "Godwin's Law"

Here is a copy.....

Subject: How to post about Nazis and get away with it - the Godwin's Law FAQ

Archive-name: usenet/legends/godwin
Posting-Frequency: monthly
Last-Modified: October 7, 2003
Version: 1.15
URL: http://www.killfile.org/faqs/godwin.faq
Maintainer: tskirvin@killfile.org (Tim Skirvin)

Godwin's Law FAQ
-or-
"How to post about Nazis and get away with it"

One of the most famous pieces of Usenet trivia out there is "if you mention Hitler or Nazis in a post, you've automatically ended whatever discussion you were taking part in". Known as Godwin's Law, this rule of Usenet has a long and sordid history on the network - and is absolutely wrong. This FAQ is an attempt to set straight as much of the history and meaning of Godwin's Law as possible, and hopefully encourage users to invoke it a bit more sparingly. Of course, knowing Usenet, it won't do an ounce of good...

[Standard Disclaimers: this document assumes you have some basic knowledge of Usenet; if you don't, go check out news.announce.newusers for a while to gain said knowledge. Misuse of the information contained within this FAQ is not the responsibility of the author (though he's pretty confused exactly how you could misuse this information). Copyright 1999-2002, Tim Skirvin, all rights reserved, <FISH><, fnord, furrfu.]

I. The Basics
1. What is Godwin's Law?

Godwin's Law is a natural law of Usenet named after Mike Godwin (godwin@eff.org) concerning Usenet "discussions". It reads, according to the Jargon File:

As a Usenet discussion grows longer, the probability of a comparison involving Nazis or Hitler approaches one.

2. What does it mean?

It pretty much means exactly what it says - as a Usenet thread goes on, the chances of somebody or something being compared to a Nazi approach one.

3. Yes, but what does it *mean*?

Aah, now *there's* the real question.

In case your head has been buried in the sand for the last sixty years or so, the Nazis were a German political party led by Adolf Hitler that slaughtered upwards of ten million people that didn't meet their standards of "ethnic purity" and set off to conquer Europe and the world in World War II. They are generally considered the most evil group of people to live in modern times, and to compare something or someone to them is usually considered the gravest insult imaginable.

As a Usenet discussion gets longer it tends to get more heated; as more heat enters the discussion, tensions get higher and people start to insult each other over anything they can think of. Godwin's Law merely notes that, eventually, those tensions eventually cause someone to find the worst insults that come to mind - which will almost always include a Nazi comparison.

4. That still doesn't answer my question. What does it *MEAN*?

The Law is generally used on Usenet as an indicator of whether a thread has gone on too long, who's playing fair and who's just slinging mud, and who finally gets to "win" the discussion. It has, over time, become the closest thing to an impartial moderator that Usenet can get.

So, what this means in practical terms:

o If someone brings up Nazis in general conversation when it wasn't necessary or germane without it necessarily being an insult, it's probably about time for the thread to end.
o If someone brings up Nazis in general conversation when it was vaguely related but is basically being used as an insult, the speaker can be considered to be flaming and not debating.
o If someone brings up Nazis in any conversation that has been going on too long for one of the parties, it can be used as a fair excuse to end the thread and declare victory for the other side.

5. So - *WHAT DOES IT MEAN*?

Fine, fine - it means that somebody's eventually going to say something about the Nazis in any thread that lasts very long. When it happens, the thread is going to start either degenerating into a long flamewar over Nazi Germany or about Godwin's Law. Either way, the thread is effectively over, and you can safely killfile the thread and move on.

II. What does it mean?
1. Didn't we already spend the last section talking about this?

Well, yeah, but people don't seem to get the point...

2. What happens if we're actually talking about Nazis?

Then you've already invoked Godwin's Law, and the chances are that your thread isn't going to last all that much longer as a sane discussion. Them's the breaks.

That isn't to say, of course, that you can't talk about Nazis and such on Usenet - this *is* Usenet, after all, where virtually every conversation that goes on is fairly ludicrous in the first place. It's just going to take you a lot more effort to find real information out of there and to avoid getting yourself off on side-threads - which you'll eventually do regardless, but you can try to put it off.

This also applies if a thread mutates into an actual discussion of Nazis, of course.

3. What about arguing with Neo-Nazis?

Arguing with Neo-Nazis is probably the quickest path to getting Nazi invocations, because, well, they're actually accurate. Still, trying to invoke Godwin's Law near a Neo-Nazi isn't really a good idea because it's not terribly original and they'll probably get off on it anyway. Just ignore them and occasionally publish a FAQ detailing what actually happened during the Holocaust and such; arguing probably isn't going to help you.

4. How can I use Godwin's Law to my advantage?

In the proper kind of flamewar, Godwin's Law can be used as a gambit - how can you force your opponent to invoke the Law? Actually teaching these skills is tough, of course, and is best done through experience. Experience with chess and alt.flame are recommended.

5. What should I do if somebody else invokes Godwin's Law?

The obvious response is to call them on it, say "thread's over", and declare victory. This is also one of the stupidest possible responses, because it involves believing far too much in the power of a few rules that don't say exactly what you wish they said anyway. The proper response to an invocation is probably to simply followup with a message saying "Oh. I'm a Nazi? Sure. Bye" and leave, and in most cases even that much of a post is unnecessary.

6. "Hitler!" Ha! The thread is over!

Nope, doesn't work that way. Not only is it wrong to say that a thread is over when Godwin's Law is invoked anyway (Usenet threads virtually always outlive their usefulness), but long ago a corollary to the Law was proposed and accepted by Taki "Quirk" Kogama (quirk@swcp.com):

Quirk's Exception: Intentional invocation of this so-called "Nazi Clause" is ineffectual.

Sorry, folks. Nice try, though.

7. Does Godwin's Law apply in the real world?

Actually, yeah, but usually discussions in Real Life end by somebody wandering off in disgust before it can be invoked.

8. Are there any topics that lead directly to Godwin Invocations?

Well, yeah. Of course. Case's Corollary to the Law states "if the subject is Heinlein or homosexuality, the probability of a Hitler/Nazi comparison being made becomes equal to one" - but that's just an old list. Abortion and gun control debates always lead to Nazi comparisons; talk with a Libertarian for more than a few hours and he'll almost certainly bring up Nazis; book-burning is pretty much considered a sub-topic of Nazism at this point. Hell, talk about anything politically related and you'll eventually get there.

If you're really bored, a fun game to play is Six Degrees of Godwin.
Take a topic - any topic - and see how quickly you can relate it to Nazis
using legitimate topic drift methods. For example: a discussion about
computers will eventually lead to discussions of keyboards and which are
best, followed by a lot of complaining about the Windows key on 104-key
keyboards, leading to complaints about Microsoft, forcing the standard
MS-vs-government flamewar that I'm sure you're all aware of, leading to
attacks on Microsoft's "fascist" tactics by one side or another, which
will force the other side to start talking about the differences between
fascism, capitalism, and, of course, Nazism! The fun never stops!

Appendix A: The Many Forms of Godwin's Law

"You can tell when a USENET discussion is getting old when one of the
participants drags out Hitler and the Nazis."
- Richard Sexton (http://www.vrx.net/richard/) stating what would later
be known as Godwin's Law, Message-ID <21000@gryphon.COM>, 16 Oct 1989

http://groups.google.com/groups?selm=21000%40gryphon.COM&output=gplain

"Godwin's Rule of Nazi Analogies: As a Usenet discussion grows longer, the
probability of a comparison involving Nazis or Hitler approaches one."
- Mike Godwin, first article about the topic in the Google archives,
Message-ID <1991Aug18.215029.19421@eff.org>, 18 Aug 1991

http://groups.google.com/groups?selm=1991Aug18.215029.19421%40eff.org

:Godwin's Law: /prov./ [Usenet] "As a Usenet discussion grows
longer, the probability of a comparison involving Nazis or Hitler
approaches one." There is a tradition in many groups that, once
this occurs, that thread is over, and whoever mentioned the Nazis
has automatically lost whatever argument was in progress. Godwin's
Law thus practically guarantees the existence of an upper bound on
thread length in those groups.
- The Jargon File (http://www.ccil.org/jargon/)

Hitler, Nazis, nazis, and net.cops:
Warning: now that this FAQ has mentioned Hitler and Nazis, UseNet Rule #4
(also known as Godwin's Rule, after Mike Godwin of the EFF, sci.crypt, and
comp.org.eff.talk, a sometime foe of David Sternlight (q.v.) [even though it
was apparently in use, by Richard Sexton {q.v.} among others, before Mike's
1988 (?) net.advent; the "Godwin's" part seems to stem from "Rich Rosen's
Rules of Net.Debate, which I don't have a copy of]) says it will be coming to
an irrelevant and off-topic end soon. Just as there will always be newbies
("It's *always* September, *somewhere* on the net" - response to a 1993 wave
of delphi.com postings on a.f.u), there will always be people who see the net
and are repulsed because there's stuff there they don't want to see - so they
set out to make sure noone else can, either. They invariably fail, because
there are no net.cops to enforce any such rules on UseNet; in the course of
the heated flamewar that usually follows, things escalate until either Hitler
or Nazis (or both) put in an appearance, at which point the thread has
officially lost all relevance. People scream at each other a bit more, then
give up and go home. Bleah. "Keep your brains up top; don't be a net.cop."

This has mutated, in true UseNet fashion, to encompass *any* continuing thread; if you mention Hitler or Nazis out of the blue, the thread is sure to die irrelevantly soon (and, incidentally, you've lost the argument, whatever it was)... and every continuing thread on UseNet *must* contain such a reference sooner or later. Invoking Rule #4 deliberately in hopes of ending a thread, however, is doomed to failure (Quirk's Exception)...

UseNet Rules #n:
No firm info at the present time is available on just what the other UseNet Rules #n are. However, at a guess, they include:
--
Rule #nonumber: There are no hard-and-fast Rules on UseNet, only Guidelines, which are more or less strictly enforced (and differ) from group to group; this is why it's generally wise to read any group for a bit before ever posting to it.
Rule #0: *There* *is* *no* *C*b*l*. There *is*, however, a net-wide conspiracy designed solely to lead Dave Hayes (q.v.) to believe that there is a C*b*l.
Corollary: *There* *are* *no* *pods*.
Rule #9: It's *always* September, *somewhere* on the Net.
Dave Fischer's Extension: 1993 was The Year September Never Ended [so far, there doesn't seem to be much evidence he's wrong...]
Rule #17: Go not to UseNet for counsel, for they will say both `No' and `Yes' and `Try another newsgroup'.
Rule #2 (John Gilmore): "The Net interprets censorship as damage and routes around it."
Rule #108 (from the soc.motss FAQ): "What will happen to me if I read soc.motss?" "In general, nothing. (You may be informed or infuriated, of course; but that's a standard Usenet hazard.)"
Rule #666: Old alt groups never die. They don't fade away nicely, either.
Rule #7-B: There is no topic so thoroughly covered that noone will ever bring it up again.
Rule #90120: Applying your standards to someone else's post *will* result in a flamewar.
Rule #1: Spellling and grammer counts. So do grace, wit, and a sense of humor (the latter two are different), as well as a willingness to meet odd people, but these are lesser considerations.
Rule #x^2: FAQs are asked frequently. Get used to them.
Rule #29: no rational discourse can happen in a thread cross-posted to more than two newsgroups.
rule #6 (Eddie Saxe): don't post to misc.test unless you understand the consequences.
Rule #547 (Arne Adolfsen): When people know they're wrong they resort to ad hominems.
Rule #37 (Faisal Nameer Jawdat): Read the thread from the beginning, or else.
Rule #5 (Reimer's Reason): Nobody ever ignores what they should ignore on Usenet.
Rule $19.99 (Brad `Squid' Shapcott): The Internet *isn't* *free*. It just has an economy that makes no sense to capitalism.
Rule #3 ("Why 3?" "Because we felt like it"): For every opinion there is at

least one equally loud and opposing opinion; sometimes stated as:
Rule #27 (Gary Lewandowski): "In cyberspace, *everyone* can hear you scream."
And for completeness' sake:

Rule #4: (Godwin's Rule) Any off-topic mention of Hitler or Nazis will cause the thread it is mentioned in to an irrelevant and off-topic end very soon; every thread on UseNet has a constantly-increasing probability to contain such a mention.
Quirk's Exception: Intentional invocation of this so-called "Nazi Clause" is ineffectual.
Case's Corollary: If the subject is Heinlein or homosexuality, the probability of a Hitler/Nazi comparison being made becomes equal to one.
- net.legends FAQ (http://www.killfile.org/faqs/legends.html)

Appendix B: Addendums, Commentary, and Miscellaneous

1. Bentsen's Defense

For some, there is another way around Godwin's Law:

"Not this time. I know Mike Godwin. Mike Godwin is a friend of mine. Senator, you're no Mike Godwin."

This, of course, only applies to friends of Mike Godwin. The originator of this rule, Earl Cooley III (shiva@io.com), is one of those people. If you have to ask, you don't apply. I don't apply, so don't feel bad.

Note that this was named after Senator Lloyd Bentsen's "You're no Jack Kennedy" line from the 1988 vice-presidential debates. And the original usage can be found in <3b09d2e6.79411309@news.supernews.com>:

http://groups.google.com/groups?as_umsgid=3b09d2e6.79411309@news.supernews.com

2. Godwin's Commentary

Godwin actually wrote a short article for Wired Magazine on the Law back in 1994:

http://www.wired.com/wired/archive/2.10/godwin.if_pr.html

The article is actually more about the power and danger of memes (thought-viruses) than about Godwin's Law itself, but it's worthwhile reading for anybody who actually got this far into the FAQ.

3. Author's Note on the Holocaust

Over the years, I have received several emails regarding this FAQ regarding the Holocaust itself, either disputing the holocaust or the numbers listed in this FAQ. I'd just like to make it clear that I don't have any particular desire to debate these points; this FAQ is meant to point out and explain a quirk of human nature, not to codify the history of World War II.

4. Additional Corollaries

There have been many additional corollaries and otherwise related
rules created since the net.legends FAQ codified them, and/or missed in
that FAQ. Those that have been brought to the author's attention:

Stead's Law (named for Lew Stead of alt.pagan fame):
Any discussion between more than 2 Pagans will eventually come around
to Christianity.
- Reported by Donal Brewich <donal@brewich.com>
- More information regarding its history would be appreciated

To me, the fact that His Law (in one form or another) is true proves
that He exists.

In the UK, in uk.radio.amateur, after about three 'overs', all threads
get hijacked and turn into a slanging match which is invariably about
the UK amateur 'Foundation Licence' (effectively a low-grade novice
licence). This is much more important than Nazis and the like.

Is there a corollary of Godwin Law where the original thread devolves into a discussion of Godwin's Law?

1890. [ADMIN,META] Allow crossposting to rec.radio.amateur.moderated?

Newsgroup: rec.radio.amateur.misc
Date: 2009-03-03 14:22:16 UTC
From: rram@panix.com
Message-ID: <gojeci$m74$1@reader1.panix.com>
Source record: 6754
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.amateur.moderated

(Followups directed to poster by default. If followup to newsgroups is desired, edit your headers on followup to drop rec.radio.amateur.moderated from the Newsgroups line, else your article will be rejected.)

The rec.radio.amateur.moderated newsgroup enters its 3rd year of operation this month. Since its creation in February of 2007, we have approved nearly 3,000 articles about amateur radio and closely related subjects. We would like to thank our readers and posters for their quality contributions to our newsgroup.

When we first started out, consistent with our newsgroup's Charter and Posting Guidelines:

http://www.panix.com/~rram/usenet/rram/

we allowed discussion threads to be posted to our newsgroup only. Our moderation software is programmed to automatically reject any crossposts. The one exception has been periodic information postings that are crossposted to rec.radio.info, rec.answers, and/or news.answers.

Some moderated newsgroups, such as those in the comp.lang.perl.* and misc.kids.* hierarchies, started accepting crosspostings to appropriate unmoderated newsgroups after a suitable waiting period from their initial creation. Now that our newsgroup is well-established and carried at most major sites, we would like to implement this customary followup and allow some crossposting. We would propose to allow simultaneous crossposting (i.e., one article, with all newsgroups specified at once on the Newsgroups line in the headers) to rec.radio.amateur.moderated and one other unmoderated newsgroup in the rec.radio.amateur.*, alt.radio.amateur.*, and alt.ham-radio.* hierarchies only.

Pros:

- Allows the moderated and unmoderated newsgroups to share discussion threads of common interest, without propagating more than one set of articles to news, or showing them more than once in a newsreader. Presently, threads of common interest have to run in parallel, with different sets of followups, and requiring readers to have to follow two threads, possibly with duplicate articles, in different newsgroups. We have seen multiple examples of this happening in the amateur-radio-related newsgroups over the past 2 years.

- Provides the default action of submitting articles and followups to moderator review, as news servers will forward to us for approval any article that contains rec.radio.amateur.moderated on the Newsgroups line. This allows the moderated newsgroup crossposting to serve as a "guardian" or "sentinel" to discourage threads from getting hijacked into running off-topic or into personal abuse. This may also encourage posters to use the underutilized rec.radio.amateur.misc or .policy newsgroups as crossposting targets for articles that might otherwise be posted only to .moderated.

- Readers of the unmoderated newsgroups will enjoy high-quality, on-topic, discussion threads that would otherwise require subscribing to and reading a moderated newsgroup. Readers of the moderated newsgroup will enjoy high-quality, on-topic, discussion threads that would otherwise require subscribing to and reading other unmoderated newsgroups. Those unmoderated newsgroups may contain articles of widely varying degrees of quality and topic relevance.

- Participation in this crossposting scheme is completely voluntary. Posters of initial articles in threads will make the voluntary choice to add rec.radio.amateur.moderated and one other unmoderated newsgroup to the Newsgroups line when posting. Those following up to these crossposted threads will make a voluntary choice whether to keep rec.radio.amateur.moderated or any other newsgroup on the Newsgroups line, or remove them. Followups may be directed by default to any subset of the newsgroups on the Newsgroups line (or via E-mail to "poster") by specifying them on an appropriate Followup-To line. In short, you control what you post, where you post it, and what default destinations you want for any followups. This proposed crossposting scheme does not change any of these long-standing features of Usenet and newsreader software.

Cons:

- This will subject all such simultaneously crossposted articles to moderator review by us. If they do not meet the Charter and Posting Guidelines of rec.radio.amateur.moderated, they will be rejected. We will attempt to work with submitters to let them know what is happening, and how their articles can be fixed for eventual approval. However, rejected articles that were submitted anonymously without a traceable/derivable E-mail address or identity will have to be dropped silently without feedback to the unreachable submitter.

- Moderator review will introduce some posting delay. However, it has been our experience over the last 2 years that with our large moderation team distributed across many time zones, and the automation provided by our moderation software, we can turn submissions around relatively quickly, often within an hour.

- Many newsreaders do not give clear feedback to the user what newsgroups in which a given article appears, nor to what newsgroups a followup to that article will be sent by default. We expect to initially have to handle a few confused, possibly angry, submitters

who will insist that they did not intend to post to a moderated newsgroup. We are willing to provide the necessary polite feedback and user education to them to allow this crossposting scheme to work effectively. This will help ensure that the scheme is only used by those who are reasonably aware of the various pros and cons. We hope that this problem will diminish with time and greater user awareness.

- Not all newsgroups, especially those in the alt.* hierarchy, are carried at all sites. Users may find themselves following up by default to newsgroups that do not exist on their local news server, possibly resulting in article rejection from their server. Those users would have to edit their Newsgroups line for successful resubmission. We will work with users to get appropriate newsgroups added to their local servers, as well as with Panix to get those newsgroups added to Panix's server. However, as with default followups described in the previous paragraph, we expect to have to go through an initial period of user and news service provider education and polite feedback. We hope that this problem also will diminish with time and greater user awareness.

We propose to enforce this scheme in our moderation software as follows:

- Submissions simultaneously crossposted to more than 2 newsgroups will be automatically rejected with a rejection form letter (same as what happens now to submissions that are posted to more than 1 newsgroup).

- Submissions that contain newsgroups on the Newsgroups line other than approved newsgroups in the rec.radio.amateur.*, alt.radio.amateur.*, or alt.ham-radio.* hierarchies will be automatically rejected with a rejection form letter.

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

To help publicize this new editorial policy, we will update our Posting Guidelines, which are posted to the moderated newsgroup on the 15th of each month. Changes to our Posting Guidelines are indicated by an updated date in the Revision: auxiliary header at the top of the body, as well as "change bars" ('|') after each modified line of text. We will also add a short announcement, posted on the 1st of each month and cross-posted to the unmoderated newsgroups, restating this new editorial policy, and encouraging crossposted submissions.

Since this is a change to our newsgroup's editorial policies, and with some impact to the readers and posters of the unmoderated newsgroups, we would like to solicit 30 days of direct feedback and/or public discussion regarding this proposed change. For example, we would be interested to know if allowing crossposting to one other unmoderated newsgroup is enough, or if two would be preferable. We feel that more than two additional crossposted newsgroups greatly increases the probability of misconduct or accidental misposting that may result in article rejection by us. Also, should this scheme be opened up to uk.radio.amateur and aus.radio.amateur.* as well? You may send us E-mail directly to our administrative contact address below, which is the default Followup-To/Reply-To for this article. You may also discuss this publicly on the unmoderated newsgroups. In fact, we cannot stop you from doing so. We will make every reasonable effort to incorporate any feedback and suggestions. If we decide to implement this proposal, we will make a public announcement shortly after the end of the 30-day discussion period.

(Followups directed to poster by default. If followup to newsgroups is desired, edit your headers on followup to drop rec.radio.amateur.moderated from the Newsgroups line, else your article will be rejected.)

I am not aware of this, but the chances are surely infinitesimal.

A related (psychological) phenomenon is: "the elephant in the livingroom"
which is a tag label for people who are unaware of their own problems even
though everyone around them can see it.

My own pet notions about newsgroup threads are as follows:

1. It is a fact that dogs, when out being walked by their owners (or dogs
wandering on their own), go around and sniff fire hydrants and tree trunks
for dog piss residue. Because of their olfactory sensitivity, dogs can
identify other dogs on piss smell alone. So, its a form of communication.
After the sniff, the dog pisses on top of the prior layer of piss to tell
the next dog (maybe the same one as before) something like "Hi Joe, this
is Pete", etc., and thus makes dog socializing possible (as for millions
of years), and now, humans can do the same on newsgroup threads (read the
post, reply to the post, etc., thus giving rize to terms like "pissing
contest" etc).

2. There is a certain resemblance, to a certain degree, to the bar scene
in the movie "Star Wars"

3. I've also had the observations that: i) no matter what you say, and no
matter what your intentions, there will always be at least one person out
there who will be unhappy with what you say, ii) they will also completely
misunderstand what you say, and iii) no matter what you do to try to
explain it, it will still be misunderstood. In my retirement years I've
been reading a lot of history; kinda makes it obvious why we've had
thousands of years of wars, destruction, death, pain. Hmmmmmm? Is there a
lesson there? On newsgroups, thus, we get flamewars as a substitute.

FOR IMMEDIATE RELEASE

K5D Desecheo Postlogue Press Release 3/3/09

All team members have safely returned home. The K5D DXpedition, 12-26th, February 2009, netted 115,783 QSO's, including one QSO with the International Space Station. The DXpedition ranks #7th for all-time number of QSO's, and the #1 DXpedition with the most 30M contacts. More importantly, we are confident that thousands of radio amateurs worldwide now have a QSO with Desecheo for an all-time new one--our overall #1 goal !

Desecheo was #2 Most Wanted in Asia and #3 Most Wanted in Europe. We are happy to report that 40% of our contacts were with Asia and Europe!!! Another important goal achieved !

The QSL card is in the final stages of design and will be available in the next few weeks. You may QSL directly to N2OO, but online QSL requests are available and highly recommended. For details see our website:
http://www.kp5.us/qsls.htm
Logs will be uploaded to LoTW and posted early next year.

The Desecheo 2009 team wants to thank everyone for working us and helping to make this DXpedition such a success!

73 and good DX!

1894. Peak-to-peak voltage for mic input?

Newsgroup: rec.radio.amateur.misc
Date: 2009-03-03 22:19:14 UTC
From: "dave.harper" <dave.harper@gmail.com>

I've made a digital modem and am trying to figure out how much I need
to reduce the modem's audio output before piping the signal into an IC-
V8. I want to make sure the voltage is high enough to RX well, but
not so high that the signal is clipped of the IC-V8 is damaged.
Anyone know what the typical peak-to-peak voltage is for a standard
mic input?

Thanks in advance for any advice!
Dave

==========
Assuming that the modem has an adjustable output , I would suggest you
hook it up to the radio and ,starting at zero input ,see at what mike
input level you get an output by listening to a receiver.
If the radio has its own mike being an electret type (possibly with an
additional built-in pre-amplifier) the mike input signal will highly
likely be in the 50 - 300 mV range .

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and Lee/ZL2AL for the following DX information.

FOR IMMEDIATE RELEASE

The ZL7T DXpedition Team will leave for Chatham Island Tomorrow around 0130 UTC and expect to be on the ground in ZL7 around 0400 UTC. The schedule is as variable as Air Chatham is. Work will begin on assembling the antennas Thursday night in the dark. We will do as much preliminary work and preparation as we can before Friday morning.

We are hoping to have the two Yagis and 30M vertical up by lunch on Friday and will work through the afternoon to get the 80M, 40M wire antennas up in the trees. The 160M inverted "L" will be the last antenna to go up. We should be on the air with two stations on the higher frequencies sometime after 1200 UTC Friday and will probably activate all four stations by the early evening.

Keep a watch on packet cluster or go to http://www.dxsummit.fi/DxSpots.aspx and you will see us spotted for information on our active frequencies. If you are new to DXing, go to the ZL7T website www.zl7t.com and have a read of tips on how to work us. Don't be afraid to call. Our aim is to help all of you who want ZL7 to get it in your log over the next 5 days of operation.

On behalf of the ZL7T DXpedition team please accept our heartfelt thanks for your support, kind words of encouragement and donations which will help defray some of the cost of this operation. It makes all the effort required in mounting a DXpedition worthwhile when we receive your good wishes.

73, Lee ZL2AL

See you in the pileups! DX IS!!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 28th/February, through Friday, 6th/March there were 223 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP8/g, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA0, SWAZILAND (Ops Needed). Operators David/GI4FUM (EI4DJ, 3DA0DJ) and Tony/G4LDL will activate the station 3DA0SS during the month of August. The object of this activity is to provide a ham radio station at an international scout camp near Manzini. Station 3DA0SS was the first ham radio station to operate in the "Jamboree on the Air" for the scouts of Swaziland in October 2008. The station was run at the Hawane Resort in western Swaziland 15km from the Swazi capital Mbabane. The resort is 4530 ft. ASL in the mountains - QRA KG53MS. David states (edited), "We will operate from Hawane in the evenings and early mornings and drive over to the scout campsite during the day (about an hour away). There is a DXpedition to Lesotho at the same time as our visit to Swaziland. John, 9M6XRO, is a member of the Lesotho DXpedition team (also serviced by African DX Safaris) but he will be joining us at Hawane between 6th and 13th August.... Our visit to Swaziland will include a trip to the Kruger National Park which is a 2 hour drive from Hawane Resort. We also hope to visit the Trans World Radio transmitter site near to Manzini. We are looking for more members for the team." Anyone interested should E-mail David at: gi4fum@arrl.net

3V, TUNISIA. SWL Ashraf, 3V4-002, will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band/Low-Power entry. QSL via IZ8CCW. Also, read about Ashraf on his Web page at: http://ashraf3v4002.wordpress.com

4M, VENEZUELA. Operators Jose/YV5TX, Werther/YV5MSG and Alexis/YV5SSB will be active as 4M5DX during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single/High-Power entry. QSL via IT9DAA.

5N, NIGERIA (Update to OPDX.898). Bodo, DL3OCH, has reported that his trip will be slightly delayed, so look for him to be in Nigeria around March 21st and to start his activity later than March 5th as first announced. He has also reported that he has received his license and will use the callsign 5N0EME. In the meantime, all his equipment is on the way. Remember, activity will be on all HF bands (160-10 meters) plus some operations on EME. QSL via DL3OCH.

6TH IDXC ANNOUNCEMENT. The 6th International DX Convention organized by the Strange Radio Team (SRT) will be held April 18-19th, 2009. The City will be Paestum near Salerno (fantastic Archeological Area) and the airport is Napoli Capodichino. Some of the guest speakers are:
* Giancarlo Sanna, IS0ISJ, ARI President
* Antonio Esposito, IW2OAZ: "D-STAR" Panoramic analysis
* Mauro Pregliasco, I1JQJ: "The IOTA of the future"
* Mario Ambrosi, I2MQP: ARI Awards
* Norman Fusaro, W3IZ: DXCC & ARRL Awards
* Simone Bizzarri/IZ0BTV & Giorgio Minguzzi/IZ4AKS: 2009
E44M PALESTINE DXpedition
* William Josh Fisher, W4WJF: 2008 VK9DWX Willis Island DXpedition
* Mike Mraz, N6MZ: 2009 KP5 Desecheo Island DXpedition
* Nuccio Meoli, I0YKN: International Polar Year
More details about the event and dinner bandquet are available at:

http://www.strangeradioteam.com/idxc/6th-idxc-2009.asp

6W, SENEGAL. Alessandro, IK4ALM, will be active as 6W/IK4ALM from Saly between March 29th and April 9th. Activity will be on 40-10 meters using CW and SSB with 100 watts into a ground plane. QSL via his home callsign.

BX5, TAIWAN. Jimmy, BX5AA, will be active during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/Single-Band (?)/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA.

C9, MOZAMBIQUE. Philip, ON4AEO, will lead a team of operators on a DXpedition to Mozambique and sign C91FC from April 9-13th. You may remember that Philip lead a team of operators last year to Lesotho for the 7P8FC DXpedition. The "Fox Charlie DXpedition" team is made up of the following operators: Philip/ON4AEO, Kath/ON7BK, Sid/ZS6AYC, Adele/ ZR6APT, Gert/ZS6GC, Lucas/ZS6ACT, Jan/ZS5JC, Deon/ZS6ABR, Jose/ON4CJK, Herman/ZS5LH and Steffi/ON3AEO. They hope to activate the following bands, 80/40/20/17/15/12/10 meters using CW, SSB, RTTY and PSK. The QSL Manager is ON4CJK. Send QSLs either by the Bureau or direct. It is requested that direct cards be accompanied with 1 IRC or 2 green stamps with a self addressed envelope (QSLs without this, QSLs will be returned via the Bureau). The QSL address is: JOSE DUYCK, MOLENAKKER 56, 8740 EGEN, BELGIUM. More information regarding the DXpedition can be obtained from their Web site at: http://www.c91fc.be

CO8, CUBA. Eduardo, CO8LY, will be in the ARRL DX SSB Contest (March 7-8th) as a Single-Op/Single-Band (80m)/QRP entry. QSL via EA7ADH. Also, look for Juan Carlos, CO8TW, to be active in the contest as a Single-OP/ Single-Band (20m)/Low-Power entry. QSL via HB9SVT. His log will be on-line at: http://www.qsl.net/co8tw

CT3, MADEIRA ISLAND (AF-014). Operators Hardy/DL3KWF and Rosel/DL3KWR (XYL) will once again be active as CT3/homecall from the Hotel Royal Orchid between now and March 19th. Activity will be mainly CW on 30/17/12 meters. Hardy is expected to try some RTTY and PSK-31. QSL via their home callsigns. E-mail requests for Bureau QSL cards can be sent to: dl3kwr@darc.de --or-- dl3kwf@darc.de
Visit their Web site at: http://www.mydarc.de/dl3kwr

CU2, AZORES ISLANDS. Operators Martti/OH2BH (CU2KG) and Juha/OH8NC (CU2KH) are in the Azores and will activate both CU2A and CU2X in the ARRL DX SSB Contest (March 27-28th) as two Single-Band categories, CU2A on 20m and CU2X on 80m. They may occasionally come on other bands to hand out multipliers. They arrived in the Azores early this week and have been active using their personal callsigns. QSL both via OH2BH.

EA8, CANARY ISLANDS. Jon, LA3JJ, will once again be active as EA8/homecall from Isla de Fuerteventura (AF-004, DIE S-006, WLOTA 0883) between now and March 26th. Activity will be on 30/17 meters and possibly 12 meter CW. QSL via his home callsign, direct or by the Bureau.

EA9/EG9, CEUTA AND MELILLA. Jorge, EA9LZ, will be active as EA9LZ or possibly EG9Z during the CQ WW WPX SSB Contest (March 28-29th) as Single-

Op/Single-Band (40m or 20m) entry. QSL via EA9LZ (QRZ.com).

FR, REUNION ISLAND (Correction). Stephane, F5UOW, will be active as FR/F5UOW from Boucan Canot (near St. Gilles les Bains) between March 8-28th (not the 22nd). Activity will be holiday style, mostly CW on 20 meters. QSL via his home callsign.

FT5X, KERGUELEN ISLANDS (Update). Gildas, TU5KG/FT5XS is enroute to the Kerguelen Area. He hopes to stop at Port aux Francais on possibly on March 9th. Look for him between March 8-10th. QSL via F4EFI, by the REF Bureau 29 or direct.

GW, Wales. Steve, GW4BLE, will be active as GW7X during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/Single-Band (40m) entry. QSL via GW3SQX, direct or by the Bureau.

HH, HAITI (Update to OPDX.849). Operators Jan/K4QD and Don/AF4Z will be active as HH4/homecall from the Northwest Haiti Christian Mission (www.nwhcm.org) between March 24th and April 4th. They will operate 80-10 meters on CW, SSB and RTTY as time permits. Nighttime low band operations will be limited to the availability of AC power. They will also participate in the CQWW WPX SSB Contest (March 29-30th). They are working with HH2JR and the Radio Club of Haiti in an attempt to obtain a special 4V4 prefix for the contest. QSL via their home callsigns. Operators prefer direct or LoTW, but the Bureau is "OK".

HQ2, HONDURAS. Operator Dan, HR2DMR, will be active as HQ2W during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band/High-Power/ Assisted entry. He will use monobander antennas on 20/15/10m and sloper antennas on 160/80/40m. QSL via HR2DMR. QSL via address on QRZ.com.

IOTA NEWS.....
AS-103. Operators Tang/BM2AAV, Wu/BM2APH, James/BU2AT, Eddie/BV2DD, Bruce/BV2KI, Lee/BV2NT and Chung/BX4AF will be active as BP0A from Penghu Island between March 27-30th. Activity will be on all bands. QSL via BV2KI.

EU-008. Members of the Kilmarnock and Loudoun ARC will be active as GM7A from Kerrera Island (IOSA FL02, SCOTIA CN02), Scotland, during the upcoming RSGB IOTA Contest (July 25-26th). Operators mentioned are Graham/MM0GHM and Arthur/MM0DHQ. QSL via GM7AAJ, direct or by the bureau.

EU-017. Operators Andy/IZ0EHO and Vincenzo/IZ0FKE will be active as ID9N from Vulcano Island (IIA ME-018, MIA MI-122, WLOTA 1001), April 24-30th. Activity will be on all HF bands and modes. QSL via the information on QRZ.com.

EU-171. Operators Tor/DJ4MG and Ela/DL1TM will be active as 5P4MG and OZ7TM, respectively, from Vendsyssel-Thy/Nordjylland (DIA NJ-001), April 5-16th. Look for SSB activity to be on 160/80/40/20/17/15 meters and PSK31 on 40/20 meters. QSL 5P4MG via DJ4MG, direct or by the bureau. QSL OZ7TM via

DL1TM, direct or by the bureau.

EU-171. Operators Rene/DL2JRM and Netti/DO6XX will be active as OZ/homecall/p from Vendsyssel-Thy/Nordjylland (DIA NJ-001) between July 18th and August 1st. Activity will include the RSGB IOTA Contest (July 25-26th). Look for them on 80-10 meters using CW with 100 watts into a dipole/GP. QSL via their home callsigns, direct or by the Bureau.

NA-192. Operators John/VE8EV, Wally/VE8DW and Gerry/VE8GER will be active as VX8X from Ellice Island, March 20-23rd. Activity will be on 40/20/15 meter CW/SSB during a 24 hours per day non-stop operation. Expect to see them on CW, but most of the focus will be on 20 meter SSB on 14260 kHz. QSL via the information on QRZ.com under VX8X.

OC-120. Operators Ed/4F1OZ, Roland/DU1KGJ, Jairus/DV1ERS and Frank/VE7DP plan to activate Cuyo Island (WLOTA 3028) between 0400z, March 6th and 0200z, March 9th. Activity will be on 40/30/20/17 meters using CW and SSB. Both the callsign and QSL route are TBA.

SA-098p. Operators Jorge/OA4BHY, Marco/CE6TBN, Zoli/HA1AG, Daniel/DL5YWM and Rene/DL2JRM will be active as OA4BHY/6 from La Leona Island, April 10-13th. There is a possibility that a special callsign may be used. Activity will be on all HF bands using 2 stations with operations on CW and SSB. QSL via DL2JRM, direct or by the Bureau.

IOTA STATESIDE TOUR. Pete, VE3IKV, will be active as W4/VA3RA from the following stateside islands:
March 7-8th - St. Simons; NA-058, USI GA-003S, Glynn county, Georgia
March 9-13th - Key West; NA-062, USI FL-040S, Monroe county, Florida
March 11-12th - Garden Key, Dry Tortugas; NA-079, USI FL-013S, Monroe county, Florida.
Activity will be on 40 meters CW using 100 watts into a sloper antenna. Also, look for him on 6 meters using CW and SSB. QSL via VE3IKV, direct or by the Bureau.

J5, GUINEA-BISSAU. Peter, HA3AUI, has announced that he will be acctive as J5UAP during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/Single-Band (20m) entry from the QTH of Varela, IK12QH. Remember, he is supposed to be here until March 31st. His activity will be mostly Digital with some SSB and CW upon request. Operations will be on 160-6 meters using a spiderbeam, verticals, dipoles, and 500w or 100w. QSL via HA3AUI, direct or by the HA Bureau.

J6, ST. LUCIA (Change in Plans). John, W5JON, informs that the dates have been changed and now he will be active as J6/W5JON from Marigot Bay between March 24th and April 2nd. Activity will be on 160-6 meters SSB using 400 watts, dipoles and 6m yagi. Also, look for activity in the CQ WW WPX SSB Contest (March 28-29th). QSL via W5JON.

JD1/O, OGASAWARA (Update). Operators Hide/JM1LJS (JD1BLK), Hiroyuki/JG7PSJ (JD1BMH), Masaru/JE4SMQ (JD1BMT) and Makoto/JI5RPT (JD1BLY) will be active from Chichijima Island (AS-031) between April 29th and May 5th. The group will be active on 160-6 meters using the CW, SSB, Digital and Satellite modes. QSL via their home callsigns. Their detailed schedule is as follows: Callsigns, Dates of Operation and Web log searches will be available at:

JD1BLK - April 29th- May 5th; http://radio-dream.com/jd1blk/e/
JD1BLY - April 29th- May 5th; http://www.ji5rpt.com/jd1/
JD1BMH - May 2-12th; http://sapphire.ganko.tohoku.ac.jp/jd1bmh/
JD1BMT - May 2-5th; No Web site available at this time

JW, SVALBARD. Rag, LA5HE, will once again be active as JW5HE between now and March 10th. Activity will probably have an emphasis on the low bands and CW. QSL via his home callsign.

KH0, MARIANA ISLANDS. Operators Masaharu/JA3CEK and Shimatake/JI3DNN will be active as KH0/N3MU and KH0/KI3DNN, respectively, from Saipan (OC-086), March 19-22nd. Activity will be on 160-6 meters using CW, SSB and some Digital modes. QSL KH0/KI3DNN via JI3DNN and KH0/N3MU via JA3CEK.

KP2, U.S. VIRGIN ISLANDS. Operators Ann/KP2YL and Brian/KP2HC will be heading back to visit St. Croix, March 28th through April 7th. They are in the initial stages of planning their move back to the island, so they may be on the air less than usual on this trip. Look for them on 160-6 meters using CW and SSB. QSL direct only. Current QSL info is available on QRZ.com. PLEASE NOTE: Brian reminds everyone that U.S. postal rates are going up in May of this year and that all QSL requests sent from this time forward should include sufficient postage to cover the rate increase.

QSL INFO AND NEWS.....
Andy, W5ACM, reports that QSLs for his W5ACM/C6A/MM Western Caribbean Cruise 2009 started going out March 2nd. He also mentiones, "Operators/ participants for this event included W5ACM, WB5RMA, WA5TWT and WA5WOD. Observers included ex-WB5QCC and ex-WA5VJT. Hopefully QCC and VJT will renew their tickets! We operated from various grids (EL54, EK69, EK66, EL60, EL46 and EL37) in the Gulf of Mexico from Galveston to Roatan (just off the coast of Honduras). We had a great time and hope to see more ports of call and operate from more grids in November."

HI9/EA3BT AND HI9/EA3WL QSL STATUS. Josep, EA3BT, has started to confirm the contacts from his last IOTA DXpedition to Cayo Levantado, NA-122. The QSL looks very nice, full color on both sides. You can see the QSL card at: http://dxinfo.ea3bhk.com

NEW QSL MANAGER. Buzz, NI5DX, has assumed the duties of QSL Manager for Tom Smith, ZC4TS. Logs have been transferred and cards are in the process of being ordered. Buzz will be able to answer any requests for a ZC4TS card once the new cards arrive in about 5 weeks. Buzz is also now the QSL manager for FM1II, Chris, in Martinique.&#65533;Buzz has the logs and will have cards in the not too distant future.

PIRATE ALERT. Phil, G3SWH, informs OPDX that he and Richard/G3RWL have just arrived back from their trip from Mayotte where they made over 10,000 QSOs as FH/G3SWH. However, Phil states, "Looking at the DX Summit spot database, we appear to have been the victim of some piracy. Please make the maximum publicity of the following: There was *NO* activity by FH/G3RWL. Both operators used the same call. There was *NO* SSB activity whatsoever."

NOT THE QSL MANAGER. Phil, G3SWH, reports that he is NOT the QSL Manager for VP2M.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: 8R1AK, C4N, CE1/K7CA, D2NX, EA9EU, FW8DX, HB9ANM, T30XX, T31DX, T32YY, T33ZZ, TT8JT and ZD8UW

QSLS RECEIVED VIA THE BUREAU: None reported this week!

RECALLING JIM B. SMITH, VK9NS (by Bruce Smith, G3HSR). Now available on the "Documentary Archive Radio Communication" Web page, an interview by Wolf, OE1WHC, with Bruce Smith, G3HSR, son of Jim B. Smith, VK9NS, recalling his father's life (recorded March 5th, 2009) at: http://dokufunk.org/vk9ns

S2, BANGLADESH (Update). By the time you read this, some members of the Korea DX Club will be active as S21KD from Dhaka until March 14th. As this was being typed, they were assembling antennas. Activity will be on 160-10 meters, CW, SSB and the digital modes using three amplifiers, verticals and beams. QSLs are via HL5FUA. For more details, updates and their logs, please visit the following Web page at: http://dxpedition.co.kr

SOUTH ATLANTIC BIRD ACTIVITY. As of March 7th, Graham, G3VZV, will be onboard the "MV Minerva" which will be visiting the islands off the edges of the Antarctica. His schedule includes visits to South Georgia (VP8) on March 12-13th, and Tristan da Cunha (ZD9) on March 18-19th, before arriving in Cape Town on March 24th. Activity is planned via SO50, AO51 and the ISS (if available) from the ship, and if licences can be obtained, from the islands themselves. Graham will sign G3VZV/MM and intends to use FM handhelds and an Arrow antenna. He hopes to have at least some limited internet access which can be used to arrange skeds at: g.shirville@btinternet.com

TC18, TURKEY (Special Event). Members of the Turkish group called SWAT (Special Wireless Activity Team) will be active as TC18M between March 17-19th. Activity is to commemorate the 94rd anniversary of the Naval Victory (March 18, 1915) in th Gelibolu Wars (World War I). Operations will take place from the University of Canakkale grounds and on the Asiatic side of Dardanelles, overlooking the Straits where the Naval War took place. Activity will be on the HF bands using SSB and CW. Operators will be TA3FB and TA3AX. QSL Manager for this year is TA3FB. For more detailed information, visit: http://tcswat.tripod.com/
Also see TC18M on QRZ.com.

TI8, COSTA RICA. Operators Carlos/TI2KAC, Juan/TI2JCY, Mauricio/TI4ZM, Eddie/K4UN, Ellis/N4JO, Bob/W4BW, Keith/W4KTR and Alexis/W4XO will be active as TI8M from Volcan Poas during the ARRL DX SSB Contest (March 7-8th) as a Multi-2 entry. QSL via TI2KAC, direct or by the Bureau. Look for activity before the contest on 160-10 meters.

TM0, FRANCE (Special Event). Members of the CBK 67 (F8KHH) will activate the special callsign TM0TAN between March 27th to April 10th, to celebrate the anniversary of the signing on April 4th, 1949, of the agreements creating the NATO treaty. Also to celebrate this event, the French and German cities of Strasbourg, Kehl and Baden-Baden, will receive government Heads of States, Presidents and Prime Ministers. A special QSL card will be issued. The QSL Manager is the F8KHH ARC. Send QSLs via direct (w/SAE and postage) or via the French REF Union Bureau.

V2, ANTIGUA AND BARBUDA. Jimmy, W6JKV, will be active as V2A/W6JKV from Antigua (NA-100, WLOTA 1118) between June 23rd and July 3rd. Activity will be on the HF bands, but his focus will be on 6 meters (Grid FK97). He has a very good location and will use a large antenna with power. QSL via his home callsign in Austin, Texas.

V4, ST. KITTS (NA-104). Nick, G4FAL, will once again be active as V4/G4FAL between March 12-17th. Activity will be on 80/40/20/15/10 meters mainly on CW. Also, look for him to be an entry in the RSGB Commonwealth Contest (March 14-15th) as V47CD. QSL via his home callsign or the LoTW.

V6, MICRONESIA (IOTA Op). Mike/KM9D and Jan/KF4TUG are reportedly now active from Turuaimu Island, Kapingamarangi Atoll (OC-167) as V63MY and V63TO, respectively. Length of stay is unknown, but probably for one week. As usual, Mike will work mainly CW and Jan will be on SSB. However, as this was being typed, V63TO was heard on 40/20m CW. Activity is expected on 40-10 meters. QSL via OM2SA. This also includes LoTW.

VK9L, LORD HOWE ISLAND (Update). Bill Horner, VK4FW, member of Oceania Amateur Radio DX Group Inc. (ODXG), reports that the VK9LA March departure date is fast approaching. All equipment sent via the ship has safely arrived on Lord Howe Island. Bill states, "When we finished packing all the gear, we ended up with more space taken up than we had booked, so we quickly managed to get more freight space on the ship." This DXpedition will take place between March 23rd and April 3rd, with 16 operators. Suggested frequencies are:

Band	SSB	CW	RTTY
160	--	1.813u/d	--
80	3.797u/d	3.513u	--
40	7.084u	7.013u	--
30	--	10.106u	10.135u/d
20	14.250u/d	14.023u/d	14.088u
17	18.165d	18.072u	18.100u/d
15	21.290u/d	21.023u/d	21.088u/d
12	24.987d	24.892u	24.925u/d
10	28.470u/d	28.023u/d	28.088u/d
6	50.100u/d	50.100u/d	--

Special Notes:
1. u/d... Up or down
2. 6m... Call us when the beacon goes into RX mode.
3. 40m... RX for the Americas will be above 7.150
4. 80m... A special time on April 1st has been set up to work the VK
and greater Pacific. (see the web site www.odxg.org/vk9la.htm
for details). We would request that these areas do not call
us in the pile ups on 80m before this event.
5. Pilot Station.... Don, N1DG, will be our only pilot station.
6. VK4FW will arrive on Sunday, March 22nd. He will begin unpacking
and sorting equipment and might manage to get a station on air for
Sunday evening local time. On Monday, March 23rd, 4 more of the
crew will arrive and will begin further assembly. They will try to
get 2 stations on air ASAP. On Tuesday, March 24th, the rest of
the crew will arrive and they will finish assembly and get all
station on air ASAP.

QSLING PROCEDURES:
1. Direct via VK4FW:Bill Horner, PO Box 612, Childers, 4660, Australia
2. via the Bureau via VK4FW
3. OQRS (http://www.odxg.org/qsl.htm) direct
4. OQRS (http://www.odxg.org/qsl.htm) Bureau

For more updates, details on the DXpedition and how to donate to this
operation, please visit the ODXG and VK9LA Web pages at:
http://www.odxg.org
http://www.odxg.org/vk9la.htm

WE'RE MOVING! Uwe, DL8OBF, reports that the AMTOR-mailbox "DA5TOR" will
move its 40m access frequency in order to comply with the new bandplan
per March 29th. The new frequencies are 7047 kHz, 7049 kHz and 7051 kHz.
The access frequencies on the other bands remain unchanged and still allow
worldwide access. All frequencies and technical details of the mailbox can
be found at: http://www.amtor.de
The new activity-center of AMTOR is 7042 khz for direct connections.

ZL7, CHATHAM ISLANDS (Update). The ZL7T team is now active through March
10th. Four stations will be on the air operating on 160-10 meters, using
CW, SSB, RTTY and the PSK modes. For updates, visit the ZL7T Web site at:
http://www.zl7t.com
A logsearch will be available on the team's return. Logs will be uploaded
to LoTW within 6 months. QSL via ZL2AL, by the Bureau or direct (CBA or
QRZ.com). Donations would be appreciated.

The following stations are expected to be active in the
ARRL DX SSB Contest (March 7-8th, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2009 ARRL DX SSB Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:

Archive-name: radio/ham-radio/recruitment
Revision: 1.1 2007/09/29 18:42:47
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.
```

1904. Vehicle auxiliary battery charging.

Newsgroup: rec.radio.amateur.misc
Date: 2009-03-08 05:10:10 UTC
From: Tom Horne <hornetd@verizon.net>
Message-ID: <Sqlsl.1885$gm6.368@nwrddc02.gnilink.net>
Source record: 6768

I'm looking for advise on how to charge an Absorbed Glass Mat (AGM) battery from the electrical system of a stock Chevrolet Express van. Since the van's starting battery is standard wet cell the voltages needed to charge it are different then those needed to charge AGM batteries. Can anyone suggest how I would go about isolating and charging the AGM battery; that will power my radio equipment, auxiliary internal lighting, external road hazard, and identification lights; without damaging the starting battery. This is to make sure that those loads cannot discharge the starting battery to the point were the vehicle cannot be started.

I'm also considering building a so called pup generator which is really a twelve volt alternator driven by a separate small engine. This would be to support radio operations from the vehicle for long periods without needing to run the vehicle engine. The hope is that the small engine will use a lot less gasoline then the vehicles engine would when run just to recharge the batteries.

Any advise or experience on either challenge would be very welcome.

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 899.1
BID: $OPDX.899.1
March 8, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Texas DX Society (K5DX), Toze/CT1GFK and Gary/ZL2IFB for the following DX information.

FOR IMMEDIATE RELEASE

ZL7, CHATHAM ISLANDS (Update). Gary, ZL2IFB, Webmaster for ZL7T.com, informs OPDX (edited): "ZL7T is QRV from 160 to 15m inclusive to date. They have a slow and unreliable Internet connection but successfully uploaded their log yesterday and anticipate another two log updates before they close down on March 10th. There is a log search function on the Web site along with a blog page with the latest news from the team. They have reported big pileups but gratifyingly courteous ones. I am collating ZL7T spots to give a 'near real time' indication of the actual propagation on the site, supplementing the predictions made before they departed to the ZL mainland, and some spectrum displays and captured audio so visitors can experience what it's like to be on the receiving end of a pileup at least 37 callers deep!" The ZL7T Web page is at: http://www.zl7t.com

---

5C, MOROCCO (Update/IOTA Op). Alfredo, IK7JWX, informs that he is preparing for a DXpedition (with 9 operators) to activate Mogador Island (AF-065), April 19-25th. With almost 75% of IOTA participants needing this island, the group is still looking for sponsors and donations. If you can help, please contact Alfredo, IK7JWX, via E-mail at: ik7jwx2003@yahoo.it
Activity will be on all HF-VHF bands and all modes (CW, SSB, RTTY PSK31). Operators mentioned (with callsigns) to be active are: Oscar/IK2AQZ (5C2A), Carlo/IK6CAC (5C2C), Ernesto/I2FUG (5C2F), Del/IZ7GWZ (5C2G), Alfredo/IK7JWX (5C2J), Leo/I8LWL (5C2L), Simon/IZ7ATN (5C2SG), Pino/I8YGZ (5C2Z) and Nicola/I0SNY (5C2Y). QSL via their home callsign. ADDED NOTE: Some of the reference numbers to be activated during this operation are:
Mogador Island - AF-065; WW.Loc. IM51CM; ITU 37; CQ 33

Essaouira Island - WW.Loc. IM51CL
ARLHS Lighthouses (callsign/m):
MOR-019 Cape Sim-Essaouira; WW.Loc. IM51CL
MOR-036 Sidi Magdul-Essaouira; WW.Loc. IM51BJ
MOR-040 Grand Jetee-Agadir; WW.Loc. IM50EJ
For details on how to help and updates, visit their Web page at:
http://www.mogador2009.altervista.org

C9, MOZAMBIQUE. Member of the Texas DX Society will be active as C91TX from Bilene, Maputo Province, between March 25th and April 5th. Bilene is 180km from the capital city of Maputo. Activity will be on all bands 160-10 meters with 3 active stations, one station each for CW, SSB, and the Digital modes. They will participate in the CQWW WPX SSB Contest (March 28-29th). Operators mentioned are: Cal/WF5W, Paul/W5PF, Madison/ W5MJ, Bill/K5WAF, Dale/KG5U and Jim/N4AL. QSL Manager for C91TX is W5PF. Depending on internet access, they hope to have an online log search page once operations start, but don't expect daily updates. For updates, visit the Texas DX Society C91TX Web page at: http://www.tdxs.net/c91.html

LAST MINUTE LIGHTHOUSE ANNOUNCEMENT. Members of the Algarve S.T.A.R. DX team will be active as CS6A on March 15th, from Murtinas Posterior Lighthouse (POR-126). This will be the FIRST ever activation from this lighthouse. Activity will be on 40/30/20/17 meters using CW and SSB. Operators mentioned are: Toze/CT1GFK, Al/CT1GPQ, Mike/CT1IUA and Rui/ CT2IHP. QSOs are valid for the new award DFFA - Algarve Lights and Lighthouses Award. The Algarve DX Team will update their Web site during the activity with pictures and an online log at: http:algarvedx.com
QSL via CT1GFK, by the Bureau, direct or for E-mail Bureau QSL requests send to: cu8at@algarvedx.com
Also, for more details on their two new recently added awards (D.I.A. - Algarve Islands Award and D.F.F.A. - Algarve Lighthouses Award), visit the above Web page.

1906. APRSPoint version 4.5.1 available

Newsgroup: rec.radio.amateur.misc
Date: 2009-03-09 04:43:52 UTC
From: "hxc98@yahoo.com" <hxc98@yahoo.com>
Message-ID: <832f2f4d-63e8-4f3d-b587-94b35a20afa0@13g2000yql.googlegroups.com>
Source record: 6770

This version has better support for mappoint 2009 and added support
for APRS symbols and overlays, and made several enhancements. Current
users please pay special attention to #2, since your current settings
may need to be changed,

1. Added support for standard APRS symbols and overlays,
2. Changed the way log files are saved, now you need to provide the
name of a folder where logs will be saved, the name of the log file is
genarated automatically by appending the date after 'log', so old logs
won't be overwritten. You need to create the folder if it doesn't
exist. Leave the folder name field empty if you don't want to save
logs,
3. Better signal range calculation accuracy to reflect real world
operating conditions,
4. Uninstall will no longer remove tnc settings file,

Visit www.aprspoint.com for details.

FOR IMMEDIATE RELEASE

S2, BANGLADESH (Op Cancelled). Members of the Korea DX Club had to cancel their operation from Dhaka due to a civil war that broke out in the city. The KDXC team mentions that the "Situation is chaotic", and the team was going back to Korea. Unfortunately, the team's callsign S21KD was cancelled when they first arrived, and they tried to get a new license. However, Friday and Saturday were holidays in Bangladesh. They did get a new license on Sunday, S21ZCY, and moved to another location 2 1/2 hours away. The team hoped to be on the air that day but could not retrieve the radio gear from the airport. Safety was the team's first priority, so they cancelled and headed back home. They hope to get another chance to operate from S2-land soon. For more details and updates, please visit the following Web page at: http://dxpedition.co.kr

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and Bill/VK4FW for the following DX information.

FOR IMMEDIATE RELEASE

VK9LA NEWS RELEASE MARCH 12TH

LOW BAND OPERATIONS.......

Extensive work has taken place to make sure all operators are familiar with various sunrise sunset times throughout the world.

Lord Howe island Sunset is at approx 07.36utc with Sunrise being 19.36utc (taken at 27th March 2009). We have all been familiarizing ourselves with possible propagation openings for all points of the globe.

A complete list in an ascending pecking order will be at every HF station for operators to continually check. It is our plan to have an operator on deck on 160m from 07.40utc daily to work all the Pacific areas followed by various parts of Asia somewhere around 08.50utc. From then we will look towards South Americas at around 09.35utc thru to approx 10.15utc when we will begin looking for W1 in USA at approx 10.30utc then head to again some parts of Asia and then VE3 and W4 around 11.30utc as well as TI and XE areas. UA9 around 13.30utc followed by W6 etc.

At approx 15.00utc we will begin searching for the likes of EK, 4L, UA1 followed by 4X at 15.45 and then the likes of 5B.

Hopefully we will get a shot at South Africa around 16.15utc then head up again into EU territory to LZ around 16.35utc, HA and so on leading up to I, LA, OZ, HB and G lands at 18.20utc.This procedure will be done every day we are there. This will also be adopted on 80m as well as 75m as we have 2 stations on air simultaneously on the same band, as well as 40m. We expect big long openings on all bands below 20m. We would however request that you be patient. It will take us a couple of days

to install all low band antennas.

We would also request that once you are in the log to please do not call the next night, let someone else have a go�� my pet hate is to see the same station in the log on the same band over and over.

Cu in the pile ups..... Bill VK4FW.... Dxpedition Leader

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, N4AA & QRZ DX, AA5UK, KH6HTV, AC7DX, K8YSE, N8AGU, K9WZB, 2E1EUB, 4Z4KX, 9A2JK, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G1DVP, I1JQJ/IK1ADH & 425 DX News, I2YSB, IK7JWX, ON4EI, PA3EWP, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th/March, through Sunday, 15th/March there were 225 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2M, SCOTLAND (Satellite Op). Just a reminder that Paul, 2E1EUB, will once again be active as 2M1EUB from March 21st for one week. He will sign 2M1EUB and be active on all the satellites from northeast Scotland. Also, look for him on 160 and 80 meters. Checkout QRZ.com under 2M1EUB for more info.

4M5, VENEZUELA. Operators Suer/YY5EBV (YL), Jose/YV5BM and Jhony/YV5KG will be active as 4M5IR during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via YV5KG.

5Z, KENYA (HF and EME Op). Operators Eltje/PA3CEE, Rene/PE1L and Ronald/PA3EWP will be here and active between April 1-12th. Eltje and Rene are expected to be active as 5Z4EME on 2 meters and 70 cm EME. For 2 meters they will be using two 10 element yagis, a 400 watt amp and a preamp (there will be a smaller setup for 70cm). Suggested frequencies for transmitting and receiving will be on 144.124 MHz, and on 144.084 MHz for Japan. Ronald will be active on HF with the call 5Z4/PA3EWP using a Elecraft K2 with a homemade amplifier and vertical antennas for 40-10 meters. QSL 5Z4EME via Eltje, PA3CEE. QSL 5Z4/PA3EWP via Dennis, PA7FM. For complete details, please visit: http://www.emelogger.com/kenya

9A09, CROATIA (Special Event). Members of the Djurdjevac Radio Club will activate special event station 9A09P (Nine Alpha ZERO NINE Papa) between now and December 31st. Activity is to celebrate the city of Djurdjevac, and operations will be on all bands and modes. A special QSL card will be issued with the city's story on it. Under the new administrative division of Croatia, Djurdjevac gained the status of a city only in 1997. All QSOs will be confirmed automatically via the Bureau.

9H, MALTA (EU-023). Valentin, DL5GA, will be active as 9H3GA between March 17-24th. Activity will be holiday style on the HF bands. QSL via his home callsign.

9J, ZAMBIA. Gabriel, YO4HEK, will be here for one year and will be active as 9J2YO. Activity will be on all bands using CW, SSB, and PSK31. Over the past week Gabriel has been very active on 40/30 meters between 1700-2030z. QSL via YO4ATW.

A6, UNITED ARAB EMIRATES. Khalid, A61BK, in Dubai, is expected to be active during the CQWW WPX SSB Contest (March 28-29th) probably as a Single-Op entry. QSL via A61BK.

AO1, SPAIN. Operators Ismael/EA1GDX and Ubaldo/EA1GVG will be active as AO1K during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via EA1GVG.

CQGC-2009 CONTEST RULE CHANGES. Please note that some rules for the "2009 Yuri Gagarin International DX Contest", which will be held between 2100z, April 11th and 2100z, April 12th, have been changed. Rules can be viewed at: http://gc.qst.ru/en/section/32
This contest is dedicated to the memory of Yuri Gagarin, who realized the first human flight to space, on April 12, 1961.

DV1, PHILIPPINES. Alex, DV1UBY, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op entry. QSL via DV1UBY direct.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC Credit:
K5D - Desecheo Island; 2009 Operation

E5, SOUTH COOK ISLANDS (Update). Tim, NL8F/VK4COF, will be active as E51COF for 14 days from Rarotonga Island (OC-013) sometime between March 21st and April 4th. Activity will be on 80/40/20/15/10 meters SSB and possibly 17 meters. QSL Manager for this operation is K8NA.

EE2, SPAIN. Members of the Ondarroa Group will be active as EE2W during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via EB2BXL.

EI, IRELAND. Olivier, ON4EI, will be active as EI/ON4EI during the CQ WPX SSB Contest (March 28th-29th) as a Single-Op/All-Band/Low-Power/ Non-Assisted. His operations will be from the area of Clonmel (Fethard) Tipperary County (IO62EK). He will be in Ireland between March 25th and April 1st. Activity will be on 160-10 meters using a K3 Elecraft w/100w into various antennas:
160/80/40m : vertical monopole 18M and inverted V.
20m : 10 elements inverted V wire beam East-West design ON4EI.
<http://www.on7wr.be/Gigazette/ON4EI/ON4EI_Wirebeam.pdf>
15/10m : 2 elements horizontal wire beam East-West design VE7CA.

GB5, NORTHERN IRELAND (Special Event). Members of the Foyle and District ARC (MN0AKU) will activate the special event callsign GB5SPD to celebrate Saint Patrick's Day 2009. Activity will take place between Saturday, March 14th, and Tuesday, March 17th. QSL via MN0AKU, direct (QRZ.Com) or by the Bureau.

HOLYLAND CONTEST 2008 RESULTS. Mark, 4Z4KX, informs OPDX that the results for the 2008 Holyland Contest are now available on the IARC Web site at:
http://www.iarc.org/?page_id=3D353/
The 2009 Holyland Contest will take place on Saturday, April 18th, starting at 0000z.

IOTA NEWS.....
AF-065. (Update/IOTA Op). Alfredo, IK7JWX, informs that one more operator has been added to the Mogador Island Dxpedition, April 19-26th. Ampelio, IS0AGY, will join the group and sign 5C2B. QSL via his home callsign. He also announced the following suggested frequencies:
CW - 1825, 3525, 7025, 10115, 14025, 18075, 21025, 24895 and 28025
SSB - 1845, 3775, 7055, 14255, 18145, 21255, 24955 and 28455
RTTY - 3585, 7040, 10145, 14085, 18100, 21085, 24920 and 28085
BPSK31 - 3595, 7040, 10145, 18100, 21075, 24915 and 28075 kHz
Activity will be on 2m (SSB and M.S.) and 6m: Stand-by on E sporadic. The group is still looking for sponsors and donations. For details on how to help and updates, visit their Web page at:
http://www.mogador2009.altervista.org

AS-079. Take, JI3DST, is now active as JS6RRR from Miyako-Jima Islands (AS-079, JIIA AS-079-005) until March 24th. Activity will be on 160/80/40/17/15/12/10/6 meters, CW, SSB, RTTY, FM and SSTV. Take may possibly make side trips to Ikema-jima (JIIA AS-079-001) and Kurima-jima (JIIA AS-079-003). He may possibly use the callsign JI3DST/JS6. QSL via his home callsign through

the JARL Bureau only.

AS-192. Suli, 7Z1SJ, and others will be activating the Red Sea Coast South (Jizan Province) Group this week. The main bands will be 40 and 20 meters, possibly 160 meters. No other details were provided.

EU-006. Members of the Galway Radio Experimenters Club will be active as EJ4GRC from Inishmore Island (WAB Square L71) between 1200z, March 17th and 1200z, March 18th. Activity will be on all bands and modes. Visit the club's Web site at: http://www.galwayradio.com

EU-020. Rolf, DK2ZF, is planning to be active as SM1/DK2ZF from Gotland Island (JO96CV) during the month of July. Activity will be mainly 6 and 2 meters as well as 432, 1296 and 2320 MHz. Preferred times will be during Sporadic E and Meteor-scatter. More details are forthcoming.

EU-037. Bernd, DL8AAV, will be active as SD1B/7 from Oland Island (WLOTA 0588) between May 31st and June 12th. Activity will be on the HF bands, SSB only. QSL via DL8AAV, direct or by the Bureau.

NA-014. Heinz, VA7AQ, will be active as VE9/VA7AQ from Grand Manan Island (CISA NB-003, WLOTA LH-0082) between March 20-25th. QSL via his home callsign, direct or by the Bureau.

NA-078. Bernardo, XE2HWB, will be active as XE2HWB/XF1 from Santa Margarita Island, March 21-23rd. Activity will be on or around the usual IOTA and island frequencies. QSL via N6AWD, direct or by the Bureau.

NA-141. (Update/Special Event) Members of the Jupiter Tequesta Repeater Group now have a Web page available for next year's activity to activate W4K to celebrate John F. Kennedy's birthday from Peanut Island (USI FL-479, Palm Beach County, FL), May 29-30th, in 2010. Operations will be from "JFK's old Cuban missile crisis bunker". Activity will be focused on HF (mainly 40/20m), 6 and 2 meters using CW and SSB. This will be the first time Peanut Island will be activated. The QSL cards have been designed for the event and can be viewed on the new Web page at: http://jtrg.org/DXpedition.shtml

JD1, OGASAWARA. Shige, JA1HMM, is once again active as JD1BIE possibly until March 25th. He is on a short holiday on Iwo-Jima (AS-030), but plans to be active on 40-10 meters using CW and SSB. Over the past week he was heard on 40/30/17 meters CW and 20/15 meters SSB. Reports indicate that he may activate a different island but details are not yet known. QSL via JA1HMM at: Shigeaki Miyamae, 4-20-22-302, Aoto Katsushika, Tokyo 125-0062 JAPAN.

KH4, MIDWAY ISLAND. It was announced this past week by Tom/N4XP and Dave/WB4JTT (edited): "A multi-national team of 19 operators will activate Midway Island in October 2009. The U.S. Fish & Wildlife Service (USF&WLS) has authorized amateur operation from this rare U.S. entity for only a 10 day period, its first radio activity in almost 10 years. Midway Island ranks number 24 worldwide and number 13 in Europe on the DX Magazine's "Most Wanted List". Activity will be on 6 meters to 160 meters with 5 to 6 stations. At least one station will be active on 20 meters around the clock for those who need it for a new country. Major efforts will be made to meet the demand to the most needed geographical areas, the low bands and RTTY. Team members are Joe/AA4NN, Carlos/EA1IR, Franz/DJ9ZB, Kimo/KH7U, Antoinette/KI6TVS, Jon/KL2A, Don/N1DG, Paul/N4PN, Tom/N4XP, Jeff/N6GQ, John/N7CQQ, Dave/WB4JTT, Charlie/W6KK, Bruce/W6OSP, Art/WA7NB, Janet/W8CAA, Joe/W8GEX, Byron/WA8NJR and Vrata/OK1KT. Off site support is being provided by Don/AA1V, Dan/W5DNT and Paul/W6XA. Travel to Midway is only allowed by chartered aircraft. Because of the size of the aircraft, the team is presented with unique challenges. As such, the aircraft will only be able to carry the team requiring the equipment to be shipped by boat some months ahead. Adding to the high cost of transportation, daily fees and other charges established by the USF&WLS makes this operation very expensive. A Web site has been established and can be found at:
http://www.midway2009.com
Please support this endeavor by sending a donation. To make it easy to donate you can contribute electronically using the Web site or if you choose regular means you may do so. Instructions are given on the Web site for either method. Updates will be published on the Web site as they become available..... Tom/N4XP & Dave/WB4JTT (Co Leaders for Midway Island 2009)"

MC0/MW9, WALES. Members of the Strumblehead DX and Contest Group will be on the air from their headquarters at the Farm in Wales for a period before, during and after the CQ WPX SSB Contest (March 28-29th). They will be using the club callsigns MC0SHL before the contest with some activity on 30 meters RTTY around 10148 kHz. During the contest they will be using both MW9W and MC0SHL - depending on the number of operators, there may be more callsigns on air. Please QSL via the club's manager M0URX. A live Web cam will be active during the contest, as well as more details and photographs on the club's Web site at: http://www.mc0shl.com

OP4, BELGIUM. Operators Jochen/DH5HV, Jean/ON4JW, Joe/ON4JZ, Karel/ON5TN and Jim/ON5UM will be active as OP4K from Antwerpen, during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via ON4JZ, direct or by the bureau.

OY, FAROE ISLANDS (First 60m Op!). Lars, OZ1FJB, will once again be active as OY/OZ1FJB from here between March 16th and April 1st. His activity will be limited to his spare time (suggested times 0600-0700z and 2100-2400z), mainly on CW but also SSB. He will be the first active station to be permitted to operate on 60 meters (CH. 5 - 5403.5 kHz USB). QSL via his home callsign.

OZ, DENMARK (IOTA/Lighthouse Op). Paul, I2AE, will be active from some Danish islands between May 1-15th. Some of the Danish island groups mentioned will be EU-029, EU-125, EU-171 and EU-172. It was indicated that there are a lot of lighthouses on these islands, and they will be activated also. No callsign was mentioned. It is suggested to monitor mainly 7050-7060 and 14250-14260 kHz.

QSL INFO AND NEWS.....
LOGS AND PICTURES ONLINE. Members of the Algarve S.T.A.R. DX team, who activated the Murtinas Posterior Lighthouse (POR-126, DFFA Fa-29) as CS6A on March 15th, state that the log and pictures are now online on their Web page at: http://algarvedx.com

E44M QSL STATUS. It was announced that the E44M QSLs are ready. The press release states, "In few days the first supply of cards will arrive to our managers Simone/IZ0BTV and Les/SP3DOI. We will start to answer the first direct QSLs as soon as possible."

KL7DX QSL STATUS. Ron, AC7DX, informs that all KL7DX Chuginadak Island (NA-234) received as of March 15th have been answered. Those who did not receive their NA-234 QSL, please resubmit.

NO QSL MANAGER. Larry, VQ9LA, wants everyone to know that he "DOES NOT" have a QSL Manager, and all QSL cards should be sent to the address listed under VQ9LA on QRZ.com.

QSLS VIA LOTW: 5R8GZ, TI5N, TN5SN, TR8CA, VK9WWI, YI1RAZ and YS4M

QSLS RECEIVED VIA MAIL: 1A0KM, 4O0A, 4O0HQ, 4W6MM, 4X4WN, 4Z1UF, 5B4/RW9UP, 7O1YGF, 7P8BA, 9J2BO, A45WD, A5100A, B1HQ, B7HQ, BA0AA, BD5WW, BD0AJ, BT1OB, BT1OH, BT1OJ, BT1ON, BT1OY, CT1ILT, E41/OK1DTP, E51QQQ, EA9IB, EL2DX, ES1QD, FK8CP, FM5CD, FO/DJ7RJ, FR/F6KDF/T, H40AA, N8S, OH0R, PZ5TX, RW1AI/MM, SV2ASP/A, T33ZZ, T77C, TA2RC, TO4E, VP2ETN, VP6DI, VK9NS, VK9RS, XW1B, XX9C, Z29KM and ZK3AH

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SILENT KEY. Silvano, I2YSB, reports that the team members of the 6O0N, J20MM and 9L1X DXpeditions regret to inform the DX community that Gianni, IS0VSG, became a "Silent Key" (SK) on March 9th, 2009. He was their pilot station during their DXpedition activity and had great dedication and passion. Silvano states, "We think we lost him, but we did not lose him as a model in our HAM life." OPDX and its readers would like to send out our deepest sympathy to the family and friends of IS0VSG.

T4, CUBA. Members of the Cuban Amateur Radio Federation in Las Tunas will be active as T48K during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via DK1WI.

TL0, CENTRAL AFRICA. Christian, TL0A (ex-TZ9A and 5U5U), is now active from here. He has been very active on 17 meters, usually around 18150 kHz at various times. There has been some activity also on 20 and 80 meters SSB. QSL via his home callsign, direct to: Christian Saint-Arroman, Chemin de Mousteguy, F-64990 Urcuit, France.

V6, MICRONESIA. Yoshi, JJ8DEN, will be active as V63PR until March 24th. Activity will be from two islands. Look for him to be active on Pohnpei (OC-010) until March 19th and from Chuuk Island (OC-011) between March 20-24th. Look for him on 160-10 meters using CW, RTTY, PSK31 and JT65A if possible. Operations over the past week were mainly on RTTY. QSL via JJ8DEN (w/SASE: Please send European type envelope with 2 USDs or 1IRC).

VC3, CANADA (New CISA Island/Lighthouse). Operators Doug/VE3CWO, Brent/VE3IRT, Neil/VE3SST, Valdas/VE3VO and Igor/VE3ZF will be active as VC3Y from the lighthouse on Bluffers Park Island (new CISA island and lighthouse), March 21st-22nd. Activity is to celebrate the 50th anniversary of the York Region Amateur Radio Club <http://yrarc.com/yrarc>. QSL via VE3CWO.

VC6, CANADA. Gord, VE6SV will be active as VC6T from Alberta during the CQWW WPX SSB Contest (March 28-29th) and CQWW WPX CW Contest (May 30-31st). QSL via VE6SV (QRZ.com).

VISALIA CONTEST DINNER. You can now purchase tickets for the Contest Dinner at the International DX Convention in Visalia, CA. The dinner is on Friday night, April 17th, in the Oak room at the Holiday Inn, Visalia. For tickets you have two options (in addition to the convention registration fee). PAID IN ADVANCE!: 38 USDs per person with random seating; or, 360 USDs for a full table for 10 people (All 10 tickets must be purchased by ONE person. One table will then be reserved for that person. Location of the reserved table will be random). The program will be Tim Duffy/K3LR, and he will speak on "The Never-Ending Challenge of Improving Your Contest Station." Also: The 2008 CQP Awards will be presented! For complete details on the dinner banquet, please visit:
http://www.elbloggotorcido.com/contest-dinner-2009.html

VK6, AUSTRALIA. Bernd, VK2IA, will be active as VK6AA during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Single-Band (40m) entry. QSL via DL8YR. Activity will be from the Northern Corridor Radio Group's (VK6ANC) club station situated about 20 kms north from the city center in Perth, Western Australia. See the station at: http://www.ncrg.org.au

VK9C, COCOS-KEELING ISLANDS (OC-003). Just a reminder that Bernd, VK2IA, will once again be active as VK9AA from the Cocos Beach Motel, West Island, between March 14-27th. Activity will be on 160-10 meters CW/SSB using a Spiderbeam for 10/15/20m, a 2 element wire beam for 40m, verticals for 80/160m and receiving antennas for the lowbands. QSL via DL8YR, direct (QRZ.com) or via DARC-Bureau.

VK9L, LORD HOWE ISLAND (Update). The VK9LA DXpedition will take place between March 23rd and April 3rd, with 16 operators. Bill Horner, VK4FW, member of Oceania Amateur Radio DX Group Inc. (ODXG), reports on Sunday, March 15th: "We have now established that we will have live internet on the island which should be 24/7. We intend to have photos, online log check and QSO totals updated on the web site www.odxg.org/vk9la.htm
All team members are finalizing last minute packing and weighing of luggage. All equipment sent via ship has safely arrived and is in storage awaiting our arrival.

There have been many queries since we devised a list of sunrise/sunset times for grey line propagation. We will have an operator on every low band every day whilst we are in darkness.
We also expect huge openings on 30m the same as K5D did. With our station separation we should be able to run 2 stations simultaneously to maximize openings......Cu in the pile ups."

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY are expected to be active as VK9GMW next week (possibly between March 22nd and April 6th) in what they call "another low-key, simple DXpedition". PLEASE NOTE that the dates are approximate and may change due to weather. The operation will have a strong low-band focus, although VK9WMW will operate on all HF bands. From their Web page, George reports from Airlie Beach, Queensland, Australia, (Sunday, March 15th): "Preparations are under way for the boat trip to Mellish. We are currently provisioning and loading fuel. Lots of fuel. We intend to depart from Airlie Beach Tuesday morning. The weather forecast is fair (15 to 20 kts)." QSL will be via HA7RY, by the Bureau or LoTW or direct to: Tamas Pekarik, Alagi ut 15, H-2151 Fot, HUNGARY. After VK9GMW has gone QRT, they will launch an "Online QSL Request Service" (OQRS) on their Web site. If you want to receive your QSL via the Bureau, please use that form to request the card. They will check your QSOs against the log and send your card to you via the Bureau. This method will allow them faster processing, helps them protect the environment, and you will receive your VK9GMW card faster. For more information, please visit the VK9GMW Web page at: http://www.vk9gmw.com For donations, please access: http://vk9gmw.com/support.html

VK9N, NORFOLK ISLAND (OC-005). Willy/ON5AX and his XYL Magda/ON3AX will be active as VK9N/ON5AX between now and March 22nd. QSL via ON5AX direct only.

VP5, TURKS AND CAICOS ISLANDS. Florida Contest Group members Art/N4PJ (CW/RTTY) and XYL Marsha/K4IRI (SSB) will be active as VP5/homecall from Providenciales (NA-002), March 17-24th. Their activity will include the Russian DX Contest (March 21-22nd) as VQ5B. QSL via their home callsigns.

WH6, HAWAII (Very Rare County). Attention county hunters! It was announced at the Maui Amateur Radio Club (MARC) this past week that the extremely rare Kalawao County will be activaed on 40 and 20 meters, March 30-31st. MARC member, Jayson Kohama, WH6BXK, is expected to work there on those particular days. After he gets off work each day, he plans to be on HF making as many contacts as possible. His station, WH6BXK, will be on the air each day after 1800 local (6:00 pm or 0400z). He will be on 7188 kHz and 14335 kHz. Kalwao County is one of the rarest USA counties. It is the 2nd smallest county and the poorest in the USA. It is located on the Kalaupapa peninsula, on the island of Molokai. It is the old Hawaiian leper colony. Because it was a leper colony, it was totally isolated from the rest of the islands and had its own separate county government, which was administered by the state. Hams must have special permission to go there and operate. Thus it is extremely rare for any ham signals to ever radiate from Kalawao.

XR1, CHILE. Members of the Radio Club La Portada will be active as XR1A during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via XQ1IDM.

XU, CAMBODIA. Retu, OH4MDY, will once again be active as XU7MDY from Sihanoukville between April 9-21st. Activity will be on the HF bands 80-10 meters using CW, SSB, RTTY and PSK31. QSL only direct to XU7MDY address on QRZ.com.

ZF2, CAYMAN ISLAND (Satellites, Grids, HF and Contesting). Adrian, AA5UK, will be operating as ZF2AE from Grand Cayman and ZF2AE/ZF8 from Little Cayman between March 25th and April 8th. Current plans are to operate holiday style on AO-51, SO-50, VO-52 and FO-29 satellites. He plans to activate EK99hi from March 25-28th, EK99xp and EK99wp from March 28th through April 3rd (he plans to operate HF only during part of CQ WPX SSB Contest and the rest of his stay on Little Cayman, 40-10m) and EK99kh from April 3-8th. Most activity will be in the afternoons and evenings. QSL direct with SAE/SASE, Bureau, LoTW or eQSL.

ZF2, CAYMAN ISLAND. Garry/K9WZB and XYL Sharon/K7WZB will be operating from Cayman Island as ZF2ZB between April 21st and May 6th. Activity will be on all bands 160-6 meters, using CW, SSB, RTTY and PSK31. They will be monitoring 6 meters most of the time for openings to U.S. and Europe. QSL direct only via K9WZB.

ZL7T QRT. Lee, ZL2AL, reports that the multi-national team that activated Chatham Island in the South Pacific as ZL7T between March 5-10th, averaged about 2,200 QSOs a day with three radios for 5 days with over 11,000 QSOs in the log. The final logs have been uploaded to the Web site. Please QSL direct via Lee, ZL2AL: 87 Auckland Road, Greenmeadows, Napier 4112, NEW ZEALAND. For a direct response, you must enclose a self-addressed envelope (SAE) and at least 2 USDs or 1 IRC to cover the return postage, otherwise they will respond via the Bureau system. They will also reply to QSLs sent to them via the ZL Bureau, and they will upload their logs to the "Logbook of The World" (LoTW) by September this year.

I received the email below today. This small-town business has been serving us since the 1930's.

73, de Hans, K0HB

Burghardt Amateur Center Inc will now be called Burghardt Radio Repair Inc and will no longer sell amateur radio transceivers and accessories. All backorders have been cancelled.

The current economic conditions have caused us to re-evaluate our goals and direction. We will continue to provide radio repair service as it has become a very busy business. Thank you for your support in the past and look forward to continuing our relationships through our servicing facility.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, W3ML, W3UR & The Daily DX, K4ZLE, N4AA & QRZ DX, K8YSE, N0TG, 7Z1SJ, 9A2X, DF7ZS, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EC1AE, F5NQL & UFT, I1JQJ/ IK1ADH & 425 DX News, OK1DOT, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE8EV and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th-March, through Sunday, 22nd-March there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FW, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4Z, ISRAEL. Ziv, 4Z4OQ, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (20m) entry. QSL via 4Z4OQ.

8P, BARBADOS. Tom, W2SC, will be active as 8P1A during the CQWW WPX DX SSB Contest (March 28-29th) as a Single-Op/All-Band/High-Power entry.

QSL via NN1N.

9A800, CROATIA. Members of the Radio Club "Varazdin" (9A1HDE/9A7A) will be active as 9A800VZ until the end of the year. First activity will be during the CQWW WPX SSB Contest (March 28-29th). Activity is to celebrate the 800th anniversary that King Andrija II gave to the people of Varazdin the status as a free and royal town. More details are available on QRZ.com. QSL via 9A7A.

9M8, EAST MALAYIA (Update/Change). Steve, 9M6DXX, will operate as 9M8Z from Sarawak (OC-088), March 21-29th. Activity will include the CQ WPX SSB Contest (March 28-29th) as a Single-Operator/Unassisted/All-Band/ High-Power entry. Outside the contest look for him to be on 20 meters SSB early afternoons, 40 meters SSB later on. He will use a 3 element Yagi. QSL via M0URX, direct, by the Bureau or LoTW. The reason Steve is going earlier than first announced, is that he has been asked to give a presentation on DXpeditioning at an "Amateur Radio Roadshow" being held by MCMC, the Malaysian licensing authority, on Saturday, March 21st.

ANOTHER ANTARCTIC OP & CRUISE IS BEING PLANNED. Mehdi, F5PFP, announced this past weekend that he is in touch with several French skippers for another planned expedition to the Antarctic area to take place in 2 years. He stresses that this is just in the "PROJECT stage", not an official announcement!! The itinerary would be more or less the following:
Machu Picchu + Republica del Ecuador refuge (King George Island)
Cerda traces station (Deception Island)
Maldonado (Greenwich Island)
Portal Point traces station (West Graham island)
Port Circoncision (Petermann Island)
Yelcho (Doumer Island)
Melchior (Observatorio Island)
And possibly a few more bases/refuges
Mehdi states this kind of expedition will take a long time to prepare because of the high cost (+/- 6000 Euros per person). If you wish to be part of Mehdi's team, send an E-mail to him at: f5pfp@aliceadsl.fr

ATTENTION TOPBANDERS! This web page may be of interest to the Topbanders. Site provides a "Whos Who on Topband" at: http://www.qsl.net/160/

C9, MOZAMBIQUE. Just a reminder that members of the Texas DX Society will be active as C91TX from Bilene, Maputo Province, between March 25th and April 5th. Bilene is 180km from the capital city of Maputo. Activity will be on all bands 160-10 meters with 3 active stations, one station each for CW, SSB, and the Digital modes. They will participate in the CQWW WPX SSB Contest (March 28-29th). Operators mentioned are: Cal/WF5W, Paul/W5PF, Madison/W5MJ, Bill/K5WAF, Dale/KG5U and Jim/N4AL. QSL Manager for C91TX is W5PF. Depending on internet access, they hope to have an online log search page once operations start, but don't expect daily updates. For updates, visit the Texas DX Society C91TX Web page at: http://www.tdxs.net/c91.html

CQ3, MADEIRA ISLANDS. Members of the CT3Team will be active as CQ3T during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via the LoTW or CT3KN.

CT3/CS9, MADEIRA ISLANDS (Update). Helmut, DF7ZS, will be active as CT3/homecall between March 24-31st. His activity will include the CQWW WPX SSB Contest (March 28-29th). He will sign CS9L for the contest. QSL via DJ6QT. Look for casual operation before the contest. QSL via the Bureau. Visit his Web page at: http://www.df7zs.de

CY0, SABLE ISLAND. Randy, N0TG, informs OPDX: "Everything is coming together nicely for the October 2009 DXpedition. Formal authorization to access the island has been received, and the team is actively preparing. Everyone is invited to visit the Web site periodically for continuing detailed information at: http://www.cy0dxpedition.com
Also, the team would invite you to sign the Guestbook." From their Web page, activity will take place between October 7-14th, and operators will sign homecall/CY0. Operators mentioned are: Murray/WA4DAN, Randy/N0TG and Ron/AA4VK. Activity will be on all bands 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns.

DAYTON HAMVENTION DX ACTIVITIES. The SouthWest Ohio DX Association (SWODXA) is pleased to announce the speakers for this year's DX dinner to be held in conjunction with the 2009 HamVention. Their speakers will be John Stanley/K4ERO, and Ruth Stanley/WB4LUA. This husband and wife team travel the globe installing, maintaining and training personnel for religious international shortwave stations. They have been to over 60 DXCC entities and operated from more than 12 of them. John has written many technical articles in the ham journals (with one in the April 2009 issue of QST), is a recipient of the 2007 Doug DeMaw Technical Excellence Award and is an ARRL Technical Advisor, having contributed many pieces to the ARRL Handbook. When they accepted the invitation to be our speakers, Ruth commented that they have "....lots of interesting details about antennas and contest sites and DXing possibilities along with stories and more stories. I can hardly wait to hear what we'll say."
The dinner will be Friday evening, May 15th, at the Crowne Plaza Hotel, located in Dayton city center. Attendees will have their choice of either a steak dinner or a vegetarian dinner. They must be informed when the tickets are ordered if you want the vegetarian option. Tickets are 39.00 USDs per meal, payable in U.S. funds to SWODXA. (Sorry, they do not process PayPal or Credit Card payments.) Please advise if you want a vegetarian meal when you order. Order from Pete Meyer, N0FW, at his CBA. SASE is required or you may pick up your tickets at the door. They attempt to honor group seating requests when tickets are ordered together. There is not a bad seat in the house, but seating is definitely limited. Come join them for an evening of fun and fellowship.
As in the past, there will be some nice door prizes. Last year the main prize was an Icom IC-756 Pro III, but this year ICOM has promised them one of the first IC-7600's to be brought in to the United States! Up-to-date information may be found on the club's Web site at: http://www.swodxa.com
Pete's E-mail address is: n0fw <at> live <dot> com.
Last year Yaesu joined them in sponsoring the DX forum during HamVention.

They have agreed to partner with them again for 2009. There will be a FT-2000 with PEP raffled off at the end of the DX forum. The winner does not have to be present. Tickets for a chance on the FT-2000 are 5.00 USDs each or 5 for 20.00 USDs. For your convenience, they may be ordered at the same time you purchase your DX dinner tickets. All proceeds from this raffle are used by SWODXA to assist in providing DXpedition grants. Confirmed DXpeditions to present at the DX forum are: E44M by Simone, IZ0BTV; K5D by TBD; African DX Safaris by Frosty, K5LBU; VK9DWX by Josh, W4WJF. The DX forum is currently scheduled for Saturday, May 16th, to begin at 2:45 PM.

E7, BOSNIA-HERZEGOVINA. Operators Richard/9A1TT, Vlado/E70T, Zoka/E76C, Braco/E77DX and Rob/E77E will be active as E7DX during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via E77E.

EF8, CANARY ISLANDS (AF-004). Operator Valery, RD3AF, will be active as EF8M during the CQ WW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via UA3DX (QRZ.com).

FJ, ST. BARTHELEMY (NA-146). Operators Oscar/EB1HF and Pablo/EC1DPM will be active as FJ/homecall between April 7-12th. Activity will be only on the digital modes, principally on RTTY, on the 20/15/10 meter bands. They will have two Icom 706s into dipoles and a 2 element yagi (by Super Antenna). Their QSL Manager is EC1AE. QSL only direct, (w/SAE + 2 USDs) or (w/SAE + 1 IRC) VALID CN01 IRC, to: Oscar Gancedo, P.O. Box 921, E-33080, Oviedo, SPAIN.

HH, HAITI (Update to OPDX.849/899). Operators Jan/K4QD and Don/AF4Z will be active as HH4/homecall from the Northwest Haiti Christian Mission (www.nwhcm.org) between March 24th and April 4th. They will operate 80-10 meters on CW, SSB and RTTY as time permits. Nighttime low band operations will be limited to the availability of AC power. They will also participate in the CQWW WPX SSB Contest (March 29-30th), along with Jean-Robert, HH2JR, using the special prefix and callsign 4V4JR for the contest. QSL via their home callsigns. Operators prefer direct or LoTW, but the Bureau is "OK".

HQ2, HONDURAS. Operator Dan, HR2DMR, will be active as HQ2W during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band/High-Power/Assisted entry. He will use monobander antennas on 20/15/10m and sloper antennas on 160/80/40m. QSL via HR2DMR. QSL via address on QRZ.com.

IOTA NEWS.....
AS-192. (UPDATE/New IOTA) Operators Firas/HZ1FS, Mohamad/HZ1MD and Suli/7Z1SJ are now active as HZ1FS/P from Hibar Island in the Red Sea Coast South (Jizan Province) Group until March 23rd (but may stay longer). Activity will be mainly SSB with possibly some CW and Digital, on 160/40/20/17/15/10 meters. They will have three stations with many antennas (mainly using a spider beam on 20/15/10m). QSL via EA7FTR.

EU-052. Operators George/SV1QN, Fotis/SV1AIN, Giannis/SV1GYG and Nikos/SW1GYN will be active as homecall/8 from Zakynthos

Island [aka Zante] (GIOTA INS-015, MIA MG-138, WLOTA 0209) between March 23-29th. Activity will be on 160-6 meters using all modes. QSL via their home callsigns.

EU-189. SPECIAL NOTICE by Theo, ON4ATW, about the Rockall operation (dated March 21st): "We are disappointed and surprised to read the news on some web pages and DX-bulletins about our planned operation from Rockall Island sometime this year. Apparently one of the organizations where we filled out an application form in order to receive sponsoring has abused this information and distributed this without notice to us. Sadly all information on those web pages and personal blogs is misleading and definitely not correct! Please be advised that any information will be forthcoming from me ON4ATW or at least will carry my signature in order to inform the DX community with real and up-to-date information. We are at a critical phase in preparing this expedition and releasing info at this stage could jeopardize the whole operation. Therefore, I ask you, our audience, to standby until accurate and inside information will be released once we have the feeling it is time to do so. Up until now nothing is official and we do not agree with individuals sending info to the DX-bulletins without prior notice to one of the actual Rockall 2009 team members."

NA-192. (Op Delayed) The date for the VX8X DXpedition has been moved back two weeks due to the requirements of the ongoing drilling operations on Ellice Island. Operators John/VE8EV, Wally/VE8DW and Gerry/VE8GER will now be active as VX8X from Ellice Island, April 2-5th. Activity will be on 40/20/15 meter CW/SSB during a 24 hour per day non-stop operation. Expect to see them on CW, but most of the focus will be on 20 meter SSB on 14260 kHz. QSL via the information on QRZ.com under VX8X. For additional info and possible updates, visit the following Web page at: http://ve8ev.blogspot.com/search/label/IOTA

JW, SVALBARD. Just a reminder that Francois, F8DVD, will once again be active as JW/F8DVD from the Longyearbyen ARC located on Spitsbergen Island, 78 degree North, and about a thousand kilometers far from the geographic North Pole (EU-026, WAZ 40 and Grid Square JQ78TF), April 19-25th. His activity will be on all HF bands both CW and SSB. This will be Francois's 6th time on the island. He will use the Longyearbyen Radio Club's equipment which consists of an ICOM 751 and a 500 watts PA, into a 5 elements yagi on a 30 meters high tower. QSL via his home callsign, through the French REF-Union Bureau or direct, w/SAE + 1 IRC (or 1 USD for EU, and 2 USDs for elsewhere) to: Francois Bergez, 6, Rue de la Liberte, F-71000 MACON, France.

K5D DXPEDITION DVD. The K5D Desecheo Island 2009 DVD is in the works. Bob/K4UEE and Ed/W4ZSB will produce yet another exciting DXpedition video. In the tradition of previous video productions, the K5D Dxpedition

video, entitled, "Desecheo---so near, yet so far" will be full of exciting footage of the helicopter trips, the island from the air, camp set up and takedown, pileups you won't believe and of course an inside look into the logistics of a big DXpedition, interviews with key team members and of course, humor. The video should be ready by September 2009 and will sell for 25.00 USDs. But by ordering now, you reserve an early copy of this collectors' item at a discounted price of 22.00 USDs. As always, this includes shipping and handling. To reserve your copy, go to: http://69.89.25.185/~trexsoft/t-rexsoftware.com/k4uee/prebuy.htm

LX, LUXEMBOURG. Lars, DF1LON, will be active as LX7I during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

OH0, ALAND ISLAND (EU-002). Anne, OH2YL, will be active as OH0/OH2YL between April 9-14th. Activity will be on the HF bands using CW and SSB. QSL via OH2YL.

OL, CZECH REPUBLIC. Members of the Jelinek Vladimir Radioklub (OK2KJU) of Prerov will be active as OL7T during the CQ World Wide WPX SSB Contest (March 28-29th) as Multi-Single entry. Operators mentioned are: OK2BXU, OK2BXE and OK2BZP. QSL via OK2BXU.

P2, PAPUA NEW GUINEA (IOTA Op). Once again the team of operators Luis/ CT1AGF, Derek/G3KHZ, Steve/G4EDG and Hans/SM6CVX, plus Gordon/G3USR, will activate three Papua New Guinea IOTA islands between October 22nd and November 9th. Islands mentioned are Tanga Island (OC-102), Green Island (OC-231) and Woodlark Island (OC-205) . Activity will be on 160-15 meters using CW, SSB and RTTY modes. Gordon/G3USR will be exclusively on SSB. The team will be using new single band vertical dipoles for 30-15 meters and a ground plane for 40 meters.

PJ2, NETHERLANDS ANTILLES (Contest Station Available). Geoff, W0CG (PJ2DX), resident caretaker of PJ2T, announced that nobody in the PJ2T club (CCC - Caribbean Contesting Consortium) is interested or able to operate the Curacao station for the IARU HF World Championship in July. Thus, the place is available if you would be interested in coming there as a Single-Op, or to organize a group operation. With sufficient lead time, Geoff could arrange for you to get a callsign of the form PJ2* (except that PJ2A, PJ2R, and PJ2T are unavailable). If you wanted to do a group operation that would include Geoff for a little bit of the operating time, you would be able to sign PJ2T. Two by two callsigns are NOT allowed for visitors to Curacao, sorry. The QTH has two bedrooms, two baths, and four beds available. (Geoff will sleep in another room attached to the house.) There's tons of info about the place at: http://www.pj2t.org Geoff is happy to respond to your questions by E-mail at: ghoward@kent.edu

QSL INFO AND NEWS.....
QSL 4U1UN via HB9BOU. Activity took place this past weekend (Friday through Sunday. Operators mentioned were: Mohamed/ KA2RTD, Johnny/LA2IIA (NQ2G), George/N2GA, Tony/ N2UN and "The Daily DX" editor Bernie/W3UR.

QSL KH0/K2JA via his home callsign, JL3SIK.
QSL V47NT via W2RQ

Petr, OK1DOT, informs OPDX that he is now the QSL Manager for Kunle, 5N0OBA. Kunle is the General Secretary of NARS (Nigera Amateur Radio Society) and the guardian of Amateur Radio in Nigeria.

CN8CG QSL ROUTE. If you recently used the QSL information on QRZ.com for CN8CG, the QSL route is not correct. The route did state QSL to Jules, W1GPY, but has since been removed. It was reported to OPDX that Jules ceased to be CN8CG in 1998 and was reissued. There is no QSL Manager list for CN8CG. According to HAMCALL, the callsign CN8CG was reissued in 2001 to Kamal Bella (Bloc, Kenitra, Kenitra 14000, Morocco).

OLD LOGS CHANGE HANDS. It was reported that Russ, WA3FRP, has received the following logs that were previously held by Ron, AC7DX, and are now in his possession for safekeeping and possible old QSLs:
XW8FA - Laos (13-Dec-1972 - 09-Apr-1974)
VK0HM - Heard Island (22-Nov-1969 - 03-Apr-1970)
V31UN - Belize (22-Oct-1991 - 31-Oct-1991)
T30W - Western Kiribati (07-Mar-1993 - 14-Aug-1994)

QSLS VIA LOTW: 4M5R, 5K0T, CW7T, CX7TT, EA1WX, EA6NB, HK6P, HQ9R, LQ0F, OA4SS, P40R, PS0F, PY2WC, S53F, T42T, TI5N, TO5A, V26G, WP4SK, YS4M and ZF2AM

QSLS RECEIVED VIA MAIL: 4L4MM, 6W/DL2RMC, 9Y4AA, CE0Z/DL2AH, CX9AU, E51QQQ, EL2DX, EY7AF, FK5RE, FK8CP, FO/DJ7RJ, II5AM, KP2AD, OZ1CTK, PA1RJ, T31DX, T33ZZ, TR50R, VK9DNX, VK9DWX, YB1ALL and ZK3AH

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SPECIAL EVENT. Look for special event station R150A to be active through the end of April. Activity is to celebrate the 150th anniversary of the birth of A.S.Popov. Operations will be from the Central Museum of Communications in St.Petersburg. Activity over the past week has been on 40/20 meters CW and SSB. QSL via RK1A.

SPECIAL EVENT (Dayton HamVention). Look for special event station W1AW/8 to be on the air during the Dayton HamVention (May 15-17th). They are currently looking for volunteers to operate the station for 4 hour shifts. Volunteers will receive an on-grounds parking pass, an admission ticket and a hat. Sign up in advance is STRONGLY recommended -- first come first served on requested shifts. This WILL fill up quickly. Contact via E-mail Jerry Bodey, N8OWV at: jerrybodey@sbcglobal.net

VK9C, COCOS-KEELING ISLANDS (OC-003). Bernd, VK2IA, continues to be very active as VK9AA from the Cocos Beach Motel, West Island, until March 27th. Most of his activity this past weekend has been on 20/17/15 meters CW, with some 40/30/10 meters. QSL via DL8YR, direct(QRZ.com) or via DARC Bureau.

VK9L, LORD HOWE ISLAND (Update). As this was being typed, there was some VK9LA activity on the air. The last of the DXpedition team should arrive on the island by March 24th (total of 16 operators). The operation with 7 full HF stations from 2 separate sites, as well as one 6m station will be on the take air until April 3rd. Modes of operation are SSB, CW and RTTY. For suggested frequencies, see OPDX.899. The QSLing chores will be handled by VK4FW. An online QSL Requesting Service is now available at: http://www.odxg.org/qsl.htm
Any QSL CARDS managed by ODXG inc., or Bill Horner, VK4FW, can be sent to you utilizing this system. This is a FREE service if you request your cards to be sent via the BUREAU. A minimum payment of 5 USDs via PAYPAL is required if you request your cards to be mailed DIRECT TO YOU. QSL cards will be printed by UX5UO. For more updates, details on the DXpedition and how to donate to this operation, please visit the ODXG and VK9LA Web pages at: http://www.odxg.org
http://www.odxg.org/vk9la.htm
ADDED NOTEL: Lord Howe operators Stan/SQ8X and Pete/SQ9DIE have added a daily blog daily on Twitter.com. Look for regular updates on how the DXpedition is progressing at: http://twitter.com/vk9la

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, who were expected to be active as VK9GMW early this week (possibly Monday), suffered a major delay due to weather. As of Saturday, March 21st, the operators are on Marion Reef and have been there March 17th. As this was being typed, their latest press release states): "It appears the Tropical Low has dissipated. If this is correct, a serious danger to us has been removed. Winds, however, are still near gale force and are forecast to remain strong at least until Tuesday. This means that we will not be able to leave for Mellish until Wednesday, the earliest. The soonest we are likely to be on the air from Mellish is Friday, March 27th. In any case, we will be able to extend the operation to make up for any lost time. While we continue waiting at Marion Reef for the weather to break, we are operating as HA7RY/MM and AA7JV/MM using a short vertical and 00W. Please follow updates at: http://www.vk9gmw.com
LAST MINUTE UPDATE: On March 22nd, the team reports: "We are still on Marion Reef. The weather has improved slightly -- winds are no longer 40 knots -- they have eased to 30 kts. The imminent threat of a hurricane has also been removed. Winds for tomorrow (Monday, March 23rd) are forecast to be 25 kts, seas 9 to 12 feet (3 to 4 meters). We will make an attempt tomorrow to cross the 440 km distance to Mellish Reef. Our plan is to turn back if the seas are too dangerous or untenable. If not successful tomorrow, the next weather window will probably be on Thursday."

YJ0, VANUATU (Pacific CW Tour). Operators Dennis/F5VHY (G3MXJ) and Nigel/ G3TXF plan to operate as YJ0MXJ and YJ0TXF, respectively, from the Aore Island Resort off Espiritu Santo (OC-035) in Vanuatu for six days between Friday, March 27th and Wednesday, April 1st. This will be a CW only operation. Given the current paucity of sunspots, the main bands are expected to be 40/30/20/17 meters. They will try 80 meters, if local conditions permit. There will be no 160 meters. QSL YJ0MXJ via F5VHY, and YJ0TXF via G3TXF. The duo also plan to do short operations from New Caledonia (FK) on the way out to Vanuatu, and from Norfolk Island (VK9N)

on the way back. Their approximate activity times are as follows:
* FK/G3MXJ & FK/G3TXF: 0006z, Wednesday March 25th to
1200z, Thursday, March 26th
* YJ0MXJ & YJ0TXF : 1000z, Friday, March 27th to
1500z, Wednesday April 1st
* G3MXJ/VK9N & G3TXF/VK9N: 1000z, Saturday, April 4th to
1900z, Saturday April 4th
PLEASE NOTE: All logs will be up-loaded to LoTW when they return home.
There will not be online logs during these operations, nor are they
expecting any Internet access.

ZD8, ASCENSION ISLAND. Karol, G0UNU, will be active as ZD8KR between
May 4-11th. Activity will be mainly on 20 meters CW and SSB. More details
will be forthcoming closer to these dates (on QRZ.com). QSL via G0UNU,
by the Bureau or direct.

ZP0, PARAGUAY. Tom, ZP5AZL, plans to be active as ZP0R during the CQWW
WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry. QSL via
ZP5AZL. Visit Tom's Web page at: http://www.qsl.net/cx6vm/ZP5AZL

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, N4AA & QRZ DX, N5FF, KL7JR, K8YSE, N8OFS, NK0S, 5B4MF, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F4EGZ, F5NQL & UFT, G3KHZ, GU0SUP, I1JQJ/IK1ADH & 425 DX News, JA1ELY, M0OXO, Pete's-DX-Newsdesk, OH1MN, PY2SEX, RSGB IOTA Web Site, SM5LWC, SK7QB, SV8CYV, TA1HZ, TA0U, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 20th-March, through Friday, 27th-March there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VP2E, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA0, SWAZILAND (Update). Operators David/GI4FUM (EI4DJ, 3DA0DJ), Tony/
G4LDL, Gerry/M0MVV, Michael/NC4MM and Yuri/UT5EL will be active from the
station at the Hawane Resort during the month of August. The object of
this activity is to provide a ham radio station at an international scout
camp near Manzini between July 31st and August 11th. David (the organizer
of the DXpedition) has operated from Hawane Resort (near Mbabane) as
3DA0DJ on two previous occasions (in March 2007 [CQWPX SSB] and in October
2008 [CQWW SSB]). The Hawane Resort is located in the mountains of Western
Swaziland at over 4,000ft ASL. It has been used for DXpeditions on quite
a few occasions and is serviced by Daniel Hubbard/ZS6JR of African DX
Safaris. There are permanent antennas on the site including a 60 ft.
lattice steel tower with HF beams for 20/15/10m and the WARC bands. There
is a "Four Square" array of 40m dipoles suspended from the tower. Daniel
usually erects a vertical for 80/160m in addition to these antennas.
David/GI4FUM states, "It would be our intention to stay at and operate
from Hawane Resort and in addition provide operators for the scout camp
on a daily basis. The camp site will use the callsign 3DA0SS but each
team member will have their own 3DA0 callsign. The camp site is about
an hour's drive away. Unfortunately the campsite is not as well situated
for takeoff to Europe and USA as Hawane Resort. The campsite is on a
southerly facing hillside. We would like to provide as many modes and
as many bands as possible on this DXpedition. The March 2007 operation
included an EME station which was very successful and made contacts in
100 different countries. During our stay at Hawane there is another
DXpedition to Lesotho also serviced by African DX Safaris and team
members from that DXpedition may join us during our time there. John,
9M6XRO, will be transferring to Hawane during the 2nd week of our stay."
David/GI4FUM provides the following reference Web sites that may be of
interest:
Hawane Web site: http://www.hawane.co.sz
African DX safaris: http://www.africandxsafari.com
Photographs of previous DXpeditions to Hawane:

http://travel.webshots.com/album/558408223diIYNe?vhost=travel

3V, TUNISIA. SWL Ashraf, 3V4-002, will be active as 3V8SS from the "Radio
Club Station of Tunisian Scouts" in Sousse, during the CQWW WPX SSB
Contest, SSB (March 28-29th) as a Single-Op/All-Band/Low-Power entry.
QSL via IZ8CCW. Also, read about Ashraf on the following Web pages at:
http://ashraf3v4002.wordpress.com
http://www.qsl.net/3v4-002/

5B, CYPRUS. Jack, RW3QC, will be active as 5B4AII during the CQWW WPX
SSB Contest (March 28-29th) as a Single-Op/All-Band/2R entry. QSL via
RW3RN.

AH0, MARIANA ISLANDS (Update). Operators Kuny/7L1FPU (W1FPU), Yoshiki/KH0UA
(who may be the youngest non-native FCC General license holder) and
Tomo/N2QP will be active as AH0BT during the CQWW WPX SSB Contest (March
28-29th) as a Multi-2 entry. QSL via 7L1FPU. PLEASE NOTE: On 40 meters,
the team can only transmit between 7075-7100 kHz. Please listen for them.

C9, MOZAMBIQUE (Update). Members of the Texas DX Society are now active as C91TX from Bilene, Maputo Province, until April 5th. Activity will be on all bands 160-10 meters with 3 active stations, one station each for CW, SSB, and the Digital modes. Antennas being used are T-8 Log-Periodics by Tennedyne, and they will be up at about 50 feet plus. They will also use a 40 meter 4 square (and possible 80 meter 4 square) and a 72 foot vertical for 160/80/30 meters. The stations will be using a Tokyo Hy-Power amp, and two IC-2KL amps. The team will participate in the CQWW WPX SSB Contest (March 28-29th). Operators mentioned are: Cal/WF5W, Paul/W5PF, Madison/W5MJ, Bill/K5WAF, Dale/KG5U and Jim/N4AL. QSL Manager for C91TX is W5PF. Depending on internet access, they hope to have an online log search page once operations start, but don't expect daily updates. For updates, visit the Texas DX Society C91TX Web page at: http://www.tdxs.net/c91.html

CN, MOROCCO. M'hamed, CN8NK, in Rabat, will be active as CN4P during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op entry. QSL via EA5XX.

E21, THAILAND. Champ, E21EIC, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Low-Power entry. JA stations QSL via JR5XPG and all others via E21EIC. Visit Champ's Web page at: http://www.e21eic.net

E2, THAILAND (Early Announcements). Dej, E21YDP, will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via E21YDP. Also, look for Chai, E20WXA, to be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m)/ Low-Power entry. QSL via E20WXA.

ED8, CANARY ISLANDS. Members of the Radio Club Henares will be active as ED8R during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via EA4RCH. Operators mentioned are Jesus/EC1KR, Javier/EC4DX, David/EC4JD, Oscar/EA4TD, Miguel/EA4DEC, Jorge/EA8TL, Tomas/EA8TH, Domiciano/EA8UP and Edu/EA8AUW. Visit their Web page at: http://www.radioclubhenares.org

EF8, CANARY ISLANDS. Operators Pekka/EA8AH, Manuel/EA8ZS, Juan/EA8CAC, Jaakko/OH1MA and Toivo/ES2RR will be active as EF8R during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via LoTW.

FR, REUNION ISLAND (Update). Cedric, F4EGZ, will be active as FR/F4EGZ from St.Leu (AF-016) between now and April 13th. His activity will include the CQWW WPX SSB Contest (March 28-29th) as a Single-Op entry. Operations will only be on 20/15/10 meters. He informed OPDX a few weeks ago that he was on holiday and did not think he would be on the air after the contest. However, he is now planning to be active on 17m and 6m from the north-side of the island. For sked, send him an E-mail at: F4EGZ@Yahoo.fr

H2, CYPRUS. Spyros, 5B4MF, will be using the special prefix callsign H22H during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (40m)/High-Power entry. Please note that H22 is a unique prefix for the contest as nobody else will be using the special prefix. QSL via 5B4MF,

direct (address on QRZ.com), by the Bureau or LoTW.

IOTA NEWS.....
AS-177. NEW IOTA! Frank, DL4KQ, is planning to be active as AT9RS from a new IOTA, Grandi Island, off the coast of Vasco da Gama, Goa, India, between April 3-8th. No other details were provided, but watch the IOTA frequencies.

EU-017. (Update) Members of the Noantri DX & Contest Team will be active as ID9N from Vulcano Island (Eolian Group) (IIA ME-018, MIA MI-122, WLOTA 1001), April 25-30th. Look for activity on the HF bands, CW, SSB and the Digital modes. Operators mentioned are: Andy/IZ0EHO, Vincenzo/IZ0FKE, GiorDano/IK0XFD and Alberto/IK0ZCW. QSL via IZ0GKN. Sked request at: id9n@libero.it

EU-049. Members of the Aegean DX Group will be operate from Samos Island (GIOTA SAS006), as SX8P (Pythagoras) between April 3-12th. Activity is to celebrate the 2500th anniversary and honor the memory of Great Ancient Samian Philosopher and Mathematician "Pythagoras". For more information, see QRZ.com. Operations will mainly be on SSB and the Digital modes. On SSB, 14260, 18124, 7090, 3780 kHz (+/- 5 kHz), and if bands are open, check 21260, 24950, 28460, 50150 kHz (+/- 5 kHz). Look for them on BPSK31 and RTTY on 20/40/80 meters, and if the bands are open 15/10m. There will also be activity on the AO-51 Satellite. Operators mentioned are: Vassilis/SV8CYV, Alexandros/SV8CYR, Kostandinos/SV8IIR, Ilias/SV8FMY and George/SV8IJZ. QSL via SV8CYV, direct by the Bureau.

EU-094. French operators Alain/F1LLS, Thomas/F4BCG, Patrick/F4FCS, Antoine/F5RAB, Christian/F6AXN, Francis/F6DPD and Dominique/F6HEQ will be active as TM5EL from the Penfret Island (DIFM AT-059, WLOTA L-321, DPLF PB-038, Locator IN87AR), one of the Glenan Archipelago, between May 8-10th. Activity will be on the HF bands, as well as VHF, UHF and SHF, using CW, SSB, and the Digital modes. QSL via F6KHI.

NA-143. Operators Buzz/NI5DX and his brother Al/WD5IQR will be active from Galveston Island on Monday, March 30th. If conditions warrant, the pair will return to Galveston Island on Tuesday morning for another day of operation. As the Galveston Island State Park is still closed due to damage from Hurricane Ike this past September, the brothers will use generator power. They will run barefoot into a ZeroFive 43 foot vertical. Monday's operation is planned to be mainly SSB with the possibility of some CW and digital modes.

NA-223. (Update/Date Change) Members of the Russian Robinson Club will be active as KL7RRC from Ogliuga Island, Alaska, between July 23rd and August 5th. Activity will be on 160-6 meters including an entry in the RSGB IOTA Contest (July 25-26th). Operators mentioned are: N3QQ, RA3NAN, RU4SU and UA9OBA. Watch for

updates on: http://www.na-234.com/contact_chuginadak_expedition.html

IR9, ITALY. Members of the ARIPA DX Team will be active as IR9Y from Sicily during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via IT9ABY.

J8, ST. VINCENT. Dave, G3TBK, is once again active from here as J88DR and will be in the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/ All-Band/Low-Power entry. Activity outside of the contest will be on all HF bands, especially 30/17/12 meters, but mostly on CW. QSL via G3TBK, direct or by the RSGB Bureau.

JT1, MONGOLIA. Operator Yohji/JH1AWN (JT1AWN) and three members of the Akita DX Association [Takao/JA7AGO (JT1AGO), Sei/JA7LU (JT1LU) and Akio/ JA7ZP (JT1ZP)] will be active between April 21-28th. Activity will be on 80-6 meters, possibly 160m (depending on their QTH), using CW, SSB, RTTY and PSK31. Look for the following callsigns on the following modes:
CW - JT1AWN, JT1AGO and JT1ZP
SSB - JT1AGO, JT1LU and JT1ZP
Digi - JT1LU and JT1ZP
Operations will be from two locations: JT1KAA's QTH and the other from Amure Hotel. QSL via their home callsigns, direct or by the JARL Bureau.

OFFICERS FOR 2009-2010. On Monday, March 2nd, the members of Northern Ohio DX Association (NODXA) re-elected the following to serve as officers between May 2009 and April 2010:
President: Tedd Mirgliotta, KB8NW
Vice President: Dwaine Modock, K8ME
Secretary: Al Moriarty, N8CX
Treasurer: Mary Michaelis, N8DMM
Newsletter Editor: David Autry, WD8IOU
For more information about NODXA, check out the club's Web site at: http://www.papays.com/nodxa.html

OH1, FINLAND. Members of the "Turun Radioamatoorit ry" (OH1AA) will activate the callsign OH1T during the CQWW WPX SSB Contest (March 28-30th) using "beams, slopers, dipoles.. anything they can get on the air". Operators mentioned are Markus/OH1MN, Markus/OH1FKR, Janne/OH1SDR and maybe some other quest operators. QSL via OH1MN.

P2, PAPUA NEW GUINEA (Update/IOTA Op). Last week we mentioned that once again the team of operators Luis/CT1AGF, Derek/G3KHZ, Steve/G4EDG and Hans/SM6CVX, plus Gordon/G3USR will activate three Papua New Guinea IOTA islands between October 22nd and November 9th. Since then Derek has informed OPDX that a friend Hans (name Stig) will also join the group. He also stated, "We anticipate using a separate call for each island but have yet to decide which call will be used for which island. P29NI will be used for one of the islands." Islands mentioned are Tanga Island (OC-102), Green Island (OC-231) and Woodlark Island (OC-205). Activity will be on 160-15 meters using CW, SSB and RTTY modes. Gordon/G3USR will be exclusively on SSB. The team will be using new single band vertical dipoles for 30-15 meters and a ground plane for 40 meters.

PY2, BRAZIL. Alex, PY2SEX, from Sao Paulo, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (40m)/ Low-Power entry. QSL via his home callsign, by the Bureau, direct (see QRZ.com) or LoTW.

QSL INFO AND NEWS.....
PIRATE ALERT. Roger,G3SXW, reports, "A station signing EP2IA has been QRV this week on 40 mtrs CW, asking for QSL via QRZ.com. This was my call in the 1970's, but I know nothing about the current operation. If the callsign had been re-issued, I would expect him to give a valid QSL route. But QRZ.com points at G3SXW, so I must conclude that this is a pirate operation. Please help me to spread the word: PIRATE! I will receive many QSLs that will be returned to sender (extra work for me) and very disappointing for many DXers who think that they have worked a new country. There are some very selfish people in this world."

PIRATE ALERT. Charles, M0OXO, reports, "Over the last few weeks, I have been made aware that my short contest callsign has been used several times by an unauthorized person and maybe during contests too. No-one has had permission to use this callsign and I have no knowledge who the offender may be. My short contest callsign is "M0X" and this has been used along with a regional designator of the Island of Guernsey. The callsign used (which I now assume is a Pirate) was "MU0X" and was certainly used on CW although I am not yet aware of any other modes. There are several 'spots' on the DX Cluster for the callsign, and there have also been several requests for QSL cards. If you have this callsign in your log then the contacts are obviously invalid as I have never operated from the Island of Guernsey. Please bear in mind the callsign of "MU0X", and if you hear it on air please report it to me on my E-mail address. There will be some Amateurs out there who think they have just worked Guernsey on a new band, mode or even an all time new one, but sadly, they will be very disappointed." Charlie's E-mail address is: charlie.debbie@btinternet.com

VQ9HB LOGS. Hutch, NK0S, announced that he is currently converting the paper logs of Hugh, VQ9HB, to electronic format so they can be uploaded to LoTW. After the logs are uploaded to LoTW, Hutch will act as the QSL Manager for QSL card requests for Hugh's operation between 12/23/89 and 5/19/90.

QSLS VIA LOTW: 4W6R and V63MY

QSLS RECEIVED VIA MAIL: 5H3RK, 5N/LZ1QK, A43DLH, A71EM, C6APG, CE0Y/N6NO, CX9AU, CT9L, E27EK/P, ET3JA, FK8CP, FW5RE, HI3K, P40ZB, PJ4/K4BAI, T77NM, TO3R, TO4X, TT8JT, V51XG, V26G, VP8DLS, VP8YLH and XE1RCS

QSLS RECEIVED VIA THE BUREAU: 4O/K1ZZ, FR5MV, VP8/LZ1UQ and VU4AN

ROSKILDE 1658 AWARD STATIONS ACTIVITIES. The weekend of April 4-5th, look for stations that are involved "Roskilde 1658 Award". Details about this award was featured in the February 2009 issue of CQ Magazine. Stations expected to be active are SB1658OZ, SH1658DK, SH1658OZ, SK1658DK and the Danish wild card station OZ1658ROS. That is a total of five qualifying

callsigns active, but you only need four callsigns for the award. It was also mentioned that due to a called district meeting arranged by SK7BQ during the past weekend, the callsigns operated by SK7BQ, SC1658OZ and SK1658OZ will not be active during the upcoming weekend. The five special callsigns will mainly be active on 80, 40 and 20 meters, depending on conditions, using CW and SSB. Stations SB1658OZ and SH1658OZ will also be active on PSK31. The press release states, "We have noted in our logs that many award hunters work only CW or RTTY/PSK31. You will be more successful if you work as many modes as possible. Not all of our operators are able to work digital modes or CW." For complete information on all callsigns, times in UTC and frequencies, please visit the "Roskilde 1658 Award" Web page at: http://www.sk7bq.com/roskilde (under "Activity calendar")

SX5, DODECANESE (EU-001). Operators Bill/SV5AZP, Panos/SV5AZK, Filolaos/ SV5CJK, Vagelis/SV5CJQ, Efstathios/SV5DKL, Stelios/SV5DZR, Denis/SV5FRD, Periklis/SV5FRK, Takis/SV5FRP and Mike/SV5KJC will be active as SX5P during the CQ WW WPX SSB Contest (March 28-29th) as a Multi-Multi entry. QSL via SV5FRD.

T2, TUVALU. Joe, LA5UF, is active as T2UF until April 1st. Activity is on the HF bands using mostly CW and PSK. QSNs show operations over the past week have been mainly on 30/20/17 meters. There has been some SSB activity on 17 meters. QSL to home call.

TA, TURKEY. Members of the AKUT Search and Rescue Association will be active as TA1KC during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Op/Single-Band entry. QSL via TA0U. Operators mentioned are Urcun/ TA0U, Ilke/TA1CU, Can/TA1CN, Tevfik/TA1HZ, Onder/TA2CL, Serkan/TA2JN and Anil/TB2ED.

TC2, TURKEY (Lighthouse Activity). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) will activate the last lighthouse in a series of historical lighthouses around Istanbul next weekend. On April 4-5th, look for TC2FLH to be active from Fenerbahce Lighthouse (TUR 021). Remember, you only need four or more contacts with lighthouses to receive the "Istanbul Lighthouses On The Air Award" (ILOTA). Details and rules can be found at: http://www.ta0u.com/detay.asp?id=4296

TC57, TURKEY (Special Event). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) will be active as TC57A once again from the Canakkale Gelibolu battegrounds to remember the 57th Regiment Martyrs between April 22-27th. Activity will be on the HF bands. For more info, visit the following Web pages:
http://www.qrz.com/db/TC57A
http://www.tcswat.org
Info about the regiment and the war:
In Turkish - http://tr.wikipedia.org/wiki/57._Alay
In English - http://en.wikipedia.org/wiki/Gallipoli_Campaign

TG0, GUATEMALA. Operators Mario/TG9ADQ, Edgar/TG9AXF and Francisco/TG9ANF will be active as TG0AA during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Op/All-Band entry. QSL via TG9ANF.

TK, CORSICA (EU-014). Brani, OM2FY, will be active as TK/OM2FY from the main island during the RSGB IOTA Contest (July 25-26th) as a Single-Op/ DXpedition/CW/Low-Power/24H entry. QSL via OM2FY.

VK9L, LORD HOWE ISLAND (Update). The VK9LA operation is on the air with all stations active. Operations will last until April 3rd. The team has had some equipment problems: an ACOM Amp is dead, AL811H blew a tube and one IC7000 has failed after 2 days. It was mentioned that the stations on 160 and 80 meters are running amps, but they are having extremely high static levels from the same weather system that has delayed the Mellish Reef operation. The team plans to stay on the lower bands always. PLEASE NOTE: The online log search is also active now at:
http://www.odxg.org/onlinelog/index.php
QSLs are via VK4FW. An online QSL Requesting Service is now available at:
http://www.odxg.org/qsl.htm
Any QSL CARDS managed by ODXG inc., or Bill Horner, VK4FW, can be sent to you utilizing this system. This is a FREE service if you request your cards to be sent via the BUREAU. A minimum payment of 5 USDs via PAYPAL is required if you request your cards to be mailed DIRECT TO YOU. QSL cards will be printed by UX5UO. For more updates, details on the DXpedition and how to donate to this operation, please visit the ODXG and VK9LA Web pages at: http://www.odxg.org
http://www.odxg.org/vk9la.htm
ADDED NOTE: Lord Howe operators Stan/SQ8X and Pete/SQ9DIE have added a daily blog on Twitter.com. Look for regular updates on how the DXpedition is progressing at: http://twitter.com/vk9la

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, were stuck on Marion Reef most of the week but were able to reach Mellish Reef on March 27th and should be on the air as VK9GMW by 0800z, March 28th. Activity should last about April 10th (this can change). For updates, please visit the VK9GMW Web page at: http://www.vk9gmw.com

VY1, CANADA (Special Event/New CISA). Members of the North County DX Association (which includes the Alaska Chapter/KL7RST, Yukon Chapter/ KL7RST and Northwest Territories Chapter/VE8RST) that promotes Amateur Radio in the North, will activate the special event station VY1/K7Y from Kluane Lake in the Yukon between June 25th and July 4th. Emphasis will be for Field Day from Jacquot Island ("new one" for the CISA). Activity will be on 20, 40 and 80 meters. Primary 14260 and 7260 kHz (+/- QRM). QSL via KL7JR direct w/SASE for full-color QSL. [Kluane Lake area is a rugged and picturesque landscape steeped in Klondike Gold Rush history. KL7JR has spent a considerable amount of time on the lake over the past 20 years and is considered an expert on local history by the Burwash Landing Library and Yukon Archives for his book, "BROTHERS in the YUKON".]

YJ0, VANUATU (Pacific CW Tour Continues). By the time you read this, operators Dennis/F5VHY (G3MXJ) and Nigel/G3TXF will have left New Caledonia and should be active as YJ0MXJ and YJ0TXF, respectively, from the Aore Island Resort off Espiritu Santo (OC-035) in Vanuatu until Wednesday, April 1st. This will be a CW only operation. Their main activity will

be on 40/30/20/17 meters. They will try 80 meters, if local conditions permit. There will be no 160 meters. QSL YJ0MXJ via F5VHY, and YJ0TXF via G3TXF. Remember, their next stop will be Norfolk Island (VK9N) on their way back (G3MXJ/VK9N & G3TXF/VK9N between 1000z, Saturday, April 4th to 1900z, Saturday April 4th). PLEASE NOTE: All logs will be up-loaded to LoTW when they return home. There will not be online logs during these operations, nor are they expecting any Internet access.

YK, SYRIA. Saad, N5FF, informs OPDX that he will be arriving in Damascus on the evening of March 29th and should be active again as YK1BA from March 30th and April 10th. He will return home to Texas on April 11th. As usual, the purpose of the trip is not a DXpedition, so his operating will be spotty, but he states that he will try to put in as much radio time as possible. He suggests that his operating hours will be between 2000-2300z or between 0200-0500z and possibly some occasional activities between 1200-1400z. Saad says, "I suspect that 30, 40, and 80 meters will be the bands of choice, and I will be active on SSB, CW, and RTTY." QSL via N5FF (QRZ.com for details).

YM2, TURKEY. Pavel, OK1MU, will be active as YM2W during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (15m)/High-Power entry. QSL via OK1TN, by the Bureau or direct.

ZM4, NEW ZEALAND. Operators Ken/ZL4NR, Mike/ZL4OL, Alan/ZL4FM, Kevin/ZL4QD and Chris/ZL1CT will be active as ZM4A during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via ZL4AA.

The following stations are expected to be active in the
CQWW WPX SSB Contest (March 28-29th, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2009 CQWW WPX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

1915. Spectrum Scopes

Newsgroup: rec.radio.amateur.misc
Date: 2009-04-01 17:46:52 UTC
From: "Bob D." <bobbyd849@comcast.net>
Message-ID: <zd2dnT5XNo0VNU7UnZ2dnUVZ_hOWnZ2d@giganews.com>
Source record: 6779

My current HF rig is a Kenwood TS-570S. I'm very satisfied with it, but I have an itch for a spectrum scope. I would like to hear comments from users of spectrum scopes, and recommendations for rigs with spectrum scopes. I don't need the ultimate power-user DX rig, but I am willing to pay a premium for the scope feature.

Bob ND9B

1916. Amateur Radio Newsline(tm) Report 1651 - April 3 2009

Amateur Radio Newsline(tm) Report 1651 - April 3 2009

Note: This weeks newscast runs 31 minutes 23 seconds and contains 3 breaks.

Amateur Radio Newsline report number 1651 with a release date of Friday, April 3rd, 2009 to follow in 5-4-3-2-1.

Amateur radio faces the raging Red River as it assists in flood relief duty; the Dayton Hamvention announces its 2009 award recipients, space adventurer Charles Simonyi KE7KDP, returns to the International Space Station; the Radio Society of Great Britain says that its time for A-M users to move off of a space to ground 2 meter frequency and the FCC says that P-R-B One does not really apply in a Yonkers, New York tower dispute. Find out why on an extended Amateur Radio Newsline(tm) report number 1651 coming your way right now.

RESCUE RADIO: HAM RADIO FACES THE SWOLLEN RED RIVER

Ham radio was on the front lines as the swollen Red River brought flooding to parts of Southern Canada and into North Dakota and Minnesota. But in this case pre-planning by ARES really paid off as we hear in this report from Amateur Radio Newsline's Mark Abramowicz, NT3V:

--

The members of the Red River Radio Amateurs in Fargo, North Dakota and Moorehead, Minnesota, had a luxury most hams don't have with an emergency upon them - time to prepare.

For those who have been following developments in the news media, the danger of flooding of the two cities straddling the river has passed and as Newsline goes to air, emergency communications operations are winding down.

The Red River crested Saturday, March 28, below the predicted 42-foot-level and has continued to go down, approaching 35 feet as our Friday, April 3 deadline approached.

Mark Johnson, KC0SHM, is president of the Red River Radio Amateurs and helped coordinate the response of a hearty group of more than 30 amateurs on both sides of the river.

Johnson says the good news is hams pulled together to help communities get through the crisis.

"People on both sides of the river, they're part of our local amateur radio family and truly there was no separation," Johnson says. "In fact, the operation itself really morphed into a single command situation where we operated together as one unified group.

"Being that we all know each other so well, there was absolutely zero segregation between section management lines and state lines and city lines. So, it was one group working for the common good of the area."

Johnson says the weather service predicted the rising river levels weeks in advance and that gave all the time they needed to get ready, pack and test radios, operating locations and repeaters.

"Our local repeater system utilizes both a VHF and a UHF repeater," says Johnson. "They're hot-linked together and that offered us a lot of flexibility. Hand-held coverage was excellent on the UHF repeater and we made great use of it."

Johnson says the hams began net operations on Sunday, March 22, supporting those on the front lines who were filling and placing sandbags along the Red River.

"In that capacity, we did a lot of roaming to basically patrol the streets looking for people that had need for additional supplies like food and what not," Johnson says.

"And they were able to guide the Salvation Army and, to some degree, the Red Cross as well to the hot zones - if you will - where people were needing the food and supplies to continue their operations. That would save them from having to stop sandbagging to go find something to eat."

As the sandbagging operation grew and more and more volunteers were brought in, the Red River Radio Amateurs moved to a 24-hour-a-day operation at a variety of locations.

"We operated upwards of 11 different locations throughout the city, not including the roaming vehicles," Johnson says. "At one point in time or another, and some of those positions included both Cass and Clay County Emergency Operations Centers.

" We also had positions stationed at two Red Cross locations, the Salvation Army. We had a group stationed with the West Fargo police department where the Coast Guard was stationed and an individual stationed at Innovi Hospital.

"And that's where basically any Coast Guard helicopters with people that were pulled from their homes or rescued, if they had a medical condition they were taken directly to Innovis."

Johnson says it was a tense time as the weekend of the projected crest of the river approached.

"Those were the days when people were scrambling, trying to finish up the levees," Johnson recalls. "We had just received word that the river crests were projected to go higher than anticipated. So there was a massive, massive volunteer push to get additional sandbags put in place.

"The difficulty was exacerbated by the snow that we had received which certainly made it a difficult challenge to both get vehicles and equipment where things needed to be and for the volunteer effort for people to get in from out of town to help.

"So, that Friday and Saturday were really just key days."

Johnson says it was a truly heroic effort put out by so many to save the communities.

"I think that the amount of effort that was put into the entire area - both with the amateur radio community and the non-amateur community doing other work from sandbagging to filling sand bags - I'm deeply humbled and touched at the amount of support we received from people in town and out of town to make it happen was absolutely critical.

"And had we not had that kind of help and resource and reaction from the people in the area, we would have never made it as far as we did."

In the Canadian province of Manitoba, the Manitoba Emergency Measures Organization and the City of Winnipeg Emergency Program requested assistance from local ARES groups there to help out with the flooding on that side of the border.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Obviously this story is far from over and we will have more in future Amateur Radio Newsline reports. (ARNewsline(tm) with thanks to KC0SHM, WD0AKO and RAC)

HAM RADIO IN SPACE: GERMAN HAMS CLAIM TO BOUNCE SIGNALS OFF VENUS

A group of German hams claim that they have bounced a signal off the planet Venus. This in an experiment that they call EVE which is an acronym for Earth-Venus-Earth.

In a press release, Amsat Germany President Peter Guelzow, DB2OS, reported that on March 25th a team from his organization used a ground station at the Bochum Observatory to transmit radio signals to Venus. He says that Morse code was used to transmit the well known letters "HI." This was the same message transmitted back to Earth from the early AMSAT OSCAR satellites.

But this time the trip in space was a lot longer than one to and from Earth orbit. After traveling almost 100 million kilometers round trip with an en-route delay of about 5 minutes, the two letters were clearly received back on Earth as echoes from the planets surface using.

DB2OS says that despite the bad weather, signals from Venus could be detected from 10:38 UTC until the planet reached the local horizon. He says that the experiment was repeated on Thursday, March 26th for several hours, again with good echoes from Venus.

Peter Guelzow, DB2OS, is very happy with the results of the EVE experiment. He calls it another milestone for ham radio on its way toward launching its own interplanetary probe towards planet Mars. (AMSAT-DL)

**

ENFORCEMENT: RSGB WILL ASK OFCOM TO HANDLE DOWNLINK INTERFERENCE TO ISS

A group of hams who seem to feel that they own the frequency that the International Space Station ham radio station uses as a downlink may soon come under the scrutiny United Kingdom radio regulator Ofcom. This, if the Radio Society of Great Britain proceeds with its plan to bring the matter before its enforcement branch. Jeremy Boot, G4NJH, reports:

--

The RSGB are dismayed to learn that a small group of AM enthusiasts based in the West Lothian district of Scotland continue to cause what appears to be deliberate interference to the ISS downlink frequency of 145.800MHz during ISS passes.

The RSGB is concerned that despite several years of negotiation with this group and a change of band allocation to move them away from the internationally agreed ISS frequency, they continue to disrupt ISS operation by their selfish disregard of their fellow radio amateurs and the Band Plan.

The RSGB intends to bring the matter up formally with Ofcom at a meeting of the RSGB/Ofcom Forum in early April.

--

Until now, little has been known about this A-M group outside of Scotland. That is because their signals are on the downlink and therefore are not being heard by the crew ion board the I-S-S. But their refusal to off the air during those times that hams on the I-S-S are trying to make space to ground contacts has become annoying to those stations on the ground attempting to hear what the Astronaut ham radio operators on-orbit are trying to say. (RSGB)

**

RESTRUCTURING: BROADCASTERS BEGIN VACATING 40 METERS HAM BAND

Shortwave broadcasters have begun to vacate 7 point 1 to 7 point 2 Mhz in ITU regions 1 and 3. This a a new I-T-U rules became effective on March 29th.

Following on from the decision made during the World Radio Conference in 2003, the amateur service becomes the primary user in this high frequency segment world-wide. In layman's terms, this represents everywhere except the Americas, who have always enjoyed this segment as part of the 7 to 7.3MHz allocation in Region 2.

Although this date also coincides with the start of the HF broadcasting schedule, it would be naive to think the segment might be completely clear

of broadcasting stations on that date. However a number of international broadcasters have already have been noted to have moved closer to 7 point 5MHz. and away from operations in the ham radio band. (Southgate)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N9QIP repeaters serving America's great dairyland in the state of Wisconsin.

NAMES IN THE NEWS: DAYTON HAMVENTION ANNOUNCES 2009 AWARD WINNERS

The Dayton Amateur Radio Association has selected the creator of an emergency communications network, a space explorer and an inventor to receive this years coveted Hamvention awards. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the details:

--

Named as 2009 Amateur of the Year is Wade D. Hampton Jr., K4ITL, of Raleigh, North Carolina. Better known as Danny Hampton, K4ITL is the architect of the famed Piedmont Coastal Repeater Network. This system was first established in the early 1970's today serves more than 40 machines in North Carolina and is well known for its heavy use for public service work. And not all that long ago the North Carolina Office of Emergency Management and SKYWARN recognized the network's vital role in emergency communication.

A ham since 1958, Hampton is the Technical Committee chairman for the multi-state Southeastern Repeater Association as well as ARRL North Carolina Section Technical Coordinator. He is also credited with helping to coordinate the development of a local hospital-based amateur radio emergency repeater system that ties 10 facilities together.

The Hamvention 2009 Special Achievement Award goes to Richard Garriott, W5KWQ, the son of ham radio space pioneer Owen Garriott, W5LFL, who made history as the first ham to communicate from Earth orbit ground during the STS-9 Space Shuttle mission, The younger Garriott is a legend in his own right as one of the worlds best known and most highly respected video game programmer and designer. And like his father Richard Garriott has been a ham radio in space pathfinder in his own right.

W5KWQ was sixth private citizen to fly to the International Space Station. Through his on-orbit experimentation, his extensive operations using a number of diverse modes, and phenomenal educational outreach program he is said to have inspired and transformed the lives of tens of thousands students worldwide.

Garriott was also the most prolific ham radio operator to fly on a short duration mission. During his 10 day stay on the I-S-S he held over 500 two-way voice QSOs. Also, while on the I-S-S over a thousand SSTV images were down linked, and hours of packet operations were performed.

But more important were the one on one chats with classrooms. Using the ARISS station on board the orbiting outpost, W5KWQ communicated with students at seven different Challenger Learning Centers in the U.S. plus numerous other schools around the globe. He also had numerous random chats with scouts world-wide as part of the scouting's amateur radio Jamboree on the Air.

Last but by no means least, this years Hamvention award for Technical Excellence winner Copthorne "Cop" Macdonald, VY2CM. First licensed at age 15, Macdonald is best known as the father of Slow Scan amateur television. He developed the system in the 1950's while an engineering student at the University of Kentucky. The paper he wrote describing it won national acclaim and took first prize in the 1958 A-I-E-E student paper competition. Later, Macdonald worked with other slow scan pioneers to get the FCC to authorize operation of the mode in the High Frequency ham bands. That effort finally succeeded a decade later in 1968.

Macdonald has authored articles on slow scan for QST and CQ magazines. In 1973 he started New Directions Radio. This is a network of hams concerned with using ham radio and SSTV to help create a more aware, more caring, and more responsible human society.

With congratulations to all, I'm Don Wilbanks, AE5DW, for the Amateur Radio Newsline. Jim.

--

Danny Hampton, K4ITL, Richard Garriott W5KWQ and Cop Macdonald, VY2CM, will receive their awards during Hamvention 2009. That's slated for May 15th to the 17th at the Hara Arena in suburban Dayton, Ohio. Amateur Radio Newsline will again be there, providing comprehensive coverage of this years event. (Dayton Hamvention 2009)

**

HAM RADIO IN SPACE: KE7KDP AGAIN OPERATING FROM THE ISS

American entrepreneur Charles Simonyi, KE7KDP, is back in space and talking to kids in schools as well as the hams worldwide. This, from his perch some 250 miles straight up.

Simonyi was onboard a Russian Soyuz rocket that blasted off from Kazakhstan on Thursday March 26 and rendezvoused with the International Space Station the following day. Since then the software pioneer and aviator turned space explorer has been delighting hams on the ground with both voice contacts and slow scan pictures sent back from space.

In addition to his leisure time ham radio operations during his 13day stay, KE7KDP, is assisting with several research projects. He is also taking part in a series of live two way contacts with school classrooms world-wide

using ham station on board the ISS and the ground facilities of ARISS. The Amateur Radio station onboard the Space Station uses a downlink frequency of 145.800 MHz FM and moat Astronauts have tended to use that frequency for both voice and Slow Scan TV.

Simonyi's first trip to the space station in 2007 cost him an estimated $24 million. It is believed that this time it will have cost him $35 million by the time he returns to Earth on April 6th. More about Charles Simonyi's latest trip to the ISS is on-line at www.charlesinspace.com. (ARNewsline(tm) from various sources)

**

RADIO LAW: THE FCC SAYS YONKERS TOWER LAW NOT IN VIOLATION OF PRB-1

The FCC says that it will not retroactively extend PRB One to a Yonkers, New York tower and antenna case where the ham put up the structure before getting a proper permit. This, as it denies for a second time a request from Thomas R. Morrison, AB2PP, who wanted the FCC to intervene in his case. Bill Pasternak, WA6ITF, has more in this report:

--

By way of background, Thomas Morrison, AB2PP, had previously filed a request with the FCC for a declaratory ruling regarding his antenna tower. The FCC denied the request by a letter to him dated January 31, 2007. In that letter, the FCC explained that the Commission's PRB-1 decision requires that local regulation of amateur radio facilities must be the minimum practicable to accomplish the local authority's legitimate purpose. But PRB-1 does permit local authorities the right to determine what constitutes a reasonable accommodation based on the its legitimate purposes, policies and concerns. The FCC's 2007 letter also stated that the Commission does not have the resources to review all state and local laws that affect amateur radio operations. Rather, it is what the FCC terms as local tribunals that have authority to review local zoning decisions.

In his response to the Commission's decision against him Morrison again requested that the FCC find that the City's building permit requirements do not satisfy the legal requirements of PRB-1. He stated that since the FCC declined to act on his previous petition, the City Planning Board denied his request for a special use permit for his tower. Moreover, they also had indicted him for a misdemeanor for installing the tower without a permit. Morrison told the FCC that he has now filed litigation in the United States District Court for the Southern District of New York, requesting that it forestall the criminal trial.

But the FCC indicates that none of this is of any concern to that the agency. The FCC says that these intervening events do not affect its conclusion that, under the Commission's PRB-1 decision, Morrison has not presented an appropriate issue for Commission involvement. As such it will not support or act favorably on Morrison's request.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The FCC says that Morrison's dispute with the city of Yonkers fundamentally involves whether its building code complies with PRB-1. It also notes that as PRB-1 recognizes that local tribunals have the authority to handle appeals of local decisions regarding antenna structures. As such the FCC says that the matter is best settled in what the regulatory agency terms as the appropriate forum. (FCC)

HAM HAPPENINGS: ARRL - TAPER DCC WANTS PAPERS

According to a note from Steve Ford, WB8IMY, technical papers are being solicited for presentation at the 28th Annual ARRL and TAPR Digital Communications Conference. That event is slated for September 25th to the 27th in Chicago, Illinois.

Steve says that papers will also be published in the Conference Proceedings exactly as submitted and authors will retain all rights. Also, authors do not have to attend the conference to have your paper included in the Proceedings.

The deadline for papers is July 31, 2009. Please send submissions to Maty Weinberg at ARRL Headquarters, 225 Main Street, Newington, Connecticut 06111. Papers can also be via e-mailed to maty (at) arrl (dot) org. (WB8IMY, ARRL)

**

ON THE AIR: NATA INAUGURATES 40 METER NEWS

The North American Traffic and Awards Net began meeting on 40 meters SSB on April 1st. The new nets meet on Sunday, Thursday, and Saturday on 7205 kHz starting at 0000 hours U-T-C with a late net at 0400 UTC. Both nets will last approximately one hour. This new net is in addition to the other North American Traffic and Awards Nets and comes exactly three months after the network returned to the air.

The North American Traffic and Awards Net also offers a series of free operating awards to anyone meeting the requirements for each award. All awards requirements and rules are on line at

www.northamericantrafficandawards.net. (NATA)

**

ON THE AIR: HPM STATION CHANGES 10 METER CHANNEL

The ARRL headquarters Hiram Percy Maxim W1AW Memorial Station recently began using a new 160 meter frequency for its CW transmissions. W1AW has moved to 1802.5 kHz in order to reduce the possibility of interference with other Top Band operations. The ARRL says that increasing activity near the previous bulletin frequency of 1817.5 kHz lead to the decision to make the change. (ARRL)

**

NAMES IN THE NEW: DJ0QN NAMED ACTING DARC SECRETARY OF INTERNATIONAL AFFAIRS

And a familiar name in the news. Mitch Wolfson, DJ0QN, has now taken over as Acting Secretary of International Affairs for the German national amateur radio society, the DARC. Wolfson succeeds Dennis Haertig, DL7RBI, who has moved to Switzerland for professional reasons.

Wolfson, is originally from Los Angeles, California, where he held the call WA6GSN. He currently holds the U-S call K7DX, is married to a German national, has two grown children and has lived in Munich over three decades. He is employed in the technology sector.

Over the years DJ0QN has been a contributor on ham radio happenings on the European continent for this news service. He tells Newsline that he will be covering both the giant Dayton and Friedrichshafen ham radio conventions for the DARC in the coming months. (ARNewsline(tm))

**

THE BPL WAR: INDUSTRY EXPRESSES DOUBTS OVER BPL

A year ago Broadband over Powerline Internet access was the fair hair boy of the business world. Now its detractors are growing as its champions fall away. Jim Linton, VK3PC, reports:

--

Strong doubts on BPL in the trade press.

It's encouraging to say the least that finally, the telecomms industry is admitting that Broadband over Powerlines has a multiplicity of issues in deployment.

According to the (3 March 2009 issue of the US industry journal Network World, it is now recognized that BPL doesn't really cut the mustard against alternative internet delivery technologies in under-served rural areas.

The three key points that publication makes are:

BPL networks have to be run jointly by an Internet Service Provider and an electricity utility; neither knows each other's business.

BPL is actually yet to be demonstrated working in a widespread deployment; a number of high-profile plans and installation trials over recent years have fallen through.

BPL has technological issues ranging from interference ingress and egress, power line noise and multiplexing problems.

Hardly a glowing endorsement of the technology!

Want to check out the Network World article, well its internet address is http://www.networkworld.com/news/2009/031309-broadband-fiber-wire.html?page=1

I'm Jim Linton, VK3PC.

--

B-P-L still has a few big name industry supporters but by and large those who used to be its biggest boosters are now championing other ways to get on the net. (Spectrum Digest & Amateur Radio Victoria)

CHANGING OF THE GUARD: SHORTWAVE BROADCAST LEGEND DICK SPEEKMAN - SK

We are sad to report the passing of another radio legend. This with world that Dick Speekman, a former host of Radio Netherlands DX Jukebox in the 1970's, and of Radio Australia's program Spectrum in the 1980's, died peacefully on March 11th at the Hawker Hospital, South Australia. Speekman had been suffering form colon cancer for some time. His funeral was held on Thursday, March 19th. (Media Network)

WORLDBEAT: RADIO AMATEURS OF CANADA POSTPONES ANNUAL GENERAL MEETING

Turning to news from around the world, we first go North to where the 2009 Annual General Meeting of Radio Amateurs of Canada has been postponed. This, due to a shift in accounting procedures.

According to an announcement, a change in the bookkeeping system at the Radio Amateurs of Canada headquarters office resulting in unforeseen complications. As a result the Annual General Meeting of Radio Amateurs of Canada members, scheduled for May 24, 2009, in Quebec, has had to be canceled.

Radio Amateurs of Canada says that the presentation of an audited financial statement at the meeting is an important and long established practice. Because of the delay caused by the transfer to a new bookkeeping method, the possibility of having an audited statement being ready for the meeting is not possible. Another date and venue for the required 2009 Radio amateurs of Canada Annual General Meeting is being sought and will be announced as soon as it is known. (RAC)

WORLDBEAT: UK MILITARY TO TRY GPS JAMMING EXERCISE IN JULY

If you are driving in the U-K next summer and your G-P-S guidance system goes brain dead, it might be jammed and the jamming is legal. The United Kingdom's Ministry of Defense has informed telecommunications regulator Ofcom that between July 6th and 16th, that it will be conducting a Global Positioning System jamming exercise.

The July tests will be for limited periods between 11.00 and 15.00 U-T-C. The location for the exercise is to sea westwards from N58 deg. 57.4' W003 deg. 13.9' which is about 60 nautical miles west of Kirkwall. Ofcom warns that it cannot be held responsible that any loss of service is due to the military G-P-S jamming exercises.

The United Kingdom's Ministry of Defense conducts occasional tests on military systems which may result in some loss of service to civilian users of the Global Positioning System. This includes such equipment as in-car navigation devices and other networks which rely on GPS signals. (GB2RS)

DX

In D-X, members of the Texas DX Society are now active as C91TX from Bilene, Mozambique until April 5th. Operations are on 160 to 10 meters with 3 active stations, one station each for CW, SSB, and the Digital modes. For updates, visit www dot tdxs dot net slash c91 dot html on the World Wide Web.

The team bringing Mellish on the air finally were able to land there on March 27th. They came on the air on March 28th as VK9GMW and hope to be there through April 10th but this can change. More is on-line at www.vk9gmw.com

E51COF is currently on the air from Rarotonga in the South Cook Islands. He plans to operate SSB on 10, 15, 20, 40, 80 and maybe 17

meters. QSL via K8NA.

Members of Turkey's Special Wireless Activity Team will be active as TC57A to remember that nations 57th Regiment Martyrs. Operation is slated from April 22nd to the 27th on the HF bands. QSL as directed on the air.

Lastly, N5FF is in Damascus, Syria, and should be active as YK1BA from through April 10th. The purpose of the trip is not a DXpedition, so his operating will be spotty. QSL via N5FF

(Above from various DX sources)

THAT FINAL ITEM: THE 45 AT AGE 60

And finally this week, the 45 RPM record -- yes we said record -- is now 60 years old. While it has faded from the pop music distribution scene it is still very popular with some music collectors and vinyl record buffs. Rebecca Bruce has the rest of the story:

--

For those like this reporter who was born after the introduction of the digital compact disc and portable music player, the 45 R-P-M record with its small size and large center hole was a kind of a trip back in time. We saw them as kids and we heard our parents playing them on their record players. But by the time we grew up the only place you could find them was at the local swap meet or on eBay.

Up until the introduction of the C-D the 45 rpm record was the mainstay of delivering popular music to an entertainment hungry world. Only 7 inches in diameter, the disc spun at 45 revolutions per minute and was designed to hold two songs. One on each side of the disc.

I'm told that the best part of the 45 was its extreme light weight and durability. Unlike the older 78 R-P-M discs which would shatter if dropped, a 45 might get a scratch but could continue to be played with the added annoyance of some clicks and pops from the scratch. This made it an ideal and inexpensive format of that era for providing recorded music to teens and pre-teens of the mid to late 20th century. That's because most 45's sold for less than a dollar.

As a historic note, the first 45 rpm disc was "Texarkana Baby" recorded by country singer Eddy Arnold. It was released by RCA on March 31, 1949.

But the entertainer who likely benefited most from the 45 was likely the man they called the "King of Rock and Roll," Elvis Presley. He sold millions of records during his career and made the 45 R-P-M record a household word among teens.

So a happy birthday to the good old 45. I have the feeling that mom and dad kind of miss having you around.

Sitting here with my iPod and my three kids who will likely only see a 45 RPM record in a museum, I'm Rebecca Bruce reporting for the Amateur Radio Newsline.

--

Now, we are in the 21st century. The 45 had given way first to the C-D and more recently to direct download to music players like Rebecca's iPod. None the less, the 45 RPM record holds an important place in bringing music into the lives of oh so many. (RW)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2009 Amateur Radio Newsline Young Ham of the Year Award is now open. Complete details are on our website at www.arnewsline.org Just scroll down to the words "2009 YHOTY Nominations Now Open" and click for more information and an official nominating form.

Also be sure to mark April 18th as this year World Amateur Radio Day. World Amateur Radio Day will focus on the hobby as it empowers people and supports communities by providing emergency communication as well as public service oriented interaction for community and other special events.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

==> ARRL COMMENTS ON FCC'S PROPOSED ESTABLISHMENT OF RURAL BROADBAND PLAN

On March 10, 2009, the FCC invited comments via a Public Notice <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-561A1.pdf> concerning the establishment of a comprehensive rural broadband strategy

as part of the Department of Agriculture's Food, Conservation and Energy Act of 2008, commonly known as the 2008 Farm Bill. Per the American Recovery and Reinvestment Act of 2009 (Recovery Act), Congress required the FCC to develop a "comprehensive national broadband plan." According to the FCC, they, Congress, and the Secretary of Agriculture "have repeatedly recognized the importance of ensuring access to advanced telecommunications and information services to all Americans, with a special focus on rural and hard-to-serve areas." The proceeding provided an opportunity for the ARRL to express its concerns about broadband over power lines (BPL) <http://www.arrl.org/tis/info/HTML/plc/> that the FCC has yet to satisfactorily address.

In the comments submitted by ARRL General Counsel Chris Imlay, W3KD <http://www.arrl.org/news/files/09-29_Rural_Broadband_Comments_03_2009.pdf>, the ARRL reaffirms its support of broadband opportunities in rural areas. "ARRL is in agreement that broadband is critical to the health of agricultural and other businesses, and to the educational interests of Americans who live in rural areas," Imlay stated. Imlay commended the FCC in looking for broadband solutions on both the short and long term, as well as identifying how Federal programs "might overcome obstacles that currently impede rural broadband development."

Imlay pointed out that while the FCC and various power utilities have touted BPL as a promising means of providing rural broadband service, the ARRL contends that there are "prohibitive limitations (notable among these being the large number, and the cost, of repeaters and couplers required on overhead, medium voltage power lines for what amounts to a limited number of subscribers' homes in rural areas)."

The ARRL maintains that before BPL could ever be considered as a long-term source of broadband in rural America, the FCC must adopt rules that provide against BPL interference to the licensed radio services. Imlay said that studies have pointed out that BPL systems cause interference to licensed radio services in "certain configurations," such as international broadcasting, aeronautical, maritime, disaster relief, military and the Amateur Radio Service. "Of particular concern in rural areas is that low-band VHF radio systems are still common among state police, volunteer fire departments and other 'First Responder' public safety agencies," Imlay told the Commission, adding, "BPL systems using this frequency range can and would, without additional rules, likely block communications between dispatch centers and emergency response vehicles."

Imlay said that Amateur Radio is a "continuous, intensive user of the high-frequency bands in residential areas," and as such, "is arguably the most pervasively affected" by deployment of BPL in rural areas. "Amateur mobile operation is a particularly notable victim of BPL interference, since medium-voltage power lines run parallel to roadways." The Commission's BPL rules "include no effective protection."

Imlay reminded the Commission that the ARRL, as well as broadcast industry representatives, challenged the adequacy of the FCC's BPL

interference rules: "On appeal to the United States Court of Appeals for the District of Columbia, the Court remanded the ET Docket 04-37 proceeding to the Commission <http://www.arrl.org/news/stories/2008/04/25/10064/?nc=1> with some very specific instructions, including reconsideration of assumptions relating to interference mitigation and disclosure of studies that had previously only been released in redacted form." Imlay pointed out that almost a year after the Court's decision, the Commission has done "literally nothing" to comply with the mandated instructions <http://www.arrl.org/news/stories/2009/03/04/10685/>.

In the six years that the BPL rules have been on the Commission's docket, Imlay said that there has been "continuous and extensive debate about the interference potential of BPL." This, he told the FCC, has created "some uncertainty" amongst the various utilities and municipalities that have been eyeing BPL as a broadband delivery mechanism, with the Commission's inaction since the Court's decision contributing to the uncertainty and "creating a dampening effect on the marketplace's interest in BPL." Before the FCC can implement a BPL policy for rural America, Imlay said that this "regulatory uncertainty" would need to be resolved.

The cost of implementing interference resolution must be considered by any rural broadband provider, Imlay said. While there is nothing in the FCC rules concerning this, Imlay reminded the Commission that the ARRL, "some eight months ago, offered a plan to the Commission's Office of Engineering and Technology in this regard <http://www.arrl.org/?artid=8341>. The revised regulation suggested by ARRL would be sufficient to reduce the potential interference from BPL to the point that it would be practical to address such instances on a case-by-case basis. Compliance is achievable with present BPL technology without significant limitation on BPL deployment, rural or otherwise. However, the absence of such rules is an obstacle to any consideration of BPL as a rural broadband mechanism and makes an evaluation of interference mitigation difficult or impossible." The deployment of a BPL system with a high potential for interference would require expensive mitigation afterwards, whereas if the potential is reduced to an acceptable level at the time of deployment, the need for mitigation -- and therefore the cost -- will be greatly reduced.

Imlay told the FCC that more than four years ago, the Department of Agriculture's Rural Utilities Service (RUS) <http://www.usda.gov/rus/> recognized "the need and willingness to utilize agency resources to remove interference concerns as an obstacle to rural broadband rollout (at least via BPL)." In a January 2005 letter from then-RUS Administrator Hilda Gay Legg to ARRL Chief Executive Officer David Sumner, K1ZZ, regarding the RUS's Community Connect Grant Program <http://www.usda.gov/rus/telecom/commconnect.htm>, the RUS acknowledged that the cost of interference mitigation from BPL systems was a "significant" issue, and told the ARRL that "whenever a loan or grant application proposes broadband service delivery via BPL, the RUS will

'consider the cost of interference mitigation in [its] financial analysis.'" On March 20, current FCC Commissioner Jonathan Adelstein was nominated by President Barack Obama <http://www.arrl.org/news/stories/2009/03/23/10716/?nc=1> to become the next Administrator of the RUS.

Imlay told the Commission that "[i]f the means by which a grantee would comply with the Commission requirements for interference avoidance are not clear (which as of now they are not), it is unlikely that any applicant for a grant for broadband service using BPL could address the RUS's concern about interference." Therefore, Imlay said that it is necessary for the FCC to address the BPL interference issues on remand from the Court of Appeals "in order to remove this additional obstacle to an assessment of rural broadband opportunities via BPL."

The ARRL is "constrained" to note that the FCC has, over the past six years, "acted not as a dispassionate technical agency in the evaluation of certain broadband mechanisms, including BPL," Imlay noted, "instead acting as a self described 'cheerleader' for certain technologies, also including BPL." By these actions, Imlay said that the Commission "has ignored technical evidence that is contrary to its predisposition," and urged the FCC that "those same mistakes" not be repeated here.

Imlay reminded the Commission that President Barack Obama, on his inauguration day earlier this year, placed a series of goals on the White House Web site. "Among these," Imlay said, "was the following, obviously laudable goal: 'Restore Scientific Integrity to the White House: Restore the basic principle that government decisions should be based on the best-available, scientifically valid evidence and not on ideological predispositions.' The Commission has the opportunity to implement this goal in this Docket proceeding."

Saying that rural broadband opportunities should be "evaluated in terms of the scientific realities of the technologies on the table, and not on the basis of what the Commission wants to believe about them," the ARRL asked the FCC to fulfill "without further delay the obligations placed upon it by the United States Court of Appeals in ET Docket 04-37, and adopt such revised and additional rules for BPL so as to eliminate the extant interference potential of the technology." With the regulatory uncertainty and unresolved interference issues that continue to surround BPL, the resolution of ET Docket 04-37 is a "prerequisite for the development" of a plan for a complete evaluation of rural broadband opportunities and the development of a rural broadband plan.

==> NEW VIDEOS PROMOTING FIELD DAY, AMATEUR RADIO TECHNOLOGY, AVAILABLE FROM ARRL

Two new video Public Service Announcements (PSAs) -- one promoting ARRL Field Day and another showing the technical side of Amateur Radio -- are now available from the ARRL Web site. "These videos are great for PIOs <http://www.arrl.org/pio>, clubs and hams in general to use in promoting the fun side of Amateur Radio," said ARRL Media and Public Relations

Manager Allen Pitts, W1AGP.

"The Field Day PSA is meant to be posted on Web sites, added to e-mails and shared via the Internet," Pitts explained. "While not broadcast quality resolution, it was intentionally made small enough to go through almost all e-mail systems and able to be seen on almost every computer. The PSA spotlighting Amateur Radio technology is meant for broadcast and cable TV; it is more general than the Field Day video and media outlets can use it all year long. This video complements the WeDoThat-Radio campaign <http://www.wedothat-radio.org/> and the Technology Pillar, one of the ARRL's five pillars."

Pitts said that the Field Day video is the League's first experiment in "viral" video. "We've seen how a good video can spread quickly via the Web and reach people. So we created a special Field Day Internet video for this year. Let's see what happens." Amateurs can download the video from the Field Day Web page <http://www.arrl.org/fieldday> and then send it to friends, e-mail lists, Web sites -- just about anywhere!
"Please do not modify it or change the ending!" Pitts requests. "Since the files can go all over the country -- and world -- the ending needs to be able to direct anyone, anywhere to the closest Field Day site near them. Just be sure your local group is listed on the ARRL Field Day Locator <http://www.arrl.org/contests/announcements/fd/locator.php> and they will find you." Since the technology PSA is targeted for commercial TV uses, it is a high resolution, 43 meg, MOV type file; it can be downloaded from the ARRL Web site <http://www.arrl.org/pio/videos/ARRL30secPSA2009.mov>. Because this version is meant for professional use, it has a formal 60 second lead-in followed by the 30 second PSA. A very low resolution preview version (not meant for distribution) is also available <http://www.arrl.org/pio/videos/LowRes2009.wmv>.

To get a copy of the technology video on a disc, please send Pitts an e-mail <mailto:apitts@arrl.org>, letting him know which TV stations or cable systems will be showing the video, and which format is needed.

Special thanks go to the volunteers of the national ARRL PR Committee who took the concept and helped bring it to reality. For the Field Day video, Kevin Pauley, KB9WVI, did the excellent video editing (right down to synchronizing shots with the music); Don Carlson, KQ6FM, did the voiceover work. Staff creativity came from Pitts -- who produced and created the video -- and ARRL Contest Branch Manager Sean Kutzko, KX9X, who did the music. The Delta DX Association in Louisiana, W5RU, with Bob McBride, AE5RN, and Albert DuPont, W5AFD, were a major help, providing action video clips and permissions from their last Field Day. The technology video was also designed by Pitts with extensive volunteer help. Special thanks go to Matt Aaron, KG4WXX, who guided the extensive video editing and to Don Carlson, KQ6FM, who did the audio work.

==> HAMS STILL ON ALERT AS RED RIVER FLOOD DANGER LESSENS

Since March 22, a group of ham radio volunteers has been providing communications during the Red River flood emergency that continues to threaten Fargo, North Dakota and Moorhead, Minnesota and surrounding areas. Hams from those cities, as well as surrounding areas, have been manning hospitals, Emergency Operations Centers and Salvation Army shelters.

Mark Johnson, KC0SHM, President of the Red River Radio Amateurs (RRRA), reports that operations have wound down as water levels continue to recede. The ham volunteers remain on alert, however, as flooding still threatens the area. As of April 3, the Red River was at 35.4 feet in Fargo. Flood stage is 18 feet.

==> FCC DENIES NEW YORK HAM'S REQUEST FOR PRB-1 RULING

On March 27, the FCC notified Thomas Morrison, AB2PP, of Yonkers, New York, that it was denying his petition concerning an Amateur Radio antenna support structure Morrison had installed at his home <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-680A1.pdf>. In his December 2008, petition, Morrison requested the Commission rule that the City of Yonkers did not provide "reasonable accommodation" in its building permit requirements per PRB-1 with regard to the installation of the support structure <http://www.arrl.org/FandES/field/regulations/PRB-1_Pkg/prb-1.pdf>.

This is the second time Morrison has sought assistance from the FCC in this matter. In 2006, he filed a request with the Commission asking for a declaratory ruling regarding the tower; the FCC denied his request in January 2007. "In that letter [denying your request]," the FCC reminded Morrison in its 2009 letter, "we explained that the Commission's PRB-1 decision requires that local regulation of Amateur Radio facilities must be the minimum practicable to accomplish the local authority's legitimate purpose, but permits the local authority to determine in the first instance what constitutes a 'reasonable accommodation' based on the its [sic] legitimate purposes, policies and concerns."

The Commission's 2007 letter also noted that the FCC does not have the resources to review all state and local laws that affect Amateur Radio operations and that local tribunals have authority to review local zoning decisions.

In his 2008 letter, Morrison told the Commission that since the FCC failed to act in his favor in his earlier petition, the Yonkers City Planning Board denied his request for a special use permit for his antenna support structure. The City of Yonkers has also indicted him for installing a tower without a building permit, a misdemeanor. Morrison also told the FCC that he has filed litigation in US District Court, requesting that it delay his criminal trial.

"We conclude that these intervening events do not affect our conclusion that, under the Commission's PRB-1 decision, you have not presented an appropriate matter for Commission involvement," the FCC told Morrison. "Because your dispute with the City fundamentally involves whether its

building code complies with PRB-1, and PRB-1 recognizes that local tribunals have the authority to handle appeals of local decisions regarding antenna structures, we believe that the matter you inquire about is in the appropriate forum. We therefore decline to act upon your petition."

==> GERMAN AMSAT TEAM TRANSMITS, RECEIVES SIGNALS FROM VENUS

On March 25, a group from AMSAT-DL bounced radio signals off the surface of Venus, marking the first time Amateur Radio operators have bounced radio signals off another planet <http://www.amsat-dl.org/pic/gallery2/main.php?g2_view=core.DownloadItem&g2_itemId=7561>. According to AMSAT-DL President Peter Guelzow, DB2OS, the Earth-Venus-Earth (EVE) transmission is another step in preparing for a mission to Mars. According to an AMSAT-DL press release, the team's transmitter was generating about 6 kW CW on 2.4 GHz.

Guelzow said that signals were sent from a ground control station at the IUZ Sternwarte observatory in Bochum: "After traveling almost 100 million kilometers and a round trip delay of about 5 minutes, they were clearly received as echoes from the surface of Venus. This was the first German success to receive echoes of other planets. In addition, this is the farthest distance crossed by radio amateurs, over 100 times further than echoes from the moon (EME reflections)."

The EVE experiment was repeated on March 26 for several hours with "good echoes" from Venus, Guelzow said. "Morse code was used to transmit the well-known 'HI' signature known from the AMSAT OSCAR satellites."

For receiving the EVE reflections, Guelzow said that the team used a fast Fourier transform (FFT) analysis with an integration time of 5 minutes. "After integrating for 2 minutes only, the reflected signals were clearly visible in the display," he said. "Despite the bad weather, signals from Venus could be detected from 1038 UTC on until the planet reached the local horizon."

Guelzow explained that with the EVE reflections, the high power amplifier "has therefore passed this crucial test as a final key component for the planned P5-A Mars mission. By receiving generated echoes from Venus, the ground and command station for the Mars probe has been cleared for operational use and the AMSAT-DL team is now gearing up for building the P5-A space probe. AMSAT-DL wants to show that low-budget interplanetary exploration is possible with its approach."

Development, design and construction of this first German Mars mission have been achieved by AMSAT-DL and its partner organizations, Guelzow explained. "Already a third of the total project costs were performed. More work shall follow during the mission. AMSAT-DL would like to demonstrate that their approaches to low-cost space missions are feasible." -- Information provided by AMSAT-DL

==> AUSTRALIAN, BRITISH RTTY CONTESTS TO MERGE

John Barber, GW4SKA, of the British Amateur Radio Teledata Group (BARTG) <http://www.bartg.org.uk/index.htm>, announced that 2009 will be the last running of the Australian National Amateur Radio Teleprinter Society (ANARTS) RTTY Contest <http://www.anarts.com.au/index.htm>. Citing the failing health of ANARTS Secretary and Contest Manager Pat Leeper, VK2JPA, Barber said that BARTG, with help toward expenses from ANARTS, will manage June's 2009 ANARTS Contest.

"BARTG have had close links with ANARTS over the years," Barber said, "and we felt that we should help in some way. After discussions between Pat and the BARTG committee, we have decided on a course of action."

Barber said that he briefly considered moving the BARTG HF Contest from the third weekend in March to the second weekend in June, the date ANARTS held their RTTY contest, but based on input from the RTTY contest community, decided against the move. "The general opinion seems to be that moving to a June date would be a bad idea, both for propagation and because there are better things to do in June," he said. "The contest calendar is very crowded and there are few options open if we were to consider a new date at the beginning or end of the year." Saying that the Russian DX Contest is also the third weekend in March, Barber said that "The RDXC contesters will just have to work round us and be tolerant if space gets tight, as we are to them."

Barber said that Leeper had "made every effort to find someone else in Australia to take over the contest, but with no success. My thanks go to Pat for her cooperation and hard work in running the previous contests."

Calling the BARTG HF Contest "a well liked and supported contest," Barber said that the March 2009 BARTG HF Contest attracted "around 2500 participants. I have no wish to change the character by messing around with the rules, so they will remain the same for next year." The ANARTS rules <http://www.anarts.com.au/rules2009.htm> will not change, but logs must be submitted to BARTG <mailto:anarts@bartg.org.uk>. The rules are currently on the ANARTS Web site, but he said they will be posted to the BARTG Web site soon.

BARTG runs two contests each year <http://www.bartg.org.uk/contests.htm>. The BARTG Sprint Contest is in January and the BARTG HF Contest is in March.

==> ARRL RELEASES 2009-2010 REPEATER DIRECTORY

With more than 20,000 listings for VHF/UHF repeaters across the US and Canada, "The ARRL Repeater Directory 2009-2010" is a must have. Once again, the ARRL is offering two sizes of the "Repeater Directory" --pocket size <http://www.arrl.org/catalog/?item=1288> and desktop <http://www.arrl.org/catalog/?item=1318>.

The pocket-sized Repeater Directory boasts a larger font size, making for easier reading. Both editions feature handy indexing tabs on the cover, easier to read listings and a "Key to Repeater Notes" located right up front in the Directory. Along with these new features, both editions have the features you know and enjoy from prior years: Repeater

operating practices, repeater lingo and hints for newly licensed hams; Frequency Coordinator contact information; listings for D-STAR and APCO 25 repeaters; a guide to using CTCSS tones and Digital Coded Squelch (DCS); VHF/UHF band plans and a 2 meter channel-spacing map; IRLP (Internet linked) nodes; tips for handling interference; listings for IRLP, WIRES-II and EchoLink (Internet linked) nodes; emergency message handling procedures, and a transceiver memory log.

Order your copy of "The ARRL Repeater Directory 2009-2010" today at the ARRL Online Store <http://www.arrl.org/catalog/?category=What%27s%20New>.

==> SOLAR UPDATE

Tad "The warm Sun thaws the benumbed Earth" Cook, K7RA, this week reports: Our Sun is in the news again, unfortunately not due to any hoped-for activity, but for the eerie quiet instead. The Sun is surprisingly calm by several measurements, including the large number of spotless days, with an average 10.7 cm solar flux and low solar wind pressure. Right now there are no sunspots, but the 10.7 cm solar flux is up a bit lately. The latest prediction has the usual quiet planetary A index at 8 for April 3-4, then back to 5, then 15 and 10 for April 9-10. Predicted solar flux is 71 for April 3-9, then back to 70 for April 10-22 then to 72 for April 23 and into May. Sunspot numbers for March 26-April 1 were 0, 0, 0, 0, 0, 0 and 0 with a mean of 0. The 10.7 cm flux was 69.1, 71.6, 70.6, 70.9, 70.9, 71.2 and 70.8 with a mean of 70.7. The estimated planetary A indices were 7, 4, 4, 5, 4, 4 and 4 with a mean of 4.6. The estimated mid-latitude A indices were 6, 2, 2, 4, 3, 2 and 3 with a mean of 3.1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Thomas Carew's "The Spring" <http://www.poetry.com/greatestpoems/poem.asp?id=508>.

==> IN BRIEF:

* This Week on the Radio: This week, the NCCC Sprint Ladder is April 3. On April 4-5, check out the Montana QSO Party, the Missouri QSO Party, the QCWA Spring QSO Party, the ARCI Spring QSO Party, the SP DX Contest and the EA RTTY Contest. The 144 MHz Spring Sprint is April 6 (local time). Next week is the NCCC Sprint Ladder on April 10 and the PODXS 070 Club PSK 31 Flavors Contest on April 11. On April 11-12, look for the Georgia QSO Party, the Yuri Gagarin International DX Contest and the JIDX CW Contest. The SKCC Weekend Sprint and the UBA Spring Contest (SSB) are April 12. The Low Power Spring Sprint is April 13. The 222 MHz Spring Sprint is April 14 (local time) and the NAQCC Straight Key/Bug Sprint is April 15. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL

Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, April 5, 2009, for these online course sessions beginning on Friday, April 17, 2009: Amateur Radio Emergency Communications Level 2; Antenna Modeling, and Radio Frequency Propagation.

Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* Byron Black, W4SSY, Wins March QST Cover Plaque Award: The winner of the QST Cover Plaque Award for March is Byron Black, W4SSY, for his article "The W4SSY Spudgun." Congratulations, Byron! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the April issue by Thursday, April 30.

* 2009 National Hurricane Conference Has Amateur Radio Focus: The 31st Annual National Hurricane Conference <http://www.hurricanemeeting.com/> will take place April 6-10 in Austin, Texas. This annual event brings together many disciplines in the Emergency Management field to address tropical events that impact the United States. According to ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD, the conference will feature several Amateur Radio presentations catering to Amateur Radio operators, Emergency Management and Non-Governmental Organization (NGO) officials. "This will be Amateur Radio's most significant presence at a National Hurricane Conference," Dura said. On the afternoon of Tuesday, April 7, Dura said an Amateur Radio Training Workshop will be offered free of charge to Amateur Radio operators, Emergency Management and NGO staff and volunteers attending the Conference. "This has been a yearly tradition at the conference," he said. "In addition, on Wednesday morning, April 8, an Amateur Radio

Workshop on Situational Awareness and Disaster Intelligence, as well as an Amateur Radio 'Rap Session,' will be held. For the Wednesday presentation, the conference registration fee is required."

* ARRL to Close in Observance of Good Friday: ARRL Headquarters will be closed in observance of Good Friday on Friday, April 10. There will be no W1AW bulletin or code practice transmissions that day. "The ARRL Letter" will be posted a day early on Thursday, April 9; there will be no "ARRL Audio News" on April 3 or April 10. ARRL Headquarters will reopen Monday, April 13 at 8 AM Eastern Daylight Time. We wish everyone a safe and enjoyable holiday weekend.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):
letter-dlvy@arrl.org

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all

automatically sent email" to temporarily stop all e-mail deliveries.)
Then, click on "Submit modification" to make selections effective.
(NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

The Ohio/Penn DX PacketCluster
DX Bulletin No. 903
BID: $OPDX.903
April 6, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, N4AA & QRZ DX, WB4PVT, K8YSE, KU9C, DK8JB, DL2SBY, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G0IAS, HA0HW, I1JQJ/IK1ADH & 425 DX News, I2JJR, IK7JWX, ON4ATW, ON5TN, Pete's-DX-Newsdesk, PS7AB, PS8ET, PY4WAS, RSGB IOTA Web Site, SV1JG, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK6JB, VU3RSB and ZL2IFB for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th/March, through Sunday, 5th/April there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T33, T7, T8, TA, TF, TG, TI, TJ, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VK9M, VK9X, VP2E, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2008 MMAA CW CONTEST RESULTS. The results of "2008 Manchester Mineira All America" (MMAA) CW Contest are now available at:
http://www.powerline.com.br/cwjf
The CWJF Web site also has photos and commentaries of the participants at: http://www.powerline.com.br/cwjf/fotos_ing.php

The CWJF group states, "If you were one of the participants, our thanks, and if you did not participate in 2008, you wait to have the HONOR of your valuable participation in 2009." PLEASE NOTE: In 2010, the Manchester Mineira All America CW Contest will be expanded to include the five continents and to separate the modes of CW and SSB into two different dates. Details will be forthcoming.

3D2, FIJI (IOTA Op). Jan, OK2ZAW, will be on a holiday DXpedition in May and will be active as 3D2ZW. He plans to activate a few IOTA using his IC-706 (w/100 watts) into a vertical and dipole antennas. QSL via his home callsign, direct or by the Bureau. His schedule is as follows:
May 1-8th - Nadi, Viti Levu Group (OC-016); callsign 3D2ZW/p
May 2-4th - Bounty Island (OC-121); callsign 3D2ZW/p
May 4-6th - Manta Ray, Yasawa Group (OC-156)
May 6-8th - Botaira Beach Res., Yasawa Group (OC-156)

40M DX HUNTERS NET. Net Controller John, VK6JB, informs OPDX that he has been in the hospital for 7 weeks and is still recovering. He states, "I have had a skin graft which is healing slowly and is still quite painful. Others were trying to run the net while I was away but conditions were bad and other problems persisted to make it difficult. As of this week, we will be back in full swing with the net, so I hope that you will be able to join us. Our regular nets are as follows: Wednesdays, Fridays and Saturdays -- Usual time is at 1200z. The net is on 7093 +/- QRM. So, starting April 8th, come and join us. We know that conditions are not good but there have been some quirky openings on 40M, so come and be part of the net. Hopefully you can make a contact with a station you really need (a QSL or new country)." For more info about the net and the 40m group, please send an E-mail to: vk6jb@wia.org.au

5C, MOROCCO (Update/IOTA Op). Alfredo, IK7JWX, updates OPDX on the QSL and log search information for the upcoming DXpedition to activate Mogador Island (AF-065), April 19-25th. He states, "Our plan is to upload logs at least once a day, so you can use the LOGsearch page to see if you're in the log starting the day after your QSO(s). The online lookup function cannot correct any problems we discover in the logs. We will correct them when back home. If your callsign is not in the log and you think it should be, please use the LOGsearch by date and control band and UTC time. Only if you find a typing error in your call, send an E-mail from the form. QSL processing will be handled as follows:
* For 5C2A, 5C2B, 5C2C, 5C2F, 5C2J, 5C2L, 5C2SG, 5C2Z: via IK7JWX, by the ARI Bureau or direct to:
Alfredo De Nisi, PO Box 218, 73100 LECCE Centro, ITALY
* For 5C2Y only: via I0SNY, by the URE Bureau or direct to: NICOLA SANNA, Via Bartolomeo Grazioli, 26, 06132 - S. SISTO (Perugia), ITALY
* Stations in the pacific Area (only zone CQ 28,29,30,31,32) for all callsigns: via VK4FW, by the bureau or direct to:
BILL HORNER, PO BOX 612, CHILDERS, 4660, AUSTRALIA
Direct QSLing requires a SASE and a minimum payment of 3 USDs or 2 Euro. Incomplete requests will be returned via bureau. All surplus funds received will go to the 5C2 DXpedition. If you wish to contribute

separately for the 5C2 DXpedition, please click on the 'Donations' button on the left (on the Web page). You can use also the 'Online QSL Request System' (OQRS) from the LOGsearch menu if you would like to receive your 5C2 QSL automatically sent through the QSL bureau or automatically mailed to you. In this last case your payment should be made via Paypal; you do not need to send us your card. If you use the Online QSL Request Service, please do not send any further cards via the bureau or direct!" For more details, please their Web page at: http://www.mogador2009.altervista.org

8P, BARBADOS (NA-021). Richard, G3RWL, is once again active as 8P6DR from here between now and April 24th. Activity will be holiday style on 160-10 meters using CW and the Digital modes. DO NOT LOOK FOR HIM ON APRIL 8th -- It is his wedding day! Over the past weekend Richard was active on 40/30/20 meters CW. QSL via his home callsign, direct or by the Bureau (E-mail requests for bureau cards can be sent to: g3rwl@amsat.org

8Q, MALDIVES. Cliff, SV1JG, will be active as 8Q7SV between April 29th and May 5th. Activity will be mostly CW and digital modes on all bands. QSL via SV1JG, direct or by the bureau.

8R, GUYANA. Operators Dan/KE7TBB and his father Dan/N7EAA will be active as 8R1AD between April 20th and May 3rd. Activity will be on 20 meters using CW, SSB and PSK31. They plan to look for stations who are young ham operators and running low power (kilowatt and under). QSL via N7EAA.

9A, CROATIA (IOTA Op). Zik, VE3ZIK/DO7ZZ, will once again be active as 9A/VE3ZIK from Bilice (Croatian coast) between April 12-21st. Activity will be only on 40 and 20 meters CW/SSB. There will be a one day operations from Ugljan Island (EU-170, CI-134) as well as Pasman Island (EU-170, CI-085). QSL via DO7ZZ, bureau 100%. LoTW and eQSL is also "OK". Zik really prefers paper QSL cards.

9H, MALTA (EU-023). Augusto, HB9TZA/I2JJR, will be on a short holiday in Bugibba (JM75EW), St. Paul's Bay, between April 9-14th. His callsign will be 9H3JR, but will sign /P around the islands if the weather is "OK". His holiday style operations, both /P and from main QTH, will mainly be SSB on 40 and 17 meters, but any band is possible (80-6m). He will use a FT817 for portable operations, and an IC7000 with AH4 for his fixed operations. The antennas will be a long wire, dipoles or a 10m fishing rod, depending on band conditions, places and space available. QSL via his home callsign.

C9, MOZAMBIQUE (Another Chance!). If you missed the C91TX operation you will have another chance to work another team of operators on a DXpedition to Mozambique, and they will sign C91FC from April 9-13th. The "Fox Charlie DXpedition" team is made up of the following operators: Philip/ON4AEO, Kath/ON7BK, Sid/ZS6AYC, Adele/ZR6APT, Gert/ZS6GC, Lucas/ZS6ACT, Jan/ZS5JC, Deon/ZS6ABR, Jose/ON4CJK, Herman/ZS5LH and Steffi/ON3AEO. They hope to activate the following bands, 80/40/20/17/15/12/10 meters using CW, SSB, RTTY and PSK. The QSL Manager is ON4CJK. Send QSLs either by the Bureau

or direct. It is requested that direct cards be accompanied with 1 IRC or 2 green stamps with a self addressed envelope (QSLs without this, QSLs will be returned via the Bureau). The QSL address is: JOSE DUYCK, MOLENAKKER 56, 8740 EGEN, BELGIUM. More information regarding the DXpedition can be obtained from their Web site at: http://www.c91fc.be

CT, PORTUGAL (Lighthouse Activity). Members of the Algarve S.T.A.R. DX Team are planning to activate a new lighthouse on April 18th between 0700-1300z. Activity will take place from Doca Olhao (Parsena Olhao) West Lighthouse (ARLHS: POR-129, DFFA (Algarve Lighthouse Award) Fa-32). Callsign will be announced later. Look for updates and more informations at: http://algarvedx.com

CT3/CS9, MADEIRA ISLANDS. Operators Ulf/DL5AXX and Frank/DL8WAA will be active as CS9L during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via DJ6QT. They are looking for another operator to join their team. If interested, send an E-mail to: dl5axx@darc.de

DP1/DP0L, ANTARCTICA (AN-016). Felix, DL5XL, (member of the first German over wintering team) is now active from the German Antarctic station "Neumayer III" using his personal DP1POL callsign and working CW mostly on 20 and 40 meters. Felix will be at Neumayer 3, until early 2010. QSL via DL1ZBO. A new WAP reference number has just been issued to the Georg Von Neumayer III Station as WAP DEU-08. More details can be found on the WAP Web site (under News & Information page) at: http://www.waponline.it

DU, PHILIPPINES (IOTA Op). Max, M0GHQ, now active from here as DU9/M0GHQ until the end of April, plans to activate the following islands sometime during his stay: Cebu Island (OC-129), Mindanao Island (OC-130), Samal Island (OC-235) and Leyte Island (OC-129). Activity will be on 160-10 meters on SSB, PSK and RTTY using 100 watts and wire antennas. There may be some 6 meter operations. This past weekend Max was heard on 20 meters RTTY. QSL via his home callsign, direct or by the bureau.

HG160, HUNGARY (Special Event). Hungarian amateurs from the city of Debrecen will be active as HG160FNY (as well as special individual callsigns) until July 31st. Activity is to remind everyone of the historical event 160 years ago (in 1849) where the Austrian army occupied the Capital city (back then was Debrecen) and Transdanubium. Look for activity on all HF bands including VHF/UHF using various modes (including digital). QSOs are good towards the Commemorative Diploma. The principal special callsign will be HG160FNY with different operators. QSL Manager is Zoli, HA0DX. Special individual callsigns announced are: HA160DX (Zoli/HA0DX), HA160KA (Istvan/HA0KA), HA160NDE (Vince/HA0NDE), HG160BW (Imre/HG0BW) and HG160JUV (Vili/HG7JUV). Stations with individual special callsigns will not have QSL Managers. QSL cards should be addressed to the Central QSL Bureau in Budapest and should be handled as a conventional card. A special QSL card will be issued for each contact with a special station. For the Commemorative Diploma, you need one contact with a HG160FNY station and two more contacts with stations participating in the event with two different callsigns, independent of mode or frequency. For more details, please visit the following Web pages:

http://www.qrz.com/db/HG160FNY http://www.ha0ka.fw.hu
http://www.mrasz.hu http://www.deol.hu

IOTA NEWS.....
AS-126. Operator Tony/E21IZC and possibly others will be active as
E21IZC/p from Lipe Island, April 12-13th. Activity will be
on 40/20 meters using CW and SSB. QSL via E21IZC.

AS-177. Operators Sara/VU3RSB, Frank/DL4KQ, Jose/VU2JOS, Yamini/VU2YAM
and Manju/VU2SMS are now active as AT9RS from Grandi Island
until April 8th. The following suggested frequencies were
announced:
CW - 28040, 24920, 21040, 18098, 14040, 10114, 7030 and 3530
SSB - 28560, 28460, 24950, 21260, 18128, 14260, 7055 and 3765 kHz
There are two regional QSL routes. QSL via W3HNK (For North/South
America) and DL4KQ (rest of the world). For more information,
please visit the following Web pages: http://www.vu3rsb.org
http://www.mdxc.org/at9rs

EU-076. Fred, ON6QR, will be active as LA/ON6QR from Moskenesoy
Island, Norway, between 2100z, Wednesday, April 8th, and
0800z, Sunday, April 12th. Activity will be only CW running
QRP (5 watts) and mainly on 40-20 meters. QSL via his home
callsign.

EU-189. Theo, ON4ATW, reports that a Belgian team of five "well
prepared and trained Dxpeditioners" will attempt a landing
on Rockall Island between April 30th and May 1st. Depending
on the weather and sea conditions, they will be on the air
with two stations using the callsign MM0RAI/p for about 48
hours. Suggested frequencies are:
Band SSB Extra CW
---- ----- ----- ------
80m 3763 up 5 kHz 3863 RX 3516 up
40m 7063 or 7163 7236 RX 7016 up
30m ----- -- 10116 up
20m 14263 up 5 kHz -- 14016 up
17m 18136 up 5 kHz -- 18084 up
15m 21263 up 5 kHz -- 21016 up
12m 24963 up 5 kHz -- 24906 up
10m 28463 up 5 kHz -- 28016 up
Operators mentioned are: Theo/ON4ATW, Patrick/ON4HIL, Luc/
ON4IA, Karel/ON5TN and Marc/ON6CC. QSL Manager is Carlo,
ON4BR. Please check their Web site for latest news and last
minute updates at: http://www.rockall.be
ADDED NOTES: Rockall is the summit of an old volcano located
between the north tip of Scotland and Iceland, sticking out 20
meters above the Atlantic. Landing on the 500 square meters
rock is very difficult as it has steep slopes at all sides.
The area is infamous for its high seas and very changeable
weather all through the year. For DXCC purposes, it counts

as Scotland (GM).

SA-072. Members of the Teresina DX Group are preparing a DXpedition to the Canary Island (DIB MA-05, DFB MA-11) on the coast of Piaui, Brazil, between April 29th and May 3rd. Callsign will be ZW8BBC. Activity will be on 160-10 meters using CW, SSB, PSK31 and RTTY, including 6 meters, 2 meters (SSB/FM) and the satellites (SSB/FM). Satellites mentioned are: AO-7 (A and B), FO-29, AO-51, VO-52, SO-50 and ISS in repeater mode, if activated. QSL via PS8DX (QRZ.com address): Operators mentioned are: PS8BBC, PS8DX, PS8ET, PS8FSM, PS8HF, PS8JN, PS8NF, PS8PY, PS8RF and PS8TV.

HAMCALL WORLDWIDE CALLSIGN DATABASE NOW TOPS TWO MILLION CALLSIGNS. The Web site at "HamCall.net" grows in popularity and content. It contains data from over two hundred countries. "Buckmaster Publishing" is proud to announce their HamCall Callsign Database now exceeds 2,000,000 world-wide callsigns. First issued in 1989 on CD-ROM, HamCall began with only U.S. callsign data then added International listings in 1993. Since then the database and its features have grown steadily each year.
HamCall is the world's largest callsign database and is available on CD-ROM and on the Internet at http://hamcall.net. A typical callsign listing includes mailing address, e-mail address, accurate latitude/ longitude, grid square, QSL manager, previous callsigns, photo and much more. A new HamCall CD-ROM is published each month.
Buckmaster Publishing is also known for its 6, 7, and 8-Band Off-Center-Fed (OCF) dipole antennas at <http://hamcall.net/7bandocf.html>, Great Circle Maps (Azimuthal Equidistant), and Name Badges. Buckmaster also hosts the web site of the popular CQ Magazine Archives at: http://hamcall.net/cq
Buckmaster products can be found at amateur radio dealers across the U.S. and are widely distributed to over 200 countries by the publisher. For further information, contact: Jack Speer, N1BIC, Buckmaster Publishing, 6196 Jefferson Hwy, Mineral, VA 23117 --or-- info@buck.com

HB0, LIECHTENSTEIN. Kasimir, DL2SBY, will be active from here between April 24th and May 4th. Activity will be on HF bands (80-10m) using CW, SSB and RTTY. Equipment will be a TS2000, FT900AT, Ameritron AL811, HF9V vertical and a monoband vertical for 30/40m. Activity will also take place on 13cm and 23cm using EME. Equipment will be a FT726R, Dish 3, 7m, and 2 amplifier for both bands. Kasmir will use two separate callsigns for this operation. For the HF bands, he will use HB0/DL2SBY and for the EME activity will sign HB0/DF1SR. QSL via DL2SBY, by the Bureau or direct.

KH4, MIDWAY ISLAND (Update). It was announced this past week by team co-leaders Tom/N4XP and Dave/WB4JTT (edited): "We are pleased to announce the anticipated dates for the DXpedition are now set for October 9-19th. These dates have been selected to allow maximum operation for the eleven days we will on the island and most importantly provide Midway Island over two weekends. Logistical planning is under way and equipment is

being arranged. Plans for six stations to be located in two separate locations are proceeding with two antenna fields feeding these two operating sites. Modes will be CW, SSB and RTTY with at least one station on 20 meters 24 hours a day to provide that new entity to those who need it. A link is now provided showing the radio site at the X on the beach area on the north side of the island where the operating positions will be located. The DXpedition web site <www.midway2009.com> is fully functional. New additions are a poll to find out what bands and modes are most needed and a Midway 2009 memorabilia store. Follow the links to tell us your Midway DX needs and to add to your DX memorabilia collection. The team is highly experienced and anxious. We invite you to become familiar with some of the team by visiting: http://www.midway2009.com/meettheops.html "

LZ8, BULGARIA (Special Event). Members of the Bulgarian Federation of Radio Amateurs (BFRA) will be active as LZ8WHST to promote the next World High Speed Telegraphy Championship to be held in Obzor, Bulgaria, in September 2009. This special callsign will be randomly activated by several different BFRA operators from their home QTH and will be active until the end of September. Operation will be 99% CW, with the possibility of some occasional SSB and Digital contacts. Activity will be emphasized during the championship, September 11-15th. QSL via LZ1PJ. QSLing will start after the end of activation.

MRD 2009. Attention all former maritime radio operators and CW operators! The "2009 Maritime Radio Day" will take place between 1200z, April 11th and 1200z, April 12th. For rules to participate and a list of stations to be in this special event, please go to: http://www.radiomaritimeday.org/

QSL INFO AND NEWS.....
7Q7AH and 7Q7HB QSL STATUS. Allan, G0IAS/7Q7AH, informs OPDX that all QSL cards for 7Q7AH and 7Q7HB, that were received during the month that he (G0IAS) was in Malawi, have been answered. Please be aware that ROYAL MAIL will be INCREASING their costs in the middle of April. Allan states, "Thank you everyone who worked 7Q7AH. Radio conditions were not very good in the Southern Hemisphere most days, just the openings in the evening which arrived when it was meal time! Despite this over 100 Countries were worked."

CS6A and CT7FFC QSL cards were received from the printer. Direct QSL requests are in the mail, and E-mail bureau requests will be answered as soon as possible via the bureau. If you received their old CS6A QSL card, please E-mail the Algarve STAR DX Team, and they will send a new CS6A QSL card again at no cost to you. See the new QSL card at: http://algarvedx.com

QSLS VIA LOTW: 4U1UN, HC8A, PW0S and YX0A/YX0LIX

QSLS RECEIVED VIA MAIL: 3V8BB, 4O/K1ZZ, 5B4AII, 5B/AJ2O, 5W0K, 6Y1LZ, 9L0W, 9X0W, C4N, C91LW, CM6RCR, EA9PY, J7N, JT1CO, RW3QC, S21DX, SV9/DJ7RJ, TO3R, VU7SJ and ZK2DF

QSLS RECEIVED VIA THE BUREAU: 9A9Z/P, A45WD, C56YK, DF1RA, DF2EY, DH6JH, DL6ABN, DL6DSA, DL8AX, DL8ER, DL9BH, DO6RO, RA6CY, UA6AF/P and UA9BX

S7, SEYCHELLES. Ben, DL7UCX, will be active as S79UCX between April 5-17th. Activity will be holiday-style on 80-10 meters with operations mainly on CW using 100 watts into a vertical and dipole antennas. QSL via DL7UCX, direct, by the Bureau or the LoTW.

SILENT KEY. OPDX was informed that Bill Hamer, ZL2CD, became a Silent Key on Sunday, March 29th, at Wellington Hospital. Bill received a QSM for services to radio but will be remembered by untold thousands of amateur radio ops all over the world for his QSOs. He was mostly active on CW, but his voice was heard on SSB. OPDX and its readers would like to send out our deepest sympathy to the family and friends of ZL2CD.

SOLAR CYCLE 24 NEWS. There was good and bad news reported this past week. In the middle of the week a good report from Thomas, NZ4O, came out stating, "A huge solar cycle 24 sunspot group has formed near E30N80 in the northern hemisphere of the Sun. It has pushed the solar flux index up from 71 to 155 and 6 meters is open globally via F2 layer propagation." However, bad news reported from NASA indicates that the sun is plunging into the deepest solar minimum in a century. NASA states on April 1st, "The sunspot cycle is behaving a little like the stock market. Just when you think it has hit bottom, it goes even lower. 2008 was a bear. There were no sunspots observed on 266 of the year's 366 days (73%). To find a year with more blank suns, you have to go all the way back to 1913, which had 311 spotless days: plot. Prompted by these numbers, some observers suggested that the solar cycle had hit bottom in 2008. Maybe not. Sunspot counts for 2009 have dropped even lower. As of March 31st, there were no sunspots on 78 of the year's 90 days (87%)." Read the complete report at: http://science.nasa.gov/headlines/y2009/01apr_deepsolarminimum.htm

SY2, GREECE (Special Event). Greek operators from Veria (SV2/Macedonia region) will activate the special callsign SY2DDAY between June 4-7th. Activity is to celebrate the 65th anniversary of the greatest landing operation in history during WWII, with the participation of seven countries on the beach of Normandy. Greece participated with 2 warships and 4 commercial freighter. Activity will be on all modes and bands. QSL only direct via SV2KBB (w/SAE) to: Archelaos Iakovidis, P.O. Box 26, P.C. 59100, Veria Makedonia, HELLAS, GREECE. Please, DON'T send bureau QSL. Operators mentioned are: Kostas/SV2LLB (5B8BG), Andreas/SV2JAO, Archelaos/SV2KBB and Litsa/SW2MIN (XYL SV2JAO). ADDED NOTE: Activity on Echolink R-4 (SV2/ Mt.Vorras) node: 121496, E.P.C. #6504. QSL Manager is also SV2KBB. To see the QSL card, go to: http://www.qrz.com/sy2dday

T8, PALAU. Operators Ryosei/JH0IXE and Nobuhiro/JA0FOX are once again active as T88CW and T88NF, respectively, between now and April 12th. Activity will be on 80-6 meters using CW, SSB, RTTY, SSTV and PSK31. This past weekend they were very active on 40/30/20/17/15 meters, mostly RTTY with some SSB on 15 meters. QSL via their home callsigns.

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, continue to be very active from Mellish Reef. As this was being typed, their log shows that the operators have worked almost 10k QSOs. They are working very hard on the lower bands and may try to work more on the higher bands. Their Web page states, "We intend to remain on Mellish Reef at least until April 10th. After that we will be looking for a favorable WX window for the return trip to the Australian mainland. We have supplies until April 15th - maybe 18th, if we stretch them and reduce power on the higher bands." QSL via HA7RY, direct, LoTW or by the Bureau (remember, they have an "Online QSL Request Service"). For updates and more info, please visit the VK9GMW Web page at: http://www.vk9gmw.com

VK9X, CHRISTMAS ISLAND. Just a reminder. By the time you read this Haru, JA1XGI/W8XGI, should be active as JA1XGI/VK9 between now and April 11th. Activity will be on all bands including the lower bands using CW and the digital modes. QSL via JA1XGI, by the bureau or direct.

YK, SYRIA. Saad, N5FF, in Damascus, is now active as YK1BA until April 10th. He will return home to Texas on April 11th. As usual, the purpose of the trip is not a DXpedition, so his operating will be spotty, but he states that he will try to put in as much radio time as possible. He suggests that his operating hours will be between 2000-2300z or between 0200-0500z and possibly some occasional activities between 1200-1400z. Saad says, "I suspect that 30, 40, and 80 meters will be the bands of choice, and I will be active on SSB, CW, and RTTY." However, he was heard this past weekend on 20 meters SSB. QSL via N5FF (QRZ.com for details).

Archive-name: radio/ham-radio/recruitment
Revision: 1.1 2007/09/29 18:42:47
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

>Date: Sunday, April 12 (Easter)
Time: 1:30 pm
Amateur Radio License Test

Basement meeting room
Public Safety Building
318 E. 5th St.
Muscatine, IA 52761

FCC License Exams for all classes.
Preregistration requested.

For more information, contact Jerry Schroder Jr., KC&#65533;WWV
Phone (563) 607-0793
E-mail KC&#65533;WWV@arrl.net

* Examinees must bring current FCC form 605 or obtain one on site.
* Examinees must present personal picture ID or two other forms of ID
(no exceptions).
* If licensed, bring original and photocopy of current FCC license and
/ or CSCEs.
* Exam fee is $15.00.

We will monitor the 146.910- Repeater to help with directions.
We hope to see you and your friends there.

IIRC, the team must keep copies of the ID documents, so I suggest you
ask applicants to bring copies with them.

73,

W1AC
P.S. BTW, your email reply address is bouncing.

According to my VE manual, the team does not need to have copies of the IDs,
we just need to see two pieces of ID. The only thing we need copies of are
the license fro those who are upgrading an existing license.

==> ITALIAN HAMS RESPOND AFTER EARTHQUAKE

An earthquake that registered between 5.8 and 6.3 magnitude struck the town of L'Aquila -- the capital of Italy's Abruzzo region, about 65 miles northeast of Rome -- early on the morning of April 6. News reports say the quake has killed more than 250 people, with at least 50,000 left homeless. Cluster spots reported that two HF frequencies -- 7045 and 3640 kHz -- were being used for emergency communications. Local hams also reported that various VHF frequencies were also being used.

According to IARU Region 1 Emergency Communications Coordinator Greg Mossop, G0DUB, the 7045 kHz frequency is being used to link local rescue and coordination centers with Protezione Civile in Rome. "Cell phone

capacity in the area is being increased," he said, "and a second wave of volunteers and workers are being prepared to go to the area to take over from the first responders." He asked that 7045 kHz be kept clear as the Net remains active and stated that "it is now more important [to keep the frequency clear now] that a formal Net seems to exist."

Alberto Barbera, IK1YLO, of Ponderano (near Milan), told the ARRL hams are operating in VHF and UHF locally "because the area involved is not that large. About 30 villages around L'Aquila are involved. Our Dipartimento Protezione Civile does not need additional help at this moment; perhaps it will be necessary in a second step, we will see."

Fabrizio Villanova, IK6GTF, of Pescara (about a 90 minute drive from L'Aquila), said that several hams from his town and from Chieti are providing communications support after the quake. "We are using Pescara's repeaters to maintain contacts with hams in L'Aquila and to coordinate the activity of Pescara/Chieti's hams," he told the ARRL. "We operate from an institutional building especially equipped for emergencies where, joined with the police, fire department, Red Cross and other public services, all committed to provide aid. Our national emergency service is working in a very good manner and all activities seem to proceed well."

Rino Odoardi, IZ6BMP, of Alanno Stazione (near Pescara), told the ARRL that he and other hams from the Pescara section of the Associazione Radioamatori Italiani (ARI) "are in L'Aquila, involved in Civil Defense activities with officials in L'Aquila. The earth is still shaking now -- I hope it will finish soon!" ARI <http://www.associazioneradioamatoritaliani.it> is Italy's IARU Member-Society <http://www.iaru.org>.

The death toll reached 260 people, including 16 children, after rescuers pulled more bodies from the rubble in the days after the earthquake. Italian Prime Minister Silvio Berlusconi said in total 28,000 had lost their homes, with 17,000 now living in tents and the rest in free hotel rooms or staying with family. Aftershocks from Italy's worst quake in three decades lasted until April 8 in mountainous Abruzzo and were felt in Rome. According to Reuters News, Berlusconi vowed to build "a whole new town near L'Aquila."

==> NEW ARRL ADVANCED EMERGENCY COMMUNICATIONS COURSE IN THE WORKS

Over the past several months, ARRL staff have been reviewing the Amateur Radio Emergency Communications online course program <http://www.arrl.org/cep/> and have decided to combine two of the three Emergency Communications courses. According to ARRL Education Services Manager Debra Johnson, K1DMJ, the review included a critical examination of the course content, as well as methods of course delivery and interrelationships with government organizations. Johnson said that the decision was made to revise the Level 3 course to become a new Advanced Emergency Communications Course; this, she said, will replace both the current Level 2 and Level 3 courses. The new advanced course is set to

be released during the last quarter of 2009.

"Our aim is to develop professional level courses which are widely accepted by other organizations for the emergency communication component of Amateur Radio," she said. "We are investigating requirements that the Department of Homeland Security (DHS) is currently putting in place for approved courses, as well as other possibilities to develop emergency communications training that meets the emerging training needs surrounding emergency communications."

Students who have previously taken the Level 2 course will need to have the new advanced course to complete the current Amateur Radio Emergency Communications training program, Johnson explained. "Those who have completed the Level 1 course may progress directly to the advanced course when it is made available; this new course contains content formerly included in the former Level 2 and 3 courses." Johnson said that there are no current plans to change the Basic Level 1 course and that that course will continue to be offered in its current format.

With the combining of the Level 2 and 3 courses, Johnson said that anyone who had signed up for the Level 2 course set to begin April 17 may apply for a refund. Any scheduled field instruction of the Level 2 content, as well as Level 2 exam sessions, will also be suspended. "We will honor exam sessions that have been previously scheduled and award Level 2 certificates for any exams successfully completed up to May 31," she said.

"Our training program mandate is to provide the training that ham radio communicators need to be prepared to serve our communities in time of communications emergencies," Johnson explained. "This consolidation of program content will streamline the delivery of the training and apply volunteer and administrative support resources more effectively."

==> FCC DENIES MICHIGAN HAM'S REQUEST FOR RULING

In October 2007, Christopher Kaczmarek, KB8MLC, of Saginaw, Michigan, petitioned the FCC for a ruling regarding the installation of his Amateur Radio antenna. Kaczmarek told the FCC that he received a notice from the manager of his mobile home community stating the antennas were not allowed and asked for "a ruling from the Commission recognizing [his] right to an Amateur Radio antenna structure." On April 6, 2009, the FCC denied Kaczmarek's request for a ruling in his favor, based on the fact that PRB-1 protections do not extend to private homeowners' agreements
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-774A1.pdf>.

The Commission agreed with Kaczmarek that Section 97.15 of the Commission's Rules provides that "state and local regulation of antenna structures must not preclude amateur service communications, must reasonably accommodate such communications, and must constitute the minimum practicable regulation to achieve the state or local authority's legitimate purpose." In its letter to Kaczmarek, the FCC pointed out

that it has not, however, extended this policy to regulations promulgated by private parties.

Saying that it has considered this same question twice before, the FCC told Kaczmarek that it "chose not to preempt private land use regulations that restrict the installation of antennas and associated support structures used by Amateur Radio stations. As agreements between private parties are voluntarily established and freely entered into, the Commission is hesitant to interfere with them unless it is shown that private agreements will seriously disrupt the federal regulatory scheme."

==> SEATTLE HOSTS AMATEUR RADIO EMERGENCY COMMUNICATIONS SEMINAR

More than 250 hams and emergency communications professionals enjoyed two days of focused programs and socializing at the 11th Annual Communications Academy in Seattle over the weekend of April 3-4 <http://www.commacademy.org/>. Held at South Seattle Community College in West Seattle, the conference drew attendees from across the country, mostly from the Pacific Northwest: Washington, Oregon and British Columbia. "The organizing committee, led by Marina Zuetell, N7LSL, is to be commended for putting together this useful annual event that continues to get better each year," said ARRL Contributing Editor and conference attendee H. Ward Silver, N0AX. "The beginner's track was created by Brian Daly, WB7OML, who unfortunately was unable to attend the conference due to some emergency situations at work. He recruited a great team of individuals to take on teaching the five different segments."

According to Silver, the conference is designed to interest everyone from brand new hams to seasoned EmComm veterans -- even emergency management and planning professionals. The breakfast keynote speakers were King County (Washington) Emergency Management Director Robin Friedman and ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD. Silver said the program was organized roughly along three tracks: Introduction to Amateur Radio for new hams; technical topics of interest to EmComm operation, and reports or training programs with EmComm themes or subjects.

"The track for brand-new hams was particularly well received," Silver said." Hosted by Scott Currie, NS7C, the programs began Saturday morning with 'Getting Your First Radio' and concluded Sunday with 'I Get It Now!Basic EmComm Equipment Needs.' This is no substitute for hands-on Elmering and training, but it certainly helps the ham with a brand new Technician license in need of some guidance."

Silver noted there were two technical programs on digital voice modes, such as D-STAR <http://www.dstarinfo.com/> and Project 25 <http://www.project25.org/>. "The presenters guided the audience through some of the intricacies of digital voice technology, comparing and contrasting the strengths and weaknesses of each," he said. "Microsoft's Groove communications technology

<http://office.microsoft.com/en-us/groove/HA101656331033.aspx> was explored as a tool for EmComm teams along with the use of D-RATS <http://www.d-rats.com/wiki/> -- a software package that makes use of D-STAR's low-speed data mode. An 'Ask the Doctor' question-and-answer session proved lively with questions ranging from 'how to' about antennas through the regulations regarding identification on digital voice modes. Staff from a local wireless store gave a standing-room-only presentation on installing mobile radios of all sorts in vehicles."

Communications Academy also offered planning and training programs, including such seminars on how to recognize haz-mat situations through "windshield surveys," ways to provide neighborhood-level communications, methods to develop situational awareness and NOAA weather. "The most difficult thing about the Communications Academy," Silver said, "is deciding what programs to give up in order to see the ones you want!" One course offered was on the Emergency Alert System. According to Zuetell, the system is not an Amateur Radio system but is "a Federal program used by emergency management officials that utilizes the public broadcast system to send targeted local alerts out to the public. The thrust of the presentation was to begin training Amateur Radio operators to program the equipment on a regular basis to keep it current and correct."

One of the highlights of the Communications Academy is an opportunity to see the local EmComm organizations demonstrate their mobile communications facilities. This year, nearly a dozen vehicles from small cargo vans to full-sized trucks were lined up outside. "There was plenty of time and excellent weather for attendees to tour the vehicles, with radios spanning the low HF bands through microwave," Silver said. "While not every club or team is fortunate enough to have its own mobile radio center, you can't help but come away with ideas from improving any EmComm station."

The building competition, wherein individuals submit examples of their ability to create EmComm-related radio packages, is a recent addition to the programs at Communications Academy. Silver said that this year's theme was to build a portable radio system that could operate from portable dc power and on as many EmComm-related bands and modes as possible. "Each entry was judged by both a panel of judges and by the attendees, with the winning score a combination of both," he said. "Like the communication vans, even if you didn't have such a package yourself, it was impossible not to walk away thinking of incorporating some of the ideas at home or in your mobile station."

Silver said that one of the highlights of the Saturday morning "Donuts and Danish" introductory remarks each year is learning how many millions of dollars worth of volunteer time and thousands of driven miles are contributed to the public good by ham radio operators, working together to prepare and be ready: "As the news reports show, it's never very long before the next opportunity to serve, no matter where you live!"

==> FCC, INDIANAPOLIS POLICE DEPARTMENT ADDRESS UNLICENSED OPERATIONS

In response to an investigation by the FCC, the Indianapolis Metropolitan Police Department (IMPD) <http://www.indy.gov/eGov/IMPD/Pages/home.aspx> has taken action to prevent further use of Amateur Radio frequencies by unlicensed officers. Any Amateur Radio equipment in the cruisers of unlicensed officers was removed by order of IMPD Chief of Police Michael T. Spears.

According to the FCC, some IMPD officers were using the radios to supplement their normal communications channels, including using amateur frequencies for tactical communications during drug surveillance. As part of its inquiry, the FCC reminded the IMPD of the large number of tactical channels available on a secondary basis to police departments from the public safety pool of frequency allocations.

"We are pleased that IMPD has put a stop to this unlicensed activity," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "The investigation by the FCC, coupled with the expedient cooperation and correction of the problem by the IMPD, eliminates a situation that had raised serious concerns in the amateur community."

The FCC stated they would monitor the situation and follow-up appropriately if needed.

==> NEW SECTION MANAGER APPOINTED IN SOUTH DAKOTA

Scott Rausch, WA0VKC, of Piedmont, has been appointed Section Manager of the ARRL South Dakota Section starting April 7. He will serve the balance of the term of Rich Beebe, N0PV; Beebe passed away on March 16 <http://www.arrl.org/?artid=8834>.

According to the Rules and Regulations of the Field Organization, when a vacancy in the office of Section Manager occurs between elections, the position is filled by appointment. Membership and Volunteer Programs Manager Dave Patton, NN1N, in consultation with Dakota Division Director Jay Bellows, K0QB, made the appointment effective Tuesday, April 7.

Rausch has served as a South Dakota Assistant Section Manager since 2003; he is also an Emergency Coordinator and an Official Emergency Station within the Field Organization. His term of appointment as Section Manager continues through March 31, 2010.

==>SOLAR UPDATE

Tad "The golden weather greeting on the Sun-warm hills" Cook, K7RA, this week reports: Recently, the 45 day forecast for daily solar flux and planetary A index has consistently predicted a solar flux at 70 for every day into the future. The last of these was on March 24. Then on March 25, the prediction was for the solar flux to be at 72 for March 28-31. That changed on March 26, showing solar flux at 72 on March 28-April 2. On March 27, the solar flux rose to 72 (actually 71.6) and the forecast was the same, but extended the 72 number through April 3. Solar flux has not reached 72 since then, but the March 28 forecast extends the reading of 72 through April 4. On March 29, it extends to April 5, and on March 30, to April 6. On March 31, it extends 72 until

April 9 -- three additional days -- but it also shows a new period with a flux of 72, April 23-May 6. April 1 is the same, but April 2 the flux is dropped to 71 for April 3-9. The April 3 prediction gives up on the slightly higher flux values for the near term, but still predicts 72 for April 23-May 6. The forecast remains the same until April 7, when the 72 flux for April 23-May 6 is shortened to April 23-29. So it appears that even these near term predictions for a very small increase in activity are continually revised downward. In the April 8 forecast, it shows the planetary A index for April 9-10 at 15 and 8, then dropping to 5 until April 21. Early on April 9, we are experiencing the effects of a solar wind stream, and planetary K index rose from 3 to 4 at 0300 UTC. Sunspot numbers for April 2-8 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. The 10.7 cm flux was 70.6, 70.4, 70.1, 70.4, 68.8, 70.2 and 70 with a mean of 70.1. The estimated planetary A indices were 3, 2, 2, 4, 3, 2 and 5 with a mean of 3. The estimated mid-latitude A indices were 0, 2, 0, 3, 2, 2 and 4 with a mean of 1.9. Geophysical Institute Prague predicts quiet to unsettled conditions April 10, quiet April 11-14, quiet to unsettled April 15 and unsettled April 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Lucy Maud Montgomery's "Spring Song" <http://www.poemhunter.com/poem/spring-song-2/>.

==>IN BRIEF:

* This Week on the Radio: This week is the NCCC Sprint Ladder on April 10 and the PODXS 070 Club PSK 31 Flavors Contest on April 11. On April 11-12, look for the Georgia QSO Party, the Yuri Gagarin International DX Contest and the JIDX CW Contest. The SKCC Weekend Sprint and the UBA Spring Contest (SSB) are April 12. The Low Power Spring Sprint is April 13. The 222 MHz Spring Sprint is April 14 (local time) and the NAQCC Straight Key/Bug Sprint is April 15. Next week is the NCCC Sprint Ladder on April 17. Be sure to check out the Holyland DX Contest, the TARA Skirmish Digital Prefix Contest, the ES Open HF Championship and the Feld Hell Sprint on April 18. The Michigan QSO Party, the Ontario QSO Party and the YU DX Contest are April 18-19. The Run for the Bacon QRP Contest is April 20. The SKCC Sprint and the 432 MHz Spring Sprint are April 22 (the 432 MHz Sprint is local time). All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, April 19, 2009 for these online course sessions beginning on Friday, May 1, 2009: Amateur Radio Emergency Communications Level 1; Radio Frequency Interference; Antenna Design and Construction; Technician License Course; Analog Electronics, and Digital Electronics.. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* ARRL to Close in Observance of Good Friday: ARRL Headquarters will be closed in observance of Good Friday on Friday, April 10. There will be no W1AW bulletin or code practice transmissions that day. "The ARRL Letter" will be posted a day early on Thursday, April 9; there will be no "ARRL Audio News" on April 10 or April 24. ARRL Headquarters will reopen Monday, April 13 at 8 AM Eastern Daylight Time. We wish everyone a safe and enjoyable holiday weekend.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

I looked all through my ARRL/VEC VE Manual
http://www.arrl.org/arrlvec/vemanual/vemanual2008.pdf
and could find no reference to copies of ID documents. As Dee said,
ARRL/VEC requires only copies of ham licenses and CSCE's. Copies of
ham licenses are optional, if the candidate has lost his license
document; a timely printout from a ham license data server, such as
the FCC ULS or qrz.com, is sufficient proof.

I heard that in some states it is illegal to copy driver's licenses.
But I cannot confirm this.

Regarding the number of ID documents, the ARRL/VEC says we need one photo or two non-photo ID's. Here's the relevant section of the VE Manual:
The candidate must present a legal photo ID. This requirement is usually met with a driver's license, but it can be a passport or other legal identification card with the candidate's photo on it. When no photo ID is available, the candidate must present any two of the following:
ï¿½ Non-photo ID/driver's license (some states still have them);
ï¿½ Social Security Card;
ï¿½ Birth certificate (must have the appropriate seal);
ï¿½ Minor's work permit, school report card, school ID card or library card;
ï¿½ Utility bill, bank statement or other business correspondence that specifically names the person; or
ï¿½ Postmarked envelope addressed to the person at his or her current mailing address as it appears on the Form 605.

I have a Mint RX-350 Shortwave Receiver with manual and origional receipts. An awsome receiver!
100kHz to 30 MHz Demodulation, filtering, passband tuning and AGC are all done by digital signal processing (DSP). In addition the DSP functions include an automatic notch filter and adaptive noise filtering. Reception modes supported are AM, USB/LSB, CW (700 Hz BFO offset) and Digital (1000Hz BFO offset). The receiver has 34 available IF bandwidths for any type of signal under all reception conditions!

I also have the optional 302R remote tuning knob/keypad and the 307B external speaker enclosure which matches the receiver. AC cord and DC plug as well.

Serious interest only please. Email me at jodi.ron@gmail.com for more information.

Thank you,
Ron

Amateur Radio Newsline(tm) Report 1652 - April 10 2009

Amateur Radio Newsline report number 1652 with a release date of Friday, April 10th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. A radio amateur in Florida is murdered. Police allege his neighbor wanted the hams money and no witnesses to identify identify him. Also, hams in Italy mobilize after an Earthquake hits 70 miles from Rome, another DX'er has his call pilfered and a ham radio April Fools joke that left very few laughing. Find out the details on Amateur Radio Newsline(tm) report number 1652 coming your way right now.

RADIO CRIME: FLORIDA HAM MURDERED IN ROBERY OF HIS HOME

A Florida ham radio operator has been killed by his neighbor in what appears to be a murder and rob crime. Amateur Radio Newsline's Mark Abramovich, NT3V, is at our East coast bureau with more:

--

Authorities say less than a day before he was to celebrate his 57th birthday, Sterling Howell, KG4KIU, a widower who lived alone in a trailer home in Glenn St. Mary was brutally stabbed to death by his neighbor.

Investigators in Baker County at the northeastern tip of Florida say Howell was stabbed by 25-year-old Aron Fox the evening of April 1st.

Baker County Sheriff Joey Dobson told local media outlets Fox, who had lived next door with his mother, stabbed Howell several times in the chest and head area.

Dobson said it was believed the murder weapon was a knife or some other very sharp object, which hasn't been recovered.

The sheriff says there was evidence of a struggle and defensive wounds on the body, which was found outside the trailer home covered by a blanket.

He said the attack was so savage that one of Howell's thumbs was nearly taken off.

Investigators say the apparent motive for murder was money.

Dobson says Fox's mother overheard her son on a cell phone telling someone he was going to get Howell's banking information.

She told authorities she tried to call Howell to warn him just as her son left the house wearing gloves, but she couldn't reach Howell.

Investigators say Fox took Howell's pick-up truck and later abandoned it miles away.

They say his sister helped deputies catch Fox and allowed authorities to take him into custody without incident.

Authorities say the investigation is continuing and they are trying to find the person with whom Fox was engaged in that telephone conversation on the night of the murder.

North Florida hams say Howell was active on local repeaters and was a regular on the South Cars net on 7.251 Mhz.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Aron Fox is expected to be charged with capital murder. If convicted he would face the death penalty or life in prison without the possibility of parole. (ARNewsline(tm) from various published reports)

**

RESCUE RADIO: HAMS AID IN WAKE OF ITALY QUAKE

Amateur radio may be assisting in the aftermath of a powerful earthquake struck Italy early on Monday, April 6th. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

According to several sources and some DX cluster reports, 3.640 MHz and 3.6343.5 on 75 meters along with 7.045 MHz on 40 are being used as emergency net frequencies into and out of the disaster area. But Alberto Barbera, IK1YLO, who is the IARU National Emergency Communications Coordinator for Italy says he is not aware of any nets operating on behalf of the emergency communications groups on the High Frequency bands. He believes that any such operation is being done on an individual basis.

Bob Josuweit, WA3PZO, is CQ Magazine's outgoing Public Service editor. He relays a report from IARU Region 1 Emergency Communications Coordinator Greg Mossop, G0DUB. Mossap says that Barbera is trying to coordinate various groups in light of the recent shutdown of Italy's national emergency communications organization. Bob says that IK1YKO has stated that practically all repeaters are still in operation, and that much of the region's cellphone infrastructure is intact as well.

The magnitude 6.2 quake hit Italy very early in the day killing at least 240 people, leaving thousands of people without homes and causing damage to many ancient buildings. The quake's epicenter was in a town of L'Aquila, about 70 miles from Rome. Numerous important churches and castles, some more than 700 years old, partially collapsed in the quake. Thousands of newer homes were leveled as well.

For the Amateur Radio Newsline, I'm Bill Pasternak, Wa6ITF, reporting.

--

As we go to air rescue efforts are still reported as ongoing and hams world-wide are being asked to keep the frequencies of 3.640, 3.6343.5 and 7.045 MHz clear until further notice, even if its all unofficial at this time. (WA3PZO, CQ, other reports)

**

RESCUE RADIO: CANADIAN HAMS ACTIVATED IN RED RIVER EMERGENCY

Minnesota and North Dakota hams were not the only ones activated when the Red River crested above flood stage almost two weeks ago. Their counterparts north of the U-S and Canadian border went on high alert after serious ice jams on the river north of Winnipeg caused several communities to declare state of emergency.

East St. Paul, West St. Paul, St. Andrews and St. Clements were all being impacted by rising water. St. Clements Emergency Coordinator Dave Place VE4PN, reported that ARES was activated and its members staffed the local Emergency Operations Center. This continued even after reports advised that the ice jam had been broken using explosives and that the water level in hardest hit areas was dropping. The hams stayed at the EOC because those communities were still at risk.

And it was due to the rapidly changing conditions that Manitoba emergency management went ahead with its planned opening of the Provincial Emergency Operations Center. Meantime, Jeff Dovyak, VE4MBQ, the Capitol Region District Emergency Coordinator advised that Winnipeg ARES had activated and had provided staffing to the Manitoba Emergency Management radio room. Plans were also in place to provide emergency communications to town and cities on the rivers edge down to the Canadian border with the United States.

Meantime on this side of the border, Mark Johnson, KC0SHM, President of the Red River Radio Amateurs reports that although operations are winding down in the Fargo North Dakota and Moorehead Minnesota areas, the flood threat along the Red River remains for later in April. (RAC, ARRL, others)

**

RESCUE RADIO: TEXAS TOWN WANTS HAM RADIO

Groves, Texas, says that ham radio operators are "invaluable" in keeping communication flowing after hurricanes. Because of this the Groves city manager D.E. Sosa says that he hopes to see better antennas on Groves water towers by the 2009 hurricane season.

According to the Port Arthur News, the Groves City Council members voted Monday, March 30th to research entering into a contract that would be of no cost the city. Chris Boone, WB5ITT, explained that the antennas could go on top of towers or clamp on to the climb ladder. Manager Sosa said he hopes that the process could be completed in about two months. (Port

Arthur News)

PUBLIC SERVICE: HAM RADIO HELPS IN TEXAS ROBBERY ARRESTS

Two men have been arrested in Texas and charged with robbery. This, as a result of the combined efforts of an observant victim, a ham radio operator and state and county law enforcement officers.

According to news reports the pair were charged with robbery after punching a woman in the mouth while in the process of burglarizing a campsite. The two made off with about $800 in fishing gear.

Figuring that the robbers might return to the lake in search of more victims authorities circvulted information on the suspects. An unnamed ham radio operator reportedly saw a suspicious vehicle and gave police its license number. A Game Warden found the vehicle parked in front of a residence near the lake and held its occupants until police arrived to take the suspects into custody. The two matched the description the victim had given. (Paris Texas News)

HAM RADIO IN SPACE: KE7KDP, KE5AIT AND RA3DT RETURN FROM THE ISS

Two members of the Expedition 18th International Space Station crew and a space tourist on his second trip to the I-S-S returned to Earth at 2:16 a.m. C-D-T on Wednesday, April 8th.

Landing safely in southern Kazakhstan were NASA astronaut Mike Fincke, KE5AIT, Russian cosmonaut Yury Lonchakov, RA3DT and spaceflight participant Charles Simonyi, KE7KDP. The three made the return trip on board a Russian built Soyuz spacecraft.

The Expedition 18 crew members undocked from the I-S-S at 10:55 p.m. April 7. The deorbit burn to slow the Soyuz and begin its descent toward Earth began at 1:24 a.m. on April 8th. The landing was moved to a more southerly site because of poor landing conditions at the original site.

Charles Simonyi, KE7KDP, spent 11 days on the I-S-S under a commercial agreement with the Russian Federal Space Agency. During his mission he was on the air as much as possible using the ARISS station that's a permanent part of the I-S-S. Simonyi is also the only paying spaceflight participant to visit the station twice with this trip reportedly costing him close to

$35 million dollars.

Meantime, astronaut Mike Fincke, KE5AIT, now officially holds the record for the most ARISS contacts on a single expedition as well as the most for multiple missions. During his stay on board the International Space Station, Fincke logged a total of 426 space to earth school contacts by an expedition and 22 ARISS supported terrestrial contacts. Because of this, Expedition 18 has now set the record for the greatest number of ARISS contacts by any single ISS expedition. (NASA, otrhers)

**

ON THE NET: APRIL FOOLS JOKE CONVINCES SOME HAMS THAT AMATEUR RADIO WAS BANNED

An April Fools joke posted at the radiobanter dot com website has some of the more gullible hams around the nation believing that a California county has banned ham radio over health issues. Bruce Tennant, K6PZWW, has the details:

--

The article titled "Silenced Hams Mean Safer County" claims that San Luis Obispo county supervisors took -- and we quote -- "drastic and unprecedented by passing an ordinance that would prohibit amateur radio operators from operating their transmitting stations."

The article claims that the reason the measure was put in place to eliminate what officials said were health risks associated with transmitters located close to children. It also claims that the action is aimed at addressing a recent Stanford University study that showed a correlation between ham radios and attention deficit disorder and hyperactivity in children, as well as nagging reports of interference caused by radio hams operating their high-powered transmitters in residential neighborhoods.

It was easy to prove the joke status of the story thanks to a few searches using Google. First, there is no reporters by-line to the article. No information on who wrote it. Then the so-called Stanford University study cited is non existent. Third is the posters claim that the story originally appeared in the April 1st edition of the Los Angeles Press-Telegram newspaper, but that also is totally erroneous. Lastly, when you read the entire story it becomes apparent that it contains items that the average newspaper reporter likely has never heard of including mention of PRB One.

The problem is that once posted on the Internet these stories seem to take on a life of their own. Because of this, we expect to see this one raising the hair on the backs of some hams for a long time. This, even though all it was trying to say was "April Fools" albeit not everyone is finding it to be all that funny.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.

--

And this just in. In response to numerous queries, including some from more than a few very irate hams, Cherie Aispuro, the San Luis Obispo County Legislative Assistant for District 2 has sent out the following statement.

Quote: "I want to tell you that the Board of Supervisors of San Luis Obispo have not and do not have anything scheduled to adopt an ordinance that would ban or prohibit amateur radio operators." -- end quote.

The item has now been removed from the radiobanter site but it's still making the rounds on several other sites and blogs including QRZ.com. See http://forums.qrz.com/showthread.php?t9547 (Tnx WA6ILQ)

**

ENFORCEMENT NEEDED: ANOTHER PILFERED CALL

Another case of a stolen callsign. Over the last few weeks Charles Wilmott, M0OXO, of Yorsshire in the U-K has received reports that his short contest call of M0X has been used by an unknown operator including in contests.

Recently, the M0X call was been used along with a regional designator for the Island of Guernsey. And as a result Wilmott has received several requests for QSL cards that he's not about to respond to. This is because he has never operated from Guernsey; at least not yet. (Southgate)

**

PUBLIC SERVICE: BUTTER, EGGS AND HAM (RADIO)

Radio amateurs in Northern California will be taking part I the upcoming City of Petalum's Butter And Egg Day Parade on April 25th. According to a note from KA6OPN, special event station K6P will be on the air to commemorate this years event. HAM HAPPENINGS: EMCOMM EAST 2009 SCHEDULED

You have heard a lot lately about the Emcommwest ham radio convention in Reno Nevada. Now comes word that EmComm East will be held on October 3, 2009, in Rochester, New York. Presentations on the agenda so far include such topics as managing large events, remote operations, N-V-I-S Emergency communications and much more. For more information, visit the shows website at www.emcommeast.org or drop an e-mail to info (at) emcommeast (dot) org (WY7Q)

**

HAM RAPPENINGS: GERMANY'S HAM RADIO SHOW GETS DISCOUT FLIGHTS

If you live in London England or are going through London on your way to the 2009 Ham Radio convention in Friedrichshafen, Germany, have we found a deal for you. The Southgate News repots that European budget air carrier Ryanair will be providing flights between London and Friedrichshafen just 10 United Kingdom Pounds each way. 10 Pounds is about $15 in U-S dollars.

The trip to Friedrichshafen departs London Stanstead Airport on June 25th at 12:15 in the afternoon with a 14:50 aerival in Germany. The return flight leaves Friedrichshafen on Junre 27th at 16:05 and arrives back in London at 16:45. All times are local. That price is hand luggage only and assumes you don't want travel insurance.

So why this deep discount? While the airline has not given a reason but we suspect that its economy related. We can tell you that Ham Radio in Friedrichshafen is one of the worlds largest amateur radio exhibitions and the largest on the European continent. This year it takes place June 26th to the 28th with 17,000 or more visitors expected. With Ryanair flies Boeing 737-800 series aircraft and that means the airline will be transporting about 140 hams to or from this show.

More about the flight discounts is is on-line at www.ryanair.com and the Ham Radio convention web page is
www.hamradio-friedrichshafen.de/html/e (Southgate)

HAM RADIO PROMOTION: ARRL RELEASES FD VIDEOS

New videos promoting Field Day and amateur radio technology are now available from the ARRL. Both are short Public Service Announcements better known as P-S-A's.

According to the League's Public Relations Manager Allen Pitts, W1AGP, the Field Day PSA is meant to be posted on Web sites, added to e-mails and shared via the Internet. . The other which spotlightings amateur radio technology is meant for broadcast and cable TV.

The two spots were an all volunteer effort on the part of ARRL's national Public Relations Committee. This included Newsline's Don Carlson, KQ6FM, who is the voice heard on the Field Day PSA. Its available for download from the ARRL's Field Day Web page. The technology PSA is targeted for commercial TV uses. As such it is a high resolution, 43 megabyte MOV type file thast can also be downloaded from the ARRL. Because this version is meant for professional use, it has a formal 60 second lead-in followed by the 30 second PSA. A very low resolution preview version not meant for distribution.
is also available. (ARRL)

**
THE SOCIAL SCENE: MOVIMIENTO RADIAL DE PUERTO RICO ON APRIL 18

Turning to the ham radio social calendar, the Puerto Rico Radio Movement or Movimiento Radial de Puerto Rico will be sponsoring a special ham radio activity day on April 18th. This, for those who want to learn about

Amateur Radio.

During the day there will be demonstrations of various digital modes used by ham radio operators. The afternoon hours will see a special event station WP4NPC take to the air to commemorate World Amateur Radio Day 2009. For more information please contact Fernando Reyes, WP4KS, by e-mail to wp4ks(at) prtc (dot) net

**

THE SOCIAL SCENE: BELTON TEXAS ON APRIL 18

The Belton Ham Expo is slated for Saturday, April 18th at the Bell County Expo Center in Belton, Texas. In addition to tailgate sales and vendors, attendees will also be able to upgrade by taking their ham radio tests at the event. Lots more on line about this one at www.beltonhamexpo.org. (Ham Expo)
**

THE SOCIAL SCENE: MT.BEACON ARC HAMFEST APRIL 26

And the Mount Beacon Amateur Radio Club is holding its annual Hamfest on Sunday April 26th. The venue is Tymor Park in the town of Unionvale. That's in central Dutchess County, New York. The gate opens at
8 a.m, Eastern Daylight time. More is on-line at www dot wr2abb dot org. (MBARC)

**

NAMES IN THE NEWS: KI6SN NAMED NEW PUBLIC SERVICE EDITOR OF CQ

CQ Magazine has announced that Richard Fisher, KI6SN, of Riverside, California, has been named the new Public Service Editor of CQ Amateur Radio magazine. Fisher has been a professional journalist for 35 years, working in various capacities for daily newspapers on both the east and west coasts. He is also a prolific writer on amateur radio matters, writing the "Washington Beat" column for Popular Communications and the "Trail-Friendly Radio" column for WorldRadio Online. He succeeds Bob Josuweit, WA3PZO, whose final column will appear in the May issue of CQ. Josuweit, who has covered amateur radio emergency and public service communications for CQ VHF, and then for CQ, since 1996, says that he is stepping down due to increased time demands at his full-time job. (CQ)

COMMUNICATIONS NEWS: MAY IS MILITARY APPRECIATION MONTH

May is Military Appreciation Month and Grace Broadcast Sales is offering a pair of free 60 second Public Service Announcements saluting local men and women serving in the armed forces. Each spot has an open front 10 seconds and open 20 seconds at the close for station or sponsor inserts.

The Grace Broadcasts press release notes that the month of May is filled with military related holidays. May 1st is Loyalty Day and May 8th is V-E Day. The latter commemorates the allied forces World War II Victory in Europe. The 8th is also Military Spouse Appreciation Day. But that's not all. May 16th is Armed Forces Day and May 25th is of coarse Memorial Day

Grace Broadcast Sales says that radio stations are welcome to download these features and air them as often as you like. You can find them marked Support Our Troops free salute one and two at
http://www.gracebroadcast.com/prodNMAM.htm

Also, we want to remind you that May 23rd is Amateur Radio Military Appreciation Day. That's when hams and their clubs are encouraged to get on the air and show thanks, support, and appreciation all current and past members of the military. More on this event is also on-line at
www.armad.net. (ARNewsline(tm), RW, ARMAD, others)

**

EMERGING TECHNOLOGY: OLED BLUE IMPROVED BY 25%

A promising technology called organic light-emitting diodes, or OLED'ds has just seen a major breakthrough. Rearchers at the Pacific Northwest National Laboratory have successfully synthesized and tested new materials that improve the power efficiency of blue OLEDs by at least 25 percent. They note that lighting consumes one-fifth of the electricity generated in the United States. They say that solid-state lighting offers tremendous potential to improve the situation once major research challenges are overcome.

OLED's are a multi-layered device that produce light by running an electrical current through a specially engineered host material into which light-producing phosphorescent molecules are embedded. The Department of Energy's solid state lighting program is funding the OLED research. (ScienceDaily)

**

EMERGING TECHNOKLOGY: MPEG SURROUND DESIGNATED INTERNATIONAL STANDARD

Proponents say MPEG Surround is now an international standard, ready for deployment. Agere Systems, Coding Technologies, Fraunhofer and Philips said the Moving Pictures Expert Group has finalized the standardization process at the 79th MPEG meeting in Marrakech, Morocco. The document is MPEG-D standard document IS 23003-1. (MPEG Group)

**

WORLDBEAT: 500 kHz COMING TO IRELAND

Turning to news from around the globe, wird that a limited number of radio hobbyists in Ireland may soon have access to a low frequency band for continuing experimentation. Irish regulator ComReg has agreed to allow the Irish Radio Transmitters Society to apply for a limited number of permits to operate in the region of 500 kHz under a blanket license to be issued to that national amateur radio society,

Stations to which permits are issued will have to send regular reports to IRTS consisting of their experience of propagation, type of propagation used, noise experienced and methodology used. This, so that the information collected be coordinated and periodic reports submitted to ComReg. (Southgate)

**

WORLDBEAT: CELEBRATING THE EUROPEAN GEO PARKS

And from the UK listen out on Saturday, May 23rd and Sunday, May 24th for Martin Foster, G3GOF, and six other radio amateurs. This as they put the special call GB6GEO on the air again this year during the European Geo Parks Communication Event.

The group will take to the ham radio airwaves from the Cavern in Torquay which right in the heart of the English Riviera Global Geopark. But they will not be the only ones involved in the event. If you live in France, Spain, Italy, Austria, Romania, Czech Republic, Norway, Brazil, or China and are interested in participating in this event and, can obtain the special "GEO" suffix., To do so please contact G3VOF as soon as possible via e-mail to martin (at) riviera (dot) fm. More information on the European Geo Parks Communication Event is on-line at http://www.qrz.com/callsign/GB6GEO (OPDX)

**
ON THE AIR: RNW ANNOUNCES MORE WORLDWIDE COOPERATION
Radio Netherlands Worldwide wants to expand and intensify its collaborations with foreign media partners over the next few years. The legendary shortwave broadcast station says that cooperation and the exchange of content, in the form of text, audio and video, fits into the station's multimedia policy. Visual content, particularly web video, will assume an increasingly prominent role in the coming months and years. (Media Network)

**

ON THE AIR: VO1MGY COMMEMORATES THE TITANIC

Ham radio will once again commemorate the loss of the fabled luxury liner the Titanic that sank in the North Sea on the morning of April 15, 1912. In remembrance of this disaster the Society of Newfoundland Radio Amateurs will be operating on April 15th 2009, using the historic Titanic call sign suffix of MGY. This, from the Society's ham station located in the former British Admiralty wireless telegraphy station. Listen out for VO1MGY using CW on all bands where propagation permits. QSL confirmation will be available via the bureau. More is on the web at www.sonra.ca. (SONRA)

**

DX

In D-X, an international team of operators known as the Tifariti Gang will be on the air from Western Sahara through the 17of April using the callsign S04R. Their activity will be on all bands from 160 to 10m using CW, SSB and digital modes. QSL via EA5RM.

G3RWL will be active as 8P6DR from Barbados until April 24th He will operate holiday style on 160 to 10 meters using CW and various digital modes. QSL via G3RWL, either direct or bureau.

And OH2YL will be active as portable OH0 from the Aland Islands through the 14th of April. She will operate CW and SSB on the H F bands. QSL requests go directly to OH2YL.

(Above from various DX sources)

**

THAT FINAL ITEM: FLORIDA GOES 11 METER CB

And finally this week, Florida has gained FCC approval to go 11 meter C-B. This as the FCC approves a request from the Florida Department of Transportation that asked the agency to permit it to operate an 11 meter Citizens Band remote base emergency alert system along the Florida Enterprise's Turnpike.

The Florida Department of Transportation had requested that it be permitted to operate wire controlled C-B remote bases at Orlando, Kissimmee, Yeehaw Junction, Ft. Pierce and Jupiter. This to provide emergency information to motorists along that highway.

In granting the request the FCC did put several restrictions on the operation of these remote base stations. Among these are that CB stations can transmit only during an emergency event such as hazardous weather conditions, impeded traffic flow, or incidents. They must cease transmissions when the event no longer presents a hazard.

Also, each transmission must identify the CB station operator as being with the Florida Department of Transportation. The operator must also provide a

telephone number or other contact information to which complaints of interference to CB communications can be directed.

Oh yes, less we forget. The FCC directed that the CB radio station operator should carefully consider channel selection to reduce the likelihood of harmful interference to on-going communications. And as they say on 11 meters, that's a "big 10-4." (FCC)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937,
Arcadia, California 91066.

A reminder that the nominating period for the 2009 Amateur Radio Newsline Young Ham of the Year Award is now open. Complete details are on our website at www.arnewsline.org Just scroll down to the words "2009 YHOTY Nominations Now Open" and click for more information and an official nominating form.

Also be sure to mark April 18th as this year World Amateur Radio Day. World Amateur Radio Day will focus on the hobby as it empowers people and supports communities by providing emergency communication as well as public service oriented interaction for community and other special events.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

The following article is from the San Jose Mercury News:

Santa Cruz County in a black hole amid phone, Internet outage

http://www.mercurynews.com/centralcoast/ci_12115324

Amateur radio gets a good, detailed, mention in this article, which
included communications support for local hospitals, possibly as part of
the Hospital Disaster Support Communications System:

http://www.hdscs.org/

The reporter was even knowledgeable enough to realize that cellular
telephone is radio, but that there are different types of radio (with
varying degrees of dependence on fixed infrastructure such as cell tower
sites, commercial power, and land-lines).

Here in Canada we would add the words "government issued" to photo ID.

Although that won't work for student ID or library cards.

It's illegal to manufacture such radios so you won't find any out of the box radios with such a dual capability.

As far as using one, it would have to be what the government classifies as a sufficient emergency which is much more stringent than what everyday people consider an emergency.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 904
BID: $OPDX.904
April 13, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, W2VU, NG3K, WP3GW, AJ4RW, K4WW, N4AA & QRZ DX, K5XK, K6LSN, K8YSE, N8OFS, W9DX, 9A2WJ, 9A5YY, DK8JB, DL2SBY, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, I1HYW, IK7JWX, IZ0IEN, Pete's-DX-Newsdesk, PS7AB, PT7WA, PY2SEX, RSGB IOTA Web Site, VA3RJ & ICPO, VE1QD, VE2EBK, and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-April, through Sunday, 12th-April there were 223 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VK9M, VK9X, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

** SPECIAL NOTICE. PLEASE stay clear of the following frequencies
-- 3.640 kHz LSB and 7.045 kHz LSB --
as they are assigned as emergency frequencies for Italian Earthquake Emergency - the Earthquake happened on April 6th, around 0140z.

3B7FQ ST. BRANDON ISLAND WRAP-UP REPORT (via K5XK). Rachid, 3B8FQ, reports on his recent February trip to St. Brandon Island, operating as 3B7FQ. All his contacts were CW only due to loud generator noise. Operations was concentrated on 10 MHz and 18 MHz, with limited operations on 40 & 20M. By the 10th day, the battery was not recharging properly which resulted in reduced power and sending by hand key. Although propagation and conditions were poor, 1,500 QSOs were made operating just a few hours each day, in between maintenance on the meteorological equipment on the island. Color QSLs have been printed and are being mailed this week. QSL all of Rachid's operations (3B7FQ, 3B6FQ, 3B8FQ, and his upcoming July trip to 3B9FQ) via K5XK. Some QSL databases are not correct, since Ron moved to a new QTH last summer. This address is correct and it is also OK on QRZ.com: Ron Evans, K5XK, 2 Pembroke Drive, Bella Vista, AR 72715-8823 USA.

3B8, MAURITIUS (AF-049). Operators Piotr/SP2JMR and Slavo/SP2JMB will be active as 3B8/homecall between now and April 17th. Activity will be on all bands using CW and SSB. QSL via their home callsign.

5C, MOROCCO (Update/IOTA Op). Alfredo, IK7JWX, and a team of operators will activate Mogador Island (AF-065), April 19-25th. He announced this week, "After the terrible earthquake in Abruzzo - center Italy on 6th April, we decided that all surplus funds received will be assigned to the many people in that region who are suffering the effects of the earthquake. We will use official channels to send the money, and we will publish on these pages a paper certifying the donation. So we invite you, if you like and you can, to send any possible amount of money, that will be assigned to the earthquake victims." For more details on this IOTA DXpedition, please visit their Web page at: http://www.mogador2009.altervista.org

C6, BAHAMAS. A group of stateside operators will be active from Eleuthera (NA-001) with each using their own individual callsigns between April 17-24th. Activity from the group will be on all bands using CW, SSB and RTTY. Operators mentioned are: Joe/AA4NN (C6DX), QRZ DX Editor Carl/N4AA (C6AAA), Janet/W8CAA (C6AYL) and Joe/W8GEX (C6DX). QSL C6AAA via N4AA. QSL C6AYL and C6DX via W8GEX.

CQ MAGAZINE NAMES PUBLIC SERVICE EDITOR. In a news release by Richard Moseson/W2VU, Editor of CQ Amateur Radio, dated April 6th, 2009, it was reported: "Richard Fisher, KI6SN, of Riverside, California, has been named Public Service Editor of 'CQ Amateur Radio' magazine, Editor Rich Moseson, W2VU, announced today. Fisher, a veteran journalist, succeeds Bob Josuweit, WA3PZO, whose final column will appear in the May issue of 'CQ'. Josuweit, who has covered amateur radio emergency and public service communications for 'CQ VHF', and then for 'CQ', since 1996, is stepping down due to increased time demands at his full-time job. Fisher has been a professional journalist for 35 years, working in various capacities for daily newspapers on both the east and west coasts. He is also a prolific writer on amateur radio matters, writing the 'Washington Beat' column for 'Popular Communications' and the 'Trail-Friendly Radio' column for 'WorldRadio Online'. He was previously QRP (low-power) editor of

'WorldRadio's' print edition. A ham since 1965, Fisher enjoys a wide variety of amateur radio activities, including QRP CW operating, outdoor operating, experimenting with antennas and building equipment. He is a co-founder of the Adventure Radio Society. ' I've loved 'CQ' since before my Novice days,' notes Fisher, 'so joining the team will be a thrill.' Editor Rich Moseson added, 'While I will miss the close working relationship I have shared with Bob Josuweit for over a decade, and wish him all the best in the future, I look forward to working closely with Richard and to the added benefits he will bring to the column as a veteran professional journalist.' Fisher's first column will appear in the July 2009 issue of CQ."

DAYTON HAMVENTION (RTTY Contesting Forum). The Dayton RTTY forum will be held Saturday, May 16th, between 1200-1300, in Room 3 and will have a panel discussion on how best to accommodate the diversity of participants in RTTY contests. The vast majority of participants are not super-serious competitors and may only be on for a few contacts to work a new state/province/country or to try out their station or simply to enjoy some RTTY contacts which are more scarce outside of contest periods. Each panelist will give a short statement of their perspective on participant diversity in RTTY contests and then be available to address questions and comments from the audience. Panelist will include K5DU, K4GMH, W2QO, and K4IA.

DAYTON HAMVENTION ARRL AWARDS CARD CHECKING. Bill Moore, NC1L, announced that card checking will be done at the ARRL National Convention in Dayton during all operating hours of the convention Friday, Saturday and Sunday, May 15-17th, 2009. There are some important guidelines that will help make the card checking process run smoothly at the following Web page: http://www.arrl.org/blog/Century%20Club%20Awards

EG, SPAIN (Special Event). Look for EG2IPY (WAP-174) to be active between April 13-19th. Activity is to celebrate the end of the International Polar Year 2007-2009. Operations will be on all bands and modes. QSL via EA2RC.

HB0, LIECHTENSTEIN (Update/Correction). Operators Kasimir/DL2SBY and his friend Georg/DF1SR will be active from here between April 24th and May 4th. Activity will be on HF bands (80-10m) using CW, SSB and RTTY. Equipment will be a TS2000, FT900AT, Ameritron AL811, HF9V vertical and a monoband vertical for 30/40m. Activity will also take place on 13cm and 23cm using EME. Equipment will be a FT726R, Dish 3, 7m, and 2 amplifier for both bands. Kasmir and Georg will use two separate callsigns for this operation. For the HF bands, they will use HB0/DL2SBY and for the EME activity they will sign HB0/DF1SR. QSL via DL2SBY, by the Bureau or direct.

IOTA NEWS.....
EU-010. After a very successful DXpedition in 2008 to the Island of Mull, the members of the Camb-Hams have decided to go to the Island of Harris which is off the north west coast of Scotland. Activity will be on all HF bands (including 5 MHz) using SSB and Digital modes. There will also be activity on 6m, 4m, 2m and possibly 70cm (SSB, JT6m and MS). There will be lots of portable operations

around the islands (possible interest to WAB chasers) and 3 very energetic climbers activating SOTA summits all week. The callsign will be the CRG (Cambridgeshire Repeater Group) callsign G3PYE, as the activation is in Scotland the prefix becomes GM3PYE/P or GS3PYE/P, both of which will be used. They plan to be active during the week starting April 20th, possibly starting Saturday April 18th through April 25th. For skeds on the VHF bands (voice or data), please E-mail: skeds@camb-hams.com

EU-042. Operators Siggi/DL3HBZ, Uli/DJ9IE, Helge/DF6LPC, Lothar/DL8HAL and Harry/DL5HAQ will be active as DK0RZ from Hooge Island (N-22 for the German Islands Award), April 15-17th. Activity will be on all bands and modes, propagation permitting. QSL via the DARC Bureau.

EU-090. The Team of German and Croatian operators will be active as 9A0CI from Palagruza Island (IOCA CI-084, WLOTA-0057, CLH-100, ARLHS-012) between May 9-16th. Activity will be on bands 160-6 meters (including 30/17/12m) using CW, SSB and the Digi modes. A online log will be available on the Web site at:
http://ov-c07.de/aktivitaeten/insel-leuchtturm-aktivierungen/2009-palagruza/9a0ci-2009-palagruza-onlinelog.html

NA-058. Randy, AJ4RW, will be active from Cumberland Island, off the coast of Georgia, May 2nd. He will be on the air from approx. 1500-1930z on the frequencies of 14260 and 7225 kHz, alternating between the two bands as there is only one station scheduled as of right now, but this might change as soon as they move closer to the date of operation. Frequencies may also vary depending upon band conditions. This will be SSB operation only. QSL via his home callsign.

NA-083. Members of the QCWA Chapter 119 will do a combination special event station and RSGB IOTA Contest (July 25-26th) effort from Tangier Island, VA, in Chesapeake Bay. The callsign will be W4T commemorating the 400th anniversary of the mapping of Chesapeake Bay and Chapter 119's 30th anniversary. The history of Tangier Island will be promoted as part of this operation. The group's contest effort will be a Multi-Op entry. Operators mentioned are: Quint/K4CQW, Stu/K4MIL, Butch/KE4AZL, Terry/KI4RXC, Talley/W4TVG, Vic/W4VIC, Barry/K5VIP and Ron/W8RJL. The group will operate three stations - CW, SSB, and RTTY on all bands 80-6 meters as conditions permit. QSL via LoTW or K5VIP. Logs will be uploaded to LoTW and eQSL at the conclusion of the expedition.

NA-128. Members of the NA-128 Contest Group will activate the special callsign CG200I (Charly Golf Two Hundred India) from Ile Verte (C.IS.A QC-015, Grid FN58, ARLHS CAN-224, WLOTA 1404) between July 23-26th, during the IOTA Contest to commemorate the 200th anniversary of the lighthouse. Operators will be: Frank/VA2RC,

Martin/VA2ZO, Eric/VE2EDA, Dany/VE2EBK, Jean/VE2FSK, Steve/
VE2TKH, Martin/VE2MTK and Guy/VE2QRA. The group will operate
many stations from the lighthouse keeper's quarters on all
bands (160-6 meters) and all major modes (AO-51, SSB, CW
and RTTY/PSK31). During the IOTA Contest a station will be
dedicated to the contest exclusively on SBB or CW. QSL via
VE2CQ (bureau or direct). ADDED NOTE: Built in 1809, the Ile
Verte lighthouse is celebrating its 200th anniversary and many
special activities will take place all summer long. This
lighthouse is the oldest in the St-Laurence River and the
third oldest in Canada. It was declared a historical monument
in 1976 by The Historic Sites and Monuments Board of Canada.
A special stamp showing the lighthouse was released by Canada
Post in 1984. The lighthouse is 54 feet high and is the main
attraction on the island. It is open to the public, and there
is also an inn where you can stay overnight. Any money received
through their QSL manager will be given to the Corporation des
maisons du phare de l'Ile Verte in order to help them with the
restoration of the lighthouse. If you would like to make a
donation, you can do so by visiting the Corporation's Web
site at: http://www.ileverte.net/maisonsduphare/index.html
Virtual visit: http://www.ileverte.net/maisonsduphare/diapo.html
ISLAND NOTE: NA-128 is made up of more than 45 islands, rocks
and smaller reefs and more than half of them are accessible for
future NA-128 expeditions.

NA-191. Just a reminder that operators Klaus/DK6AO, Gunter/TI7WGI,
Andy/DH8WR (EA2CRX), Norbert/DL2RNS, Rene/DL2JRM and Daniel/
DL5YWM will be active as TI7*** (TBA) from San Jose Island
(Guanacaste Province), Costa Rica, between April 17-20th.
Activity will be on 80-10 meters using CW, SSB, RTTY and
PSK31. QSL via DK6AO, direct or by the bureau. For updates
and more info, please visit their Web page at: http://ti7.info

SA-079. Members of the Rio DX Group and Labre will activate Rasa Island
(DIB RJ-07, DFB-RJ-10, ARLHS - BRA-047) off the coast of Rio
de Janeiero, as PT1R, May 1-5th. Activity will be on 160-2
meters using CW, SSB and the Digital modes with two stations.
There will be also a station active on 6m and 2m for operations
in the Araucaria VHF Contest. Operators mentioned are: PY1ZV,
PY1NB, PY1YB, PY1IBM, PY1KN, PY2WC, PY2NDX, PY4OG and PY4OY.
QSL via PY1NB. More details are forthcoming on:
http://riodxgroup.dxwatch.com/rasa

LN2, NORWAY (Special Event). Members of the Radio Club of Gardermoen
(LA2G) will be active using the special callsign LN2G between April
17-19th. This special callsign has been authorized in conjunction with
the "Norwegian Hammeeting" (See http://www.hammeeting.no). Activity
will be mostly on 40 and 20 meters, SSB, PSK31 and RTTY. QSL via the
club station LA2G.

MDF IN NOVA SCOTIA. The Halifax Amateur Radio Club (HARC) invites DXers, contesters and HF enthusiasts to the 6th Annual Maritime DX Forum (MDF). On Friday, August 7th. A reception and registration will begin at 7:00 pm. The MDF program on Saturday, August 8th, will run from 8:30 am - 4:45 pm, followed by reception and the DX banquet at 6:00 pm.
The speakers - active and outstanding members of our ham radio community - include:
* MARTTI LAINE, OH2BH: Turning New Stones: Building Passion for Amateur Radio
* JOE TAYLOR, K1JT: Advances in Weak Signal Communications
* GEORGE NICHOLSON, N4GRN: 2009 Desecheo Island DXpedition
* DOUG ZWIEBEL, KR2Q: QRP Contesting from Home Stations
The MDF will be held in the Rosaria Centre of Mount St. Vincent University in Halifax, Nova Scotia. Inexpensive accommodations are available at the University. This is a great opportunity to combine a top-notch ham radio event with a tourist visit to Canada's Maritime Provinces. The cost of the Maritime DX Forum is $45 and the banquet is $35 Registration materials can be downloaded from the HARC Web site (http://www.halifax-arc.org/), or requested directly from the MDF Chair, Scott Wood, VE1QD. Scott would like to know of your intention to attend, and will gladly answer any questions. He can be contacted at: ve1qd@rac.ca or at (902) 823-2761.

OA4/OA7, PERU (Satellite Op). Neven, 9A5YY, intends to operate on the satellites AO-51, AO-27 and SO-50 with his handheld Yaesu VX-7R and vertical antenna AL-800 during his stay in Peru between now and April 19th. Look for him to use the callsigns 9A5YY/OA4 from Lima and as 9A5YY/OA7 from Cuzco. Neven states, "I will be limited with time because of other obligations. I hope I will succeed to do some satellite QSOs. Please, listen and respond to me when you hear my CQ on the birds!"

OH0, ALAND ISLAND. Operators Mikko/OH3FM and Pertti/OH3LQK will be active as OH0/homecall through April 15th. Activity will be on 80-10 meters using CW and Digital modes. QSL via their home callsigns.

P2, PAPUA NEW GUINEA (Update/IOTA Op). Operators Hans/SM6CVX (CW), Derek/ G3KHZ (CW), Luis/CT1AGF (SSB/RTTY), Gordon/G3USR (SSB) and David/M0VTG will activate three Papua New Guinea IOTA islands between October 22nd and November 9th. The announced schedule and callsigns are as follows:
OC-102 - Tanga Island; callsign P29VCX (via SM6CVX); October 22-26th
OC-231 - Green Island; callsign P29VLR (via SM6CVX); October 27-31st
OC-205 - Woodlark Island; callsign P29NI (via G3KHZ); November 2-9th
Activity will be on 160-15 meters using CW, SSB and RTTY modes. The team will be using new single band vertical dipoles for 30-15 meters and a ground plane for 40 meters. Hans, SM6CVX, will activate D'Entrecasteaux (OC-116) as P29VCX (via SM6CVX) between November 11-13th. A Web page is available at: http://www.425dxn.org/dxped/p29_2009/index.html

QSL INFO AND NEWS.....
The C91TX DXpedition's log is now available online as well as some new pictures at: http://www.tdxs.net/c91.html

QSLs for EG2ANT (WAP-171) have been printed; direct requests have been posted already. Bureau cards will be put in the box this week. More info available at the WAP Web site: http://www.waponline.it

QSLS VIA LOTW: 4U1UN, 4W6R, CT1ILT, EF8R, F8DBF, FS5KA, HC8A, HH4/K4QD, J7OJ, J75KG, NP2KW, PY2WC, RW0LT, TI5N, TM6M, UN1L, V5/DJ4SO, VP2E, WP2Z, YN2DD and ZZ6Z

QSLS RECEIVED VIA MAIL: 4K9W, 5H3EE, 6W/DL2RMC, ER4DX, ET3JA, FS5KA, FW5RE, HC2/SM7BUA, HC2/SM6FKF, J7N, JD1BMM, LY2ZZ, NH0AA/NH2, PX200JMU, T27OU, T30XX, T33ZZ, T88CD, V6C, V6P, V7XX, VK9AA, VP2V/SP7VC, VR2XMT, XW1B, YB2UTX and ZL3IX

QSLS RECEIVED VIA THE BUREAU: 1A4A, 4O/DD5FZ, 4Z1UF, 9M4DXX, AM5R, CT1BOL, CT1DIZ, EA6AAC, EU2MM, F/OR7S/P, HB9H, JA3JOT, OE2008MCU, OE8PPK, OL4HQ, RZ4CWW, SV9CVY, TM0BRZ, TM6ACO, TM6I, UR7GO/P, UW1GZ, YU105NT and YW5AS

S0, WESTERN SAHARA (Update). By the time you read this, an international team of operators (known as the Tifariti Gang) composed of Agustin/EA1KY, Roberto/EA2RY, Antonio/EA5RM, Manuel/EA7AJR, Alain/F6ENO, Bernard/F9IE, Fabrizio/IN3ZNR and Valery/UT7CR will be on the air from Western Sahara until April 17th using the callsign S04R. Activity will be on all bands from 160-10 meters using CW, SSB and the Digital modes. QSL via EA5RM. Ruben, EA5BZ, will be the pilot station. For more information, please visit the S04R Web site at: http://www.dxfriends.com

S2, BANGLADESH. By the time you read this Ramon, DU1UGZ, is expected to be active as S21UGZ from Dhaka City until June 20th, depending on his work schedule. He will be using a low band dipole at first, so his emphasis will be on 80/40 meters SSB and RTTY. From May through June, he will be using a beam for 10, 12, 15, 17 and 20 meters. He hopes to have a linear in use starting in May as well. QSL via DU1UGZ.

SPECIAL EVENT. Members of the Sonoma County ACS (Aux. Comm. Service) and the Sonoma Mountain Repeater Society (SMRS) will activate special event station K6P from Petaluma, CA, on April 25th, between 1600-2300z. This activity takes place during the "Butter & Egg Day Parade", honoring Petaluma as egg capital of the world. Suggested frequencies are: 14260, 7260, 7050 kHz and 146.91 MHz. QSL via KE6LPO, Matt Ilonummi, PO Box 2922, Petaluma, CA 94953-2922. Visit the K6P Blog page at: http://k6p.blogspot.com

SUMMER HOLIDAY TOUR (OY and TF Ops). Maurizio, IW4BLZ, will be on a summer holiday and plans to be active as OY/IW4BLZ from Faroe Islands between July 27-29th, and as TF/IW4BLZ from Iceland between July 31st and August 11t. Activity will be on 80-6 meters using his ICOM IC706 MK2-G (w/100 watts) into a vertical antenna. QSL via IW4BLZ, by the Bureau or direct (w/2 USDs) to: Maurizio Bergonzi, via Pedora 30, 40052 Baricella, Bologna, ITALY. Visit his Web page at: http://digilander.libero.it/IW4BLZ/index.html

TS1, TUNISIA (Special Event). The Tunisian Scouts will be using the special callsign TS1LYMC between April 12-30th. Activity will take place during a Festival "I Love You My Country" and to celebrate the 75th anniversary of the Tunisian Scouts. Activity will be on all bands 160-10 meters using CW, SSB, RTTY, PSK and SSTV. For more details and

the QSL address, please go to: http://www.qrz.com/db/ts1lymc

USI ACTIVITY. Members of the Michiana Amateur Radio Club (W9AB) will activate Monkey Island (Not an IOTA, USI IN-005R), located in the St. Joseph River in Mishawaka (St. Joseph County, WW Loc. EN61WQ, Indianna), on April 18th, between 1400-1700z. Suggested frequencies are: 7030, 7225, 14060, 14225 kHz (+/- QRM). QSL via W9AB (w/SASE) to: Michiana Amateur Radio Club, 3220 E Jefferson Blvd., South Bend, IN 46615-3028 U.S.A.

VK9LA WRAP-UP AND COMMEMORATIVE T-SHIRT AUCTION. The VK9LA DXpedition made 30,160 QSOs. Breakdown of the QSOs are as follows: 18842/CW, 9261/SSB and 2057/RTTY. By bands: 160m/627, 80m/3347, 40m/9111, 30m/4458, 20m/6714, 17m/3579, 15m/2158, 12m/2158, 10m/161 and 6m/5.
Now is your chance to bid on a piece VK9LA memorabilia. To help raise some funds to repair equipment that failed on the island, a special commemorative Icom VK9LA T-shirt with all operators listed on it, will be auctioned off to the highest bidder. The bids will end April 30th. Current bid (as of press time) was 157 USDs. To see the shirt and place a bid, go to: http://www.odxg.org/vk9la.htm

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, have had a tough job during this DXpedition -- fighting storms with heavy rains and winds. By the time you read this the operation should be over. On their last day of operation (April 12th), they reported that some of their antennas were destroyed, and the latest storm almost knocked down their tent. They also had to cannibalize parts of their beverage antenna to shore up the tent again. As of print time, their online log showed 17663 QSOs in the database (as of 2039z, April 10th). PLEASE NOTE that their "Log Search" has not been updated with the QSOs that took place between April 9th, 2020z and April 10th, 0920z. There seems to be some issue with the WriteLog file for that period which they hope to fix later. Please QSL via HA7RY, direct, LoTW or by the Bureau (remember, they have an "Online QSL Request Service"). For updates and more info, please visit the VK9GMW Web page at: http://www.vk9gmw.com

VP2M, MONTSERRAT. John, KB4CRT, will be active as VP2MRT between June 12-19th. His activity will include CW, SSB, possibly PSK, and the June VHF Contest. Asian stations are suggested to look for him on 20 meters between 1200-1300z. QSL via KB4CRT.

VP9, BERMUDA (NA-005). Paul, G4BKI, will once again be active as VP9KF from Hamilton Parish, until April 22nd. Activity will be CW only on all bands. QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Visit his Web page at: http://vp9kf.com/
Please, DO NOT send to the VP9 bureau.

WP4, PUERTO RICO (Special Event). A group of operators will activate special event station WP4NPC to commemorate World Amateur Radio Day 2009. Operations will be on the Digital modes, SSB and possibly CW starting about 1600z, mainly between 15 and 20 meters. QSL via WP4NPC.

XR0, JUAN FERNANDEZ ISLAND. A multi-national team will be active as XR0ZN between November 24th and December 3rd. Activity will take place before and during CQWW DX CW Contest (November 28-29th). Operations will be on CW, SSB and RTTY. Operators mentioned are: Marko/CE6TBN, Terje/LA8BCA, Yuri/RA0FU, Ole/LA6EIA, Rag/LA6FJA, Hakon/LA-M, Arne/LA7WCA, Johnny/LA5FJA and RA0FU's brother. QSL direct to Manager. Logs will be uploaded to LoTW in 6-9 months. For more details and updates, visit their Web page at: http://www.la6fja.eu/dx/XR0ZN

ZD8, ASCENSION ISLAND (Update). Karol, G0UNU, will be active as ZD8KR between May 4-11th. Activity will be mainly on 20 meters CW and SSB. Activity will only be during his spare time, but hopefully daily using IC-7000 and an inverted V dipole. Further details will be available through the QRZ.com Web page under ZD8KR once it is set up at the end of this month. QSL via the RSGB Bureau or direct by using the address under G0UNU on QRZ.com.

Amateur Radio Newsline(tm) Report 1653 - April 17 2009

Amateur Radio Newsline report number 1653 with a release date of Friday, April 17th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio replaces telephones after vandals cut cables in northern California, ham radios post earthquake response winds down in Italy, the murderer of two hams at sea is sentenced to death and more on a not so funny ham radio April Fools joke that has now reached all the way to the FCC. Find out the details on Amateur Radio Newsline(tm) report
number 1653 coming your way right now.

**

RESCUE RADIO: NORCAL HAMS RESPOND TO CUT CABLE PHONE OUTAGE

Investigators say that they are looking for leads to find the criminal vandals that cut a number of northern California fiber optic cables that took out telephone and Internet service across southern Santa Clara, Santa Cruz and San Benito counties. This, as ham radio operators stepped in to provide communications alternatives for medical and emergency services effected by the outage. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the newsroom with more:

--

According to news reports, phones and Internet service went dead when one or more vandals severed 10 underground cables. Most were in San Jose, where the first four belong to AT&T were cut shortly before 1:30 a.m. on Thursday morning, April 9th. Four more underground were cut about two hours later at two locations in San Carlos, authorities said. Two others were cut in south San Jose. In ecah case the vandals had to access manhole covers weighing in excess of 250 pounds each.

Santa Clara County declared a state of local emergency as a result of the widespread outage. Among those services affected in all three counties by the sabotage were public safety crews that rely on 911 calls, hospitals trying to access medical records and people who wanted to make a landline or cell phone call. Jumping in to fill the communications gap were a number of the regions first responder amateur radio groups.

According to volunteer communicator Craig Smith, W6WL, ham radio operators organized themselves to assist with communications between

hospitals. About 25 operators were handling the radio traffic while another 50 to 60 had signed up to fill in when other volunteers got tired.

Meantime other teams of ham radio operators set up at Dominican, Sutter and Watsonville Community hospitals and a local American Red Cross office. They handled tactical traffic and messages between medical care providers, such as relaying information from one doctor to another.

News reports say that some of the hams who responded were the same operators who helped with communications during last summer's devastating wildfires and during the 1989 Loma Prieta earthquake.

Repairs were completed, and full service was restored early Friday, April 10th. That was about 24 hours after the first problems were reported.

For the amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

So far no suspects have been named. Police revealed only that they are tracking down a bunch of leads and reviewing traffic-camera footage taken near one of four sites where the cables were cut in hopes of catching the culprits who committed the cable cutting crime. A total of a quarter million dollars is being offered for tips that lead their arrest and conviction. (WA6UHA, WA6LIE, SFNewsOnLine, others)

**

RESCUE RADIO: HAM RADIO HF QUAKE OPERATIONS IN ITALY WIND DOWN

Amateur radio High Frequency operations related to last weeks deadly earthquake that devastated L'Aquila Italy have wound down. This, according to Alberto Barbera, IK1YLO, who is the IARU National Emergency Communications Coordinator for that European nation

He reports via IARU Region 1 Emergency Communications Coordinator, Greg Mossop, G0DUB, that he received a phone call on April 10th from the nations civil response agency stating that the use of ham radio on the High Frequency bands for emergency communications was being terminated. Also that all relief efforts were being transferred directly to L'Aquila.

Mossop says that monitoring the frequencies in use right after the quake shows no other emergency groups using them, so it is appropriate to return it to normal use. However since the post quake recovery is still ongoing, Mossop says to please listen before transmitting. If you hear any station passing emergency traffic please leave the frequency clear and avoid causing QRM. (Southgate, others)

**

RADIO LAW: FCC PROPOSES UP TO 20 MHz AT 70CM FOR MEDICAL BREAKTHROUGH

The FCC has suggested the allocation of 20 MHz of prime UHF spectrum in 413 to 456 MHz band for a truly worthy cause. But one that could adversely impact current spectrum users including the Amateur Radio and Amateur

Satellite services.

FCC Notice of Proposed Rulemaking ET Docket 09-36 seeks comment on a recommendation to allocate up to 20 MHz of currently occupied UHF band space for use by wireless medical devices. These are tiny appliances could be implanted into the human body and used to restore sensation and mobility to paralyzed limbs and organs.

The devices would act as a wireless medical micro-power network within the patient. Among the conditions that could be treatable using them include polio, Lou Gehrig's disease, cerebral palsy, and spinal cord injuries.

The 400 MHz band is targeted because it is optimal for RF propagation through body tissue. The devices would require at least 5 MHz of bandwidth to function and would operate on a low power, secondary non-interference basis.

Twenty MHz of spectrum in four band segments are proposed so that the device would have multiple options in case one band segment was already in use in a given area. These are 413 to 419 MHz, 426 to 432 MHz, 438 to 444 MHz and 451to 457 MHz. Its assumed this allocation would be on a secondary, non-interfering use with current users of this band space. In fact, comments are also being sought on the potential for interference between these new devices and current spectrum users. Amateur radio and amateur satellites have heavily used allocations in the 420 to 450 MHz band.

In announcing the release of ET Docket 09-36 acting Commission Chairman Michael Copps stated that he was pleased to support this Notice of Proposed Rulemaking which he says examines the possible allocation of additional spectrum and service rules for use by advanced wireless devices. He indicates that this new technology could significantly enhance the quality of life of many Americans that suffer from a wide array of neuromuscular disorders.

The text of the FCC news release can be found at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-289482A1.doc or http://tinyurl.com/ct8ntw) (FCC)

THE BPL WAR: FIBEROPTICS IN AND BPL OUT DOWN UNDER

Hams down-under appear to be safe from the rollout of a nationwide Broadband over Powerline or BPL system. This as Australia's government announces that it will be building a system based on fiber optic technology. Graham Kemp, VK4BB, is in Brisbane with the details:

--

The Australian Federal Government has announced its decision on Australias National Broadband Network. In a surprise move, instead of deploying a widely expected half-way-house fiber-to-the-node (FttN) solution from a consortium of companies, the Government is moving ahead with its own

full-blown 100Mb/s fibre to the home rollout, (FttH). The reported $43 billion project will include a mix of government and private sector funding which may or may not include telecommunications companies.

Telecommunications analyst Paul Budde states: "This is the most ambitious infrastructure ever undertaken in Australia and will be the most ambitious FttH network anywhere undertaken in the world. The Australian Government is one of the few governments who, in a holistic way, understand the importance of broadband across the various sectors. This network is not just for high-speed Internet and entertainment but, more importantly, for healthcare, education,
smart grids, etc".

This is good news for Australian's in general, and also for Australian radio amateurs. Australia's largest telecommunications carrier, Telstra, was excluded from the original selection process on the grounds of submitting a non-compliant bid, however, as Telstra owns most of the copper cable in the ground, any fiber-to-the-node solution which did not include Telstra would have resulted in a variety of 'alternative' access technologies used to connect the ï¿½node' to customers premises. Although there may be many steps along the way, the predominant access technology in Australian cities will now be fiber, and in less populated areas will likely be wireless.

This decision would appear to remove the possibility of widespread interference to radio communications from any network-wide adoption of BPL technology, but still leaves as a concern the possibility of interference from in-home use of BPL as an internal distribution technology.

--

The decision by Australia to opt away from BPL is likely a major blow to the world-wide implementation of this technology. This is because other nations will look at Australia's decision to go fiber and based upon it reconsider any commitment to BPL. (WIA News)

**

RESTRUCTURING: NEW ZEALAND MAY INTRODUCE FOUNDATION CLASS

New Zealand appears headed toward the introduction of an entry level Foundation Class ham radio operating permit. This according to the February minutes of the New Zealand national amateur radio society NZART
. .

The minutes report that ZL2UFI has presented a draft document on the creation of a Foundation Amateur Operators Certificate. Also that the Council agreed that while future members on Council may not share the view of an additional license that the present Council members had been tasked at the Annual General Meeting in Dunedin 2008 to proceed with the option of a Foundation Certificate.

But there is one caveat. Any New Zealand Foundation Class will not be considered as a full license. Rather it will be a Foundation Certificate so that the nations telecommunications regulator the MED is not forced to introduce a new grade of examination. MED will only have to make a change in New Zealand's Radio Regulations. (NZART)

**

BREAK 1

This week from the Auckland New Zealand and the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the K4LJP repeater system serving West Palm Beach, Florida.

(5 sec pause here)

**

RESTRUCTURING: INDONESIA HAMS GET CENTRALIZED LICENSING

Some welcome changes to the rules governing ham radio in Indonesia. This as that nations telecommunications regulator says that its taking over all aspects of issuing licenses. John Lego, VK3BUI, reports:

--

The Indonesian Government is seeking to take a central control of licenses for radio amateurs ending the current practice of permits being issued by provincial authorities. The Jakarta Global National reports that the proposed action is to plug a loop hole in permit issuing that has apparently resulted in commercial broadcasting.

Communications and Information Technology Ministry spokesman Gatot Dewa Broto says that new amendments are aimed at strengthening the guidelines for amateur radio activities.

He says ham radio is vital for establishing contact with areas where there are no telephone lines or cellphone access, including areas left without communications after disaster struck. In particularly the government recognizes the very good response by radio amateurs to the Indian Ocean Tsunami in December 2004 that severely hit the Indonesian provinces of Aceh and North Sumatra.

The IARU member society ORARI -- the Organisasi Amatir Radio Indonesia -- Secretary General Suryo Susilo YB0JTR says the new draft rules amend the permit application and frequency granting procedures. He said ORARI has been involved in the drawing up of the draft amendments which will be of benefit to ORARI's activities and radio amateurs, and demonstrates government support for them.

I'm John, VK3BUI.

--

No date was announced as to when the changes in Indonesian radio law will occur. (WIA News)

**

RADIO JUSTICE: MUDERER OF KD7VWJ AND KD7VWK SENTENCED TO DEATH

Back in the United States, The man who masterminded the murders of two hams in order to try to steal their boat and their life savings will pay the ultimate penalty. Bruce Tennant, K6PZW, has been following this case and has the latest:

--

The next stop for Skylar Deleon is Death Roe at California's San Quentin prison. This, after a California judge has sentences the former child actor to death for murdering an Arizona ham couple by tying them to an anchor and throwing them overboard from their yacht off the southern California coastline.

The same jury that had convicted Deleon last November of killing Tom and Jackie Hawks KD7VWJ and KD7VWK recommended that he be put to death. On Friday, April 10th Orange County Superior Court Judge Frank F. Fasel officially imposed the jury's recommendation that Deleon forfeit his life to pay for his crimes.

In fact, in his sentencing order Judge Fasel stated: "It is the judgment and order of this court you shall suffer the death penalty as to each count."

This, a reference to the findings that the Hawkes murders were premeditated and that Deleon was convicted for each one with special circumstances. That special circumstance was multiple murder for profit and is what made him eligible for the death penalty.

As previously reported, prosecutors say that Deleon faked interest in buying the Hawkes yacht and that he and his accomplices forced them to sign the boat over and then killed them during a test cruise in 2004. Three others including Deleon's former wife Jennifer have also been convicted of the same or related charges. Accomplice John Fitzgerald Kennedy's recent trial jury also recommended the death penalty. He will be formally sentenced sometime in May.

But Deleon will likely not be put to death anytime soon. Under California state law there are a series of automatic appeals that could go on for several years.

For the Amateur radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Deleon was also convicted in the 2003 killing of Jon Jarvi, whom he reportedly met on a work furlough program. (ARNewsline(tm) from published reports)

**

ON THE NET: BAD APRIL FOOLS JOKE CONTINUES TO BACKFIRE

When is a ham radio April Fools joke stop being an April Fools joke? How about when the FCC and county officials get involved. Randy Malick, KF0X, reports:

--

That not so funny April Fools Internet article reported on last week -- the one claiming that San Louis Obispo County California had banned ham radio operations as a health hazard has now reached all the way back to the nations capital. In fact its entered the doors at the FCC.

According to the ARRL, San Luis Obispo County officials were notified by the Federal Communications Commission on Wednesday, April 8th of the story which carried a date of April 1st. The FCC reported it had received a number inquiries about the posting, which first noted on radiobanter.com web log and was later picked up by Google Groups and re-posted world wide.

As a result of this and other notifications from the local southern California ham community, the San Luis Obispo County Office of Emergency Services has issued a statement. One that confirms the story to be a fraud while heaping praise on the nations ham radio community.

The release says in part that not only is the online story not true, but San Luis Obispo County government, along with the incorporated cities within the county and other entities work hand-in-hand with Amateur Radio operators. Hams who the county says are always ready to provide alternate and back-up communications in case of unique emergencies or disasters.

But that's not all. It added that that the County looks to sign ham radio operators up as Disaster Service Workers to assist in times of need and it calls their assistance absolutely appreciated.

Lastly, the county notes that radio amateurs have communications set up, or wired to be set up quickly, in city Emergency Operations Centers, the County EOC and other emergency and disaster coordination sites throughout the area. Obviously this is a very strong bond between the county and its ham radio community and one that no nameless blogger is going to break.

For the Amateur Radio Newsline, I'm Randy Malick, KF0X, in Tucson.

--

Meantime, hams across southern California and neighboring areas are getting increasingly agitated as the Internet-based rumor continues to spread. More and more calls are being heard for an investigation to locate, expose and if possible to prosecute the person who wrote and posted the article. There has also been at least one suggestion of a class action suit against the author for defaming the amateur radio service. If legal action is not possible then some feel that its apropos to at least publicly identify the person so as to subject him or her subject to public ridicule. This, in the hope that he or she will leave the hobby and never return. (ARNewsline(tm), ARRL, listener input and other published reports)

**

RADIO LAW: PRB-1 DOES NOT APPLY IN MOBILE HOME PARK

If you live in a mobile home park and the park managers tell you that you canny have a ham radio antenna, don't go to the FCC and ask it to impose PRB One. As one ham recently found out, the FCC is not going to do it. Here's Don Carlson, KQ6FM, with the reason the Commission says its not going to get involved:

--

In its second PRB-1 related ruling in the past two weeks, the FCC has again said that thiss aspect of federal preemption does not apply in cases where conditions, covenants and other deed restrictions are in force. This now includes hams living in mobile home parks where the management says that no outdoor antennas are allowed.

By way of background, back in October 2007, Christopher Kaczmarek, KB8MLC, of Saginaw, Michigan, asked the FCC if PRB-1 could be enforced to require the mobile home park in which he lives in to let him keep his ham radio antenna system. He had previously been notified by the parks management that no antennas of any type were allowed.

On April 6, 2009, the FCC denied Kaczmarek's request. In its ruling the regulatory agency noted that PRB-1 covers only state and local regulation of antenna structures. The agency told Kaczmarek that it is hesitant to become involved in the area where agreements between private parties are voluntarily established and freely entered into. This includes whatever restrictions that a mobile home park places on its space renters.

The FCC also noted that twice before it has addressed this same issue and that in all cases it has chosen not to preempt private land use regulations that restrict the installation of antennas and associated support structures used by Amateur Radio stations. This means that Kaczmarek or anyone else who wants to challenge a mobile home parks restrictions on outdoor antennas is going to have to do so in court, on their own.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM in Reno.

--

The bottom line appears to be that the FCC is not the place to go to look for relief from deed and renters agreements that preclude ham radio antennas. Rather its going to take congressional action to declare these restrictions as unconstitutional before the FCC will act. (FCC release)

**

SUGGESTED READING: THE IARU REGION 3 NEWSLETTER

A new issue of the IARU Region 3 newsletter is available to download. Among the items covered are this weekends World Amateur Radio Day and Global Simulated Emergency Test both on April 18th. Also included are reports on the recent Australian bushfire disaster and the now underway expansion of 40 Meter band. You can get copies in aP DF version: http://www.iaru-r3.org/news/r3nl-09-04.pdf or Word version at

http://www.iaru-r3.org/news/r3nl-09-04.doc (IARU Region 3, Southgate)

**

BREAK 2

This is ham radio news for today's radio amateur. This week from beneath the Southern Cross, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO BUSINESS: BUCKMASTER HAMCALL DATABASE EXCEEDS 2 MILLION

Buckmaster Publishing' has announced that its HamCall Callsign Database now exceeds 2,000,000 world-wide callsigns, with data from over two hundred countries.

HamCall says that it is the world's largest callsign database and is available on CD-ROM as well as on the hamcall.net website. A typical callsign listing includes mailing address, e-mail address, accurate latitude/ longitude, grid square, QSL manager, previous callsigns, photo and much more. And for those who want to have all of this information on their home computer a new HamCall CD-ROM is published each month.

For further information on HamCall and other Buckmaster products please contact: Jack Speer, N1BIC, at Buckmaster Publishing, 6196 Jefferson Hwy, Mineral, Virginia 23117. Or you can e-mail Jack to info (at) buck (dot) com. Either way you will get a quick response for one of the nicest people that we have ever met who is serving the needs of the world-wide ham radio community. (ARNewsline(tm) via press release)

**

HAM HAPPENINGS: AIRVENTURE 2009

The Fox Cities Amateur Radio Club will host a special event station from the Pioneer Airport durring the EAA's Airventure 2009 Airshow. The cub will be on the air daily on Wednesday July 29th through Sunday August 30th. This, from 1300 to 2100 UTC on 20 and 40 meters SSB and 6 meter FM. . Further information is on-line at www.fcarc.us or by e-mail to ab9ah (at) arrl (dot) net (Via e-mail)

**

HAM RADIO IN SPACE: NZ KIWI-SAT GETS ADDED FINANCIAL SUPPORT

New Zealand's KiwiSat has gotten some additional funding in the form of a $1000 from the Auckland VHF Group. This money will be used for the purchase of the special Aluminum blocks from which the very structure of KiwiSAT will be milled by Mike Jack of Stanier Engineering. Stanier is a small precision engineering company based in Auckland. Video of the milling

process will be available on the KiwiSat website at kiwisat.org/index.html. (ANS)

**

ON THE AIR: DEBRECEN OCCUPATION ON THE AIR REMINDER

Hungarian radio amateurs from the city of Debrecen will be active as the special call HG160FNY through July 31st. This ias an on the air activity is to remind everyone of the historical event 160 years ago where the Austrian army occupied the then capital city of Debrecen and of Transdanubium.

The principal special callsign will be HG160FNY will be used by several different operators. Listen out for it on all of the HF bands as well as VHF and UHF using various modes including some digital. QSOs are good towards the commemorative diploma. The QSL Manager is Zoli, HA0DX. (OPDX)

**

ON THE AIR: BULGARIA CELEBRATES CW

Members of the Bulgarian Federation of Radio Amateurs will be active as LZ8WHST. This, to promote the next World High Speed Telegraphy Championship to be held in Obzor, Bulgaria, from September 11th to the 15th.

This special callsign will be randomly activated by several different federation operators from their home QTH and will be active until the end of September. Operation will be 99% CW, with the possibility of some occasional SSB and digital contacts. QSL via LZ1PJ. (Southgate)

**

ON THE AIR: THE CARABINIERI AWARD

Its almost Carabinieri Award time. The aim of the Carabinieri Award is for amateurs and SWL around the world to contact or listen and log as many Carabinieri On The Air members. This, between 07:00 on May 20th and 19.00 UTC on June 5th. Contacts can be made using the 80, 40 and 20m bands on SSB, CW, PSK31 or RTTY and you are allowed one contact a day for the same band using the same mode with the same Carabinieri member. The official list of Carabinieri On The Air award amateurs as well as details of the points system and award that are available, are on line at www.cota.ce. (COTA)

**

DX

In DX, word that HB9TZA says that he will spend his Easter holidays on Malta and on the air through April 23rd as 9H3JR. Listen out for him mainly on 40 and 17 meters using SSB though he might show up on other high frequency bands as well. QSL via I2JJR.

OH4MDY is back again in Cambodia and is signing the call XU7MDY on CW, SSB, RTTY and PSK31/ Hes reportedly operating on 80 through 10 meters and will be at the location through April 21st. QSLs only direct via Reijo Laitinen, Mantytie 13, 76940 Nenonpelto, Finland.

The "4 M 5 DX Group" is planning another activity as Y-W-Zero-A from Aves Island. Up to 15 operators will be on using SSB, CW and RTTY on 160 through 6 meters but the activity is depending on the transportation by the Venezuelan navy. QSL this one to IT9DAA direct, via the bureau or electronically using Logbook to the World.

And word that SV1JG, will be active from the Maldives as 8Q7SV between April 29th and May 5th. His operation will be mostly CW and digital modes on all bands. QSL via SV1JG, direct or by the bureau.

N7EAA will be active from Guyana as 8R1AD between April 20th and May 3rd. Operations will be on 20 meters using CW, SSB and PSK31. The operators say that they plan to look for stations who are young ham operators and running low power. QSL via N7EAA.

Lastly, G3RWL, is once again active as 8P6DRfrom Barbados through April 24th. His operation is holiday style on 160 through 10 meters using CW and the Digital modes only. But don't look for him on April 18th or maybe a few days afterward as the 18th is his wedding day and he will likely have things other than ham radio on his mind. But if you make contact QSL via his home callsign, direct or via the bureau. We say congratulations to the new bride and the groom.

(Above from various DX news sources)

**

THAT FINAL ITEM: AC0MX TAKES PRIZE WITH HAM RADIO AT SCIENCE FAIR

And finally this week, a big shout out of congratulations to Jill Niemeier, AC0MX. This, on her award in engineering at the 53rd Annual Southeast Missouri Regional Science Fair. Rebecca Bruce, reports:

--

According to the Dulkin Democrat on-line newspaper, in her first year of competing in the science fair at the senior level, Jill Niemeier, AC0MX entered the third part in her continuing project "Emergency Communications." She not only took the second place in engineering, but also the Cape Girardeau Area Engineers Club Award, a U.S. Savings Bond, and a U.S. Army Award. Her first two entries at the junior level received several awards and acclamations as well.

But Jill's interest is not just in winning Science Fair's and awards. Rather it is in helping the community as evidenced by her newest aspect of the project titled "Emergency Communications Propagation." This is described as a micro-propagation study of the two-meter amateur radio band specific to emergency communications in a public school setting.

Jill's project focuses on helping the different campuses in the Kennett School District communicate with each other during a disaster. To accomplish this study, AC0MX is in the process of setting up low-power radio systems for the five campuses in the district. Each case will is equipped with a radio, a police scanner, a pack of batteries, and several adapters allowing the radio to draw power from vehicle batteries. A Health Services representative at each location will be trained and licensed to use the gear.

But that's not all. To go along with the radio aspect of the project, Jill
Niemeier gathered GPS data for every entry into every building on each campus. This information will be useful in the event that the buildings are on the ground. In planning for her project, AC0MX pursued the theory that if the New Madrid Fault area ever has a major earthquake, the normal means of communication will be lost. She wants to make certain that schools will be able to continue to talk with the outside world in such a circumstance.

For the Amateur Radio Newsline, I'm Rebecca Bruce, no call yet, In Los Angeles.

--

Jill is the daughter of Donna Gill and Mark Niemeier and attends Kennett High School. Her research project began four years ago when she became a member of the school's amateur radio club. That's where she became interested in radio operation, propagation, and emergency communications.. In 2007, Jill earned her Amateur license and the call KC0YQJ. She currently holds an Extra and the AC0MX call. (ARNewsline, Dulkin Democrat)

==> WHEN VANDALS STRIKE INFRASTRUCTURE, HAMS PROVIDE COMMUNICATIONS SUPPORT

Just after midnight on April 9, someone climbed down four manholes in the San Jose, California area and cut underground fiber optic cables. The sabotage led to widespread disruption of phone service -- including tens of thousands of land lines, an undetermined number of cell phones, Internet access and 911 emergency service -- in southern Santa Clara County, as well as in Santa Cruz and San Benito counties. San Jose is the county seat of Santa Clara County. With the infrastructure disabled, local Emergency Management officials called on ham radio operators in their communities to provide back-up communications. According to the "San Jose Mercury News," Santa Clara County called a local state of emergency, "but worst-case scenarios were successfully avoided through use of ham radios, door-to-door checks and extra-vigilant patrols"
<http://www.mercurynews.com/centralcoast/ci_12121118?nclick_check=1>.

In Santa Cruz County, just over the Santa Cruz Mountains from San Jose, Santa Cruz County District Emergency Coordinator Cap Pennell, KE6AFE, was awoken just after 5 AM on April 9 by uniformed police at his door. Sent by Dominican Hospital President Nanette Mickiewicz, the police officers escorted Pennell to the hospital for a brief on this situation: The fiber optic lines that had been cut in San Jose had affected the Santa Cruz hospital's communications infrastructure, cutting off communications from the hospital to the outside world. Santa Cruz is located on the northern edge of the Monterey Bay, about 70 miles south of San Francisco.

"While I was meeting with hospital department heads, Bob Wolbert, K6XX, had started our ARES Resource Net on the W6WLS/W6MOW linked repeaters," Pennell told the ARRL. "During the briefing, the hospital determined to implement HICS/SEMS for this emergency. There hadn't been telephones or Internet anywhere since about 2:30 AM. The hospital's phone system did work, but only within the hospital. Their internal computer local area network wasn't working either, so they were instantly on a 'paper system.'"

By 6:15, Pennell said they had established tactical radio links on the K6BJ/KI6EH linked repeaters between the Dominican Hospital Emergency Operations Center in Santa Cruz and the Watsonville Community Hospital emergency room; Watsonville is about 15 miles south of Santa Cruz via the Pacific Coast Highway. "We established HEARNET 155.385 simplex between both hospital ERs and County 911; HEARNET is the Hospital Emergency Administrative Radio Network. Once HEARNET (ER staff) and K6BJ repeater (hams) were staffed and operating at both hospitals, I left the hospital to become our initial ham operator at the County Emergency Operations Center and operated as ARES/ACS shift supervisor from there for the rest of the day," Pennell reported.

Throughout the day, Pennell said that hams -- including some in Monterey County who had been working telephones -- helped dispatch ambulances, conferred with the Poison Center on a children's poisoning case, ordered replacement blood supplies for two hospitals from San Jose Red Cross, relayed a complex major "whole hospital" day's food order to the supplier out of county, tracked down various doctors for emergency consultations and shared status updates from our area. "We did all this while in unity with the County government, public safety agencies and California Emergency Management Agency's Coastal Region," he said. "Greg Smith of Cal-EMA <http://www.calema.ca.gov/> spent the day in the Santa Cruz EOC with us." All service was restored by 12:15 AM on Friday, April 10.

NETCOM, the dispatch center for most police and fire agencies in Santa Cruz County, was able to receive 911 calls placed from land lines, but could not receive calls placed from cell phones, said Santa Cruz County Senior Dispatcher Stephanie Zube. "Because the only phone number many land line phone owners could call was 911," she said the center received "countless calls" regarding the blackout: "At least several people attempted to call 911 before driving themselves to the emergency room. A lady in Gilroy fled her home when a robber broke in, and couldn't call 911 before fleeing to a nearby firehouse."

Vandalism Takes Out System

San Jose and San Carlos police are joined in their investigation of the cut fiber optic cables -- now considered by authorities to be a coordinated act of sabotage -- by the Santa Clara County Sheriff's Office and the FBI. The investigation also includes members of AT&T's security force, a handful of trained investigators working for the company. Authorities said on April 10 that evidence collection was complete, but would not elaborate on what exactly what they are examining or whether new security measures are in place to prevent similar acts of destruction.

San Jose police reported receiving about 10 tips concerning the sabotage; San Carlos police told the "Mercury News" that they were examining video surveillance of a major intersection near one of the four locations where AT&T's underground fiber-optic cables were sliced early Thursday morning.

On April 11, AT&T issued a $100,000 reward for information, but bumped up the reward to $250,000 the next day when it discovered that the damage was more serious than originally thought. According to the Daily Tech, some banks in the area were forced to close temporarily, while all service was disabled and hand-written receipts were offered to customers. Many businesses also were forced to either accept cash or close for a few hours, since credit card and ATM transactions were unavailable <http://www.dailytech.com/Vandals+Cut+Phone+Cables+Drop+Service+for+50K+People+911+Services/article14821.htm>.

Authorities say the communications sabotage occurred in two separate incidents, one at 1:30 AM in south San Jose and the other two hours later in San Carlos. Several companies, such as Verizon, "piggy back" on the AT&T-owned cables. AT&T spokesman John Britton told the "Mercury News" <http://www.mercurynews.com/centralcoast/ci_12115324?nclick> that it appears vandals opened a manhole and climbed down at least 8 feet to cut four or five fiber optic cables along Monterey Road just north of the Blossom Hill Road exit. The second vandalism was along Old County Road near Bing Street in San Carlos. San Jose police spokesman Sergeant Ronnie Lopez said the manhole covers are heavy and would take quite an effort to lift, perhaps even requiring a tool. Investigators do not have a suspect yet, he said, but have learned "to expect the unexpected. We have some obvious clues and can assume some things," but a motive remains elusive <http://www.mercurynews.com/valley/ci_12142268>.

Community Leaders Praise Hams

Gilroy, the southernmost city in Santa Clara County, was also affected. City Administrator/Director of Emergency Services Thomas J. Haglund expressed his thanks to the Amateur Radio operators who assisted with communications support, saying, "This particular emergency situation underscores that our reliance on technology should be balanced with maintaining the very types of capabilities that you provided to us. Communication is an obvious key to adequately responding to any emergency and the efforts of the Mutual Aid Communicators and the Gilroy Police VIP's provided the necessary communication and public visibility in this instance and demonstrated just how important your training and skill is to our community. Thank you very much for your dedication and expertise."

Gilroy Police Chief Denise Turner echoed Haglund's comments: "We truly appreciated all of your help during this challenging event! Each of you played a key role in a successful operation. I feel better knowing we have dedicated volunteers like you that will come to our aid in time of need! Thank you!" -- Some information provided by "The San Jose Mercury News" and "The Daily Tech"

==> ARRL COMMENTS ON BROADBAND PROVISIONS IN RECOVERY ACT

On March 24, 2009, the FCC invited comments from interested parties concerning the Commission's consultative role in the broadband provisions of the American Recovery and Reinvestment Act of 2009 (Recovery Act) <http://www.fcc.gov/Daily_Releases/Daily_Business/2009/db0324/DA-09-668A1.pdf >. In the Recovery Act, Congress assigned grant and loanmaking responsibilities to the Department of Commerce's National Telecommunications and Information Administration (NTIA) and the Department of Agriculture's Rural Utilities Service (RUS). On April 13, the ARRL, through General Counsel Chris Imlay, W3KD, submitted comments <http://www.arrl.org/news/files/BroadbandDefinitionDocket09-40.pdf> that expressed concern as "the threshold for what constitutes 'broadband' is a critical determination that will inevitably determine the success or failure of the [Broadband Technologies Opportunities Program] BTOP <http://www.ntia.doc.gov/broadbandgrants/> program going forward."

In the League's comments to the FCC, the ARRL asked the Commission to adopt as the definition of broadband "those technologies capable of the minimum threshold bidirectional speeds [as recommended in the ARRL's comments], without variation among the type of broadband technology under consideration, as a minimum threshold in order to be considered for grants or loans of public funds."

While the FCC has no funds under the Recovery Act for grant or loanmaking, it does, however, have what the Commission describes as "an important role to play in providing expert, technical advice to the NTIA" as it establishes the BTOP, "and the Commission may also provide expert, technical advice to RUS as it proceeds with its own programs."

Imlay pointed out to the Commission that the ARRL actively participates in the Committee for Communications Policy of the Institute of Electrical and Electronics Engineers-USA (IEEE-USA CCP), "which has engaged in considerable discussion of universal access to high-speed broadband networks, and in particular, broadband definitions and target goals for broadband deployment" <http://www.ieeeusa.org/volunteers/committees/ccp/>.

He told the Commission that the ARRL "wholeheartedly concurs" with that organization's views on broadband technologies, as detailed in its position statement, 'Nationwide High Speed Broadband Data Services,' that says "The most important short-term goal is broadening ubiquitous availability [of broadband]. Data rates should be sufficient to provide the equivalent of several channels of bidirectional, high resolution video, achievable by expanding the capabilities of current technologies" <http://www.ieeeusa.org/policy/positions/broadband.pdf>.

The IEEE also says that it "initially advocates" the achievement of at least 20 Mb/s bidirectional speed with 90 percent availability throughout the nation within five years. "The wide penetration of such speeds will achieve most of the expected benefits and accommodate numerous simultaneous applications per household or small business. Of course, greater speeds can be had by those with greater needs. We further advocate the achievement of at least 100 Mb/s bidirectional speed with availability to all businesses and households within 10 years. The technology necessary to meet this goal is scalable to almost any future need at inexpensive upgrade costs."

Imlay said that IEEE-USA's position statement concludes that there are "two overarching goals for nationwide high-speed broadband networks: widespread availability and high performance." In providing public funds to achieve widespread availability, Imlay stated that the FCC, NTIA and the RUS should ensure that high performance should not be set aside to achieve that goal. "This," he told the Commission, "to ARRL, means the establishment of a floor for throughput of at least 20 Mb/s bidirectional speed for funding of broadband systems to be developed between now and 2014, and 100 Mb/s bidirectional speed for those systems to be implemented between 2014 and 2019. Expenditure of public funds should be limited to the technologies that can meet these goals."

The IEEE-USA statement also notes, Imlay explained to the Commission, that the FCC's recently adopted definition of broadband speed "is a series of tiers, starting as low as 768 kb/s. As noted in the statement, this is woefully inadequate to perform even current computing applications." Imlay called for an elimination of tiers "at least for purposes of determining what broadband technologies should be funded with public funds."

Imlay, in his comments, said that the "most urgent" of the FCC's "consultative issues with the NTIA" involve defining just what broadband is. "The Commission is obligated pursuant to the Recovery Act to consult with NTIA on the establishment of a national broadband service deployment and expansion program, and the NTIA is obligated, through the BTOP program, to provide access to broadband service to consumers residing in unserved areas," he said. "It is not useful in the expenditure of large sums of Recovery Act funds to promote broadband technologies that do not include the capabilities needed by individuals and businesses located in rural or underserved areas. Therefore, the threshold for what constitutes 'broadband' is a critical determination that will inevitably determine the success or failure of the BTOP program going forward."

The ARRL recognizes that the FCC has struggled with this definition for some time, Imlay wrote: "Indeed, in the Notice of Inquiry in Docket 09-51, FCC 09-31, released April 8, 2009 (at ï¿½15-16), the Commission stated that 'Broadband can be defined in myriad ways. In order to ensure that all people of the United States have access to broadband capability, we must make sure that the Commission appropriately identifies goals and benchmarks in this regard...In addition, to the extent that broadband is defined by 'speed,' should the Commission consider raising the speeds that define broadband? Should we distinguish among the various broadband technologies?" <http://www.fcc.gov/Daily_Releases/Daily_Business/2009/db0408/FCC-09-31A1.pdf

>

Imlay said that it is the ARRL's position that the definition of "broadband" should include an "absolute lower threshold, minimum bidirectional speed. It should not be a variable concept determined by technology. To do otherwise is to provide grants and loans of public funds to technologies whose benefits are, in the medium term, inadequate and which might, for example, render businesses in rural areas less competitive than those located in urban areas. It is, in other words, not useful to fund the creation of infrastructure that will be obsolete in the near term or less useful than other technologies which provide greater speeds. That simply perpetuates the status quo, where there will still, going forward, be adequately served and underserved areas. The status quo is quite obviously unacceptable to Congress, and it should be.

==> LOOK FOR THE MAY ISSUE OF QST IN YOUR MAILBOX

The May issue of QST has left for the printer and is speeding toward your mailbox. This issue -- with its cover featuring the 2009 ARRL National Convention and the Dayton Hamvention -- is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting, the upcoming issue of QST has something for just about everyone.

In the May issue, Dwight Merkley, N7KBC, shows a way to see what's happening at night on your mobile radio in his article "See Your Mobile Controls at Night with Superbright LEDs." Discover another way to talk on your radio in "A Cell Phone Headset Adapter for Amateur Radio" by Geoff Haines, N1GY. Is your antenna beam pointed at the best possible elevation for the contacts you want to make? Find out in the article "What's the Best Height for My HF Beam?" by Steve Hunt, G3TXQ.

If you're excited about the 2009 ARRL National Convention and the Dayton Hamvention, you're definitely not alone! Catch up on all the latest happenings at these events in S. Khrystyne Keane's, K1SFA, article, "Something for Everyone at the 2009 ARRL National Convention." ARRL ARISS Program Manager Rosalie White, K1STO, gives readers a glimpse into the life of Richard Garriott, W5KWQ, son of US astronaut Owen Garriott, W5LFL. Find out in the May QST how you can meet Richard in Dayton at the ARRL EXPO.

If you like the competitive spirit of radiosport, but you have a hankering for the big outdoors, why not try ARDF, or Amateur Radio Direction Finding? ARRL Contest Branch Manager Sean Kutzko, KX9X, explores the world of ARDF in "This Month in Contesting." According to Kutzko, all you need to get started in competitive ARDF is "your running shows, a set of headphones attached to a receiver, a map or compass and a small handheld directional receiver. Now run through a course in a forest or on a trail, and try to find several hidden transmitters as fast as possible." Kelly Taylor, VE4XT, reports on the results of the 2008 ARRL CW Sweepstakes in this issue.

ARRL Contributing Author Gary Pearce, KN4AQ, reviews Kenwood's RC-D710 Control Head/TNC. According to Pearce, the RC-D710 "upgrades the TM-V71A transceiver to add packet radio and APRS capabilities identical to Kenwood's

TM-D710A transceiver, and it can be used with other radios as a stand-alone TNC." Be sure to also check out the reviews by ARRL Technical Advisor Bruce Prior, N7RR, on portable dual-lever keyer paddles, also in the May issue.

Of course, there are the usual columns you know and love in the May QST: Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more. Look for your May issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <http://www.arrl.org/join>.

==> CALIFORNIA TEEN IS 2009 GOLDFARB SCHOLARSHIP RECIPIENT

In April, the ARRL Foundation Board of Directors <http://www.arrlf.org> voted unanimously to award the prestigious William R. Goldfarb Memorial Scholarship to Dean LaBarba, KI6CUX, of Long Beach, California. LaBarba will graduate from Woodrow Wilson High School this year with a GPA of 4.0. According to ARRL Chief Development Officer Mary Hobart, K1MMH, upon graduation, LaBarba will more than meet the course requirements with 50 hours of honors and Advanced Placement credits.

LaBarba holds a Technician class license that in 2005 led him to participation in the Amateur Radio Emergency Communication (AREC) team at his high school; since 2007, he has served as president. The mobile Amateur Radio station at Wilson High School is the only high school emergency team in Long Beach. Hobart said that LaBarba took the "extra initiative" to display and demonstrate the mobile radio station at the district science fair, explaining to the public the role that Amateur Radio plays in community safety. LaBarba also spends considerable time coordinating Amateur Radio activities, including Field Day, with the local community.

In addition to his Amateur Radio activities, LaBarba is active in the Symphony and Symphonic Orchestra where he is seated as principal trombone. He also participates in the school speech and debate team. From an early age, LaBarba -- who will be attending Westmont College <http://www.westmont.edu/> in Santa Barbara, California -- has had a keen interest in medicine and intends to pursue a career in neurology.

The Goldfarb Scholarship is the result of a generous endowment from the late William Goldfarb, N2ITP. Before his death in 1997, Goldfarb set up a scholarship endowment of close to $1 million in memory of his parents, Albert and Dorothy Goldfarb. Awarded to one high school senior each year, the Goldfarb Scholarship assists the recipient to receive a four-year undergraduate degree in engineering or science or in the medical or business-related fields. The terms of reference of the generous Goldfarb scholarship award require that recipients demonstrate financial need and significant involvement with Amateur Radio, in addition to high academic performance. The seventh Goldfarb Scholarship winner, LaBarba continues the tradition of prior recipients, demonstrating superior academic performance, outstanding leadership and extraordinary Amateur Radio and community service.

More information on the Goldfarb Scholarship is available on the ARRL Web site <http://www.arrl.org/arrlf/>. Applications for the Goldfarb Scholarship and other ARRL Foundation Scholarships are accepted each year beginning October 1 and ending February 1 for the academic year that starts the following August/September.

==> HAMS IN SOUTHEASTERN US PROVIDE SPOTTING ASSISTANCE TO NWS

As tornados swept through the southeastern part of the country on April 10, hams in Alabama, Tennessee, Arkansas and Georgia were on the air providing assistance to the National Weather Service (NWS) <http://www.nws.noaa.gov/>.

In Alabama, hams in Madison, Shelby and Calhoun Counties activated SKYWARN Nets. According to Madison County Emergency Coordinator Rolf Goedhart, K4RGG storm spotters in that county were quite active on their Net. "At 12:37, at the request of the Madison County Emergency Operations Center and in response to a tornado watch, we formally activated the Madison County Emergency Net," Goedhart told the ARRL. "For about an hour and a half, there was virtually no dead air, either on the SKYWARN net or the Madison County Emergency Net. In fact, reports were flowing fast enough to make one pause, deciding when or even whether to call NCS with a report." Goedhart said that Hilton, at the Huntsville NWS amateur station, estimated handling more than 200 reports from the northern counties of the state in the nine hours that the Net was open.

In Tennessee, members of the Heart of Tennessee (HOT) ARES <http://www.hotares.com/> started an NWS SKYWARN Net at 12:18 PM as the storms approached. "Amateur operators relayed storm damage information to NWS for evaluation in determining tornado strength in the area," Rutherford County Emergency Coordinator Keith Miller, N9DGK, told the ARRL. "ARES members were monitoring the developing line of storms as watches and warnings were issued in the adjacent counties in the Middle Tennessee area."

Miller said that since primary communications for police departments, fire departments, Emergency Medical Service, County Sheriff or County Emergency Management Agency were not lost, backup communication was not required per the County EMA Director. His ARES group did not receive any requests to staff emergency shelters.

ARRL Georgia Section Emergency Coordinator Gene Clark, W4AYK, told the ARRL that hams in Gwinnett County activated a SKYWARN Net at 4:30 PM on April 10. "According to plan, a de-centralized Net Control function was used, with the Net Manager coordinating weather spotter reports to the NWS office in Peachtree City," he said. "Forty-one amateurs reported seven different reportable weather situations to the NWS."

In Newton County, Emergency Coordinator Charles Davis, WA4UJC, activated a weather Net at 8 PM. Ten operators from different areas of the county, as well as from adjacent counties, participated in the Net, reporting golf ball-sized hail and heavy rain. "When power went out for three hours due to a broken power pole on the west side of the county, the Net continued with hams using mobile transceivers and backup power," Clark explained. "The power outage caused us to lose repeater capabilities, so the hams relied on simplex. Using backup power, they contacted a linked repeater system and

maintained communication with the NWSï¿½until securing at 11:15 that night."

Arkansas hams were busy with the storm, too. At 7:24 PM CDT, the NWS issued a tornado warning for areas north of the Arkansas town of Mena in Polk County; at 8:01 PM CDT, the warning was extended into Mena. Nine minutes later, an EF-3 tornado struck the city, killing three people.

According to ARRL Arkansas Section Emergency Coordinator John Nordlund, AD5FU, members of the Central Arkansas UHF Group (CAUHF) <http://www.cauhf.org/weather/> provided real-time reports to the National Weather Service office in North Little Rock and to media outlets around the state. "The Group used the AR-Links SKYWARN net and the WarnIM system," Nordlund said. WarnIM is a SKYWARN instant messenger system serving to give those with or without ham radio access, or those who are in remote areas an additional means of communication in times of emergencies or severe weather events. Its features include live chat and access to updated radar data directly from the NWS.

"When the net closed at the end of the severe weather outbreak, NWS Warning Coordination Meteorologist John Robinson stated on the WarnIM system that the North Little Rock NWS office had never had so much timely storm report information before," Nordlund said.

Nordlund visited Mena on April 11 and noted that the local ham operators are participating in any emergency tasks that are assigned to them -- based on their training and certifications -- and are using simplex ham radio frequencies primarily to avoid additional loading of public safety frequencies as they carry out those assignments. "The damage path [of the tornado] is a striking example of the power of nature," he said. "The recovery effort of community volunteers is inspiring. This is another fine example of a local ham group that has their ducks lined up and on parade when it really counts."

==> FORUM SCHEDULE ANNOUNCED FOR 2009 DAYTON HAMVENTION

One of the many highlights at Dayton Hamvention is the myriad of educational and fun forums that take place the entire weekend at Hara Arena. The Dayton Amateur Radio Association has coordinated 45 unique programs that encompass nearly 80 hours of programs and activities for the thousands of people expected to attend these programs. Hamvention, the largest event of its kind, will be May 15-17 at Hara Arena in Dayton, Ohio. Please keep in mind that the schedule may change before Hamvention.

Friday, May 15
9:15-11:15 -- TAPR Digital Forum (Room 1)
9:15-10:15 -- Engineering Manuals (Room 2)
9:15-10:15 -- Kit Building (Room 3)
9:15-10:15 -- QRP (Room 5)
10:30-12 -- Drake Forum (Room 2)
10:30-12 - Teachers Workshop (Room 3)
10:30-11:30 -- ARRL Field Day (Room 5)
11:30-12:30 -- APRS Forum (Room 1)

11:45-12:45 -- QSL Cards (Room 5)
12:15-1:15 -- ARRL, The Doctor Is IN (Room 2)
12:15-2 -- Ham Radio and the Law (Room 3)
12:45-2:15 -- D-STAR Forum (Room 1)
1-2:15 -- Alternative Energy Forum (Room 5)
1:30-2:30 -- ARRL, Public Relations (Room 2)
2:15-3:30 -- Gordon West (Room 3)
2:30-5 -- Antenna Forum (Room 1)
2:30-5 -- Software defined Radio (Room 5)
2:45-3:45 -- Foxhunting Forum (Room 2)
3:45-5 -- Techniques of the Best Operators (Room 3)
4-5 -- County Hunting Forum (Room 2)

Saturday, May 16
9:15-11:15 -- Contesting Forum (Room 1)
9:15-10:15 -- SATERN Forum (Room 2)
9:15-10:15 - Lightning Grounding Forum (Room 3)
9:15-11:00 - VHF/UHF/Microwave Forum (Room 5)
10:30-11:30 -- ARRL Members Forum (Room 2)
10:30-11:45 -- Heil Sound (Room 3)
11:15-1:30 -- AMSAT Forum (Room 5)
11:30-1:15 -- Youth Forum (Room 1)
11:45-2 -- Newsline Town Meeting (Room 2)
12-1 -- RTTY Forum (Room 3)
1:15-2:15 -- ARRL, Digital Contesting (Room 3)
1:30-2:30 - ARRL Presents Richard Garriott, W5KWQ (Room 1)
1:45-3 -- SSTV Forum (Room 5)
2:15-3:15 -- FCC Forum (Room 2)
2:30-3:30 -- ARES Forum (Room 3)
2:45-5 -- DX Forum (Room 1)
3:15-5 -- MARS Forum (Room 5)
3:30-5 -- ATV Forum (Room 2)
3:45-5 -- Collins Forum (Room 3)

Sunday, May 17
9:15-10:15 -- Red Cross Forum (Room 1)
9:15-11 -- QCWA Forum (Room 2)
9:15-10:15 -- Volunteers and EmComm Forum (Room 3)
9:30-11:15 - Bicycle Mobile Forum (Room 5)
10:30-11:30 - When All Else Fails, South Carolina Is Ready (Room 1)

For more information on forums at the 2009 Dayton Hamvention, please visit
the Dayton Hamvention Web site <http://hamvention.org/forums.php>.

==>SOLAR UPDATE

Tad "The Sun is hot on my neck as I observe" Cook, K7RA, this week reports:
Still no sunspots, and again we saw a prediction for slightly higher solar
flux slip away. Sunspot numbers for April 9-15 were 0, 0, 0, 0, 0, 0 and 0
with a mean of 0. The 10.7 cm flux was 70.1, 69.4, 69.3, 69.3, 68.4, 69.4 and
69.4 with a mean of 69.3. The estimated planetary A indices were 12, 8, 9, 8,
4, 2 and 3 with a mean of 6.6. The estimated mid-latitude A indices were 9,

6, 7, 4, 3, 1 and 2 with a mean of 4.6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Edna St Vincent Millay's "Spring" <http://www.poetryfoundation.org/archive/poem.html?id=173994>.

==>IN BRIEF:

* This Week on the Radio: This week, the NCCC Sprint Ladder is on April 17. Be sure to check out the Holyland DX Contest, the TARA Skirmish Digital Prefix Contest, the ES Open HF Championship and the Feld Hell Sprint on April 18. The Michigan QSO Party, the Ontario QSO Party and the YU DX Contest are April 18-19. The Run for the Bacon QRP Contest is April 20. The SKCC Sprint and the 432 MHz Spring Sprint are April 22 (the 432 MHz Sprint is local time). Look for another NCCC Sprint Ladder next week on April 24. The Florida QSO Party, the Nebraska QSO Party and the SP DX RTTY Contest are all on April 25-26. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, May 3, 2009 for these online course sessions beginning on Friday, May 15, 2009: Antenna Modeling and Radio Frequency Propagation. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* No ARRL Audio News April 24: There will be no ARRL Audio News on Friday, April 24. The ARRL Letter will be distributed that day. The ARRL Audio News will return for May 1 and 8, but will be on hiatus on May 15 due to the Dayton Hamvention. The Audio News will resume regular distribution on May 22.

* Italy Discontinues HF Earthquake Net: On April 10, Italy's Dipartimento della Protezione Civile announced they had closed down all organized emergency communications support on HF frequencies that had been set up after the April 6 earthquake that struck the town of L'Aquila. The ARRL reported that two HF frequencies -- 7045 and 3640 kHz -- were being kept clear of regular traffic so that they could be utilized for any communications support needed in the aftermath of the quake <http://www.arrl.org/news/stories/2009/04/06/10757/?nc=1>. "There do not appear to be any other emergency groups using [7045 kHz]," said IARU Region 1 Emergency Communications Coordinator Greg Mossop, G0DUB, "so it is appropriate to return it to normal use and let normal amateur procedures apply: Listen before transmitting, and if you hear any station passing emergency traffic, leave the frequency clear and avoid causing interference." Mossop said that a large number of Amateur Radio responders are st ill present from the different emergency communications groups in the country.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make

selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Keep in mind that most hams are old and if you are under 30 and not
a Democrat you have no heart and if over 30 and not a Republican you
have no brain.

If you claim to be either, it's worse than all that.. even if you have a
brain, you are refusing to use it, and letting others do your thinking for
you.

That's crazy talk. Most people are independents. There are some
uptight hams, for sure.

If you bother to look at the headers of the original post, you'll see that the poster has an agenda for his repost that all of you missed (look at the Summary header). Apparently, some hams swallowed that story hook, line, and sinker with the result that they have now formed an angry mob, complete with burning torches and pitchforks, and they are trying to track the original story author down. See the most recent Amateur Radio Newsline for full details.

yes there are some very uptight hams and plenty of stupid ones esp the
OT that let Morsed nonsense burn out their ability to think

"one useless man is disgrace 2 become a law firm 3 or more become a congress"
adams

woger you are a Congress all in your own head

Ohio/Penn DX Bulletin No. 905

The Ohio/Penn DX PacketCluster
DX Bulletin No. 905
BID: $OPDX.905
April 20, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, K3IXD, NG3K, N4AA & QRZ DX, K8GG, K8YSE, W8UVZ, K0HB, DK8JB, DL2SBY, DL7MAE & The DX News Letter, DL8EBW, DX World of Ham Radio Web Site, F5NQL & UFT, G3SWH, I1JQJ/IK1ADH & 425 DX News, IT9EJW, IZ0FKE, LX2A, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 12th-April, through Sunday, 19th-April there were 210 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FT5W, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S0, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VK9M, VP2M, VP2V, VP8, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2009 W0DXCC CONFERENCE. Make plans to attend the 2009 W0DXCC and Contest Central Conference, July 18th, in Rochester, Minnesota. It is a "FULL Day" dedicated to HF Contesting and DXing! There will be DX and Contest forums, vendors, QSL card checking and a DX Dinner Banquet. Guest speakers mentioned are: John/ON4UN (on Low Band DXing), Rich/N6BV (on HF antennas), Carl/K9LA (on Sunspots and propagation), Rob/NC0B (on HF receivers),

Ward/N0AX on Contesting and DX Banquet speakers will feature Desecheo
DXpedition operators (including Glenn/W0GJ and Ralph/K0IR as speakers).
For more details, please visit:
http://www.rahrahrochester.com/events/2009_W0DXCC_and_Contest/index.aspx

5H, TANZANIA. Operators Hermann/DL2NUD and Joachim/DL9MS are planning
to be active as 5H1HP and 5H1MS, respectively, from Zanzibar, between
May 16th and June 2nd. Activity will be on the HF bands and 6 meters,
but an emphasis will be on VHF (EME/MS). Grid squares to be activated
are: KI93RU and KI94RA.

8Q, MALDIVES. Hiroshi, 7M2VPR, is now active as 8Q7HN. Length of his
operation is unknown at this time. He was spotted Sunday on 15 meters
SSB -- between 0530-0800z on 21235 kHz and 1300-1330z on 21244 kHz.
QSL via 7M2VPR.

8R, GUYANA. The 6 Meter Beacon Project, Inc., is happy to announce a
HF-50 MHz DXpedition here between June 16th and July 6th. Antenna for
6 meters will be a 6M7JHV yagi at 45 ft. on the Atlantic Ocean pointed
towards EU and NA, and using a 3CPX800A7 amp. Activity will be split
between two teams: 11 days will be by Chris/W3CMP and Dave/N3DB, the
other 11 days by Terry/K4RX and Ken/AC4TO. They hope to get some decent
openings to, amongst other places, Northern EU, 5B/4X and W6/W7. They
expect to have internet access most of the time. Operating frequencies
and Web site will be announced at a later date.

AN8, CANARY ISLANDS. Operators Luis/EA8AY, Jeronimo/EA8NC, Pedro/EA8QP
and Juan/EA8TT will use the special callsign AN8R during the CQWW WPX CW
Contest (May 30-31st) as a Multi-Multi entry. QSL via EA8AY. Visit the
special AN8R Web page at: http://www.ea8ay.com/an8r_wpx/

AX, ANTARCTICA (Special Callsign). Bob, VK0BP, currently employed by the
Australian Antarctic Division as a Communications Tech from Davis Base
Station (WABA VK-03, WAP AUS-03, IOTA AN-016), Antarctica, will be using
the special callsign AX0BP on April 25th, to celebrate ANZAC Day. ANZAC
Day is a national public holiday to commemorated and honor the members
of the Australian and New Zealand Army Corps (ANZAC) who fought at
Gallipoli in Turkey during World War I. This holiday is observed by
Australia and New Zealand, as well as the Cook Islands, Niue, Samoa and
Tonga. Bob can only use this callsign from midnight to midnight (local
time -- Davis is +7 hrs UTC). However, Bob will not be able to operate
the full 24 hours but will do his very best to operate as long as possible
that day. Australian operators can only use the AX prefix just 3 times
per year -- Australia Day (January 26th), ANZAC Day (April 25th) and
World Telecommunications Day (May 17th). QSL via VK2CA, direct only
(2 USDs and a SAE is preferred).

C6, BAHAMAS. Look for C6APR to be active again from the Crooked Island
Lodge, Pittstown Point, Crooked Island (NA-113), Bahamas. Activity will
take place between July 23-27th, and during the RSGB IOTA Contest (July
25-26th) as a Multi-Op/Mixed-Mode/High-Power/DXpediton entry. Operators
mentioned are: Pete/W2GJ, Ed/K3IXD, Dallas/W3PP and Jim/K4QO. Operations

before and after the contest by C6APR will be on 80-10 meters including the 30/17/12 meter bands using CW and SSB. Also, look for C6AXD to be on RTTY and C6AQO on 6 meters (grid FL22). All three callsigns are good for Bird Rock Lighthouse (ARLHS BAH-005) as well as IOTA NA-113 and Grid Locater FL22tt. All QSLs go to K3IXD.

CQWW DX CONTEST BREAKS 10,000 LOG BARRIER! A press release (dated April 15th) from CQ Communications, Inc., states: "For the first time, more than 10,000 logs have been submitted for the CQ World Wide DX Contest, according to Contest Director Bob Cox, K3EST. In addition, Cox reports that the number of CW logs have exceeded the number of phone logs for the first time in more than 20 years.
According to Cox, there were a total of 5013 SSB logs and 5272 CW logs submitted for the 2008 running of the event, for a total of 10,285 logs. This is the first time that the CQWW -- already the world's most popular amateur radio contest -- has broken the 10,000 log mark. Of these, nearly 98% were submitted electronically.
It is also the first time since 1986 that more CW logs have been submitted than SSB logs. 'This is a clear indication,' says Cox, 'not only of the health of contesting and of CW, but of ham radio as a whole.' In addition, the logs contained the callsigns of more than 50,000 different amateur stations making at least one contest contact, indicating that many more stations participate in the CQWW Contest than submit logs.
SSB results of the 2008 CQWW Contest will be published in the August 2009 issue of 'CQ' magazine; CW results will appear in the September issue."

DAYTON TOP-BAND DINNER BANQUET FULLY BOOKED. George/K8GG and George/W8UVZ announced: "Despite the economic turn-down, the response for the 2009 Dayton Topband Dinner has been steady and growing. We are now fully booked with a long waiting list for this May. We are sorry to report we cannot handle any further reservations and have been turning away repeat attendees for over a week now. We will do it again in 2010, assuming the Dayton Hamvention(r) continues, so if you missed this year and want to attend next year, please mark you calendars to contact us in late February or early March next year. We will announce the details on The Topband Reflector, and various DX e-bulletins as we have on the past. Thanks for your understanding, and we hope to see you next year."

GD0, ISLE OF MAN (EU-116). Stewart, GM4AFF, will be active as GD0F during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/SSB/24-Hrs/ Island entry. QSL via M0CMK.

HB0, LIECHTENSTEIN (Update). Operators Kasimir/DL2SBY and his friend Georg/DF1SR will be active from here between April 24th and May 4th. Activity will be on HF bands (80-10m) using CW, SSB and RTTY. Kasimir informed OPDX that he has bought Spiderbeam for 10/12/15/17/20m which will improve his signal. Other equipment includes a TS2000, FT900AT, Ameritron AL811, HF9V vertical and a monoband vertical for 30/40m. Activity will also take place on 13cm and 23cm using EME. Equipment will be a FT726R, Dish 3, 7m, and 2 amplifier for both bands. Kasmir

and Georg will use two separate callsigns for this operation. For the HF bands, they will use HB0/DL2SBY and for the EME activity they will sign HB0/DF1SR. QSL via DL2SBY, by the Bureau or direct.

HI, DOMINICAN REPUBLIC. Ronny, OT4R, will be active as HI7/OT4R from Punta Cana between May 9-30th. Activity will be on 20/15/10 meters SSB. Suggested frequency for 20 meters maybe 14300 kHz. QSL via OT4R.

IOTA NEWS.....
AF-019. Operators Vincenzo/IW9EJP, Filippo/IW9FRB, Giovanna/IW9GVP (YL), Ferdinando/IW9HSK, Ezio/IT9OJW, Sebastiano/IT9ZIR and Dario/ IT9ZZO will be active as IG9/homecalls from Linosa Island (IIA AG-003, MIA MI-128) between April 24-26th. They plan to operate on SSB, PSK and RTTY on the HF bands, 80-10 meters. QSL via their home callsigns, direct or by the Bureau. Visit their Web page at: http://www.iw9frb.it/linosa.htm

AF-065. (Update) By the time you read this, 8 operators should be active as 5C2J/p (possibly other callsigns) from Mogador Island until April 26th. For details, visit their Web page at: http://www.mogador2009.altervista.org
For suggested frequencies:
http://www.mogador2009.altervista.org/index.php?
option=com_content&view=article&id=57&Itemid=65
For questions and skeds, contact their pilot station:
http://www.mogador2009.altervista.org/index.php?
option=com_content&view=article&id=47&Itemid=62
Operating locations:
http://www.mogador2009.altervista.org/index.php?
option=com_content&view=article&id=58&Itemid=64
Remember to also look for operators to be active from Essaouira and Marrakesh. For QSL info, please see their Web page or refer to OPDX.903.

AS-077. (Special Event) Look for 8J6SL to be active from the Kumamoto Museum between May 1st and October 31st, to celebrate the 100th anniversary of Hisatsu (Railroad) Line (Steam Locomotive) on the Island of Honshu (JIIA AS-077-001). Activity will be on all bands and modes. Possibly 5 stations will be on the air. QSL via the JARL Bureau.

AS-133. This was a late one to report, but hopefully you can get him on the last date. Wim, XU7TZG, will be active as XU7KOH from Koh Russei (aka Bamboo Island) again, between 0500z, Friday, April 17th, and 0500z, Monday, April 20th. Activity will be SSB only (and possibly PSK31). Suggested IOTA frequencies are: 3755, 7055, 14260, 18128, 21260, 24950, 28460 and 28560 kHz. QSL only direct with SAE and 2 USDs to the QSL Manager ON7PP: Patrick PIESEN, Hermans-Lybaertstraat 35 b.1, 8301 KNOKKE-HEIST, BELGIUM. Look for logs to be online after April 24th at: http://www.xu7tzg.be

EU-017. (Update) Members of the Noantri DX & Contest Team will be active as ID9N from Vulcano Island (Eolian Group) (IIA ME-018, MIA MI-122, WLOTA 1001), April 25-30th. Look for activity on the HF bands, CW, SSB and the Digital modes. They will have two high power stations from this dangerous outpost. During operations they will have a 6m beacon active from grid square JM78lj (ID9N/B 50.006 MHz). Operators mentioned are: Andy/ IZ0EHO, Vincenzo/IZ0FKE, Alberto/IZ0FMA, Claudio/IZ0GKX, GiorDano/IK0XFD and Alberto/IK0ZCW. QSL via IZ0GKN. Sked requests available at: id9n@libero.it
An InterNet link will be available, so look for daily updates online (Log and Pictures) at: http://www.id9n.com

EU-123. Operators Colin/G3VCQ, Sharon/M3VCQ, Andy/M0GAV, Joanne/2E0JOX and Tim/2E0TJX will be active as MM3M from Ilse of Arran, Scotland, during the RSGB IOTA Contest (July 25-26th). QSL via G3VCQ. They will possibly be active as GS3RCM/p before and after contest. QSL OK via RSGB Bureau or direct.

EU-123. Operators Tom/MM0BHX, Gordon/MM0GPZ, Phil/GM0LIR, Iain/GM0OQV and John/GM0NBM will be active as GM0B from the Isle of Bute, Scotland, during the RSGB IOTA Contest (July 25-26th). QSL via MM0BHX.

EU-189. (Update) A Belgian team of five operators will attempt a landing on Rockall Island between April 30th and May 1st. They will be on the air with two stations using the callsign MM0RAI/p for about 48 hours. A report from the "Maciverblog" indicates that they are "hoping to achieve a world first by shooting a video on the rock, more than 240 miles west of mainland Scotland, and streaming it live on the internet on each of the three days they plan to spend there. A Scottish cameraman is also going to be in the landing party and, if conditions are good and the technology works, hopes are high of the first live TV news broadcast from the rock. Rockall, the summit of an ancient volcano, stands about 60 feet above the Atlantic. Landing on the rock is very difficult as it is steep even on its easiest side. The area is infamous for its high seas and very changeable weather throughout the year."
Read the complete blog by journalist Iain Maciver at:
http://maciverblog.co.uk/2009/04/15/belgian-hams-bid-to-broadcast-from-rockall/
Also, check-out the Rockall Web site for latest news and last minute updates at: http://www.rockall.be

NA-191. Operators Klaus/DK6AO, Gunter/TI7WGI, Andy/DH8WR (EA2CRX), Norbert/DL2RNS, Rene/DL2JRM and Daniel/DL5YWM will be active as TI7KK from San Jose Island (Guanacaste Province), Costa Rica, until April 20th. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK31. QSL via DK6AO, direct or by the bureau. For updates and more info, please visit their Web page at:
http://ti7.info

SA-021. Members of the Radio Club Grupo DX Bahia Blanca will be active as L21D from Ariadna Island, located 70km south of Ingeniero White Harbour, in the natural reserve of Bahia Blanca, May 1-3rd. Activity will be on 80-10 meters using CW, SSB and PSK. QSL as per operator's instructions.

K4, UNITED STATES (Special Event). Operators from ARES in the Summerville, SC, area (Dorchester County, Grid locater EM93), will activate the special callsign K4E during an ARES Earthquake Emergency Communication Awareness Exercise, April 21-22nd. When not passing event traffic, K4E will be available for QSOs on 80-15 meters, as well as 2 meter FM local QSOs. QSL via W4NSC. This training exercise is to demonstrate the cooperation needed between the firemen, policemen, hospital workers, hams, and other public service personnel throughout South Carolina in time of an emergency. South Carolina is prone to hurricanes, and it has been determined that a major earthquake occurring in the greater Charleston, SC, area would divide the area into 18 "islands" due to damage to infrastructure such as bridges and roads. Each of these "islands" is equipped with a structure containing various emergency supplies and Amateur radio equipment and antennas. Each POD (Points of Distribution) has a generator and is environmentally controlled. This exercise is a test of one of those "islands".

QSL INFO AND NEWS.....
4S7NE QSL NOTE. Nelson, 4S7NE, states: "Please send GS (green stamps). It's very difficult to exchange IRCs here. If you are sending mail without registering, please secure the envelope well. (See QRZ.COM)"

NEW QSL ROUTE (GI5K and MI0LLL). Phil, G3SWH, announces that effective immediately, he has been appointed the QSL manager for GI5K and MI0LLL. Phil states, "I will shortly be adding a log search page for each callsign to my Web site <http://www.g3swh.org.uk/>. I am also arranging for any unanswered, direct QSL requests to be forwarded to me by Chris and for the RSGB QSL Bureau sub-manager to forward cards directly to me."

QSLS VIA LOTW: C91TX

QSLS RECEIVED VIA MAIL: 3D2NB, 3D2OU, 4A7L, 5L2MS, 6Y5/W5ZL, AH2R, AH0F/KH2, C91LW, C98LW, CQ3T, E51QQQ, EK3GM, FH/G3SWH, FW5RE, HP2/CX2AM, HS0ZEE, J88XF, JT1BH, KH8Q, KP2/K3CT, OX2A, PY0S/PS7JN, SV9COL, T27A, T27OU, T47C, T88WW, TF/G3SXW, TG9AHM, TT8PK, TY6A, V73M, VK9DWX, VP2V/SP3IPB, VP5/W5CW, VP6DX, VP8DLQ, VP8YLE, VP8YLI, W3A, XW1B, YU1EXY, YW1TI, ZD8UW, ZF2AM, ZK3RE and ZS1JX

QSLS RECEIVED VIA THE BUREAU: ER1BG, ER1OI, ER1RR, ER1WK, ER10KDR, ER4DX, ER570C, ER7C and ER0ITU

S0, WESTERN SAHARA (Update). The Tifariti Gang, signing S04R, is now QRT as of 0500z, April 18th. Operation netted 37,005 QSOs (CW - 20,274, SSB - 14,342 and RTTY - 2,389). The S04R log is now available online at: http://www.dxfriends.com/s04r/log.php
QSL via EA5RM. For more information, please visit the S04R Web site at: http://www.dxfriends.com

S2, BANGLADESH. By the time you read this Ramon, DU1UGZ, is expected to be active as S21UGZ from Dhaka City until June 20th, depending on his work schedule. He will be using a low band dipole at first, so his emphasis will be on 80/40 meters SSB and RTTY. From May through June, he will be using a beam for 10, 12, 15, 17 and 20 meters. He hopes to have a linear in use starting in May as well. QSL via DU1UGZ.

SILENT KEY. Philippe, LX2A/LX7I, informs OPDX that Charly Hausemer, LX1AJ, from Differdange, Luxembourg (LX), became a "Silent Key" (SK) on April 7th, at the age of 89. He was the oldest ham in LX-land and was a licensed amateur for more than 60 years. He was a keen DXer and had contacted nearly all the DXCC entities on SSB. He was part of a group of hams who established amateur radio in Luxembourg, and also the "Reseau Luxembourgeois des Amateurs d'Ondes Courtes (RL) (in English, Luxembourg Amateur Radio Society). He was one of the first hams who got licensed. Philippe, LX2A, states, "He was my uncle and introduced me into amateur radio and always supported me in this great hobby. Putting up the contest station LX7I would never have been possible without his help. He was a great OM and I hope to be able to promote amateur radio in Luxembourg and worldwide like he has always done it." OPDX and its readers would like to send out our deepest sympathy to the family and friends of LX1AJ.

SX5, DODECANESE (GIOTA Op). Members of the Dodecanese Radio Amateur Association (DRAA) will be active as SX5SYMI from Symi Island between July 31st and August 3rd. Activity is good for the GIOTA (Greek Island On The Air) as DKS 032 and also the IOTA as EU-001. QSL direct to SV5FRI.

TI6, COSTA RICA. Operators Orrin/K9KEJ and Don/W9YOR will be active as TI6/homecall between April 28th and May 1st. Activity will be SSB only on 40/20/17 meters. QSL via TI6/K9KEJ via EB7DX and TI6/W9YOR to his home callsign.

V63, MICRONESIA. Operators Shoji/JA7HMZ (V63DX) and Masayuki/JH7IOS (V63CW) will be active from Pohnpei Island (OC-010) between May 11-16th. Activity will be on 40-6 meters using CW and SSB. QSL via their home callsigns.

VK9M, MELLISH REEF. The VK9GMW DXpedition went QRT at 0400z on April 13th, making 20,058 QSOs, of which 2028 were on 160 meters. The team has arrived safely at the Australian mainland (Airlie Beach) on April 16th (0600z). QSL via HA7RY. Remember, the "Online QSL Request System" (OQRS) is available for both direct and Bureau cards on their Web page at: http://www.vk9gmw.com

YW0, AVES ISLAND. The 4M5DX Group, which was expecting to activate YW0A from Aves Island in March, is still waiting for a scheduled day by the Venezuelan Navy for transportation.

ZS8, MARION ISLAND. This is per the ZS8T Web page <http://zs8t.net>: "ZS8T is now QRT. He leaves the island soon and is expected back in ZS mainland in the middle of May. QSLs will be uploaded to LoTW. Additionally, all QSLs which are sent to the manager will be answered.

Any questions regarding his operation from Marion Island should now be
directed only to ZS6GCM.

Gee I thought the KGB tells the Democrats what to say or else, and the Democrats do their bidding and define the Republicans with mass disinformation so they will be ashamed of themselves. Meanwhile, The Dems bring about "change" by destroying the economy and proceed to surrender to the UN by apologizing to all countries who hate us, thereby validating and vindicating their hatred and reason for perpetrating violence against US citizens and interests. It's a no-brainer! Dems can accomplish that by blaming GW for everything in order to divert attention from their treason. Remember, these are the people who gave us the UN, backstabbed Chiang Kai-shek and brought us Mao, and excused the Soviet purges and likened the gulags to a cross between "Hudson's Bay Company and TVA". Don't forget the sale of the latest Nuke Weapons technology to China so that soon they will be able to Nuke the US and simply blame it on GW. BTW now that the Department of Homeland Security has been re-purposed to profile and target Christians, law abiding gun owners, people who speak out against "This Historic Election" and returning war veterans, the purges
can begin.

Update! Obama has just sent orders for the fed gov't to cut the budget in the departments. Probably to purge the evil conservative America loving

white man from the planet. Get ready to be "normalized". If you have a back yard better start planting your farm so the government can confiscate it for the revolution.

1955. Amateur Radio Newsline(tm) Report 1654 - April 24 2009

Amateur Radio Newsline(tm) Report 1654 - April 24 2009

Now, Amateur Radio Newsline report number 1654 with a release date of Friday, April 24th, 2009 to follow in 5-4-3-2-1. The following is a Q-S-T. South Africa proposes a major increase in the fee to get or renew a ham radio license, the 70 centimeter band now seems safe down-under. NASA says the sun is kind of spotless and a big fine against an unlicensed broadcaster in Milwaukee. All this and more on Amateur Radio Newsline(tm) report number 1654 coming your way right now.

(Billboard Cart Here)
**

WORLDBEAT: SOUTH AFRICA PROPOSES LARGE HAM LICENSE FEE INCREASE

The Independent Communications Authority of South Africa has published some far-reaching proposals to the restructure of license fees in that nation. A major increase for a ham license is included. Jim Davis, W2JKD, has the details:

--

The licensing authority better known by the acronym ICASA proposed that fees for an amateur radio license be increased to 120 South African Rand or $1 2.50 per year. This from the current fee of 27 Rand or $2.80.

Also, to reduce the administrative burden on the regulatory agency the fees would be payable for a period of 5 or 10 years in advance. This means that a South African ham renewing his or her license would have to pay about $ 52 for a five year license or about $85 for a ten year ticket.

In addition, the fees for beacons, change of callsign, guest and special event licenses, repeater stations including radio links, packet radio digipeaters and bulletin boards would all be increased to the new minimum yearly fee. This fee would also apply to experimental stations for weather reception and retransmission and listener only licenses as well.

Reaction has been swift from the South African Radio League. At a Strategic Council meeting the SARL reviewed the draft fees and new structure. It says that it will be filing in opposition well in time before the comment cutoff deadline. The Council's view is that while it understands that the current fee of $2.80 a year is due for revision, the proposed minimum fee represents an excessive increase

and that paying five years or ten in advance should be by choice and not compulsory.

--

For its part ICASA says the spectrum fees are not intended to raise extra revenue for the national treasury. However it notes that there is a general principle that the application and annual fees in total should at least cover the cost of spectrum management and monitoring. (SARL)

**

RESTRUCTURING: 70 CM APPEARS SAFE DOWN-UNDER

The threat to 70 centimeter ham radio operations down-under appear to have ceased. This as the Australian Communications Authority indicates that its current review of 400 MHz and above spectrum no longer includes the amateur band 430 to 450 MHz.

This time last year the ACMA was seeking comments on other users being given access to the sub-bands 430 to 440 and 440 to 450 MHz. Now the regulatory agency says that 430- to 440 MHz is used for defense radar and the amateur services including amateur satellites,. This the authority says is in line with internationally harmonized allocations. It also says that its analysis of 440 to 450 MHz has led it to conclude that there is no space for additional use of this band for the land mobile service. (WIA News)

**

THE SOLAR CYCLE: NASA CALLS IT A SPOTLESS SUN

The lack of High Frequency propagation could continue. This, as NASA has announced that the sun has plunged into the deepest solar minimum in nearly a century.

According to the space agency, Sunspots have all but vanished and consequently the sun has become very quiet. It notes that in 2008, the sun had no spots 73% of the time,. That was a 95-year low. Now, in 2009, sunspots are even more scarce, with the "spotless rate" jumping to 87%. How long this downward sunspot spiral will continue is unknown. (Spaceweather)

**

RADIO STATS: MORSE EXCEEDS SSB IN 2008 CQ WORLD WIDE DX CONTESTS

Even with the poor propagation, more than 10,000 logs have been submitted f or the 2008 running CQ World Wide DX Contest. This, according to Contest Director Bob Cox, K3EST, who says that's a new record for the event.

But here's the real surprise for those who think that Morse is dead or dying. Cox reports that the number of CW logs have exceeded the

number of phone logs for the first time in more than 20 years. A total of 5013 SSB logs and 5272 CW logs submitted.

SSB results of the 2008 CQWW Contest will be published in the August 2009 issue of CQ magazine with the CW results in the September issue. (CQ)

**

ENFORCEMENT: ALLEGED UNLICENSED BROADCASTER FINED $10000 BY THE FCC

Federal Communications Commission has affirmed a $10,000 fine issued against Steven A. Skalecki of Milwaukee, Wisconsin. This for allegedly operating an unlicensed broadcast station and failing to heed FCC warnings to take it off the air. Bruce Tennant, K6PZW, has the rest of the story:

--

The story goes back to March 25, 2006. That's when FCC agents observed a radio station broadcasting on 92.9 MHz and located that the station was operating from a single family residence in Milwaukee and that Skalecki lived there. The agents took field strength measurements and determined that the signals being broadcast exceeded the limits for operation under Part 15 of the Commission's Rules and therefore required a license. An agent searched Commission databases and found no evidence of a Commission authorization for this operation on 92.9 MHz in Milwaukee, Wisconsin. Later that day, the agents knocked on the front door but there was no response. Before leaving they wrote up a Notice of Unauthorized Operation and left it between the inner and outer doors. It directed Skalecki to terminate operation of the unlicensed station immediately. As a follow-up the FCC sent a registered letter to Skalecki with the same demand. The return receipt from the U.S. Postal Service shows that Skalecki signed for and received the notice on April 24, 2006.

Then on May 6th Commission agents again traced the broadcasts on 92.9 MHz to Skalecki's residence. They again tried to talk with those in the home but received no response.

On May 10th, the Chicago office received a response to the a Notice of Unauthorized Operation issued to Skalecki. In it he denied having any broadcast equipment and also stated that no local broadcasts can be heard on 92.9 MHz. Skalecki also acknowledged receipt of the notice left in the front storm door by Commission Agents on March 25th.

On March 1st, 14th, 24th as well as May 28th of 2007 Commission agents again traced the broadcasts on 92.9 MHz to Skalecki's home. On December 14, 2007, the Chicago Field Office issued a Notice of Apparent Liability for Forfeiture to Skalecki in the amount of $10,000 for operating radio transmitting equipment on the frequency 92.9 MHz without a license. In his response to the proposed fine Skalecki again denied operating an unlicensed station. He did admit that he

operated a weather monitoring station from that property, but claimed that the unlicensed broadcast station was operating from another nearby residence on which several antennas are located.

On March 13th, the FCC rendered its decision on Skalecki response. It said that it would not cancel the proposed forfeiture based on Skalecki's claim that he was not operating an unlicensed broadcast station from his home. It said that only evidence Skalecki provided in support of his claim is a list of nine dates on which he states he observed a station operating on 92.9 MHz from a nearby residence but the FCC countered that it had determined the signals were coming from Skalecki home on those dates.

The FCC also rejected Skalecki's claim that it could not assess a forfeiture because agents were unable to conduct an inspection. The FCC says that whether or not agents were able to inspect the station does not affect its determination here that Skalecki violated Section 301 of the Act based on the direction finding evidence collected by its agents. It said that even if he did not personally operate t e station that Skalecki is responsible for its unlicensed operation because he provided the facilities used in its operation. As such, he is required to pay the fine.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The FCC gave Skalecki the customary 30 days from the date it issued its forfeiture order for him to pay the $10,000 fine. He also has the option of filing an appeal. (FCC)

RADIO LAW: COMMERCIAL RADIO OPERATOR LICENSE RENEWALS

The FCC says that holders of certain commercial radio operator licenses are no longer required to file renewal applications. Specifically, it extended the terms of GMDSS Radio Operator's Licenses, Restricted GMDSS Radio Operator's Licenses, GMDSS Radio Maintainer's Licenses and several other classes to the lifetime of the holder.

Unaffected by the change are holders of General Radiotelephone Operator Licenses, Restricted Radiotelephone Operator Permits, and

Restricted Radiotelephone Operator Permits for Limited Use. All of these are already valid for the lifetime of the license holder. More details are at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-658A1.doc (CGC, FCC)

**

ENFORCEMENT: FCC SUSPENDS THREE COMMERCIAL RADIOTELEGRAPH LICENSES

Three people the FCC says did not follow the rules in getting their commercial radiotelegraph licenses have had them suspended. Don Carlson, KQ6FM, has the details:

--

The FCC has suspended the Second Class Radiotelegraph Operator's Certificate held by Chicago residents Ahmaad D. Brunson, Todd C. Robinson and Jason C. Robinson. This after an investigation by the regulatory agency found that the three may have obtained their certificates by fraudulent means.

All three filed applications for a Second Class Radiotelegraph Operator's Certificate on February 24, 2004. The applications were returned because none were accompanied by a Proof of Passing Certificate. They then filed amended applications with what appeared to be a Proof of Passing Certificate signed by three examiners associated with National Radio Examiners. Each certificate documented the successful completion of Written Elements 5 and 6 and Telegraphy Elements 1 and 2 by each applicant. The FCC then granted each of the three a Second Class Radiotelegraph Operator's Certificate.

But based on subsequent developments, the FCC came to question the authenticity of the Proof of Passing Certificates. So the agency contacted National Radio Examiners and asked for clarification. After investigating the matter, National Radio Examiners informed the FCC that no examinations had been administered in Chicago by their examiners on March 27, 2004. They also confirmed that the signatures of the three examiners appearing in the Proof of Passing Certificates were inconsistent with the actual signatures on file. National Radio certificates also stated that the typeface used for serial numbers was different than theirs that the watermarks were missing. Based on what it had learned, the FCC wrote official Letters of Inquiry to Brunson and the two Robinsons asking that they explain the discrepancies. The letter to Brunson was returned marked undeliverable. Jason Robinson never responded. Only Todd Robinson filed a written response. In it he claimed never to have taken any radiotelegraphy exams proctored by the National Radio Examiners nor submitted an application to the FCC. After weighing the evidence the FCC has decided to suspend the Second Class Radiotelegraph Operator's Certificates of all three operators for the remainder of each license term unless each files a written request for a hearing within a fifteen-day period from receipt of the

Suspension Order. -- If any or all do file appeals the suspensions will be held in abeyance until the conclusion of the hearing.

(FCC) ** RADIO AND THE NET: BROADCAST RADIO HOLDING ITS OWN VS. THE WWW

According to a survey from American Media Services, Internet-only radio is gaining ground as a way to discover music. None the less, terrestrial broadcast radio is not loosing any audience to it.

In talking to 1,000 Americans by phone at the end of March, OmniTel personnel handling the survey found that 27 percent of those polled say they have listened to Internet-only radio on an Internet site. This includes 47 percent of young adults age 18 to 24 and about 34 percent of those under the age of 50.

But even as new media, such as Internet-only radio, continue to gain in popularity, regular radio is maintaining its audience. In the latest American Media Services survey, 73 percent said they are listening to broadcast radio about as much or more than they did five years ago. (RW)

**
TOWER ISSUE: A PROPOSED 1500 FOOT BROADCAST TOWER IN ILLINOIS

A proposed 1500 foot self supporting radio and television broadcast tower is polarizing some of the citizens of Clear Lake, Illinois.

BMB Communications Management is working to get approval to build the broadcast tower in the southeast corner of McHenry County College's main campus. The Oklahoma-based company says that it will pay $6 million dollars for the land at closing of the sale. It also would reward the college an additional $1 million dollars if the company manages to sell all five broadcast slots on the tower in the first five years of the agreement.

A local attorney who worked on getting zoning approval for a 405-foot FM radio tower, supports selling the land for the tower. He calls it a financial windfall for the college. On the other side is a commercial pilot who put five of his children through McHenry County College. He has expressed several safety concerns ranging from the safety of the students to the safety of local pilots.

John Maguire is the the co-owner of BMB Communications Management. He says that if its built, it would be one of the tallest towers of its kind in the world. (RW)

**

NAMES IN THE NEWS: VE5SF APPOINTED TO CAC

Radio Amateurs of Canada has then chosen Sam Ferris, VE5SF, to replace David Shipman, VE7CFD as its representative on the ARRL Contest Advisory Committee. Shipman had held that position for the past ten

years. Ferris is a well known Canadian contest enthusiast. (RAC)

**

NAMES IN THE NEWS: KI6CUX NAMED ARRL GOLDFARB SCHOLARSHIP WINNER

The ARRL Foundation Board of Directors selected Dean LaBarba, KI6CUX, of Long Beach, California, to be this year's recipient of its William R. Goldfarb Memorial Scholarship. LaBarba will graduate from Woodrow Wilson High School this year with a GPA of 4.0. He holds a Technician class license and since 2007 has served as president of his school's Amateur Radio Emergency Communication team. After graduating high school he plans to attend Westmont College in Santa Barbara, California. (ARRL)

**

With some words about Amateur Radio Newsline's finances here's our support fund administrator Andy Jaema, N6TCQ:

--

In the Merry Month of May of last year we heard via PayPal from Michael Scheliga, Daryl Stout, Scott Currier of Haverville, MA; Rory Shaffer-Roebling, NJ; Thomas Home- Takoma Park, MD; Murray Hunt-Odenton, MD; David Carter- Washington, D.C.; Jesse Lindley-Greensboro, NC; Robert McClintock, N3RZ I & KB3PHI in Franckville, PA; Robert Harlan- Mansfield, OH; Robert Mallory - KD8HXT, North Canton, OH; Paul Vinoski- Fisher, WV; Doug Papciak- Tucker, GA; James Drenthe in Galesburg, MI, who is a regular contributor and Wayne Strickland-W9BBB, Chicago.

Also from Illinois, John Leonard- W9JBL in De Kalb; Joseph Kratky-KA9KBU in Hickory Hills ; James Langsted- Golden, CO; Lee Dusbabek-WR7NV, Las Vegas; David Billeci- WA6UHA, San Francisco;

Also from California, Russell Williams- W6OHM in Latrobe; Matt Sturtz-Broomfield Roy Hepp-Carpinteria Frank Brand-Tujunga. And finally, and through the magic of PayPal, Mitchell Wolfson- DJ0QN, Unterschleissheim, Germany.

That was fun! Got to exercise my schprechen ze Deutch!

That's quite a list, but you have to remember that most of those contributions were on the order of $10-$20, and this was right after a major capital campaign.

It costs almost $1000 a month to gather the news and put these newscasts on the air. And right now, things are pretty grim. Please do what you can to keep these newscasts on the air by logging onto our website and going to our PayPal secure contribution link, or contacting us at our Arcadia support fund address given at the end of this newscast.

For now, I'm Andy Jarema, N6TCQ, and thank you.

--

Thank you Andy. (ARNewsline Support Fund)

HAMVENTION HAPPENINGS: FREE HIGH SCHOOL STUDENT TICKETS OFFERED

The Dayton Hamvention has announced that high schoolers will be welcome guests at this years event. According to a posting on the Hamvention website, high school students can obtain a free ticket by filling out a form that's downloadable from the website and present it at the will call window to receive their student ticket. Teachers may order student tickets by making their request on school letterhead.

All persons over 12 years of age attending the Hamvention are required to have an admission ticket. Age 12 years and under are admitted free without a ticket if accompanied by a paid ticket holder. Full information on this Hamvention educational assistance program is on line at www dot hamvention dot org slash tickets dot php. Scroll down to the bottom of the page to the words 2009 Student Tickets.

Hamvention 2009 is slated for the weekend of May 15, 16 and 17 at its traditional home at the Hara Arena in suburban Dayton, Ohio. Its theme this year is the word DREAM. That stands for Digital Radio Enabling Amateurs to do More. The Hamvention runs from May 15th to the 17th at the Hara Arena in suburban Dayton, Ohio. (Hamvention.org)

**

HAMVENTION HAPPENINGS: KIDS TO BE HONORED AT YOUTH FORUM

And another first for the Dayton Hamvention. Educator Carole Perry, WB2MGP, tells us that this year there will be a special ceremony to honor the speakers participating in her very popular Youth Forum. This ceremony is being made possible by ICOM America, MFJ Enterprises, the Radio Club of America , and the L'Anse Creuse Amateur Radio Club. Carole says that they will be donating some very special gifts to each of her nine young speakers. There will also be door prizes for kids in the audience as well. The Dayton Hamvention Youth Forum is Saturday, May 16th from 11:30 a.m. to 1:15 p.m. in Meeting Room 1. (WB2MGP)

**

HAMVENTION HAPPENINGS: ARRL AWARDS CARD CHECKING.

Still with Hamvention news, Bill Moore, NC1L, has announced that card checking will be done at the ARRL National Convention in Dayton during all operating hours of the convention Friday, Saturday and Sunday. Moore says that there are some important guidelines that will help make the card checking process run smoothly. You can find that information at www.arrl.org/blog/Century%20Club%20Awards (OPDX)

**

SOCIAL SCENE: SEVHFS CONFERENCE APRIL 24 - 25

And a reminder that the Southeastern VHF Society is again sponsoring its yearly conference which is this weekend April 24th and 25th in Charlotte, North Carolina. For more information about the conference and the fall sprints which the society also sponsors, go to www.svhfs.org on the World Wide Web. (SVHFS)

**

EMERGING TECHNOLOGY: COLLEGE RADIO TUNER FOR IPHONE

Now here's a new toy that might quickly be adapted for use in ham radio. Backbone Networks, a Web radio service provider, has developed software called the College Radio Tuner for use with the Apple iPhone and the iPod Touch. This is an application for streaming college-based radio stations that works in coordination with Backbone Networks and its partner, the Intercollegiate Broadcasting System and its IBS Student Radio Network.

The College Radio Tuner software is available for free from the Apple Store . The Intercollegiate Broadcasting System maintains the constantly updated station database. The player can provide information and art for currently playing stations, songs and provide a purchase link for the Apple iTunes store.

Now, if some enterprising ham could find a way to adapt this technology to monitor repeaters in a geographic area they too might be available to monitor from anywhere without the need to carry a separate H-T. (RW)

**

HAM RADIO IN SPACE: WORK CONTINUES ON SUITSAT

In ham radio space related news, word that a SuitSat-2 team recently met in Phoenix, Arizona. Reports are that the group primarily worked on software development matters as well as some final coordination on the cabling and hardware.

The software team was able to run some integration tests and achieved the first radio frequency (RF) output of the system. During the testing, the team demonstrated the CW and voice message

transmissions. Work continues on the solar panel mounting.

The Amateur Radio on the International Space Station or ARISS group plans to have the SuitSat-2 hardware ready for delivery by September. (ANS)

**

HAM HAPPENINGS: N6R - THE REAGAN FIELD DAY COMMEMORATIVE STATION

N6R commemorating the lives of President & Mrs. Ronald Reagan will again be operational for Field Day from the grounds of the President Ronald Reagan Presidential Library & Museum in Simi Valley, California. N6R will operate 1800 UTC on June 6th to 1900 UTC on June 28th using various modes on 80 meters through 10 Gigahertz. This will be the ninth year of Field Day operations from the Presidential Library. More is on-line at www.vcars.org (N6ZE)

**

DX

In DX, NK0S says that he is currently converting the paper logs of VQ9HB, to electronic format so they can be uploaded to Logbook to the World. After the logs are uploaded NK0S will act as the QSL Manager for card requests for VQ9HB's operation between December of 1989 and May of 1990.

KB4CRT will be active as from Monserrat as VP2MRT between June 12-19th. His operation will include CW, SSB, possibly PSK, and the June VHF Contest. Asian stations are suggested to look for him on 20 meters between 1200 and 1300 U-T-C. QSL via KB4CRT.

DU1UGZ has been in Dhaka Bangladesh since April 12th and will be there until about June 20th. His callsign is S21UGZ and is operating SSB and RTTY mainly on 80 and 40 meters with some activity on the other High Frequency bands including 12 and 17 meters. QSL as he directs on the air.

K7WZB, and K9WZB, will stay on from the Cayman Islands through May 6. They will sign ZF2ZB using SSB, CW, RTTY and PSK 31 on 160 through 6 meters. QSLs only direct to Garry Fisher, K9WZB.

Tunisian scout special event station TS1LYMC can be found working in CW, SSB, RTTY, PSK and SSTV 80 through 10 meters. It will be operational through April 30th. QSL only direct to TS1LYMC, 33 Rue Plaine Lune Borj Louzir, Ariana, 2073 Tunis, Tunisia.

DL2SBY and DF1SR will be active from Lichtenstein through May 4th on 80 through 10 meters using CW, SSB and RTTY. There will also be some operation on 13 and 23 centimeters for weak signal E-M-E experiments as well. Two separate callsigns for this operation with DL2SBY portable HB0 for the High Frequency bands and DF1SR stroke HB0 used for E-M-E. QSL via DL2SBY, either direct or via the bureau.

Lastly, CT1FBF reports that the Portuguese ham radio national society has just concluded the installation of station CS5BLA which is the first multi-band beacon cluster in Portugal. Transmitters operate on 50.076, 144.410, 432.425 MHz and 1.296.825 MHz. QSN reports go to cs1rla <dot>arla <at> gmail <dot>com.

(Above from various DX news sources)

**

THAT FINAL ITEM: IT THINKS IT'S A POLICE SCANNER

And finally this week the story of a toy broadcast band radio that thinks it's a VHF and UHF police scanner. Here's John Lego, VK3BUI.

--

The German powers that be are investigating a kids' miniature Mickey Mouse radio which apparently entertains nippers with police radio traffic.

The Chinese-made novelty came with issue 12 of Micky Maus magazine. Hamburg police confirmed: "We've received reports and detectives are finding out whether it's in violation of telecommunications law."

A representative of publisher insisted the radio had been "scrupulously tested at an institute for toy safety" and "should only be able to tune into normal radio stations".

The statement further offered a typically Teutonic solution to inadvertent Police snooping, ordering the magazine's readers: "The radio is exclusively designed for listening to music. Everything else is not allowed."

I'm John, VK3BUI.

--

Now, what was it that the late actor Brodrick Crawford used to say on the 1950's T-V series Highway Patrol? Oh yes: 2150, clear. (WIA News)

==> EMCOMM WORKSHOPS AT 2009 NATIONAL HURRICANE CONFERENCE FOCUS ON AMATEUR RADIO

On April 6-10, Amateur Radio had its largest presence ever at the 2009 National Hurricane Conference in Austin, Texas <http://www.hurricanemeeting.com/>. Representatives from the ARRL, WX4NHC <http://www.wx4nhc.org/>, the Amateur Radio Station at the National Hurricane Center (NHC) <http://www.nhc.noaa.gov/>, the Hurricane Watch Net (HWN) <http://www.hwn.org/> and VoIP Hurricane Net (VoIPWXNet) <http://www.voipwx.net/> completed several presentations at the conference as well as a presentation at the local Austin Amateur Radio Club. According to ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD, the workshops were very well attended with more than triple the participation of prior conferences.

"The Austin Amateur Radio Club, along with ARRL Field Organization Section and Division officials did an outstanding job of promoting the various presentations at the conference," Dura said. "It is these coordinated efforts at the local club and ARRL Section, Division and National levels that will allow us to propel forward with our efforts in emergency communications and train people, allowing us to become a more valuable asset to served agencies."

Assistant WX4NHC Amateur Radio Coordinator Julio Ripoll, WD4R, thanked everyone who participated in the meeting "for making our NHC 2009 presentations and experience so successful and enjoyable. We had one of the largest attendances for the Amateur Radio workshop that I can remember."

Nearly 60 people attended the Amateur Radio Disaster Communications Workshop on the afternoon of April 7. WX4NHC Amateur Radio Coordinator John McHugh, K4AG, and Ripoll made the first presentation of the workshop. Explaining the 29 year history of their work at the NHC and the importance of measured surface data and damage reports, the pair told how this knowledge allows hurricane specialists to make better forecasts. They also told some stories and showed videos from several of the most critical activations over the past few years. They discussed the importance of the reporting from all stations, stressing that they will take reports by any means in support of the mission to help save lives.

Director of Operations of the VoIP Hurricane Net Rob Macedo, KD1CY, gave a presentation on the VoIP Hurricane Net and the role it plays in gathering data for WX4NHC. He also explained how it also can be used to connect various National Weather Service forecast offices, as well as local and regional Emergency Operation Centers during hurricanes. Macedo also explained how the net is looking for more contacts within the affected area to connect to the net and more amateurs to relay data from local and regional nets in the affected area of hurricanes. "The VoIP Hurricane Net relays info to WX4NHC using any and all means of reliable information from all sources to give WX4NHC the most information possible from the surface during a hurricane," Macedo explained.

Macedo also presented a session on the International Radio Emergency Support Coalition (IRESC) <http://www.iresc.org/> and its role in providing translators and additional contacts in the affected area during hurricanes and other disasters. "This includes monitoring and translation of international media broadcasts and press releases that the NHC may not normally receive," he said. "The IRESC EchoLink conference is often connected to the VoIP Hurricane Net during hurricanes to support both the net and listen-only activity for stations outside of the affected area that want to monitor the VoIP Hurricane Net during hurricanes."

Assistant Net Manager of the Hurricane Watch Net Brad Pioveson, W9FX, gave a presentation on the HWN's 44 year history. Explaining that the HWN has been around longer than operations at WX4NHC, Pioveson described how in the days before WX4NHC, HWN ham radio operators -- using phones

and faxes -- passed information on tropical advisories to the NHC. He also detailed some potential changes at the HWN that will include not just the monitoring of their traditional 14.325 MHz frequency, but also branching out onto other bands.

"Given the extremely poor propagation that we've seen lately," Pioveson said, "we see the need for the HWN to expand its reach to other HF bands. The Maximum Usable Frequency simply doesn't allow for 20 meters to propagate as it has in the past. We need to scale our operations to other HF bands when propagation is poor so we can support stations in the affected area of a hurricane."

ARRL Southeastern Division Director Greg Sarratt, W4OZK, explained how the Alabama section is preparing for an upcoming hurricane interoperability exercise, giving a breakdown of the Alabama Section by region. Sarratt explained that the focus of the exercise is a "worst case scenario hurricane" with cell phones rendered unusable during the hurricane exercise. He also gave a breakdown of the ARRL HQ disaster response mechanism, saying that all ARES members and leadership should recognize and observe the ARES Field Organization structure <http://www.arrl.org/FandES/field/org/>.

On the evening of April 7, the same presenters gave similar presentations to the Austin Amateur Radio Club meeting after a BBQ put on by the local club. West Gulf Division Director Dr David Woolweaver, K5RAV, was present for all the Tuesday workshops and the local club meeting. At the meeting, Woolweaver thanked everyone for their support of the conference workshops and for attending the club meeting. He also took the opportunity to announce that he was appointing Lee Cooper, W5LHC, president of the Austin Amateur Radio Club (AARC), as Assistant Director for Emergency Communications in the West Gulf Division. "This is a necessary appointment in our Division to address the importance of emergency communications," Woolweaver told the group.

On April 8, Dura and Macedo gave a workshop to emergency management officials and representatives of government agencies. The workshop focused on situational awareness and disaster intelligence, stressing its importance to Emergency Management and how it creates more opportunities to utilize Amateur Radio. The presentation was followed by a question-and-answer session relating to Amateur Radio Emergency Communications. "Collecting and gathering data and sharing information and reporting during disasters is another way Amateur Radio can assist beyond the typical message handling," Dura said. "Monitoring critical infrastructure -- such as in the case of the Red River in North Dakota -- is an example, and these examples can be applied to hurricanes."

Macedo gave the audience several disaster intelligence examples used during hurricanes, as well as from his ARES and SKYWARN work in the ARRL's Eastern Massachusetts section: "On several occasions, SKYWARN spotters gave information to emergency management. This information, along with other data, helped emergency management officials to escalate their response in several recent disaster-related incidents. This model

can also be utilized during hurricanes."

During the closing session, Director of Safety Operations and Emergency Management for the City of Houston Arcadio Avalos asked several questions, starting a discussion on coordination and credentialing. "Based upon his experiences from Hurricane Ike last year, he said he understood the importance of Amateur Radio and wanted to assist in easing logistical issues for the next time this work is needed in his area," Dura said. "He will be assisting to ease those issues on the public safety side of things. He also took copious notes on how he could improve things on the Amateur Radio side. He mentioned that he viewed Amateur Radio as a 'huge asset' in this task and wanted to ensure that no coordination issues arise for next time so Amateur Radio support can be utilized even further and more efficiently."

All sessions were videotaped through the efforts of professional videographer and VoIP Hurricane Net Control Scheduler Jim Palmer, KB1KQW. Macedo said that the videos should be available the first part of May on the North Shore Radio Association (NSRA) Web site <http://www.nsradio.org/video>.

The 2010 National Hurricane Conference is scheduled for March 29-April 2 in Orlando, Florida.

==> BOSTON AREA HAMS PROVIDE COMMUNICATIONS SUPPORT FOR ANNUAL MARATHON

More than 250 Amateur Radio operators provided communication support for the 113th running of the Boston Marathon <http://www.bostonmarathon.com> on Monday, April 20, also known as Patriots' Day <http://en.wikipedia.org/wiki/Patriots_Day>. With more than 26,000 official runners and 500,000 spectators along the 26 mile route, the marathon utilized amateurs at the starting line, along the course at each water and first aid station, and at the finish line.

"This is the largest public service event in New England in terms of the number of Amateur Radio operators required for a one-day event, and we can always use more hams to help us," said Marathon Amateur Radio Communications (MARC) <http://marc.mmra.org/marc/index.html> Course Coordinator Steve Schwarm, W3EVE. "We're glad that the weather was cool and the number of ambulance requests this year was lower than past years, where we had higher temperatures and more medical issues."

Even with the more temperate weather, MARC Finish Line Coordinator Paul Topolski, W1SEX, said the medical tents at the finish line were near capacity by mid-afternoon. "Hams provided communications, status and logistical issue updates between the medical tents to our finish line net control as needed," he said.

The Massachusetts Emergency Management Agency (MEMA) was active with operations at the State Emergency Operations Center in Framingham, with their operations room acting as a Unified Command Center (UCC) for the marathon. RACES members staffed the communications room at the SEOC, and ARRL Eastern Massachusetts Section Manager Mike Neilsen, W1MPN, staffed

the UCC. Neilson fed status reports on any issues along the marathon route into the operations room, as well as issues from the UCC to the operations room.

"This is the first time we've had an Amateur Radio Operator in the operations room of the UCC," said Massachusetts State RACES Radio Officer Tom Kinahan, N1CPE. "We have been coordinating with the Boston Marathon Net Control and the finish line communications in Boston to provide updates into our station and to our Amateur Radio operator in the UCC."

The Net Control center is located with a line-of-sight to the Boston area and to the entire 26 mile route in case simplex communication is required. More than a dozen repeaters were utilized to provide overlapping coverage to the marathon route. The Clay Center Amateur Radio Club, the Minuteman Repeater Association, the Framingham Amateur Radio Association and many other clubs in the New England area support the marathon operations.

With so many amateurs placed along the marathon route, ARRL Eastern Massachusetts Section Emergency Coordinator Rob Macedo, KD1CY, placed Eastern Massachusetts ARES on standby in case something went wrong along the marathon route, or a major incident occurred coincident with the marathon. "This is standard operating procedure for 'Marathon Monday'" he said. "We want our members to maintain a heightened state of awareness during the event."

Patriots' Day -- a state holiday in Massachusetts and Maine -- commemorates the anniversary of the Battles of Lexington and Concord, the first battles of the American Revolutionary War.

==> NWS AWARDS ARKANSAS HAM TOP HONOR

In late March, officials at the National Weather Service (NWS) office in Little Rock, Arkansas, awarded Brother Anselm Allen, WB5JLD, the prestigious Thomas Jefferson Award for his service as a Cooperative Weather Observer <http://www.nws.noaa.gov/om/coop/>. Named for the third President of the United States -- who kept an almost unbroken series of weather records from 1776 to 1816 -- the award is the highest and most prestigious award bestowed on Cooperative Weather Observers; only five Jefferson Awards are conferred each year. Cooperative observers are trained by the NWS to provide temperature (air and soil), precipitation and river data on a daily basis.

In addition to Allen's outstanding support of the National Weather Service, he is also an Amateur Radio operator and is active on local nets. Allen is only the second observer to receive the Jefferson Award in the Little Rock County Warning Area <http://www.srh.noaa.gov/lzk/html/imgviewer1.php?pic=x73>.

The NWS has trained more than 11,000 people to take weather observations on farms, in urban and suburban areas, National Parks, seashores and mountaintops, giving the NWS a true weather picture representative of

where people live, work and play. Formally created in 1890 under the Organic Act, the Cooperative Observer program has a twofold mission: To provide observational meteorological data, usually consisting of daily maximum and minimum temperatures, snowfall, and 24-hour precipitation totals, required to define the climate of the United States and to help measure long-term climate changes; and to provide observational meteorological data in near real-time to support forecast, warning and other public service programs of the NWS.

Volunteer weather observers provide data that are invaluable in learning more about the floods, droughts, heat and cold waves. The data are also used in agricultural planning and assessment, engineering, environmental-impact assessment, utilities planning and litigation. Information gathered by Cooperative Observers plays a critical role in efforts to recognize and evaluate the extent of human impacts on climate from local to global scales. -- Information provided by the National Weather Service, Little Rock

==> ARRL MEMBERSHIP NEWSLETTERS, BULLETINS AND NOTIFICATIONS

Did you know the ARRL offers more newsletters than just The ARRL Letter? One of the many ARRL membership benefits includes other newsletters, such as the ARRL Contest Update (a bi-weekly contest newsletter), the ARES E-Letter (sent monthly, containing public service and emergency communications news), the ARRL Club News, the ARRL Instructor/Teacher E-Letter and the VE Newsletter, just to name a few.

You can also elect to receive news and information from your Division Director and Section Manager (keep in mind that not all Divisions/Sections send notices), as well as W1AW bulletins that relate to DX, propagation, satellites and Keplerian reports. The ARRL also offers a free notification service that lets them know when their membership and license are due to expire.

Sign up for these newsletters, bulletins and notifications on the Member Data page of the ARRL Web site <http://www.arrl.org/members-only/memdata.html>.

==>SOLAR UPDATE

Tad "Twinkle like black stars in sunny skies" Cook, K7RA, this week reports: On Wednesday, April 22 we saw sunspot 1015 fade away, just as it was about to slip over our Sun's western limb. It emerged only briefly, late on April 21, and by Thursday it had disappeared. Sunspot numbers for April 16 through 22 were 0, 0, 0, 0, 0, 0, and 11 with a mean of 1.6. The 10.7 cm flux was 69.9, 69.8, 69.9, 70.1, 69.8, 71, and 71.1 with a mean of 70.2. The estimated planetary A indices were 6, 5, 8, 4, 4, 5 and 4 with a mean of 5.1. The estimated mid-latitude A indices were 3, 4, 8, 4, 3, 3 and 2 with a mean of 3.9. The outlook for the near term is more of the same, quiet conditions. Geophysical Institute Prague predicts quiet conditions for April 24-30. The US Air Force and NOAA predict a nice quiet planetary A index of 5 until May

6-9, when they expect to see a planetary A index of 15, 8, 8 and 8. Sunspot numbers for April 16 through 22 were 0, 0, 0, 0, 0, 0, and 11 with a mean of 1.6. 10.7 cm flux was 69.9, 69.8, 69.9, 70.1, 69.8, 71, and 71.1 with a mean of 70.2. Estimated planetary A indices were 6, 5, 8, 4, 4, 5 and 4 with a mean of 5.1. Estimated mid-latitude A indices were 3, 4, 8, 4, 3, 3 and 2 with a mean of 3.9.

For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by William Henry Davies' "April's Charms" <http://www.poemhunter.com/poem/april-s-charms/>.

==>IN BRIEF:

* This Week on the Radio: This week, the NCCC Sprint Ladder is April 24. The Florida QSO Party, the Nebraska QSO Party and the SP DX RTTY Contest are all on April 25-26. Look for another NCCC Sprint Ladder next week on May 1; the AGCW QRP/QRP Party is also May 1. The Microwave Spring Sprint is May 2 (local time), The MARAC QSO Party (both CW and SSB), the 10-10 International Spring Contest (both CW and digital), the 7th Call Area QSO Party, the Indiana QSO Party, the New England QSO Party and the ARI International DX Contest are all May 2-3. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, May 3, 2009, for these online course sessions beginning on Friday, May 15, 2009: Antenna Modeling and Radio Frequency Propagation. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* No ARRL Audio News for April 24: There will be no ARRL Audio News on Friday, April 24. The ARRL Audio News will return for May 1 and 8, but will be on hiatus on May 15 due to the Dayton Hamvention. The Audio News will resume regular distribution on May 22.

* Thomas Dick, KF2GC, Returns as Northern New York SM: Thomas Dick, KF2GC, of Saranac Lake, has returned to the office of Section Manager of Northern New York. He has taken the reins of the Northern New York Field Organization from Tom Valosin, WB2KLD, who had been Section Manager since 2007. When Valosin decided not to run for another term of office, Dick submitted his nomination petition to run for Section Manager; the open position was re-solicited in the January 2009 issue of QST. Since Dick's nomination was the only one received by the receipt deadline, he was declared elected and his term of office extends through December 31, 2010. Dick has several years of prior experience as a Section leader: He served as the Northern New York Section Manager from 2000-2006 and as Section Emergency Coordinator from 1998-2000.

* "Hints and Kinks": Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint, you will receive $20. Send your hints via e-mail to <h&k@arrl.org>; or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main Street, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address. Items in "Hints and Kinks" have not been tested by QST or ARRL unless otherwise stated. Although we can't guarantee that hints published will work for every situation, QST makes every effort to screen for harmful information.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly
from ARRL HQ. To subscribe, unsubscribe or change your address for
e-mail delivery:
ARRL members first must register on the Members Only Web Site
<http://www.arrl.org/members/>. You'll have an opportunity during
registration to sign up for e-mail delivery of The ARRL Letter, W1AW
bulletins, and other material. To change these selections--including
delivery of The ARRL Letter--registered members should click on the
"Member Data Page" link (in the Members Only box). Click on "Modify
membership data," check or uncheck the appropriate boxes and/or change
your e-mail address if necessary. (Check "Temporarily disable all
automatically sent email" to temporarily stop all e-mail deliveries.)
Then, click on "Submit modification" to make selections effective.
(NOTE: HQ staff members cannot change your e-mail delivery address. You
must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these
sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will
be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur
Radio Club: Visit Mailing Lists@QTH.Net
<http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL
cannot assist subscribers who receive The ARRL Letter via this
listserver.)

Ruff nite tonite, Markie.
I stretched things a little bit, but you know the drill.
You've been down this road after hosting a few back door parties of your
own.

Everything works out in the end.

Here in the U.S.A., our ham licenses are free of charge. (Except for
Vanity licenses.)

Do hams in most other countries pay yearly fees for their licenses?

2009 W5DXCC DX DINNER/FORUMS AT HAM-COMM. The Lone Star DX Association (LSDXA) is pleased to sponsor the 2009 W5DXCC programs and DX Dinner in conjunction with Ham-Com on June 12-13th, in Plano, Texas. The DX Dinner will be Friday evening, June 12th, at the Plano Centre in the Windhaven Room. The evening will begin with a cash hospitality bar in the Plano Centre from 5:00 to 6:30 PM. Dinner activities will begin promptly at 6:30 PM. Dinner will be Char-Broil Prime Rib with salad, rolls, baked potato, seasoned vegetables, and cheesecake for desert. A vegetarian option will be available upon request. The DX dinner program will be the 2009 KP5 Desecheo DXpedition (www.kp5.us). On October 1, 2008, the U.S. Fish and Wildlife Service (USFWS) selected the KP1-5 Project team led by K4UEE and W0GJ to be the first USFWS-approved DXpedition to Desecheo Island in fifteen years. DXpedition co-leader Bob Allphin, K4UEE, will present what promises to be a very interesting program. Friday DX Dinner door prizes are: Yaesu FT-2000 Transceiver, Force 12 C-3S Yagi Antenna, Array Solutions AIM 4170 Antenna Analyzer and Begali Sculpture Paddle. Dinner ticket price is 40 USDs and can be ordered on the Ham-Com Web site, <http://www.hamcom.org> by clicking the Admission button. Because of the banquet room capacity, only 200 tickets are available. Tickets will be sold until all 200 are gone or June 1st, whichever comes first. Tickets can be picked up at the Lone Star DX Association booth. The Saturday, June 13th, W5DXCC programs presented in conjunction with Ham-Com include:
K5D Desecheo Round Table/Q&A by K5D operators K4UEE, K5AC, K5AND, & NA5U
VK9LA Lord Howe by W5SL
Cycle 24 and More by K9LA
How to DX on 6 Meters by K5AND
DXCC QSL card checking, including deleted and 160 meter cards will be offered on Friday and Saturday at the LSDXA booth. Please have all paperwork filled out before submitting cards for checking. Additional information is available on the LSDXA and Ham-Com Web sites at:
http://www.hamcom.org
http://www.dxer.org

2D/GT3/GT7/MD0, ISLE OF MAN (EU-116). By the time you read this, operators Mark/M0MJH (MD0MJH), Kevan/2E0WMG (2D0WMG), Matt/2E0XIS (2D0XIS) and James/M0ZZO (MD0ZZO) will be active until May 1st. Activity will be on SSB on the HF bands mainly on 80/40/20m, but there may be possible activity on the higher bands if conditions allow and 160m if space allows, as well as VHF/UHF. Also, look for GT3CO, the callsign of the Colchester Radio Amateurs Club (of which Kevan, Matt and James are members) and GT7SRA, the callsign of the Sudbury and District Radio Amateurs Clun (of which Mark is a member). Matt and James are SOTA enthusiasts and are planning to activate all five IOM SOTA Summits over two days on the 27th and 28th. They may be accompanied by Mark or Kevan on some or all of these summits. Look for updates and possibly further information on their activities on Mark's Blog page at: http://m0mjh.blogspot.com

4TH MDXC CONVENTION. The 4th Mediterraneo DX Club Convention will be held in Battipaglia (Salerno), Italy, May 23-24th. Complete details are available at: http://www.mdxc.org/meeting.asp

5F, MOROCCO (Special Event). It's the event of the year in Morocco, the "Race of Morocco", and Abder, CN8VO, is now operating with the special callsign 5F1ROM for the FIA Touring Car Grand Prix which will be held in Marrakech. Activity will last until May 10th. QSNs show he was on 40 and 20 meters SSB this past weekend. QSL via EA7FTR. Visit his Web page at: http://www.cn8vo.com

5R8, MADAGASCAR. Wayne, W5KDJ, will be active as 5R8KD between July 1-15th. Activity will be on 160-6 meters using CW and RTTY. QSL via his home callsign. Also on LoTW and eQSL.

6V, SENEGAL. Seb, F8IJV, informs OPDX that he will be on his honeymoon here between October 17th and November 1st. He plans to be active in the CQWW DX SSB Contest (October 24-25th). He will try to operate before and after the contest as 6V7Q on 160-6 meters, mainly on SSB and the Digital modes. He will be operating from Jean-Francois, 6W7RV, QTH in La Somone. QSL via F8IJV. More details will be forthcoming.

9M2, WEST MALAYSIA. It has been reported that Richard, PA0RRS, will be permanently moving to Penang Island (AS-015, WLOTA 2743), West Malaysia, on May 1st. He will be active as 9M2MRS from Penang Island, but initially only on 20 meters using a dipole. He prefers CW but will go on SSB if requested. QSL via 9M2MRS, by the 9M2 QSL Bureau or direct to: Richard Smeets, Reef Apartment Building, 54-7-12 Jalan Low Yat, 11100 Batu Ferringhi, Penang Island, Malaysia. QSLs sent "via PA0RRS" will still be possible, but you will have to be patient as Richard will only be back to the The Netherlands for a limited time each year.

8R, GUYANA (Update). The 6 Meter Beacon Project, Inc., (HF-50 MHz DX-pedition between June 16th and July 6th) now has a Web page online at: http://6meterbeaconproject.org/8R2009.html
Watch for updates and operating frequencies to be posted.

A3, TONGA. David "Kawe" Lee, A35KL, will be active from Vava'u (OC-064), beginning April 25th through May 6th. His operation will be mainly CW, on 40-17 meters. QSL via W6ZL (w/SASE or IRC, or via LoTW). Paul, A35RK, will join Dave on the 25th, but will probably not begin his solo operation until after Dave leaves. Paul will be working the HF bands on CW and SSB, using a FT-450 and a G5RV until June 1st, and possibly a bit longer signing A35RK/p. QSL A35RK/p via W7TSQ or via LoTW.

A5, BHUTAN. Hisato, JA1DOT, is now active as A52DT until May 6th. Activity will be on 160-10 meters using CW, SSB and RTTY. QSNs show most of his operations have been on 30 and 80 meters CW. QSL via his home callsign. Updates will be posted on the Nippon DX Association (NDXA) Web site at: http://www.ndxa.net

A6, UNITED ARAB EMIRATES. Philippe, F5LTB/9Q1TB, is expected to pick up his new license sometime this week and will now be active as A65BK. Activity will be mainly on SSB. His QSL Manager will continue to be SM5DJZ, direct ONLY (eQSL are welcome for eDX100, eWAS and eZ40).
More details are forthcoming.

C5, THE GAMBIA. Eric, SM1TDE, is planning an operation to take place between December 10-31st. More details should be forthcoming.

CY0, SABLE ISLAND (Update). The CY0 Team has re-adjusted their arrival date on Sable Island so the CY0 Team can provide a CY0 country multiplier to contesters during the CQWW DX SSB Contest weekend (October 24-25th). The team plans to operate only one station in the contest and also continue to maintain CW and 30/17/12m operations for those DXers who are not in the contest. The complete operation will take place between October 19-26th, and operators will sign homecall/CY0. Operators mentioned are: Murray/WA4DAN, Randy/N0TG and Ron/AA4VK. Activity will be on all bands 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns. Visit their Web site periodically for continuing updated details and information (see below).
ADDED NOTE BY RANDY, N0TG, (CY0-Preparation): A Simulation Test by N0TG, WA4DAN and AA4VK will be performed from IOTA NA-67, on the Outer Banks of North Carolina on an island that is similar in environment (terrain, sand, sea, remoteness, etc.) to Sable Island during the period 2300Z on April 30th through 1830Z on May 2nd. The purpose of the operation will be a "test" of potential antennas for use at CY0 this coming October. Testing of antenna layout will be conducted to assess inter-station interference. DXers from the U.S. and other countries are welcome to call in and participate in the CY0 simulation "test". The DXPedition for Sable Island is scheduled for mid-October. All Dxpedition details and updates are available on the Web site: http://www.cy0dxpedition.com

DF0, GERMANY (Green Days/WFF Op). Operators Gabi/DF9TM, Frank/DL2SWW and Ric/DL2VFR will be active as DF0WFF during the "Green Days" weekend, June 13-14th. Activity is good for the WFF Award (new DLFF-024). QSL via DL2VFR (also via DL Bureau). For information about German WFF activities, please visit: http://www.wff-dl.de --or-- http://www.wff44.de

EO64, UKRAINE (Special Event). Operators Rustam/UU2JQ, Eugene/UU5DX and Sergey/UU5WW will activate special event station EO64JM from May 1-15th. The operation will commemorate the 64th anniversary of victory in the Great Patriotic War. QSL via K2PF.

F, FRANCE (LH Activity). Jean-Loup, F8DYR, will spend his holiday week activating Eckmuhl lighthouse (ARLHS FRA-256, Grid IN77tt) in south Brittany between April 27th and May 2nd. Activity will be on 6 and 2 meters, with a low power portable station, between 0600-0800z every morning and possibly other times. QSL via his home callsign.

H4, SOLOMON ISLANDS. The "DX World of Ham Radio" Web page is reporting that Mike/KM9D (H44MY) and Jan/KF4TUG (H44TO) are once again in the Solomon Islands staying in Honiara. Mike has indicated that there are no plans to be immediately active. Any activity may be announced at short notice.

II2, ITALY (Special Event). Members of the "Sezione di ERBA" ARI Radio Club will activate the special callsign II2ERBA between May 1-24th. Activity will be on the HF bands using CW, SSB and the Digital modes. QSL Manager is IQ2ER. NO E-QSL.

IOTA NEWS.....
AF-019. (POSTPONED) Operators Vincenzo/IW9EJP, Filippo/IW9FRB, Giovanna/
IW9GVP (YL), Ferdinando/IW9HSK, Ezio/IT9OJW, Sebastiano/IT9ZIR
and Dario/IT9ZZO have postponed their activity as IG9/homecalls
from Linosa Island (IIA AG-003, MIA MI-128) until May 1-3rd
(not April 24-26th as first announced). They plan to operate
on SSB, PSK and RTTY on the HF bands, 80-10 meters. QSL via
their home callsigns, direct or by the Bureau. Visit their Web
page at: http://www.iw9frb.it/linosa.htm

AS-077. Look for 8J6DON to be active from Kyushu Island during the
upcoming Hakata "Dontaku" Port Festival between April 29th
and May 5th. QSL via the JARL Bureau.

AS-192. (Pictures of recent activity) Suli, 7Z1SJ, one of the operators
from the recent (March) HZ1FS/P operation to Hibar Island in
the Red Sea Coast South (Jizan Province) Group, provides OPDX
readers with a URL link to see many pictures of this activity
at: http://www.laselki.net/vb/showthread.php?t=3680
Remember to QSL via EA7FTR.

EU-008. Operators Charlie/MM0GNS, Willie/GM4ZNC and Rodger/GM3JOB
will be active as MS0TJT/p from the Island of Coll, Inner
Hebrides, May 3-8th. Activity is planned for 80-6 meters,
mainly SSB, but with a little CW and PSK. QSL via GM4ZNC.

EU-031. Claudio, IZ0KRC, will be active as IC8/IZ0KRC from Ischia
Island (IIA NA-001, MIA MI-042, WLOTA 0689) between April
29th and May 4th. Activity will be SSB only on 40/20/15/10
meters. QSL via his home callsign, Bureau is preferred.

EU-047. Juergen, DL1IAI, will be active as DL1IAI/p from Borkum Island
(N-001 for the German Islands Award) in the Niedersachsen State
Group between April 27th and May 18th. He will also try to
activate the club station DL0BRF on the lightship "Borkumriff"
on SSB and maybe also PSK31/RTTY on 80-2 meters during this
time. QSL ONLY via the bureau (PLEASE). Also, visit:
http://www.dl1iai.de

EU-065. Member of the Charente DX Group will activate TM0M from
Molene Island (DIFM AT002 - French Island Award), May 23-30th.
Four stations will be on air 24/7, with operations on 80-10
meters using CW, SSB, RTTY and PSK. Operators mentioned are:
Joel/F1BLQ, Jean/F4EEK, Michel/F5EOT, Eric/F5LOW, Sibard/F5NBQ,
Laurent/F5MNK, Bertrand/F6HKA and Leon/ON4ZD. QSL via F6ANA,
direct or by the bureau.

EU-094. Johann, F4FEP, will be active as F4FEP/p from the beach of
Saint-Nicolas Island (DIFM AT-010) possibly 1 to 3 days during
the month of May, depending on the weather and a boat. He will
be active on May 1st (1400-1700z) and May 19th (1000-1700z).
Watch 14260 kHz (+/- QRM); he will be use an ICOM-706 w/100
watts, battery power and a G5RV antenna. QSL via his home

callsign, direct or by the Bureau.

EU-125. Operators Gabi/DF9TM, Frank/DL2SWW and Ric/DL2VFR will be active as OZ0FR from Romo Island (NS-001 for the Danish Islands Award) between July 23-26th, including the IOTA Contest (July 25-26th). Activity will be high power on CW and SSB into a yagi antenna for 20-10 meters, a SteppIR vertical (BigIR) for 40-10 meters and dipoles for 80 and 40 meters. This activity will also count for the World Flora and Fauna Award (WFF - for OZFF-004). QSL OZ0FR via DL2VFR (also via the DL Bureau, do not send QSLs via OZ Bureau). More details will be forth-coming on: http://www.iota-expedition.de

EU-129. Helmut, DL7VOX, will once again be active as DL7VOX/p from Usedom Island (O-013 for the German Islands Award) between April 27 and May 16th. Activity will probably be CW on 160-10 meters.QSL via his homecall, direct or by the Bureau.

EU-178. Uwe, DL3BQA, will be active as ES8/DL3BQA from Kihnu Island, Estonia, between June 15-22nd. Activity will be holiday style on 80-6 meters, mostly on SSB and possibly some RTTY. QSL via his home callsign, by the bureau or direct.

EU-189. Just a reminder that a Belgian team of five operators will try to land and activate Rockall Island between April 30th and May 1st. Operation will depend on the weather and sea conditions. The team will have two stations on the air using the callsign MM0RAI/p. Activity will be on 80-10 meters using CW and SSB. QSL via ON4BR, direct or by the Bureau. Please visit their Web site for latest news and updates at: http://www.rockall.be

SA-021. (Update) Members of the Radio Club Grupo DX Bahia Blanca will be active as L21D from Ariadna Island, located 70km south of Ingeniero White Harbour, in the natural reserve of Bahia Blanca, between 0000z, May 1st, and 1800z, May 3rd. Activity will be on 80/40/20/15/10 meters using CW, SSB and PSK. Operators mentioned are: Carlos/LU7DSY, Osmar/LU8DWR, Carlos/LU4ETN, Gerardo/LU1EUU, Enrique/LU5DEM, Nestor/LU4DBP and Willy/LU4DBT. QSL via LU7DSY, by the bureau or direct to: P.O. Box 709 (8000) Bahia Blanca, ARGENTINA. Visit the group's Web page at: http://www.grupodxbb.com.ar

SA-072. (Update) Members of the Teresina DX Group are preparing a DX-pedition to the Canary Island (DIB MA-05, DFB MA-11) on the coast of Piaui, Brazil, between April 29th and May 3rd. Callsign will be ZW8BBC. Activity will be on 160-10 meters using CW, SSB, PSK31 and RTTY, including 6 meters, 2 meters (SSB/FM) and the satellites (SSB/FM). Satellites mentioned are: AO-7 (A and B), FO-29, AO-51, VO-52, SO-50 and ISS in repeater mode, if activated. QSL via PS8DX (QRZ.com address): Operators mentioned are: Ray/PS8BBC, Junior/PS8DX, Jesus/PS8ET, Chicao/ PS8FSM, Milton/PS8HF, Joca/PS8JN, Nelson/PS8NF, Joao/PS8PY,

Piraja/PS8RF, Dalton/PS8TV and YL Milena/PS8ML. Sugguested
frequencies are:
CW - 1830, 3530, 7030, 10114, 14040, 18098, 21040, 24920 and 28040
SSB - 1970, 3765, 7055, 14260, 18128, 21260, 24950 and 28460
RTTY - 3577, 7037, 10127, 14080, 18101, 21080, 24920 and 28080 kHz
6m - CW/50.107 and SSB/50.127 MHz

A web page is now active for this operation at:
http://zw8bbc.blogspot.com/

IOTA SPECIAL NOTES:
* IOTA Contest 2008 Credits: The RSGB are pleased to announce that
they can now accept QSOs made in the 2008 IOTA contest for credit
without QSL Cards.
* Interruption of service from RSGB HQ: The RSGB regrets that as the
result of the sudden resignation of the IOTA Coordinator at HQ, there
will be an interruption in its service to the IOTA community pending
the filling of the post. This means that there will be a delay,
possibly as long as a month, in the issue of certificates, plaques and
trophies and in the handling of emails addressed to: iota.hq@rsgb.org.uk
A notice will be posted when normal service resumes.
* NEW IOTA Directory available: Now celebrating 45 years of Island
collecting -- The "IOTA Directory" is the essential guide to partici-
pating in the Islands on the Air (IOTA) award program. For details
on how to get one:
http://www.rsgbshop.org/acatalog/Online_Catalogue_IOTA_42.html

IRC NEWS. Just a reminder for those who like to stockpile International
Reply Coupons (IRCs)-- the current IRC will expire at the end of year.
Unlike the old style coupons, the current types all have an expiry date,
giving them a maximum life of 3 years. If you purchased a current IRC
today, they will still expire on December 31, 2009. Ken, ZL2HU, advises
us on the following information from International Postal Union in Geneva:
"The current issue (Beijing 2) IRC may be exchanged up to 31 December
2009 (date printed on coupon). In principle, Beijing 2 coupons will no
longer be sold from 31 August 2009. The new international reply coupon
(Nairobi model) is due to go on sale from 1 July 2009, and will be valid
for exchange until 31 December 2013." Ken states, "So make sure you
aren't holding any of the Beijing 2 coupons at the end of this year."
To see what the new IRC looks like, go to:
http://www.upu.int/news_centre/2008/en/2008-08-08_irc.shtml

JD1, OGASAWARA. Koji, JI1LET, will once again be active as JI1LET/JD1
from Chichijima Island (AS-031) between April 29th and May 5th. Activity
will be on 40-6 meters, CW, SSB and RTTY. QSL via JI1LET, by the JARL
Bureau or direct.

JW, SVALARD. Operators Jan/OK1JK, Jiri/OK1JST, Pavel/OK1IPS and Jiri/
K1IEC will be on a Czech Polar DXpedition to Longyearbyen, Spitsbergen
Island (EU-026, WLOTA 0125), June 5-15th. Look for them to sign JW/homecall
and be active on all HF bands using CW, RTTY, PSK and SSB. QSL via their
home callsigns. More information can be found on their Web site at:

http://jan.kepic.cz/view.php?cisloclanku=2009030003

LN3, NORWAY. Members of the Vestfold Contest Club (LA3Z) of Stavern will be active as LN3Z during the CQ World Wide WPX CW Contest (May 30-3st), as a Milti-Single entry. Operators mentioned are Svein/LA3BO, Harald/LA5UF, Paul/LA6YEA, Jon/LA8HGA and Gaute/LA9TJA. QSL via LA9VDA, direct (see details on QRZ.com) or by the bureau. Bureau QSL cards can also be requested by E-mail to: la9vda2003-at-yahoo.no
Visit the club's Web page at: http://www.la3z.com

NCDXF PRESS RELEASE (by Al Burnham, K6RIM, NCDXF Director). At its Board of Directors meeting on April 17, 2009, in Visalia, CA, the Northern California DX Foundation elected Bruce Butler, W6OSP, as President and Glenn Johnson, W0GJ, as Vice President. Outgoing President Len Geraldi, K6ANP, and Vice President Al Burnham, K6RIM, remain on the board as Directors. Information pertaining to the Northern California DX Foundation is available at: http://www.ncdxf.org

NEW CONTEST WEB PAGE. Pete, N4ZR, announced that "The Contesting Compendium is up and running at: http://wiki.contesting.com
With the help of KM3T, K5TR, K5ZD and N5KO, the objective of this Web page is "to make this into a one-stop source for information on contesting, and to ensure that all the good stuff that is now scattered across the Internet doesn't succumb to the ravages of time, hard drive failures, or other accidents of history." Pete states he is looking for contributors/authors to contribute material and to keep the Web page up to date. Check it out!

QSL INFO AND NEWS.....
4M5M via W4SO. Members of the Association of Radioamateurs of Venezuela activated a special event station for the International Marconi Day on April 25th. W4SO address is: Scott Cronin, 5020 Pierce ST., Hollywood, FL 33021.

QSL AX6JB via M0URX. Special prefix for ANZAC Day. Operator was John, VK6JB.

NEW QSL ROUTE. Buzz, NI5DX, reports that, effective immediately, he is the QSL Manager for Kahlid, A61BK. Kahlid has already sent his log file to Buzz. QSL cards will be ordered, so there will be a delay in replying to cards until the new cards arrive from the printer. PLEASE NOTE: Phil, ex-9Q1TB, has just been issued the callsign A65BK. To avoid confusion, those requesting cards for either station should make certain they send their request to the proper QSL Manager.

GB8GM via M0DOL. Special event station for the International Marconi Day on April 25th. M0DOL's address is: Chris Darlington, 24 Westridge, Northampton, England, U.K.

CHECK YOUR HG1S QSO. It has been reported that the MTTOSZ Radio Club of Gyor is receiving a large number of cards for QSOs made with HG1S that cannot be confirmed as they are "not-in-logs". Since HG1S is a "direct only" station, you'd better check the online log and/or E-mail the Radio Club before running the risk of wasting your money. Also,

please note that local postage stamps cannot be used in Hungary! To check your QSO, go to: http://www.mttosz.t-online.hu/

KL7J - NO BUREAU QSLS. Fred, K3ZO, from the Third Call Area Incoming QSL Bureau, reports: "This Bureau continues to receive cards directed to KL7J via his QSL Manager, N3SL. Please note that KL7J has asked his manager not to accept cards coming in via Bureau. Any such cards received by this bureau are passed on to an elementary school teacher we know who uses the cards as an instructional tool with her kids."

ZL7T QSL STATUS. Lee, ZL2AL, reports that the ZL7T cards have been ordered, and he expects delivery in a few weeks from Europe. The QSOs and envelopes have been processed, and he thanks those who put a little extra in them to help cover their freight costs. Lee states, "I am hoping to have the first cards in the mail in about 45 days if all goes well. We are considering the idea of doing ZL7 Chatham Island again next year late February or early March with better antennas and enhanced operation on 160m and 80m and the WARC bands."

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: CX3CCC, E70T, EL2DX, ET3JA, FK8CP, FM5LD, FW5RE, LY8O, MU0FAL, NP4A, RO9O, T27A, TF3CW, TJ3SL, UA2FCC, V25WY, VK9AA, VP2V/SP3IPB, VP8KF and Z36A

QSLS RECEIVED VIA THE BUREAU: 3XM6JR, 4K7Z, 4X0C, 4X0V, 7P8FC, 7U5CI, 9A73AA, 9K2HN, BD7JLR, BG7JLR, BT1OB, C4EURO, EN600Y, ER61V, EU5ROPE, EU940OR, EV7DP, EV9P, H44MS, HB0/DL4IAL, HD2A, IF9A, J48MDC, J6/DL7AFS, JI2ZJS, PJ7/DL7DF, RI1OTA, S79SG, T32CXX, T77WI, TC85TC, TO5FJ, UK8AJ and YI1DZ

S7, SEYCHELLES. Davide, IZ3EFL, is now active as S79DF from Aldabra Atoll (AF-025) for the next year. Activity has been only on 20 meters SSB, but he has promised to appear on other bands soon. Watch between 1600-1730z on 20 meters. QSL via IV3TDM, direct or by the bureau.

T30, WESTERN KIRIBATI ISLANDS (Also 3D2). By the time you read this Hrane/YT1AD and Miki/YU1DW should be active as T30M and T30DW, respectively, from Tarawa Island for a few days until April 29th. Their Pacific trip is to make plans for their upcoming operations to Tokelau Island (ZK3) in 2010 and Conway Reef (3D2C) in 2011. The duo will leave T30 and end their Pacific trip in Fiji. They will be active as 3D2AD (YT1AD) and 3D2DW (YU1DW) until May 4th. QSL all callsigns via their home call, direct or by the Bureau.

TA7, TURKEY. Operator Berkin, TA3J, will be active as TA3J/7 from Erzincan City (KM99RS) between now and May 3rd. Activity will be on all bands using CW, SSB and the Digital modes. He was heard this past weekend on 20 meters SSB. QSL via TA3YJ QSL Service at: http://www.aydogmus.gen.tr/ta3yj/qslservice.htm

TK, CORSICA (IOTA/SOTA/LH/QRP). Laurent, F8BBL, will be on holiday on the main island of Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390)

between August 1-15th. His QTH will be located in the Valinco Gulf, near the city of Olmeto (Department South Corsica/2A, WW Loc. Loc JN41KQ). His activity will be QRP using a FT-817 and a new MP1 antenna. He will be signing TK/F8BBL/QRP and will be on the HF bands, mainly CW, but some SSB during his spare time. On August 8th, Laurent will climb the summit Punta di Buturetu (SOTA TK/TK112, 870m ASL, WW Loc. JN41KR) and expects to be on the air around 1000z. Suggested frequencies are: 7032 kHz/CW, 7096 kHz/SSB and 10118 kHz/CW. He will also make another one day trip to the Island of Sanguinaires (EU-104, DIFM TK-002, MIA MCO-022, WLOTA 0098, Loc JN41HV) during his second week (weather and sea conditions permitting and boat rental). QSL via his home callsign, direct or by the Bureau.

TK, CORSICA (IOTA/LH/Mills/Towers Op). Claude (Jim), F5MCC, will be on holiday from the main island (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) between May 22nd and June 11th. He will be signing TK/F5MCC or possibly TK/F5MCC/p. Tony, TK5XN, may be with him. Look for Jim to activate some lighthouses which count for the "French Onshore Lighthouses Award" (DPLF) with the following references: PB 074, PB 068, PB 087, PB 091, PB 287 and PB 292 (with weather permitting, possibly PB 170 and PB 171). Also, a very difficult lighthouse (PB 289) may be activate which is hard to reach and for this activation, Tony, TK5XN, will go with Jim. There is another planned activation from the Island of Lavezzi (EU-164, TK-011, MCO-007, PB 175 and WLOTA 755), but this depends on the renting of a boat. On May 23rd and 30th, Jim will also activate (along with Denys/TK5JU) some Mills or Genovese Towers (not yet chosen). Activity from all locations will be on the HF bands 80-10 meters CW/SSB. QSL TK/F5MCC via F5MCC, TK5XN via F2YT and TK5JU direct to his home callsign.

TY, BENIN. In close cooperation between the DAGOE Foundation, Mercy Ships and 5 Dutch radio amateurs, a new DXpedition is on its way. If everything goes according the plan, the team foresees a visit to Benin between October 7-30th. The team expects to be on air from October 10th-27th and will also participate in the 2009 CQWW DX SSB Contest (October 24-25th). QSL Manager is PA3AWW (direct or by the Bureau). An online QSL REQUEST service will be available. More details are forthcoming, but a Web page is up and running at: http://www.benin2009.com/home.php

VK9GMW, MELLISH REEF (News - QSO Data Lost!). George, AA7JV, reports on April 22nd: "We both made it home, safe and sound (but dog tired). Unfortunately our support team's efforts to recover the WriteLog QSO data have not produced results yet. We are now seeking help from WriteLog. In the meantime, please do not send any QSLs or OQRS requests for any QSO that took place between 4/9 2020 UTC and 4/10 0923 UTC. We apologize, understanding how this may disappoint those who have made the QSOs, but as long as we can not recover the data, we will not able to QSL these QSOs."
ADDED NOTE: George, AA7JV, also, reports: "I have been getting a lot of requests for info on the antenna we used on Mellish." Read about their multi-band antenna at: http://vk9gmw.com/documents/VK9GMW_ANTENNA.pdf

YB0, INDONESIA (IOTA Op). Hotang, YC0IEM, will be active as YB0IEM/P from Borneo Island (OC-088) between April 27th and May 15th. Bands and modes of activity were not provided. QSL via IZ8CCW.

YJ, VANUATU (IOTA Op). Kaku, JA6REX, will be active as YJ0KS for 10 days from two different islands. Activity will be from Espiritu Santo (OC-035) between April 28th and May 3rd, and from Tanna Island (OC-035) between May 5-7th. Look for activity to be on 160-6 meters using CW, SSB, RTTY and PSK31. QSL via his home callsign.

YS, EL SALVADOR. Operators Michael/G7VJR, Bob/MD0CCE and Nigel/G3TXF will be active as YS1G between May 17-23rd. Activity will be focused on CW on 160/80/40/30 meters, and possibly the other higher bands depending on the conditions. Mario, YS1MAE, is expected to join the team and operate SSB. QSL via G3TXF.

YW0, AVES ISLAND (Update). The 4M5DX Group, which is expecting to be active as YW0A from Aves Island, received on Monday, April 20th, a schedule from the Venezuela Navy to travel to Aves Island. From their Web they state, "The stay time that they can give us on Aves Island is no less than 30 days (can be more, depending of vessels availability). No one operator or team member can stay for so long time on the island. For that, we are still looking for no more than 7 or 12 days to operate from YV0." The YW0A Web is at: http://yw0a.4m5dx.info/news.html

ZF, CAYMAN ISLANDS. Dave, W9CGI, will be active as ZF2GC from the Grand Cayman Island (NA-016, WLOTA 1042) between July 29th and August 10th. Activity will be mainly on 17 and 12 meters using PSK31 and SSB. He will use a vertical antenna with under 50 watts. QSL via his home callsign, eQSL preferred; direct w/SASE or by the Bureau. Sorry no LoTW.

ZL, NEW ZEALAND (Island Names To Be Decided!). New Zealanders are being asked what they would like to call their two main islands, currently North Island and South Island. The BBC News reports: "The country's Geographic Board, which assigns and approves place name changes, has announced consultations on alternative English and Maori names. The move follows the discovery that the geographically correct names, used for 200 years, were not legally registered." The Maori names are Te Ika a Maui (the fish of Maui) for the North Island and Te Wai Pounamu (the waters of greenstone) for the South Island. Read the complete story at: http://news.bbc.co.uk/go/em/fr/-/2/hi/asia-pacific/8011846.stm

It's been free here in the UK for a couple of years, previously it was ï¿½15
per year. I suspect it was costing them more to collect the fee than to
administer the system..!

Long-time USA hams please correct me on this if I'm wrong, but ...
I seem to remember that 20 or 30 years ago (long before I became a
ham), there was a fee for ham licenses. But Congress (our national
legislature) passed a law to make the FCC justify the fees charged for
all of their licenses. The FCC gave up figuring out what it could
legally charge us hams, and decided that our license would be free.

I was asked to forward this to hams in Nebraska. It looks like a great event.
****

Dear Friends,

The HamCon Colorado 2009 committee would be grateful if you would forward this to your club members, and other hams and non-yet-hams that might be interested.

After 18 months of planning and preparation, HamCon Colorado 2009, the ARRL Rocky Mountain Division Convention is almost upon us! The big event will happen May 29-31, 2009 in gorgeous Estes Park, CO. Many of you are already registered and have your accommodations booked.

If you've not already made your HamCon Colorado 2009 reservation, or your hotel room reservation, time is running out for your best opportunities!

On April 28th, our host hotel (The Holiday Inn in Estes Park) will release the remaining rooms blocked for HamCon Colorado to general public sales. Our amazing special rate of $89/night will still be good, but rooms will be on a space-available basis only. If you'd like to stay at the Holiday Inn, wait no longer! Call them today (Sunday, April 26th) or tomorrow (Monday, April 27th) to avoid disappointment. Call the hotel directly at (800) 803-7837 or (970) 586-2332, and mention that you're with HamCon Colorado to get our preferred rate.

Then, be sure to get your HamCon Colorado registration in too! You can register on-line at www.HamConColorado.org, or you can fill out a printed form and mail it in. But, our discounted $15 advanced registration ends on May 14th. After that, registration will be $20. Save some bucks, get your HamCon Colorado reservation in soon!

Here are some current highlights:

a. Here is our major speaker lineup!

Friday, May 29th Evening

Brian Mileshosky, N5ZGT, ARRL Rocky Mountain Division Director
Harold Kramer, W1JB, ARRL Chief Operating Officer and QST Publisher

Saturday, May 30th Daytime

Mike Gruber, W1MG, ARRL EMC Engineer and contributor to "The Doctor Is IN" QST column

Saturday, May 30th Luncheon

Cheryl Muhr, N&#65533;WBV, YL columnist for WorldRadio Online (formerly WorldRadio Magazine)
Saturday, May 30th BanquetRick Roderick, K5UR, ARRL Vice President

Sunday, May 31st Breakfast

Gordon Hardman, W&#65533;RUN, Desecheo Island 2009 DXpedition, Peter I DXpedition (3Y&#65533;X) and Alpha Radio Products

b. We've got more than 30 fantastic technical sessions and forums scheduled for Saturday (all day) and Sunday (morning). Check out the evolving schedule at the following URL: http://www.hamconcolorado.org/hamcon_conference_session_grid.htm.

c. You can take the mic or key in a massive W1AW/0 operation which includes 3 HF stations, a contest-suite station, VHF, D-Star and more!

d. Stop by our own "Doctor Is In" booth for some solid technical advice. You'll be "treated" by one of the contributors to QST's "The Doctor is In" column, Mike Gruber, W1MG, or by one of our skilled ARRL Colorado Section Technical Specialists.

e. Talk with manufacturers and exhibitors! Take advantage of some special HamCon Colorado deals from them too! Take a look at the rapidly growing list here: http://www.hamconcolorado.org/exhibitors.htm.

f. Place a bid in our silent auction on one of several factory refurbished and guaranteed radios from a top manufacturer! Prices like these, for a just-like-new radio will be super hard to beat.

g. We'll have lots of prizes, including a new HF radio grand prize, door-prizes at sessions, and hourly prize drawings. A quickly expanding list of prize donors can be found here: http://www.hamconcolorado.org/donors.htm. We'll announce our major prize radios soon! Watch www.HamConColorado.org for details!

h. We'll also have a VE session where you can test for your amateur radio license or an upgrade, a CW Pileup contest, an hilarious QLF contest, a transmitter foxhunt, a Wouff-Hong ceremony and much, much more.

You just don't want to miss this one, especially since the next HamCon Colorado won't happen until 2013!

Don't be disappointed! Sign up now, and let us know if you've got any questions or comments!

73,

Steve Williams, K&#65533;SRW

It was dropped as a "collateral effect" of Congress telling the
FCC to "charge according to worth."

Obviously a TV station license is worth a lot. Local broadcast
radios stations are worth a lot. Business band licenses such as
for tow trucks aren't as much.

Then there's Amateur Radio. How do you assign a value to something
that is specifically called out as having "no pecuniary interest"?

And they dropped the CB fees as well for similar reasons.

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.

Amateur Radio Newsline(tm) Report 1655 - May 1 2009

The following is a closed circuit advisory. Here's our Support Fund Administrator Andy Jarema, N6TCQ, who says that donations are needed right now:

--

Yep, it's me. A.J. And if I'm here you likely suspect that once again the
Amateur Radio Newsline is in desperate need of your financial support. And you would be right.

If you look back, you will notice that the last time you heard me soliciting donations was way back in 2008. Thanks to your generosity last year the need for me to make these announcements was minimal.

We know you prefer to hear the news rather than having to listen to these announcements and we agree. But over the past few months almost all donations have ceased so here we are with our annual spring pitch.

As we have said so many times before, it takes money to gather the news. It takes money to assemble a newscast and it takes money to bring it to you. And as the price of goods and services continue to increase, so do our operating costs. The cost of telephone service. The cost of web access. The costs related to hosting our website and providing you with a downloadable FTP of the newscast. The cost of equipment repair and upgrade. In essence, all of the costs involved in bringing you 52 newscasts a year as we have done for almost 31 years.

We do our very best to keep operating expenses to a minimum. Everyone involved in the Amateur Radio Newsline is a volunteer. There is no paid staff.

More important, all of the monies you donate go only toward operating expenses and in supporting the Young Ham of the Year Award. And for you, your donation is tax deductible.

We even make it very easy to donate. If you have web access all you need to do is take your web browser to www.arnewsline.org. Then click on the words "Make a donation" and use your PayPal account or credit card to transfer into ours.

Or you can use the good old method of writing a check and sending it to Amateur Radio Newsline Support Fund, P.O. Box 660937, Arcadia CA 91066.

Either way, we thank you for your kindness. For your support and for your trust.

OK. Time for me to get back to my desk and back to balancing the books. For the support fund, I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1655 with a release date of Friday, May 1st, 2009 to follow in 5-4-3-2-1.

The following is a QST. Police in Indianapolis discover ham radio is more than just a tactical channel and they like it as a hobby. Also, Amateur radio prepares for the Swine Flu, a new group in Europe is formed to Challenge the International Amateur Radio Union as the IARU thanks broadcasters for moving off of 40 meters, and hams in Honolulu get their first ever pro ham radio legislation. Find out the details on Amateur Radio Newsline(tm) report number 1655 coming your way right now.

**

NEWSLINE FOLLOW-UP: IMPD HOLD FIRST TEST SESSION

A growing number of police officers in Indianapolis have decided to get their ham radio licenses. This, after being told by their superiors in the department to remove all personal radio gear from patrol vehicles. Now they are discovering that there's more to the hobby than idle chit chat. Some are so impressed that they are even helping to organize training and testing sessions for their fellow officers. Amateur Radio Newsline's Jack Parker, W8ISH, has the latest:

--

As we first reported last February, the Indianapolis Metro Police Department has cracked down on road officers using Amateur Radios without a license. This comes following a complaint filed with the FCC by a local ham.

As a result, the Indianapolis Police Chief ordered all illegal radios removed from police cars until the officers became licensed hams. That forced dozens of Metro officers to race off to the nearest Amateur Radio book store.

Veteran police officer Dewey Runnels passed his test and helped organize a weekday test session for officers working Indy's eastside district. Over sixty officers signed up to take the Technician Class license test.

This called for a response from the ham radio SWAT team. That stands for Swift Working Amateur Testers. VE Dave Wendt-KA9OOH, recruited thirteen volunteer examiners from four Central Indiana counties to handle the overwhelming number of applicants. IMPD provided a training room, the officers lined up, produced an ID and put pen to paper to earn their Tech ticket. The centralized test session allowed officers from three different shifts an opportunity to work the exam into their work schedule.

Of those pre-registered only one third showed up to take the test. Sixty percent of the officers passed and now await their new amateur radio call signs.

Officer Dewey Runnels, KC9PIY, expects future test sessions to be better attended. He is excited about his new privileges and looks forward to a General Class upgrade.

KC9PIY: "I've talked to a couple of guys that have been able to talk
to
Canada, California and South America and I want to be part of that."

Future weekday test sessions are being scheduled to accommodate the growing number of IMPD officers wishing to earn their Technician Class license.

Reporting from Indianapolis, this is Jack Parker W8ISH.

--

This footnote: Don't look for these newly licensed police officer hams to be operating while on duty. Indianapolis Metro Police officials have renewed their original VHF radio license. They plan to give road officers at least 10 VHF channels. This, for point-to-point communications using department-approved radios. (W8ISH, ARNewsline(tm))

**

RESCUE RADIO: HAMS PREPARE FOR THE SWINE FLU PANDEMIC

Ham radio operators involved in emergency communications are making ready in case they are needed if the Swine Flu hits their area. We have more in this report:

--

During the past year, the Health Department in Nevada has discovered the power of amateur radio. This, according to Newsline's Don Carlson, KQ6FM, who says that Nevada hams involved in emergency communications have worked 2 major, statewide drills for pandemic point of dispensing of emergency supplies.

The hams passed traffic on how many citizens could be vaccinated over a given period of time. They also supplied information on how much vaccine was available.

Don says that officials were quite impressed with what hams did for them. Especially after their Satellite Phones failed and were unreliable. Simply said, ham radio had the ability to continue communications when the conventional methods of communicating shut down.

During the drills, the point of dispensing, better known by the acronym POD's were real, and open to the public, giving free flu shots.

Don says that it was quite amazing how the Nevada ham community did this only last year. Now, the real deal seems to be knocking on our door.

Carlson says that Nevada hams have already been asked to be on standby in case their services are needed should there be a major Swine Flu outbreak. He tells Newsline that they are well trained and prepared..

In addition to reporting for Newsline, Don Carlson, KQ6FM, also serves as the Nevada Section Emergency Coordinator and RACES Officer. The reason he is not here doing this report himself is that ironically, he is involved in this weekend's Emcommwest Pacificon gathering in Reno. Needless to say that preparing for the Swine Flu pandemic will be a hot button topic to be discussed at this year's gathering.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in Los Angeles.

--

More on this in future Amateur Radio Newsline reports. (ARNewsline(tm))

**

HAM POLITICS: NEW EURAO ORGANIZATION SEEN AS CHALLENGE TO IARU

A world challenge to the political dominance International Amateur Radio Union has, has been established in Europe. The challenge is from a group calling itself EURAO. That's an acronym for the European Radio Amateurs' Organization. It's a group that seems to have taken aim at the IARU's strict policy of having only one national society represent any given nation's ham radio community to the rest of the world.

EURAO says that its prime goal is to unite all amateur radio associations in Europe and beyond. According to its website, the original idea, proposed by F5RCS in 2005, is to provide an opportunity to combine efforts of all those radio amateurs' associations that EURAO claims that the IARU does not support. This, due to what EURAO calls International Amateur Radio Union rigid structure that prevents admitting more than one association per country which EURAO says amounts to a true monopoly. One more concerned with their own income than promoting the interests of Amateur Radio.

Whether or not that claim has any validity is obviously open to debate. That said, it's well established that anyone or any group that has
tried to challenge any national ham radio society has quickly found out that it takes massive amounts of money to do so. In our lifetime here in the United States there have been many challenges to the American Radio Relay League's dominance as the single national society representing all U.S. radio amateurs whether or not they are dues paying members. This has included the abortive Institute of Amateur Radio founded in the early 1960's as an alternative to the ARRL by 73 Magazine Editor Wayne Green, W2NSD. It did not last very long nor have any other attempts to replace the ARRL with a different group. Every one of the challenges has failed, mainly due to lack of funding.

What quickly becomes apparent is that even with web exposure, it still costs tens of millions of dollars -- or Euro's in the case of EURAO's -- to mount and run the kind of campaign needed to reach the ham radio masses. It's the ham in the street whose support is required and simply establishing a website is not going to reach all that many.

You can read more about the European Radio Amateurs' Organization at www.eurao.org/en/node/54
(Southgate)

**

RESTRUCTURING: IARU THANKS BROADCASTERS FOR SWIFT MOVE OFF 40

Speaking about the International Amateur Radio Union, it has thanked shortwave broadcasters for achieving a high degree of migration away from the now-worldwide Amateur-exclusive band of 7100 to 7200 kHz. This, by the mandated March 29th date.

IARU Secretary Dave Sumner, K1ZZ, has been quick to acknowledge the compliance by most broadcasters to QSY out of that band, as required by a decision of the World Radio Conference in 2003. In a statement, Sumner thanked the international broadcast community for its compliance with the changeover schedule. He also noted that he is certain that the few remaining broadcast transmitters operating on 7200 kHz and below will be addressed in the coming weeks.

Sumner's letter of appreciation was sent to the High Frequency Coordination Conference. That group represents 60 organizations from more than 30 countries accounting for up to 80% of the global output of short wave broadcasting.

The departure of broadcasting from this spectrum has resulted in an enormous improvement in the usefulness of 40 meters for amateur radio communication. (VK3PC)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N4MWA repeater serving the community of Phelps, Kentucky.

(5 sec pause here)

**

RADIO LAW: HONLOULU HAMS WIN MOBILE RADIO EXEMPTION

A major victory for hams in Honolulu, Hawaii. Bill 4, the pro-ham radio mobile cellular phone legislation for the City and County of Honolulu passed Third Reading on April 22nd, and has passed out of the Council.

The measure includes a full exemption for radio amateurs from the effects of this bill. This bill is significant because it addresses the issue of

traffic safety, but does not diminish the role of amateur radio in the course of the legislation. It's also believed to be the first legislation in Hawaii that fully supports amateur radio. The mayor will sign this bill into law shortly, with an effective date will be July 1st.

But the fight is not over yet. The Hawaii County Council is currently working with a draft equivalent to Bill 4, but so far lacks the exemption for amateur radio. According to Ron Hashiro, AH6RH, the next few weeks will be important for the Big Island for testimony and education of their Council members.

Updates will be posted on this web page: http://www.qsl. net/ah6rh/ am-radio/ cellular- phone-ordinance. html (AH6RH, KH6QX)

**

RADIO LAW: SUPREME COURT SAYS NO MORE FLEETING DIRTY WORDS CAN BE BROADCAST

Using dirty words in any broadcast is illegal. So says the Supreme Court in its Tuesday, April 28th narrow ruling in favor of a government policy. One that threatens broadcasters with fines over the use of even a single curse word on any broadcast.

By a 5 to 4 vote, the court threw out an earlier decision by the 2nd U.S. Circuit Court of Appeals that had found in favor of a Fox Television-led challenge to the FCC policy. That court returned the case to the agency for what it had termed as a reasoned analysis of its tougher line on indecency. Instead, the FCC took the matter to the Supreme Court.

By way of background, the FCC changed its long standing policy after it concluded that an unofficial one free expletive rule did not make sense. This, in the context of keeping the air waves free of indecency when children are likely to be watching television. This, based on a Supreme Court decision some ruled 31 years ago that determined that the FCC could ban curse words from the airwaves between 6 a.m. and 10 p.m. local time in any given broadcast market.

The events leading to this latest change involved a number of live broadcasts of awards shows in which celebrities let slip a few variations of certain dirty words. So-called fleeting expletives were not treated as indecent before then. The Fox Television Stations and other networks challenged the policy after the FCC singled out use of the words by entertainers Bono, Cher and Nicole Richie during awards programs that aired in 2002 and 2003.

What, if anything, this ruling might mean to personal radio users at this time is unclear. In the short term, likely nothing.

However, the FCC has been known to use legal findings in one service as basis to enforce rules in another. It has successfully denied license renewals in several services based on violations in others and has used cross service violations to successfully lift all licenses in some cases. That's even happened in ham radio.

Now, with so many scanner radios out there in households with young children, there is the possibility, albeit a remote one, that enough complaints reaching the FCC about a foul mouthed ham could bring some enforcement action based on this ruling regarding broadcast indecency into play. (Adapted from Media Network and various published reports.)

**

PUBLIC SERVICE: FDARA ASKED TO ASSIST WITH LOCAL AIRPORT DISASTER DRILL

Members of Iowa's The Fort Dodge Amateur Radio Association will be providing communications for an emergency drill on April 30th. This, after being invited by officials to assist the Fort Dodge Regional Airport by providing a back-up emergency response to the 2009 Fort Dodge Regional Airport Aircraft Disaster Drill.

During the two-hour exercise, all modes and methods of communications will be used. Following demobilization, there will be a meeting with airport, TSA, EMA and city emergency officials. This, to discuss their assessment of all aspects of this emergency preparedness event. (AC0LM)

**

PUBLIC SERVICE: HAM RADIO SUPPORTS THE 2009 TOUR DE ROUGE BIKE RIDE

Ham radio will be providing communications for the Tour de Rouge bike ride slated for May 3rd to the 8th. This will include groups communicating via the 444.500 WB5ITT Beaumont, Texas repeater, the 147.24 K5ET Crowley, Louisiana and the 145.23 W5GQ Baton Rouge, Louisiana repeaters. All bands from HF through 2 meter SSB will also be used for coordination of this massive, 512 mile event. The ride supports Red Cross chapters along the US Gulf Coast. (WB5ITT)

**

RADIO JUSTICE: NY MAN GETS 5 YEARS IN PRISON FOR SELLING HEZBOLLAH TV IN USA

Remember the case of Javed Iqbal we reported on more than two years ago? He's the 45year old Pakistani citizen living in New York City who was
charged back in 2006 with supporting Hezbollah by importing the signal of the Al Manar and selling it to US customers .

Well, Iqbal quietly plead guilty to the charges last December. Now, he has been sentenced to serve more than five and a half years in prison for the crime that he still says was noting more than a legal way to make a living.

The US Treasury branded Al Manar a terrorist organization in March, 2006, saying it supported Hezbollah's fund raising and recruitment activities. Prosecutors said Iqbal, who moved to the United States more than 26 years ago, provided transmission services to the Beirut-based channel in return for payment between 2005 and 2006. They termed him Hezbollah's "man" in New York City.

But Iqbal's defense lawyer, Joshua Dratel, said his client had no ideological support for Hezbollah. Dratel said that Iqbal sold the channel to make money as part of his satellite television business that also included Christian channels and even some adult entertainment. A second man who worked for the Iqbal's company has also pleaded guilty. (Media Network)

**

THE DTV TRANSITION: 3.8 MILLION STILL NOT READY FOR PRIME TIME

Not everyone is ready for the upcoming United States transition to all digital television and ham radio's assistance is still needed in the public awareness campaign. Jim Meachen, ZL2BHF, reports:

--

According to the A.C. Neilsen Company, some 3.8 million, or 3.4% of all United States households are still unprepared for the digital television transition slated to take place on June 12th. Geographically, Albuquerque, New Mexico, is the least prepared, with 9.4% having no over-the-air digital reception capability. It's followed by the Dallas-Fort Worth metroplex and
Houston, Texas, each with 6.3% of the citizenry not ready for the transition.

On the other side of the equation, the most digital ready cities appear to be New Haven and Hartford, Connecticut and the Providence to New Bedford region of Rhode Island. Each of these have less than one percent of their citizens unprepared for the digital TV change.

As previously reported, several months ago the FCC requested, through the ARRL, that ham radio operators assist their communities in preparing for the digital television rollout. Many radio clubs across the U.S. have reportedly become involved as advisors in this ongoing public service effort, nationwide.

I'm Jim Meachen. ZL2BHF.

--

Again, the date for the transition to digital television in the United States is June 12th. If your club wants to assist in helping the public to be prepared for the move, please contact the ARRL. (Adapted from a report in B&C and other sources.)

**

RADIO LAW: THE 106.1 MHZ UNLICENSED STATION IN SAN DIEGO

Ever wonder what an unlicensed broadcast station's location and antenna might look like? Well, the 106.1 MHz San Diego area station recently written up in the CGC Communicator apparently used two transmitter sites. The first location was on El Cajon Blvd. The station then seemed to have relocated to Monroe Ave. before going off the air. You can see it

all for yourself: http://earthsignals.com/add_CGC/San_Diego_Pirate.htm (CGC)

**

RADIO BUSINESS: ATTENDANCE AT BARCELONA MOBILE PHONE TRADE SHOW DOWN

The softness in the market for new mobile phones showed clearly in a thin array of new product rollouts at the recent Mobile World Congress trade show in Barcelona, Spain. In what little there was, Sony-Ericsson announced its first full touch-screen phone with a 12 megapixel camera running Symbian Foundation S60 software. This is the first non-Nokia phone to use that platform.

Sony-Ericsson also announced a new Walkman phone as well. Meantime, Samsung also renewed its promise to eventually release an Android phone, but wasn't ready to preview a model at the show.

Attendence was down to 49,000 from 55,000 last year with the reason likely the slumping world economy. (Radio News OnLine)

**

SPECIAL EVENT: VE7IYOA CELEBRATING THE INTERNATIONAL YEAR OF ASTRONOMY

The first amateur radio special event station for the International Year of Astronomy has been announced and it is VE7IYOA located in Victoria, British Columbia Canada. VE7IYOA will be active from June 1st to the 30th to celebrate the 400th Anniversary of Galileo Galilei's first look at the sky
through an optical instrument. This Italian physicist, mathematician, astronomer, and philosopher is acclaimed as the father of modern observational astronomy. VE7IYOA has a unique QSL card on offer. (VK3PC)

**

NAMES IN THE NEWS: NCDXF ELECTS NEW LEADERS

The NCDXF has new leaders. At its Board of Directors meeting on April 17th, the Northern California DX Foundation elected Bruce Butler, W6OSP, as President and Glenn Johnson, W0GJ, as Vice President. Outgoing President Len Geraldi, K6ANP, and Vice President Al Burnham, K6RIM, remain on the board as Directors. Information pertaining to the Northern California DX Foundation is available on-line at www.ncdxf.org (NCDXF)

**

HAMVENTION NEWS: 2009 TAPR/AMSAT BANQUET MAY 15

The third annual joint TAPR and AMSAT Banquet will be held Friday evening, May 15, 2008, during the Dayton Hamvention. The event is slated for the Jefferson Room at the Kohler Presidential Banquet Center, in Kettering, Ohio. Reservations are required and must be made by Monday, May 11th. For additional information contact the AMSAT office by e-mail to martha (at) amsat (dot) org. (ANS)

**

HAMVENTION NEWS: RTTY FORUM TO DISCUSS CONTEST PARTICIPATOPN

This year's Dayton Hamvention RTTY forum will feature a panel discussion on
how best to accommodate the diversity of participants in RTTY contests. Speakers scheduled to appear include K5DU, K4GMH, W2QO, and K4IA. Each will give a short presentation of their perspective on participant diversity in these contests and then be available to address questions and comments from the audience. The forum takes place in Meeting Room 3 from 12:20 to 1 PM local time on Saturday, May 16th. (RTTY Reflector)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline, with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

HAMVENTION NEWS: LIVE FROM HAMVENTION TO YOUR HAMSHACK

Hams who cannot attend Hamvention 2009 can still be there vicariously thanks to Tom Medlin, W5KUB. For the 7th-year-running, Tom will be streaming live video and audio of this "show of shows" to radio amateurs worldwide.

Tom's transmissions will go live Wednesday May 13 at 1300GMT for his 500 mile drive to the Hara Arena. He will then be streaming on Thursday as he sets up in the Flea Market and then for the entire Hamvention. The broadcast will end as he gets back home to Memphis, Tennessee, on Sunday night.

In addition to the video, the site has a chat room where you can talk with other hams around the world. And you will find it all on-line, Hamvention weekend at www.w5kub.com. (W5KUB)

**

PROPAGATION NEWS: NEW SOLAR CYCLE 24 WEBSITE

Wondering where Solar Cycle 24 is? So is Kevin Gibeau ,VE3EN, in Ontario, Canada. And now Kevin has established a web site to track the ever so slowly emerging solar cycle.

The information on this site updates every two minutes and is gathered from a wide range of sources. This saves you the trouble of surfing the web to find all the data yourself. Instead, you need only take your web browser to www.solarcycle24.com to find it all. (Southgate)

**

HAM RADIO IN SPACE: NEW APRS SATELLITES BEING PLANNED

The APRS satellite fleet will be expanded in the not to distant future. Writing from the US Naval Academy Satellite Development Lab, Bob Bruninga, WB4APR, the father of APRS, reports on new satellites with the same APRS packet relay capability as currently operated by PCSAT and the ISS that are now in their development stages.

Bruninga says that their design will use the new Byonics all-on-a-board Packet TNC/Radio/Telemetry system. This makes it possible to build a packet satellite out of a single 3.4" square board. 5 rechargeable batteries is all you need to power this tiny APRS satellite.

No launch dates have been announced at this time. (WB4APR)

**

HAM RADIO IN SPACE: CELEBRATING THE APOLLO 11 MOON LANDING

A group of radio amateurs are planning a commemorative event to mark this year's 40th anniversary of the Apollo 11 moon landing. Called 'Echoes of Apollo,' various activities are planned around June and July.

The organizers of the event are reportedly negotiating with some of the world's largest and most capable amateur radio moon-bounce stations, and also some radio deep space radio facilities. The idea is to hook-up people from various locations using moon-bounce and, if the antennas are large enough, possibly achieving near broadcast quality audio. You might say, a kind of ï¿½Back-to-the-Moon' day.

Also planned is an HF radio weekend, with HF stations set up near sites that took part in the original support for the Apollo 11 mission. The EME event is planned for the 27th of June and the HF event is planned for July 18th to the 20th. More on this as information becomes available. (WIA News)

WORLDBEAT: THE ANSWER IS "BLOWIN' IN THE UK WIND"

The UK telecommunications regulator Ofcom has published a report dealing with the effects of interference caused by power generating Wind Farms turbines to Ultra High Frequency and Super High Frequency communications. The report was compiled by ERA Technology and Aegis Systems Ltd. It describes a technical study in which a series of measurements were carried out with regard to the presence of wind turbines near to wireless services.

Some of their findings include the fact that a single turbine can produce measured fades as large as 3 dB for UHF scanning telemetry links and 2 dB for fixed links operating between 1.5 and 18 GHz. This, when the turbine is lying on the transmitter-receiver path. Also established is that a wind farm with seventeen turbines can produce measured fades as large as 10 to 15 dB for 1% of the time when the wind farm is lying on the transmitter-receiver path.

The purpose of the study was to enhance understanding of the effects of wind turbines near to wireless services. The full text of this propagation study and report in PDF Format is available at http://www.ofcom.org.uk/radiocomms/ifi/licensing/classes/fixed/Windfarms/rf_measurement/windfarm_report.pdf

WORLDBEAT: FRANCE FAILS TO PASS ENTERTAINMENT ANTI-PIRACY MEASURE

French lawmakers have rejected a bill that would have cut off the Internet connections of people who illegally download music or films. The measure would have also created the world's first government agency to track and punish those who steal music and film on the Internet.

The contested bill had initially passed the lower house of parliament two weeks ago and seemed destined for overwhelming approval by France's legislative body. But very few lawmakers were present for Thursday, April 9th vote to finalize the measure, which was rejected by a vote of 21 to 15.

The music and film industry had supported the bill, aimed at cracking down on illegal downloading. Its critics claimed that it encroached far too much on individual freedoms. (RW)

RADIOSPORTS: NEW CONTESTING COMPENDIUM WEBSITE

In radiosports news, Pete Smith, N4ZR, has announced that the new Contesting Compendium website is now up-and-running. The objective of this Web page is to make it a one-stop resource source for information on contesting. You can find it on-line at http://wiki.contesting.com (N4ZR)

**

RADIOSPORTS: 2008 JUNE VHF QSO PARTY CERTS MAILED OUT

Sean Kutzko, KX9X, the ARRL's Contest Branch Manager says that certificates for the 2008 June VHF QSO Party have been mailed out. Kutzko also reports that plaques have been ordered and will begin shipping in a few weeks. KX9X says that he will notify the ham community when the plaques go out the door. (KX9X)

DX

In DX, listen out for the Greek special event callsign SY2DDAY between June 4th and 7th. It will be on the air to celebrate the 65th anniversary of the greatest landing operation in history during WWII. That, of course, was the Allied-lead Normandy Beach invasion with the participation of seven countries. Greece supplied 2 warships and 4 commercial freighters. QSL this one only direct as instructed on the air.

And W5KDJ, will be active from Madagascar as 5R8KD between from July 1st to the 15th. He will be active on 160 through 6 meters using CW and RTTY. QSL via his home callsign. He is also accepting Logbook to the World and eQSL.

SM1TDE, is planning an operation from Gambia to take place between December 10-31st. More details on this one as they are announced.

The "DX World of Ham Radio" Web page is reporting that H44MY and H44T are once again in the Solomon Islands staying in Honiara. Mike has indicated that there are no plans to be immediately active so keep an ear open for both these calls to show up with little or no notice.

Lastly, JA1DOT, is now active from Bhutan as A52DT. He will be there until May 6th on 160 through 10 meters using CW, SSB and RTTY. QSL via his home callsign. Updates will be posted on the Nippon DX Association's web page.

(Above from various DX newsletters and news sources)

THAT FINAL ITEM: A TESTAMENT TO SAMUEL F.B. MORSE

Lastly, a belated 218th Happy Birthday to the inventor of telegraph communications, Samuel F.B. Morse.

Morse was born on April 27, 1791, in Charlestown, Massachusetts. 53 years later on May 24th 1844, it was Morse who sent the words "What hath God wrought" by telegraph from Washington, D.C to Baltimore, Maryland. That single transmission ushered in a new era in telecommunications and set the stage for the vast global data and voice networks that exist today.

But Morse's influence on communications appears to be in its sunset days. His vision of a vast wired community based on dots and dashes did emerge to some degree but has since given way to wireless communications, with the telegraph considered an anachronism of another century long past.

Most services have phased out the use of the Morse Code having replaced it with automated digital communications. Even the longtime distress monitoring for the three letters SOS is being phased out world-wide in favor of an automated, satellite-based search and rescue service.

Very soon it will only be the current generation of ham radio operators who will likely be using Morse's simple, but elegant communications system and it's not known if the next generation of ham radio operators will want to carry this nostalgia and legacy on. Let's hope they do because it would be
a shame to see the contributions of the great Samel F.B. Morse forgotten with the sands of time.

By the way, the Google search engine did its share in celebrating. On April 27th it featured some Morse Code right on its front page. (ARNewsline(tm) from various sources.)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our email address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only
official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2009 Amateur Radio Newsline Young Ham of the Year Award is now open. Complete details are on our website at www.arnewsline.org. Just scroll down to the words "2009 YHOTY Nominations Now Open" and click for more information and an official nominating form.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

==> HOUSTON REPRESENTATIVE INTRODUCES AMATEUR RADIO BILL IN CONGRESS

On Wednesday, April 29, Representative Sheila Jackson-Lee (D-TX)
introduced HR 2160 -- the "Amateur Radio Emergency Communications
Enhancement Act of 2009" -- in the US House of Representatives. This
bill, if passed, would "promote and encourage the valuable public
service, disaster relief, and emergency communications provided on a
volunteer basis by licensees of the Federal Communications Commission in
the Amateur Radio Service, by undertaking a study of the uses of Amateur
Radio for emergency and disaster relief communications, by identifying
```

unnecessary or unreasonable impediments to the deployment of Amateur Radio emergency and disaster relief communications, and by making recommendations for relief of such unreasonable restrictions so as to expand the uses of Amateur Radio communications in Homeland Security planning and response." The bill has been referred to the Committee on Energy and Commerce <http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf>.

If enacted into law, HR 2160, would instruct the Secretary of Homeland Security to undertake a study and report its findings to Congress within 180 days. The study would spell out uses and capabilities of Amateur Radio communications in emergencies and disaster relief. The study shall:

* Include recommendations for enhancements in the voluntary deployment of Amateur Radio licensees in disaster and emergency communications and disaster relief efforts.
* Include recommendations for improved integration of Amateur Radio operators in planning and in furtherance of the Department of Homeland Security initiatives.
* Identify unreasonable or unnecessary impediments to enhanced Amateur Radio communications -- such as the effects of private land use regulations on residential antenna installations -- and make recommendations regarding such impediments.
* Include an evaluation of Section 207 of the Telecommunications Act of 1996 (Public Law 104-104, 110 Stat 56 [1996]).
* Recommend whether Section 207 should be modified to prevent unreasonable private land use restrictions that impair the ability of amateurs to conduct, or prepare to conduct, emergency communications by means of effective outdoor antennas and support structures at reasonable heights and dimensions for the purpose in residential areas.

The Secretary of Homeland Security shall utilize the expertise of the ARRL and shall seek information from private and public sectors for the study.

The bill currently has five co-sponsors: Madeleine Bordallo (Guam), Mary Jo Kilroy (D-OH), Zoe Lofgren (D-CA), Blaine Luetkemeyer (R-MO) and Bennie Thompson (D-MS). Representative Thompson currently serves as Chairman of the Committee on Homeland Security. Representatives Jackson-Lee, Lofgren and Kilroy are members of that committee.

"We understand that Representative Jackson-Lee was very impressed with the radio amateurs she encountered on a visit to an Emergency Operations Center in Houston during Hurricane Ike last September," said ARRL Chief Executive Officer David Sumner, K1ZZ. "We are grateful to her and to the five original co-sponsors for their support of Amateur Radio and the encouragement that their bill offers."

ARRL President Joel Harrison, W5ZN, concurred: "We are excited to have Representative Sheila Jackson-Lee introduce HR 2160. It is extremely

encouraging to have the support of a number of original co-sponsors -- including several members of the House Homeland Security Committee -- who recognize the importance of Amateur Radio's long history of public service."

==> PRESIDENT OBAMA NOMINATES NEW FCC COMMISSIONER

On Wednesday, April 29, President Barack Obama announced his intention to nominate Mignon L. Clyburn of South Carolina as an FCC Commissioner <http://www.whitehouse.gov/the_press_office/President-Obama-Announces-More-Key-Administration-Posts-4-29-09/>. If her nomination is approved by Congress, Clyburn will fill the seat of Democrat Jonathan Adelstein. Adelstein is leaving the FCC to head up the Department of Agriculture's Rural Utilities Service (RUS) <http://www.arrl.org/news/stories/2009/03/23/10716/?nc=1>.

Clyburn, the daughter of House Majority Whip Representative James Clyburn (D-SC), has served on the Public Service Commission of South Carolina <http://www.psc.sc.gov/> since 1998. The Public Service Commission regulates South Carolina's investor owned public utilities, including providers of telecommunications services. Before her election to that body, she spent 14 years as the publisher and general manager of "The Coastal Times," a weekly newspaper in Charleston, South Carolina.

In 1998, Clyburn was elected by the South Carolina General Assembly as a Commissioner to represent the Sixth Congressional District; she has been re-elected three times, chairing the Commission from 2002-2004. She is a past chair of the Southeastern Association of Regulatory Utility Commissioners, and is presently the chair of the Washington Action Committee of the National Association of Regulatory Utility Commissioners (NARUC) <http://www.naruc.org/>. Clyburn also serves on NARUC's Audit Committee and Utilities Market Access Partnership Board.

Calling Clyburn a "fine public servant," Obama said Clyburn was "a welcome addition to my team as we work to put America on a path towards prosperity and keep our nation safe. I am honored [Clyburn] will be joining my administration and look forward to working with [her] in the months and years ahead."

Acting FCC Chairman Michael Copps congratulated Clyburn, saying, "She is an excellent choice, and the experience she brings from her service on South Carolina's Public Service Commission will be an invaluable asset as we address the many challenges and opportunities that are before us. I wish her a successful Senate confirmation and look forward to working with her over the coming months and years in serving consumers and the public interest."

Clyburn graduated from the University of South Carolina with a Bachelor of Science degree in Banking, Finance & Economics in 1984.

==> THE 2009 ARRL NATIONAL CONVENTION AND DAYTON HAMVENTION: TWO WEEKS AND COUNTING!

On May 15-17, hams from all over the world will make their way to the Hara Arena, located in Trotwood, Ohio for the 2009 ARRL National Convention <http://www.arrl.org/announce/nc/2009/dayton.html> and Dayton Hamvention <http://www.hamvention.org/>. Held annually since 1952, Hamvention is one of the largest Amateur Radio gatherings in the world.

Following the tradition of Dayton natives Wilber and Orville Wright, the ARRL National Convention will be a "hands-on" paradise. New, interactive exhibits at the ARRL EXPO, the centerpiece of the National Convention, will provide engaging, real-life experiences that encourage hams and non-hams alike to get more active in Amateur Radio. At the ARRL Project Building Booth, attendees can try their hand at assembling a kit as they handle electronic components and circuit boards -- even a little soldering!
"If you have never built a project before, we hope you will consider this a 'Soldering 101' basic course," said ARRL Laboratory Engineer Bob Allison, WB1GCM. Allison will lead a team of instructors who will mentor visitors throughout the activity. "We want to encourage hams who have not built something in a long time to get back in the saddle. Project building is fun, and it's a great way to build low cost gear and accessories. We want everyone to unlock their inner do-it-yourselfer." Pre-registration is required -- sign up at the ARRL EXPO.

You can also explore the many facets of ARRL Field Day <http://www.arrl.org/fieldday> at the ARRL EXPO. "Field Day is the largest operating event in the world and represents the very best of the Amateur Radio Service," said ARRL Field Day Manager Dan Henderson, N1ND. The annual event draws tens of thousands of radio amateurs to the airwaves over a single weekend. Henderson said that Field Day is part emergency preparedness exercise, part public demonstration and part radio club social event: "It's really just a lot of fun and gives us a chance to get out there and show what we can do on many fronts."

ARRL Forum Schedule

Several ARRL staff members will be on hand at Dayton, presenting forums on several exciting topics. On Friday, May 15 at 10:30 AM in Room 5, Henderson and a group of other Field Day aficionados will share some helpful hints they have garnered from decades of Field Day operations. Special Field Day 2009 posters will be available to participants (while they last), as well as some special Field Day surprises. Come learn more about some of the unique and fulfilling ways groups across the US and Canada get on the air to celebrate ARRL Field Day.

ARRL Volunteer Counsel (VC) Jim O'Connell, W9WU, along with "Antenna Zoning for the Radio Amateur" author Fred Hopengarten, K1VR, ARRL Technical Relations Manager Brennan Price, N4QX, and ARRL VC Paula Uscian, K9IR, will present "Ham Radio and the Law -- Getting It Up and Keeping It Up" on May 15 at 12:15 PM in Room 3. Join this discussion by Amateur Radio attorneys on legal issues of interest to hams on topics that include how to avoid restrictive covenants, how to present your case for a tower permit and how to defend against nuisance claims. Hear about the latest court rulings on RFI, PRB-1 and towers, as well as

updates on the ARRL's Legal Defense and Assistance Committee.

Come ask QST's very own "Doctor" your technical Amateur Radio questions in person on May 15 at 12:15 PM in Room 2. QST Technical Editor Joel Hallas, W1ZR, will provide his best answer on the spot, or get back to you shortly after the National Convention. Some questions and answers may end up in QST if they seem likely to be helpful to readers. This will be an informal sleeves-rolled-up chalk talk environment. Be sure to bring your questions!
Reaching out to the public is the life blood of Amateur Radio! From land- and property-use restrictions to recruiting, our ability to enjoy the service depends on keeping a positive image. Join ARRL Media and Public Relations Manager Allen Pitts, W1AGP, on May 15 at 1:30 PM in Room 2 as he introduces ARRL's PR-101 course <http://www.arrl.org/news/stories/2009/01/22/10578/?nc=1>. This is a course to teach hams the basics of making -- and keeping -- a good relationship with your town and the media. If "every ham is a Public Information Officer," then every ham needs to have these skills.

Join the ARRL on Saturday, May 16 at 10:30 AM in Room 2 for an interactive session with ARRL national and regional leadership. ARRL is a membership organization -- we are here for you. Come share your ideas and ask questions.

If you've ever wanted to try digital contesting but weren't sure how to get started, we definitely have a forum for you! Join ARRL Publications Manager and digital guru Steve Ford, WB8IMY and learn how to get started in digital contesting. This forum, offered on May 16 at 1:15 PM in Room 3, will show you that you don't need to be a big-gun station with a kilowatt and a tower to have hours of on-the-air fun. All you need is a radio, a computer, an antenna -- and some helpful advice that you'll pick up at this forum! Join the thousands of hams who are already experiencing the joys of digital contesting.

Get up close and personal with Richard Garriott, W5KWQ, on Saturday, May 16 at 1:30 PM in Room 1. In October 2008, Garriott -- son of Owen Garriott, W5LFL -- fulfilled a lifelong dream to experience spaceflight and traveled to the International Space Station (ISS) aboard a Russian Soyuz spacecraft. While living on the ISS, he conducted scientific experiments and environmental research, but he also had a chance to do quite a bit of Amateur Radio operating, including sending slow-scan TV (SSTV) images. Owen Garriott, W5LFL, initiated the first ham radio contacts from space 26 years ago aboard the shuttle Columbia on STS-9. Richard Garriott will also be on hand at the ARRL EXPO throughout the weekend signing autographs and meeting amateurs.

At the EXPO -- and Beyond!
There is so much to do at the ARRL EXPO. Visit the huge ARRL bookstore to purchase popular ARRL publications, join or renew your ARRL membership and pick up official ARRL merchandise. Get a free gift when you join ARRL or renew your membership at ARRL EXPO and everyone gets a free ARRL Dayton 2009 button (while supplies last).

Whether you're 10 or 110, the EXPO has something just for you. Join young (and young-at-heart) amateurs at the ARRL Youth Lounge. Drop by the ARRL Youth Lounge to meet and socialize with other young hams. Come chat with other hams, listen to music, grab a snack or participate in one of the many activities, such as fox-hunts, scavenger hunts, Morse code fun, a QSL card designing contest, crafts, prizes and more. Whether or not you're licensed, you're welcome to come by and join the fun! If you're looking for other youth during the convention, try calling them on the youth calling frequencies: 145.540 MHz (107.2 Hz CTCSS) primary and 146.430 (233.6 Hz CTCSS) secondary. Not licensed yet? Soon-to-be hams can check-in using FRS channel one.

If you enjoy waxing nostalgic over the gear of yesteryear, drop by the exhibit area to meet vintage equipment photographer Joe Veras, K9OCO. He will be autographing his book, "50 Years of Amateur Radio Innovation" -- filled with photographs of classic and legendary transmitters -- that was recently published by ARRL <http://www.arrl.org/catalog/?item=0228>. You can also tour a 1964 Collins Radio Company communications van -- a Ford Econoline van that traveled as a mobile demonstration center for Collins equipment. The van, decked out with vintage gear from the S-Line period, will be there for you to explore.

Bring your license and get on the air from W1AW/8 at the ARRL National Convention. Operating times and frequencies will be posted at the station. Meet W1AW Station Manager Joe Carcia, NJ1Q, from the famed Hiram Percy Maxim Memorial Station at ARRL Headquarters.

Personnel from the ARRL DXCC Branch will be on hand to check your DX cards and applications. All cards will be eligible for checking, including old cards, cards for deleted countries and cards for 160 meters. Applications will be limited to 120 cards (more cards will be checked as time and volunteer Card Checkers are available). See the DXCC Web site for the latest program information and current forms <http://www.arrl.org/awards/dxcc>. Representatives from Logbook of the World (LoTW) will also be on hand, giving demonstrations and answering your questions <http://www.arrl.org/lotw>.

Be sure to stop by the EXPO to meet new IARU <http://www.iaru.org/> President Tim Ellam, VE6SH, and Vice President Ole Garpestad, LA2RR, at the IARU booth. Special exhibits in the area will be hosted by the three different IARU Regions: Deutscher Amateur Radio Club (DARC) from Germany will represent Region 1, the ARRL will represent Region 2 and the Japan Amateur Radio League (JARL) will represent Region 3.

Besides the myriad of activities taking place off-site such as Contest University <http://www.contestuniversity.com/> and the QRP event Four Days in May <http://www.fdim.qrparci.org/>, there will be a Wouff Hong Ceremony <http://www.arrl.org/tis/info/history.html> on Saturday, May 16 at 10:45 PM at the Crowne Plaza Hotel in downtown Dayton. Sponsored by the NE Ohio Ham Radio Players, any licensed ARRL member can participate in this lively ARRL tradition that is steeped in mystery! Attendees will receive a special keepsake at this fun activity, appropriate for all ages.

Keeping Up in Dayton

If you can't make it to Dayton -- or even if you make the trek -- you can still catch all the latest news on the Convention's Weblog <http://www.arrl.org/blog>. QST Editor Steve Ford, WB8IMY, will once again be blogging about Hamvention. Proving you can indeed go home again, Steve will regale readers with the adventures of staying with his mother at his childhood home in Dayton. For the past few years, thousands of readers have been entertained as Steve has related stories about new gear making its debut at Hamvention, the weather in Dayton and the overall feel of the event -- as well as the ever-popular antics at "Casa de Mi Madre."

The ARRL will introduce a new blog at this year's National Convention: ARRL Youth Editor Duncan MacLachlan, KU0DM, will blog from a young ham's perspective. MacLachlan, who will be assisting former Youth Editor Andrea Hartlage, KG4IUM, and her father Scott, KF4PWI, in the ARRL Youth Lounge, will explore the Hamvention exhibits, forums and events, giving his first-time take on the Hamvention experience. MacLachlan's perspective is a welcome addition to the ARRL National Convention team. Explore all of Hamvention's nooks and crannies through his blog and Twitter updates <http://twitter.com/arrlyouth>.

ARRL staff are getting ready for all the excitement that a National Convention brings. Teaming up with the Dayton Hamvention is sure to bring everything to a fever pitch, so why not make plans to join in on the fun? Travel and lodging information is available on the Hamvention Web site <http://www.hamvention.org/travel.php>.

==> ARRL FOUNDATION ANNOUNCES 2009 SCHOLARSHIP RECIPIENTS

The ARRL Foundation <http://www.arrlf.org/> Board of Directors is pleased to announce that they have awarded 52 scholarships to students in 21 states. Of these awards, 48 are annual scholarships with a total value of $54,700. In addition there are currently four holders of the William R. Goldfarb Memorial scholarship for whom the awards vary based on the college or university they attend, other awards they receive and other financial factors.

Last month, the ARRL Foundation announced that they had awarded the William R. Goldfarb Memorial Scholarship <http://www.arrlf.org/programs/scholarships> to Dean LaBarba, KI6CUX, of Long Beach, California. He will graduate from Woodrow Wilson High School this year with a GPA of 4.0. LaBarba holds a Technician class license that in 2005 led him to participation in the Amateur Radio Emergency Communication (AREC) team at his high school; since 2007, he has served as president. LaBarba also spends considerable time coordinating Amateur Radio activities, including Field Day, with the local community. LaBarba -- who will be attending Westmont College in Santa Barbara, California <http://www.westmont.edu/> -- has had a keen interest in medicine and intends to pursue a career in neurology.

The Goldfarb Scholarship is the result of a generous endowment from the late William Goldfarb, N2ITP. Goldfarb, who died in 1997, set up a scholarship endowment of close to $1 million in memory of his parents, Albert and Dorothy Goldfarb. Awarded to one high school senior each year, the Goldfarb Scholarship assists the recipient to receive a four-year undergraduate degree in engineering or science or in the medical or business-related fields. The terms of reference of the generous Goldfarb scholarship award require that recipients demonstrate financial need and significant involvement with Amateur Radio, in addition to high academic performance. The seventh Goldfarb Scholarship winner, LaBarba continues the tradition of prior recipients, demonstrating superior academic performance, outstanding leadership and extraordinary Amateur Radio and community service.

The ARRL Foundation administers scholarships for post-secondary education students holding a valid FCC-granted Amateur Radio license. Scholarship awards range from $500 to $5000 or more and are available to high school seniors (or equivalent) or students currently enrolled in a college or university. Scholarships are funded by generous individuals and Amateur Radio organizations to encourage radio amateurs to pursue their educational goals. All ARRL Foundation-administered scholarships are intended exclusively for educational use, to provide assistance with costs of tuition, room, board, books and/or other fees essential to the education of the recipient.

For a complete list of scholarship recipients for 2009, please visit the ARRL Web site <http://www.arrl.org/news/stories/2009/04/28/10787/?nc=1>.

==> ARRL'S TECHNICAL INFORMATION SERVICE PROVIDES MEMBERS WITH ANSWERS

Have you ever had a technical question that you weren't able to figure out? Even after checking with publications such as The ARRL Handbook or the ARRL Antenna Book, you're still stumped. Have you exhausted every resource you can think of, including your Section's Technical Coordinator (TC) <http://www.arrl.org/FandES/field/org/tc.html>? Just when you think you're at the end of your rope, you remember the ARRL Technical Information Service <http://www.arrl.org/tis/>.

The TIS is staffed by members of the ARRL Lab and is here to provide technical assistance at no cost to ARRL members. Many members seem to be using the service: In a six week period (October 20-November 30, 2008), ARRL Lab staff fielded almost 1300 requests for information from the TIS. These ranged from questions on how to choose the best radio, propagation and BPL to questions concerning antennas, feed lines and towers.

ARRL TCs and Technical Specialists (TS) <http://www.arrl.org/FandES/field/org/ts.html> in the field and at ARRL Headquarters can answer your questions on topics ranging from A (ampere) to Z (impedance) -- and just about anything in between. Our technical staff will help you over the phone, refer you to a volunteer ARRL TS in your area or send you the needed information from a growing collection of information packages. For really difficult questions, an ARRL Lab

Engineer will research the League's technical library and send you an answer by postal or electronic mail.

ARRL Lab Engineer Mike Gruber, W1MG, remembers a question that a member sent in recently via e-mail: "I have a 250 foot run of Buryflex 213 from the shack to the switchbox at the top of the tower. I know that results in significant loss at, say, 14 and 18 MHz (I seldom work 10 or 15 and the tower antennas are only for HF), but here is the question: Is it ENOUGH of a loss (for the receiver) to warrant running hardline (it would be free) between the shack and tower switchbox with a tail of about 10 feet of 213 inside the shack, and another tail of about 10 feet at the tower end, running from the switchbox to the TA-33, considering the insertion loss of two additional connectors (to connect the hardline to the 213 on each end) and the impedance difference of the hardline compared with the 213?"

Gruber answered the ham, providing a chart he developed, showing "some losses shown for 250 feet of RG-213 vs half-inch hardline. I selected 50, 100 and 150 ohm resistive loads for this analysis. Any rate, if you consider the case with the highest loss -- 29 MHz with a 150 ohm load -- will only improve by 3.9 - 1.544 = 2.4 dB. If you consider that a typical S-unit is 6 dB, the most dramatic improvement in the example cases I selected is still less than half of an S-unit. It's not a homerun by any stretch of the imagination. Of course, that extra 2.311 dB may be significant in some cases. If you ran 1500 W, you would only have 881 W at the antenna feed point. The rest would be lost in the feed line."

ARRL Senior Lab Engineer Zack Lau, W1VT, recalls an interesting question he received from a member: "How can I make a simple circularly polarized antenna out of linear elements?" Lau referred him to an article he wrote, "A Simple 10-Meter Satellite Turnstile Antenna," that appeared in the November/December 2001 issue of QEX.

The TIS, as one of the many services it offers, maintains a database of more than 2000 suppliers that provide goods and services of interest to radio amateurs <http://www.arrl.org/tis/tisfind.html>. These include manufacturers, dealers, publications, clubs and museums, just to name a few. The TIS also keeps what they call an "expanding list" of technical pages that include articles from QST, QEX and The ARRL Handbook, as well as original articles on a variety of subjects including theory, tutorials and projects <http://www.arrl.org/tis/tismenu.html>. Many pages also contain additional sources for materials and information and Web links of particular interest.

If you need a copy of the QST Product Review from May 1985 that featured the ICOM IC-271A 2 meter multimode transceiver, look no further. The TIS also keeps a list of every QST Product Review published since 1970 <http://www.arrl.org/tis/info/prodrev.html>. ARRL members can also download any QST Product review published after 1980 <http://www.arrl.org/members-only/prodrev/bymfg.html>. If you need a quick summary of any HF transceiver featured in a QST Product Review,

you can also find it on the TIS Web site.

The TIS also maintains the ARRL Periodicals Archive and Search <http://www.arrl.org/members-only/qqnsearch.html>. This feature provides ARRL members with PDF copies of all QST articles from December 1915 through December 2005, enabling members to view and print their favorite article, project and more. The ARRL Periodicals Archive and Search lists every article for QST from 1915 to the present, QEX from 1981 to the present, Ham Radio Magazine from 1968 to 1990 and NCJ from 1973 to the present (please note that beginning in 1998, each issue of QEX covers two months).

"Having access to every issue of QST through 2005 is absolutely incredible!" said ARRL Lab Manager Ed Hare, W1RFI. "The best of the best of QST from every era is now at the fingertips of every ARRL member with a keyboard and an Internet connection. Members can research articles on any subject that interests them, or just browse the past issues. This valuable content will help radio amateurs who use QST as a technical resource -- for projects, equipment 'hints and kinks' -- and for other research contributing to the advancement of the radio art."

For those needing a higher quality reprint, a reprint from QEX or NCJ, or for hams who are not members of the ARRL, the TIS also provides photocopies of articles for a nominal fee <http://www.arrl.org/members-only/artcopies.html>. You can reach the TIS via e-mail <mailto:tis@arrl.org> or by phone at 860-594-0214.

The TIS is just one of the many benefits available to ARRL members. To learn about all the benefits of ARRL membership, including QST, e-mail forwarding service, the outgoing QSL service and more, please visit the ARRL Membership Web page <http://www.arrl.org/join>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment covers the month of April.

The ARRL worked with Representative Sheila Jackson Lee (D-TX) as she sponsored HR 2160, the Amateur Radio Emergency Communications Enhancement Act of 2009, in the US House of Representatives <http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1>.

Upon request from the FCC, the ARRL submitted comments to the Commission defining "broadband" <http://www.arrl.org/news/stories/2009/04/15/10768/?nc=1>.

The ARRL Foundation awarded scholarships, including the prestigious William R. Goldfarb Memorial Scholarship, to 49 outstanding young radio amateurs for the 2009-2010 academic year <http://www.arrl.org/news/stories/2009/04/28/10787/?nc=1>.

Santa Cruz area ARES members provided communications support after vandals disrupted communications infrastructure on April 9 <http://www.arrl.org/news/stories/2009/04/15/10771/?nc=1>.

Amateurs in North Dakota and Minnesota provided communications support to various served agencies when the Red River overflowed in late March and early April <http://www.arrl.org/news/stories/2009/04/06/10752/?nc=1>.

Hams in the Southeastern US, through the use of weather spotting networks, kept the National Weather Service apprised when deadly tornadoes struck that area on April 10 <http://www.arrl.org/news/stories/2009/04/14/10766/?nc=1>.

The ARRL announced that it was in the process of developing a new Emergency Communications course <http://www.arrl.org/news/stories/2009/04/07/10756/?nc=1>.

ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD, attended the 2009 National Hurricane Conference, held April 6-10 in Austin, Texas. ARRL Media and Public Relations Manager Allen Pitts, W1AGP, represented the ARRL at the National Association of Broadcasters event in Las Vegas <http://www.arrl.org/news/stories/2009/04/22/10779/?nc=1>.

Thomas Dick, KF2GC, of Saranac Lake, returns as Section Manager of the ARRL Northern New York Section <http://www.arrl.org/?artid=8903>. Scott Rausch, WA0VKC, of Piedmont, was appointed Section Manager of the ARRL South Dakota Section as of April 7 <http://www.arrl.org/?artid=8882>.

The winner of the QST Cover Plaque Award for April is Byron Black, W4SSY, for his article "The W4SSY Spudgun."

The June 2009 issue of QST and the May/June issues of QEX and NCJ were released to the printer.

==>SOLAR UPDATE

Tad "He smiles upon their sunny faces" Cook, K7RA, this week reports: The data at the end of last week's bulletin showed daily sunspot numbers from April 16-22 as six zeros, then 11. In fact, every day was at zero until April 21, when it was 11; it moved again to zero the next day, April 22. We had just as many zero sunspot days -- and only one day with a sunspot -- but we saw the sunspot on Tuesday, April 21, not April 22. We had two additional days with a sunspot this week, Wednesday and Thursday, April 29-30. The sunspot number was 15 and 12, respectively, on those days. But this was another old Solar Cycle 23 sunspot, and it appeared near the western limb. By today, it may have either faded away completely or rotated out of view, May 1. The data at the bottom of our bulletin shows seven days, Thursday through Wednesday for the reporting week, so the sunspot number of 12 for Thursday will appear in next week's data. Sunspot numbers for April 23-29 were 0, 0, 0, 0, 0, 0 and 15 with a mean of 2.1. The 10.7 cm flux was 70.6, 69.7, 69.4, 69.2, 67.7, 68.8 and 69.5 with a mean of 69.3. The estimated planetary A

indices were 3, 5, 4, 5, 4, 2 and 3 with a mean of 3.7. The estimated mid-latitude A indices were 0, 5, 2, 3, 3, 2 and 3 with a mean of 2.6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by John Clare's "May" <http://www.poemhunter.com/poem/may-2/>.

==>IN BRIEF:

* This Week on the Radio: This week, the NCCC Sprint Ladder and the AGCW QRP/QRP Party are May 1. The Microwave Spring Sprint is May 2 (local time). The MARAC QSO Party (both CW and SSB), the 10-10 International Spring Contest (both CW and digital), the 7th Call Area QSO Party, the Indiana QSO Party, the New England QSO Party and the ARI International DX Contest are all May 2-3. Next week is another running of the NCCC Sprint Ladder on May 8. The FISTS Spring Sprint is May 9. On May 9-10, look for the SBMS 2 GHz and Up WW Club Contest (local time), the CQ-M International DX Contest, the VOLTA WW RTTY Contest, the Nevada Mustang Roundup and the 50 MHz Spring Sprint. The SKCC Weekend Sprint is May 10. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, May 24, 2009, for these online course sessions beginning on Friday, June 5, 2009: Amateur Radio Emergency Communications Level 1; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* No ARRL Audio News on May 15: Due to staff attendance at the ARRL National Convention and Dayton Hamvention, there will be no ARRL Audio News on May 15. The ARRL Letter will be distributed that day. ARRL Audio News will resume regular distribution on May 22.

* Larry Banks, W1DYJ, Wins April QST Cover Plaque Award: The winner of the QST Cover Plaque Award for April is Larry Banks, W1DYJ, for his article "A 20 Meter Moxon Antenna." Congratulations, Larry! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the May issue by Sunday, May 31.

* ARRL Sweepstakes Awards Sent: The ARRL Contest Branch reports that all special items for the 2008 November Sweepstakes have been sent. This includes a Clean Sweep Broom and Medallion for all entrants who worked a confirmed Clean Sweep and a magnet for all stations that worked a confirmed 75 ARRL Sections. These items were sent free of charge to all stations that qualified; no order was necessary. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, all Clean Sweep mugs and Participation Pin orders have also been shipped. If you have not received your Sweepstakes items yet, please let Kutzko know via e-mail <kx9x@arrl.org>.

* ARRL DXCC Desk Approves Two 2009 Operations: ARRL DXCC Manager Bill Moore, NC1L, reports that two 2009 operations have been approved for DXCC credit: Western Sahara (S04R) and North Cook Island (E51QQQ). "If you had cards that were recently rejected for this operation, please send an e-mail to the ARRL DXCC Desk <dxcc@arrl.org> and you will be placed on the list for update," Moore said.

* Internet Search Engine Celebrates Birthday of Samuel F. B. Morse: Internet search engine Google <http://www.google.com/> reconfigured their home page for April 27 to honor the 218th birthday of Morse code creator Samuel F. B. Morse (April 27, 1791-April 2, 1872). Morse, a native of Charlestown, Massachusetts, conceived the basic idea of an electromagnetic telegraph in 1832. Experiments with various kinds of electrical instruments and codes resulted in a demonstration of a working telegraph set in 1836 and introduction of the circuit relay, making transmission possible over any distance. With his creation with Alfred Vail of the American Morse code, the historic message "What hath God wrought?" was successfully sent from Washington to Baltimore. For more information Amateur Radio and Morse code, please visit the ARRL Web site <http://www.arrl.org/FandES/ead/learncw/>.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):
letter-dlvy@arrl.org
==>Editorial questions or comments: S. Khrystyne Keane, K1SFA,

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

the same archves contain the expressed threat k4yz to murder mthey
also contain ab8mq's threat to murder me
w4nti has posted many pics of him being as threatening to me to todd
and to tother

they also cantain year of criminal activities what is your point

for what crime?

I agree he was taking a risk suggesting joking or not of offering 5 k
for crows death
> Let's hope that they do.

How about you tell us, Markins? You've always been a whiner when it comes
time to accuse others of comitting crimes. Not that any of your prior
accusations have a nickel worth of merit, but you are good at making up
"laws" as you go along.

I mean...Goddamn! How many times have we heard you whine about allegedly
being "stalked"? You whined about alleged attacks on your ISP by a fictitous
DeLorean, you whined that Roger was sending you magazine subscriptions and
making hang-up phone calls, you whined that somebody allegedly "stole" your
credit card information, "stole" your blog...and you went on and on. You
were the biggest crybaby in this group for a couple years.
Then you flooded this group with hundreds of daily nincompoop one-liners
while stupidly claiming that you were "defending" yourself. Then, and this
is a hoot...when the users complained about your imbicile floods, you whined
that you were again being "stlaked"...your spelling.
Oh, and let us not forget that you also whined about others hijacking the

topics of the threads...while you were the biggest violator of all.

You suffer from some very serious mental issues as can plainly be seen by everybody but you. Everybody's out of step but you, huh?

Oh, and I won't even begin to touch on your numerous lies. Those are self evident. Three Masters degrees? Sure...but you won't name ONE college you attended.(meanwhile you challenge posters to use their names and calls, calling them cowards) And your silly claim that you are a Geophysicist and worked with a world-renowned man who is an expert in this field?
Yeah...until you got shot down on that false claim by a REAL Geophysicist who actually DID work with the man and got taken to task for your lies. I noticed that you shut your mouth about this and never broached the topic again. You slunk away, embarassed, but many of us remember it. You literally got caught with your pants down on that one. I guess you figured that the odds of being caught in this lie were nil...but who'd have ever figured that of the few users in this group, one of them actually knew and worked with the Scientist?

So also goes your claim to have been in the Army. Let's see. You have claimed to have been "drafted" into the National Guard, which is a volunteer organization. Then you claimed that you were "drafted" as a Colonel, (Full Bird or Light?) later backing away from that claim and "demoted" yourself to a Lieutentant. (First or Second?) And the icing on the cake, so to speak, was when you unashamedly told us that you entered the Military under an assumed name and that the CIA or the Govt., it changed weekly, allowed you to serve under an assumed identity. Nice tale! G. Gordon Liddy you ain't!

And your claims that the Govt. wanted you to "lead men into battle" was another of your many fantasies. Recall what you said? And I quote, "no they want to do soemthing I have never done before lead men in
battle "
You couldn't lead anybody to the latrine, much less find it.

So it now seems that your entire life is nothing but a laughable fantasy, a work of fiction. A comic book lie.

You and Daffy Duck have a lot in common.

Mark doesn't know it. He is so deluded that he actually thinks that he is
telling the truth.

He still prefers to reside on his version of Fantasy Island.

funny
>
>I mean...Goddamn! How many times have we heard you whine about allegedly
>being "stalked"? You whined about alleged attacks on your ISP by a fictitous
>DeLorean, you whined that Roger was sending you magazine subscriptions and
>making hang-up phone calls, you whined that somebody allegedly "stole" your
>credit card information, "stole" your blog...and you went on and on. You
>were the biggest crybaby in this group for a couple years.
>Then you flooded this group with hundreds of daily nincompoop one-liners
>while stupidly claiming that you were "defending" yourself. Then, and this
>is a hoot...when the users complained about your imbicile floods, you whined
>that you were again being "stlaked"...your spelling.
>Oh, and let us not forget that you also whined about others hijacking the
>topics of the threads...while you were the biggest violator of all.
>
>You suffer from some very serious mental issues as can plainly be seen by
>everybody but you. Everybody's out of step but you, huh?

no indeed there are 3-6 misfits like yourself and funny they can't
sem to find anybody they like

>
>Oh, and I won't even begin to touch on your numerous lies. Those are self
>evident. Three Masters degrees? Sure...but you won't name ONE college you
>attended.(meanwhile you challenge posters to use their names and calls,
>calling them cowards)

I lier I porven it in case

> And your silly claim that you are a Geophysicist and
>worked with a world-renowned man who is an expert in this field?

I never made that claim

>Yeah...until you got shot down on that false claim by a REAL Geophysicist
>who actually DID work with the man and got taken to task for your lies.

when did that happen

> I
>noticed that you shut your mouth about this and never broached the topic
>again. You slunk away, embarassed, but many of us remember it.

no never happened
> You literally
>got caught with your pants down on that one. I guess you figured that the
>odds of being caught in this lie were nil...but who'd have ever figured that
>of the few users in this group, one of them actually knew and worked with
>the Scientist?

you invented a post in my where I claimed to work with a particaluar
man I never made that then you proven (one of the fw things you got
right that I did not work with him)

I have a master in Geophysics but I never claimed to work with anyone
famous indeed I have never claimed to do that much in the filed
although the degree is usefull in real work)
you post lies in my then denouce your own strawmen

I hope it makes you feel like some one
>
>So also goes your claim to have been in the Army. Let's see. You have
>claimed to have been "drafted" into the National Guard,

never made such a claim

> which is a volunteer
>organization. Then you claimed that you were "drafted" as a Colonel, (Full
>Bird or Light?)
that is your lie

>later backing away from that claim and "demoted" yourself to
>a Lieutentant. (First or Second?) And the icing on the cake, so to speak,
>was when you unashamedly told us that you entered the Military under an
>assumed name and that the CIA or the Govt.,

never said that either

> it changed weekly, allowed you
>to serve under an assumed identity. Nice tale! G. Gordon Liddy you ain't!

never clamed to b liddy either

I am not responible for your fantasies about me

>
>And your claims that the Govt. wanted you to "lead men into battle" was
>another of your many fantasies.

noty at all it is more of a nightmare in point of fact

> Recall what you said? And I quote, "no they
>want to do soemthing I have never done before lead men in
>battle "

yes I said that no fantasiy like I said a night mare

>You couldn't lead anybody to the latrine, much less find it.

you are so OCD
>
>
>So it now seems that your entire life is nothing but a laughable fantasy, a
>work of fiction. A comic book lie

hardly

YOU have made up a lot of stuff you claim I said and it is all
afantasy like your oft spun fantasy I am some kind of a pedo
.
>
>You and Daffy Duck have a lot in common.

porjecting again
>
>

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or
more likely a "BUSTED CALLSIGN". As always, you never know - "Work
```

First Worry Later" (WFWL).

3D2, FIJI (IOTA Op). Akira, JA1NLX, will once again be active as 3D2YA from Mana Island (OC-121) in Mamanuca Group, between June 29th and July 3rd. Activity will be on 80/40/30/20/17/15/12/10 meters using CW and RTTY. QSL via his home callsign, by the Bureau or direct (w/SASE). Log will be uploaded to LoTW.

A3, TONGA (Update). Paul, A35RK, informs OPDX that Dave, A35KL, has been active on 80-15 meters with a couple of openings to Europe occurring on both 30 and 20 meters between 0600-0830z. Dave has 750+ QSOs in the log so far. On May 1st, Dave and Paul put up a G5RV antenna and worked W1MK on 80m CW at 0943z. Paul states that 40 meters appears to be open to North America at that time, but there have been very few takers on that band. He adds, "20 and 30 meters have been the 'money bands'." Dave will be departing Vava'u (OC-064) on May 5th, at which time Paul, A35RK, will become active using the G5RV. Paul will be there until June 1st, and possibly a bit longer signing A35RK/p. QSL A35RK/p via W7TSQ or via LoTW. Remember to QSL A35KL via W6ZL (w/SASE or IRC, or via LoTW).

A6, UNITED ARAB EMIRATES (Update). Philippe, F5LTB/9Q1TB, did not receive the callsign A65BK as first announced but did receive the callsign A65BI instead. He will be in France most of the month (May 6-20th), but expects/hopes to be active by the end of the month. Activity will be mainly on SSB. His QSL Manager will continue to be SM5DJZ, direct ONLY (eQSL are welcome for eDX100, eWAS and eZ40).

AH2, GUAM. Operators Lee/AH2Y and Harry/WX8C will be active as AH2Y during the CQWW WPX CW Contest (May 30-31st) as a Multi-Op/Single/All-Band entry. QSL via LoTW or direct to HL1IWD.

C2, NAURU (Update/Change). Dani, EA4ATI/9M2TI, in Malaysia, informs OPDX some details have been changed for their DXpedition to activate Nauru in the Pacific (refer to OPDX.894). The callsign C21TI will remain the same as well as operating frequencies. However, Dani states, "Our webmaster (EA4YK) has changed the Web site as we had a lot of hackers..... The DXpedition is postponed to June and exact dates will be announced soon." Looking at the new Web page, dates have now been posted. Operation is expected to take place between June 16-26th. Visit their new Web page at: http://c21ti.madrono.net/index.html

DXCC NEW.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC Credit:
S04R - Western Sahara; 2009 Operation
E51QQQ - North Cook Islands; 2009 Operations
If you have had any QSLs rejected in a recent DXCC submission, please send an E-mail to <dxcc@arrl.org> to be placed on the list for an update.

* QSL CHECKING AT DAYTON HAMVENTION (Update). Bill Moore, NC1L, has revised/updated details on the QSL card checking to be done at the

ARRL National Convention in Dayton. Checking will be done during all operating hours of the convention Friday, Saturday and Sunday, May 15-17th, 2009. There are some important guidelines that will help make the card checking process run smoothly at the following Web page: http://www.arrl.org/blog/Century%20Club%20Awards

E21, THAILAND. Champ, E21EIC, will be active during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Low-Power entry. JA stations QSL via JR5XPG and all others via E21EIC. Visit Champ's Web page at: http://www.e21eic.net

E51SIX 6M DXPEDITION WRAP-UP. Lance, W7GJ, has put together a nice PDF file of his recent (March) 6m EME operation from Rarotonga in the South Cook Islands. All the photos in the PDF file are in high resolution, so you can zoom in on any detail in the photos if you wish. Read his story at: http://www.bigskyspaces.com/w7gj/E51SIX.htm (20 pages, 60 MB)

FG, GUADELOUPE (Ilet Op). The radio club FG5KC Guadeloupe will try to activate three ilets (Kaouane, Caret and Fajou) on a day during the the first week of June. They are looking for some sponsors to help with the QSL cost. Visit their Web site for more news on their DXpedition: http://acra-radioclub.site.voila.fr

GB1, ENGLAND (Mill Op). Members of the Bittern DX Group are participating in the National Mills on the Air weekend by activating GB1WM from Weybourne Mill in Weybourne, North Norfolk, May 8-10th. Activity will be on all HF and VHF bands, including some Digital modes. Visit the Bittern DX Group's Web page at: http://www.bittern-dxers.org.uk

IOTA NEWS.....
EU-090. Slovenian operators Jane/S57L, Goran/S52P, Vinko/S53F, Brane/S56UGB and Silvo/S50X will be active as 9A8ZRS from Vela Palagruza Island (ACIA IC-901, CIA-33, IOCA CI-084, MIA MC-284, ARLHS CRO-012, CLH-100, WHL 9A-046, WLOTA 0057), July 20-31st. Activity will be on 80/40/20/15/10/6/2 meters using CW, SSB, PSK-31 and possibly other digital modes. They will also be an entry in the RSGB IOTA Contest (July 25-26th). QSL via the operator's instructions.

EU-094. French operators from the Eure et Loir area will be active as TM5EL from the Penfret Island (DIFM AT-059, WLOTA 0321, DPLF PB-038, WW Loc. IN87AR) between May 8-10th. Activity will be on open HF bands plus 6m, VHF, UHF and SHF using CW, SSB and the Digital modes. Operators mentioned are: Alain/F1LLS, Thomas/F4BCG, Patrick/F4FCS, Antoine/F5RAB, Christian/F6AXN, Francis/F6DPD and Dominique/F6HEQ. QSL via F6KHI, by the French REF Bureau or direct (with SASE).

EU-097. Ian, G4FSU, will be active as OH/G4FSU from Emasalo Emsalo Island (EU-097) between July 21st and August 16th. Activity will include an entry in the RSGB IOTA Contest (July 25-26th). Operations will be on or near the IOTA & QRP CW frequencies.

QSL via his home callsign. More details can be found at:
http://ian.greenshields.googlepages.com/emsalo

EU-124. Operators Alan/G0RCI, Pete/M0USY, Harry/G7DEH, Alan/G4VUA and
Brian/M0JNC will be active from Holy Island, Wales, between
June 24-29th. Activity will be on the HF bands using CW and
SSB. QSL direct only to G0RCI.

EU-189. The big disappointment of the week was that the Rockall Island
operation did not take place. The rough seas and huge waves
were the major factors that did not let the team land on Rockall.
With both wind and sea conditions so bad on the way back, most
of the team and crew on board the sail yacht Elinca were seasick
and did not come out of their bunks, not even to eat. Some of
the radio equipment got smashed onto the floor when the Elinca
got pounded with a big wave. As this was being typed, no other
news has been reported about the MM0RAI team since Friday.
Please visit their Web site for latest news and updates at:
http://www.rockall.be

NA-079. Operators Bill/WD2E and Sofia/AI4KQ will be active as WD2E/4
from the Dry Tortugas Islands, May 8-14th. QSL via WD2E, direct
or by the Bureau.

NA-201. Ed, CO7PH, and possibly other Cuban operators will be active
as T47D from Jardines de la Reina, probably from Cayo Anclitas,
between July 24-31st. Activity will be on all HF bands and
modes, as well as an entry in the RSGB IOTA Contest (July
25-26th). QSL via CO7PH (QRZ.com).

SA-071. Members of the Sao Paulo Association of Radioamadores (APRE)
will be active as PT2T from Ilha da Moela (DIB SP-06, DFB SP-07,
ARLHS BRA 043, TWLHD WLH PY-031, WLOTA 1335, WW Loc. GG65UW)
between June 11-14th. Activity will include operations from
blockhouses, islands and lighthouses of the State of Sao Paulo.
Operators include Irineu/PY2IA, Marcelo/PY2OMT, Thiago/PY2TLB,
Claudio/PY3NZ, Felipe/PU2OVA, Filipe/PU2TEA and Thiago/PU2TJQ.
Operations will be on 80-2 meters, SSB only. QSL via PY2OP,
direct or by the Bureau. For more info, go to:
http://www.apre.com.br/moela

J8, ST. LUCIA. John, W5JON, will once again be operating from the hilltop
QTH overlooking the Caribbean Sea and Marigot Bay in St. Lucia, between
October 20-30th. His callsign will be J68JA. Reference numbers are: IOTA
NA-108 and Grid Square FK93. Activity will be on 160-6 meters (including
60m) on SSB. He will use an ICOM IC-7000, KL-400 Amp (350 watts) into
the following antennas: Alpha Delta DX-LB and DX-EE Dipoles, and a 3
element yagi on 6m. Activity will also include the CQWW DX SSB Contest
(October 24-25th) as a Single-Op/All-Band entry. QSL via W5JON. John
adds, "As in the past, XYL Cathy/W5HAM will be very busy pool side."

JD1, OGASAWARA (A Very Early Notice!). Operators Kirk/JF3MYU, Ted/K8AQM, Brian/KG8CO, Paul/NF8J and possibly others will be operating from the Island of Chichijima (AS-031) in the Ogasawara Island group, March 25th through April 5th, 2010. Activity will be on 160-10 meters using CW, SSB and RTTY. More details are forthcoming as well as the QSL info and callsigns as they are issued.

JW, SVALBARD. Robert/LA9QNA and his XYL Gro will be active as JW9QNA from the JW5E club station in Longyearbyen between July 17-22nd. Activity will include entries in the NA RTTY QSO Party (20m) and the CQ World Wide VHF Contest. QSL via LA9QNA.

JW, SVALBARD. Ingrid/LA8FOA and Unni/LA6RHA, members of the Scandinavian YL Radio Amateurs (SYLRA), report that they planning an "expedition" to a part of Norway - remote but still very accessible, after the SYLRA meeting in Kolbotn (near Oslo), September 3-6th. Their plans are to get a group of YL operators (and possibly their OM) to activate the Longyearbyen radio station from Svalbard between September 6-13th. They have already received the callsign JW1SYL for the operation. For more details and updates, please visit the following Web pages at:
http://home.online.no/~la6rha/expedition_to_svalbard.htm
http://www.sylra.is/index2.html

K5, UNITED STATES (6m/Grid/LH/USI Op). Members of the "EL58 Grid Activation Group" will be active as K5N between May 29-31st (1700-1700z). Activity will be from the sandy beach facing the Gulf of Mexico in Grid Square EL58hx, ARLHS USA 1101 under the "Visual Site Rule" and a New USI Island (USI LA105S - Burwood Island, LA) (South West Pass). The operation will be 6 meters ONLY, consist of 2 stations with both SSB/CW, and M/S capability, two 6M5 antennas, and 6 operators. Power out will be approximately 200W. Operating frequencies are: 50.100/CW, 50.150/SSB and 50.315 Meteor Scatter. QSL via: Joey Fierro II, 1054 Cajun Ln, Magnolia, MS 39652. Operators mentioned are: Al/WA4EWV, Bill/K5YG, Bob/WN2E, Bruce/N5SIX, Daniel/KE5KDM and Danny/N5OMG. Visit their Web pages at:
http://www.kcvhfgridbandits.com/kc_vhf_grid_bandits_018.htm
http://w4abc.com/K5N.html

KP2/NP2, U.S. VIRGIN ISLANDS. Operators Larry/K3VX, William/W3WH, Ron/W3WN, John/W9UK and Carl/K9CS will active from here between May 28th and June 2nd. Operators will be signing homecall/KP2, but during the CQ WPX CW Contest, they will be signing NP2SH (possibly as a Multi-2 entry). QSL W3WN/KP2 via W3WN. QSL all others via K9CS.

LZ2009, BULGARIA (Special Event). Look for special event station LZ2009KM to be active from the HQ of the Bulgarian Federation of Radio Amateurs between May 1-31st. Activity is to celebrate national "St. Kiril and Methodius Day" (creators of Cyrillic alphabet). Operations will be on all bands and modes. QSL via bureau to LZ1PJ. Logs will be uploaded to LoTW. More information is available at: http://www.qrz.com/db/LZ2009KM

NEW ANTARCTIC WEB SITE. Bob, K4MZU, Antarctic Chaser and QSL Manager for several U.S. Antarctic Stations has set up an interesting Antarctic Web site at: http://www.k4mzu.net

On it you can see a very nice general Antarctic QSL Gallery and a more attractive U.S. Antarctic QSL Gallery, plus a wonderful Antarctic Hams and Bases Album. There are years of Antarctic passion in there! The site is in the beginning stages as there are more pictures coming in. An Antarctic DX Chasers Page is under construction and lets you see what kind of surprise is coming up! Also anyone having photos of U.S. Hams operating in Antarctica is encouraged to send them to K4MZU at: oldbibles@aol.com

OH0, ALAND ISLAND. Operators Juha/OH1JT, Jouko/OH1RX, Kari/OH2XX, Ari/ OH5DX, Tomi/OH6EI and Timo/OH6GLE will be active as OH0Z during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via W0MM.

ON100, BELGIUM (Special Event). Members of the Trudo Radioamateurs Club (TRC), in Haspengouw, will be active as ON100PES during the entire year of 2009. Activity is to celebrate Belgium's two scientific event. First is to celebrate the 100th anniversary since Adrien de Gerlache led the first Belgian expedition to the Antarctic on board the Belgica between 1897-1899. The second event took place on February 15th, of this year with the inaugural opening of the Princess Elizabeth research station. This research station is the first of its kind that follows the concept of "Zero Emission". The callsign represents three elements. In ON100PES the ON is the prefix for Belgium, 100 is the centenary for the pole expeditions and PES is the abbreviation for Princess Elizabeth Station. The special event QSL card (double format) will only be sent to all stations who send their QSL card to ON4TRC. There will be an award given those stations who work ON100PES on five bands. Activity will be on HF, VHF/UHF and 2m/70cm. PLEASE NOTE: WAP has given ON100PES and ON100PES/p the new reference number (WAP-175) valid for WAP Awards (WACA,WADA & ASEA). More details are available at the WAP Web site: http://www.waponline.it

QSL INFO AND NEWS.....
THERE HAS BEEN "ONE" REPORT. Someone reported receiving their K5D Desecheo Island QSL card this past weekend. OPDX has NOT received an official announcement yet (and it was too close to print time to verify), but if true, it will keep the DXCC Card Checkers at the Dayton HamVention busy. If you want to see a preview of the K5D QSL (as well as the VK9DWX, ZS8T, and other) go to: http://sq8x.net

DON'T QSL VIA THE 3RD U.S. BUREAU! Fred Laun, K3ZO, Manager NCDXA/ARRL Third U.S. Call Area QSL Bureau, reports that the following "should not" be QSLed to the 3rd Bureau:
4L0ABC - K3PD was the QSL Manager, but became a "SK" on June 19th, 2008. NO QSL route known at this time.
4L0HQ - K3PD was the QSL Manager, but became a "SK" on June 19th, 2008. As to 4L0HQ, they understand that the new manager for this station is UA9LP, so the 3rd U.S. Bureau now forwards 4L0HQ cards to him via the Russian Bureau.
5B/K3UY - The QSL info for this station is to the operator's home callsign, RA3AUU.
7X5VRK - W3HC is NO LONGER the QSL Manager. As of April 8, 2008,

W3HC had retired from being a QSL manager. 7X5VRK has not
agreed to have anyone be his QSL Manager. The best advice,
QSL 7X5VRK direct, including sufficient means for return
postage.
HI8A - K3WGR is NOT the QSL Manager. For the last several years,
Chikin, the former HI8RV, has held the callsign HI8A. He
does NOT have a QSL manager and handles his QSLing duties
himself. Our understanding is that he does answer bureau
cards.
KO3A - Please note that the licensee of KO3A is YT6A. QSLs for
KO3A and 4O3A (ex-YT6A) go via AI4U (for USA/Canada stations)
or the Serbian Bureau.
KP2/W3AVO - Please be advised that the QSL Manager for this operation
is JA3AVO, the home callsign of the operator. They forward
such cards to the JARL Bureau.
LZ9W - AA3AX is NOT the QSL Manager. According to QRZ.com, the real
QSL Manager for LZ9W is LZ1ZD.
NP3U - QSL Manager is WP4U. PLEASE NOTE: Callsigns with the prefixes
KP3, NP3 and WP3 should go to Puerto Rico which has its own
QSL bureau at: Puerto Rico QSL Bureau, Box 9021061, San Juan,
PR 00902-1061. Puerto Rican stations are not served by the
3rd U.S. Bureau, and they have to forward cards received
for them to the Puerto Rican Bureau. Exceptions are WP3C,
WP3R, and NP4A which CAN be handled by this 3rd Bureau
because W3HNK is their QSL Manager.
SV/W3FN - (or W3FN/SV) Please note that the QSL route for this station
is the home callsign of the licensee, SV2BFN.
VQ9X - W3MR is NOT the QSL Manager. Please note that W3MR handles
VQ9 cards ONLY for his own VQ9 callsign, VQ9MR. QSL direct
ONLY.
WP4U - AA3BG is NOT the QSL Manager. Please note that WP4U handles
his own cards.
ZS4RY - K3IRV is NOT the QSL Manager for ZS4RY. QSL direct.

Fred states that for the QSLs which were received, the only recourse
(for most cards) are to forward such cards to their following perspective
QSL Bureau.

QSL T70A via: A.R.R.S.M. Radio Club, P.O. Box 77, 47890 San Marino,
REPUBLIC OF SAN MARINO. Activity during the ARI International Contest.
Operators were: I4UFH, IZ4DPV, I4YSS, IK4UPB, IK2NCJ, IW2MJQ and IZ4EFN.

NEW QSL ROUTE. Ted, K8AQM, reports that the QSL route for the V63TR
2008 operation is no longer K5ZM, but QSL V63TR only to K8AQM. Look
for V63TR QSOs to soon be up on LoTW.

HAVE PATIENCE! More QSL cards are still being received for the many
UA4WHX operations. Vlad is still sending them out. Bill, W2AY, reports
he received QSLs for UA4WHX's African Tour for 81 QSOs (Request was
sent July 2007).

PIRATE ALERT! Pasquale, IW0HEX, informs OPDX that he has been receiving QSL cards via the bureau for 5Z4/IW0HEX for activity dated in August 2008, on 30 meters CW. He states that he has never been in Kenya and this is someone abusing his callsign. DO NOT send for this QSO! All info about Pasquale's radio activity can be found on: http://www.iw0hex.it

ZF2BI QSLS. Jim, K4BI/ZF2BI, reports: "I am the QSL Manager for all QSOs by ZF2MU (My first ZFcall, period 1988-2001) and ZF2BI (2002 to the present date). My QSL policy has been and remains direct only w/SAE and postage (green stamps). I do not respond to QSLs received without them and the same for the many cards received via the Bureau."

QSLS VIA LOTW: D4C, KH7X, VQ9HB and TL0A

QSLS RECEIVED VIA MAIL: 5H1DF, 5N0EVR, 7Z1SJ, CO8LY, E51KAJ, E51QQQ, FK/JA1KAJ, HK0/EA7HEJ, JA1XGI/VK9X, JD1BMH, K5D, OA4O, T32BE, T88WW, V63WW, V73M, VK9DWX, VP8KF, VU2PHD, YI1RZ, ZF2NN and ZM1A

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SOLAR CYCLE 24 (Ed. Or is 23 still?) WEB SITE. Some say we are still in Solar Cycle 23 (which mean the cycle is 13 years old), but anyway, you decide. A Web page is available for those who believe we are in Solar Cycle 24. It is put together by Kevin Gibeau, VE3EN, tracking the new solar cycle. This interesting site has plenty of information and updates every two minutes using a wide range of sources. Give it a look at: http://www.solarcycle24.com

SUITSAT-2 NEWS. Gould, WA4SXM, reports that they will be demonstrating the SuitSat-2 system at the Dayton HamVention. They will have a complete SuitSat system for demonstration at the AMSAT events. YOU DO NOT KNOW WHAT SUITSAT IS? Go to the following Web pages for the info: http://www.suitsat.org/ http://suitsat2.org/ http://suitsat2.com/ http://en.wikipedia.org/wiki/SuitSat http://www.issfanclub.com/node/5506

SV5, DODECANESE (EU-001). Ralph, DL9MWG, and his XYL are on their annual holiday, this time to the Island of Rhodes (EU-001). Look for Ralph to be active until May 17th. He will be using an IC-7400 w/100 watts and a G5RV antenna operating mainly on CW on all HF bands. QSL via DL9MWG, direct or by the Bureau.

TP60, FRANCE (Special Event). To celebrate the 60th anniversary of the Council of Europe, look for TP60CE to be active between May 8-10th. Activity will be on CW, SSB, RTTY and PSK. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

VC2, CANADA (Zone 2/Special Event). Operators Lajos/VE3NE, Paul/VE3TA and Bob/VE3CWU will activate VC2A from Zone 2 in at Sept-Iles, QC, during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via VE3TA. VC2A is a special callsign being used to commemorate the 100th anniversary of Flight in Canada.

YOUNG BRIT CAME OUT AS WINNER OF RADIO ARCALA ESSAY CONTEST. In a press release by Jarmo, OH2BN: "It was in February 2009 when the team at Radio Arcala, OH8X launched an essay contest to get some fresh ideas from today's youth and their elders to boost recruitment to the ranks of Amateur Radio. Great participation was ensured and determining the winners took some effort from a multinational jury representing six nations. A 19-year old Briton, Mark Dumpleton, 2E0NCG came out as winner by a fair margin while two U.S. hams, John Scott Anderson, KC9OQO and Brian Wood, W0DZ , finished in second and third place respectively. Argentinian Diego Salom, LU8DX, was recognized for his submission of the best Spanish language piece. You can read Mark's piece and his interview at <http://www.radioarcala.com> under the 'Young People Terms' button and get your personal inspiration to do your share for Amateur Radio."

1986. Re: Suspending Belief In This Climate Of Hot Air

Newsgroup: rec.radio.amateur.misc
Date: 2009-05-05 23:49:52 UTC
From: Veijo Heiskanen <heiskanen@coco.com>
Message-ID: <Q8Iik.39314$_03.33983@227.107.115.251>
Source record: 6750

01.05.2008 J�� historian kirjoihin erityisp�iv�m��r�n� josta alkaa ydinalan vaikeudet kasautumaan aivan erityisesti my�s Suomessa. Jo siit� asti kun puollisentoista vuotta sitten Krister Fuuglesangin NASA:n avaruusionisaatioraportin tiedot maapalloa kohtaavasta v��j��m�tt�m�st� ydinvoimap��st�jen megatuhosta vuodettiin maailman p��tt�jille ydinalan alasajon v�ltt�m�tt�myys on ollut tiedossa. Samasta pohjasta jopa IPCC ennakoi koko ilmastoj�rjestelm�n tuhoa 10v sis�ll�. Mutta toukokuusta alkaa my�s tietomuruja mainiyusta maailmanhistorian suurimmasta ydinkatastrofitulemisesta vuotaa, esim. kauttani viimein suuren kansanmassan tietoisuuteen. Mist� tarkemmin on kyse. Maailman metastabiilinen perustaustataso on 10-kertaistunut totaalisen tuhoisaan suuntaansa romahdellen. Luonto itsess��n viestitt�� katastrofaalisista mehil�istuhoviesteist� ja vastaavantyyppisist� ydinkampamaneetti-invaasioista kiihtyv�sti. Einsteinin 5v mehil�ish�vi�misn�yt�ist� ennakoima ionosf��rituho on vy�ry�m�ss� kaikin merkein ihmiskunnan kohtaloksi.

Onnistuin saamaan ydinalan silkaksi kauhuksi YVA 4/TEM tiedostoihin maininnat siit�, ett� tulevat sukupolvet voivat my�s arkistofaktojen perusteella tuomita nykyiset ydintoimitsijat, firmat ja p��tt�j�t ydinalan kansainv�liseen Nyyrbergin oikeudenk�yntiin p��tt�jiemme nyttemmin kiistatta tiet�mist� rikoksistaan ihmiskuntaa vastaan. Niin pitk�lle on prosessi edennyt, ett� Sis�ministeri� jo panikoi t�m�n tulevan faktan tiet�en! YLE-teksti-TV kirjoitti, miten v�hin ��nin oli muutettu maamme lakia rajusti: " Rikoksista ihmisyytt� vastaan on toimeenpantu lakimuutos 01.05 lukien, ett� jatkossa henkil�it�, ryhmi� ja teollisuuslaitoksia jne. jotka tuomitaan eritt�in raskauttavista (ydin) ja sotatoimista kansaansa vastaan ja rikoksista ihmisyytt� vastaan ei voida tuomita Suomesta kansainv�lisiin Haagin tuomioistuimiin saamaan jopa kuolemantuomioitaan. Vaan jopa n�in rajuista rikoksista langetetaan korkeintaan Suomen lains��d�nn�ll� paikan p��ll� maksimirangaistukseksi rajaten vain elinkautisiksi! Siis huh, hu alkaa ydinherrojemme polvet tutista alati kasvavien ydinrikosilmitulojen paineissa! Ilmankos Heiniluoma sanoi, ettei Suomeen TVO:n kaavailemia isotooppilaitostartteja ja ydinvoimaloittemme keskeisi� plutoniumpoltto-oikeuksia, uraanikaivosmassiiveineen ja ydinj�tek�sittelyineen EU:sta kiirehdit�. Vaan oltiin yht ��kki sit mielt,
ettei edes seuraavakaan hallitus tunke kokoomuksen/TVO/Posiva:n suunnattomaksi mieliharmiksi lupaa hakien kansantahtoa vastaan edell�mainittuihin NATOn hyv�ksymiin-optiotoimiin.

02.04-08. Uutiset kertoivat, ett j�lleen kerran oli Norjassa 200km Oslosta pohjoiseen Ottessa sortunut tektoniliikunnasta 300m pitk ja 50m leve kalliorinne ja allle oli hautautunut v�hint��n 150 hengen pakolaisvirran startanneen v�est�n kymmenet talot. Edellisest t�st kuuluisasta 2500 km

pitk�st� Laatokka-Skotlantitektonisesta Litoraanisaumalikunnasta Olkiluodon l�pi olimme saaneet viestej� Norjasta 5 hengen kuolemaep�ilyst� ja 7m liikuneesta vuorirojahduksesta kuukausi sitten. P�iv�n selv�sti t�m� kyseinen maailman syvin maanp��llinen tektonisauma on hurjasti aktivoitumassa. Niin ruotsalaisvoimalat, kuin Olkiluodon kaikki laittomasti mm. kallioon ankkuroidut ydinvoimalat tulevat liikuntojen murskaamina joutumaan suunnattomiin vaikeuksiin. 5cm/v liikuva sauma kun tuottaa jatkossa ruotsalaisopein huikeita mitattuja yli 8 Rihterin maanj�ristyksi�! Edes vuoden takaista 450m kallioliikuntoa Ruotsissa saati saman aikaista 14 Norjan luolan tuhoa ei olla uskallettu tutkia julkisesti. Virannoimaisten panikointi muutti jo nyt koko Ruotsin tektonisaumaan ydinj�tehautauskuviot totaalisesti syv�porausmalleihinsa. Esimauksi my�s Suomeen 10 kertaistuneine lis�maksuin turvarajamuutospakoin. Mutta kaikesta n�kee, ettei luonto t�h�n tyydy, vaan pahentaa odotettaan alati!

Archive-name: radio/ham-radio/recruitment
Revision: 1.1 2007/09/29 18:42:47
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.
```

Amateur Radio Newsline(tm) Report 1656 - May 8 2009

ATTENTION: DUE TO BREAKING NEWS THIS IS AN EXTENDED LENGTH NEWSCAST RUNNING 34MINUTES AND 55 SECONDS AND CONTAINING 3 BREAKS

The following is a closed circuit advisory. Ladies and gentlemen, Amateur Radio Newsline's Support Fund Administrator Andy Jarema, N6TCQ:

--

OK, you all know why I am here. Its spring and all the bills from last winter have been mounting up. And, as usual, there is really not very much left in the treasury to pay them. Eventually they have got to get paid or these news reports will cease. That time is now.

So we ask that you take a few moments to send a donation to the Amateur Radio Newsline support fund so that we can keep these newscasts coming your way. Making a contribution is only a mouse click away if you have Pay Pal. Just go to www.arnewsline.org and click on the button at the top of the page marked "Make Donation." Or you can send in a donation to the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066.

Whichever way you choose, the all volunteer crew at the Amateur Radio Newsline will be eternally grateful and these newscasts will be here for you..

Once again that's the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066. Or by Pay Pal at www.arnewsline.org

For the Support Fund, I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1656 with a release date of Friday, May 8th, 2009 to follow in 54321.

The following is a Q-S-T. Congress says its time for the FCC to change and two congressmen introduce legislation to begin the process. Also, another conspirator in the murder at sea of two hams is sentenced to death, the FCC sides with a deceased hams son in reassigning a call and a preview of Hamvention 2009's forums that tell us all to dream. Find out the details on Amateur Radio Newsline(tm) report number 1656 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: CONGRESSIONAL BILL TO REFORM FCC INTRODUCED IN THE HOUSE

Congress is taking a hard look at the way in which the FCC operates with an eye at changing the way the regulatory agency does business. Bill Pasternak, WA6ITF, is in the Newsroom with the rest of the story:

--

A bill to change the way that the FCC approaches all regulatory matters has been introduced in the United States House of Representatives. Sponsored by representatives Joe Barton of Texas and Cliff Stearns of Florida, H.R. 2183 seeks to reform some of the Federal Communications Commission's regulatory processes.

Among the matters that H.R. 2183 addresses is a requirement that would force the FCC to let the public see any and all proposed rules and rules changes before it adopts them. Also, that the agency would be forced to provide everyone with a realistic amount of time to comment. In this area, the measure would require the FCC to provide at least 30 days for comments and an additional 30 days for replies on the published language of proposed rules.

The measure would also give the FCC only 30 days from adoption of a policy to release the actual text of the decision.

For the Amateur Radio Newsline, I'm Bill Pasternak, Wa6ITF, in the studio in Los Angeles

--

According to the wording of the bill Representatives Barton and Stearns want to require the agency to publish weekly the items being circulated among the Commissioners for a vote,. They also want to name any commissioner who has not voted on a given item. For ham radio it would mean knowing more about what the FCC is thinking in regard to changes in our service instead of having to second guess what the future might bring. (RW)

**

RADIO LAW: CONGRESS LOOKS AT HAM RADIO EMCOMM RESPONSE MEASURE

Congress is taking a look at the valuable role that ham radio plays in times of natural or man made disasters. This, after U.S Representative Sheila Jackson-Lee of Texas has introduces HR 2160 in the US House of Representatives.

Better known as the Amateur Radio Emergency Communications Enhancement Act of 2009, HR 2160 would promote and encourage the valuable public service, disaster relief, and emergency communications provided on a volunteer basis by licensees in the Amateur Radio Service. This, by undertaking a study of the uses of Amateur Radio for emergency and disaster relief communications.

The study would also identify unnecessary or unreasonable impediments to the deployment of Amateur Radio emergency and disaster relief communications. It would also make recommendations for relief of any such unreasonable restrictions so as to expand the uses of Amateur Radio communications in Homeland Security planning and response.

HR 2160 has been referred to the Committee on Energy and Commerce. If enacted into law, the measure would instruct the Secretary of Homeland Security to undertake its own study and report its findings to Congress within 180 days. That study would also spell out the capabilities and specific uses of amateur radio communications in emergencies and disaster relief situations. (ARRL)

**

RADIO JUSTICE: THIRD DEFENDANT IN HAM RADIO MURDER CASE SENTENCED TO DEATH

Another death sentence in the murder of two hams at sea. Bruce Tennant, K6PZW, reports:

--

A Southern California man has become the second person sentenced to die for the murders of a retired ham radio couple who were tied to an anchor and thrown off their yacht. This as Orange County California Superior Court Judge Frank Fasel condemns 43-year-old John Fitzgerald Kennedy to die by lethal injection for his part in the murders at sea of Thomas and Jackie Hawks, KD7VWJ and KD7VWK.

The supreme penalty was handed down by Judge Fasel on Friday, May 1st. This, after the same jury that had convicted Kennedy in February of two counts of special-circumstances murder had recommended death.

As previously reported, Kennedy's co-defendant, Skylar Deleon, was sentenced to death in the same two murders. Automatic appeals will likely delay the sentences to be carried out for some time. In California its currently an average of 8 to 13 years or longer between a judge sentencing a convicted felon to death and carrying out of a death sentence no matter how heinous the crime.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Deleon's ex-wife Jennifer Henderson was convicted in the murders in 2006 and sentenced to life in prison. A fourth co-defendant still faces trial in this case. (Published news reports)

**

RADIO LAW: THAT CALL BELONGS TO THE SON

The FCC has denied a petition for reconsideration filed by Mr. Richard E. Essen, N6CX, of Silver Spring, Maryland, to be awarded the vanity

call sign W3ZD. This, after a relative of the calls original holder exercised his right of survivorship and the FCC agreed. Heres the back story.

On December 22, 2006, Winfield C. Brantley surrendered amateur call sign W3ZD upon the grant of his application for a different call. A surrendered call sign generally is not available to the vanity call sign system for two years, but the Commission's Rules provides an exception for certain relatives of a deceased former holder of the call sign.

On December 10, 2008, Allan B. Corderman filed an application for call sign W3ZD. In his application, he stated that he is the son of a deceased former holder of the call sign. Commission staff has verified that call sign W3ZD was previously held by Roy C. Corderman, now deceased. Because of this Allan B. Corderman's application was granted on December 30, 2008.

On January 8, 2009, Essen requested reconsideration of the grant. He argued that the application should not have been granted because the exception in the FCC rules applies only to close survivors of the most recent person to hold the call sign, and not to close relatives of any deceased prior holder.

But the FCC says that's not the case. It says that when the agency adopted its rules dealing with call sign survivorship it stated that it was granting priority to close relatives of any and all deceased holders. That it did not say that the priority applied only to close relatives of certain deceased holders.

The FCC says that its rule has always been interpreted to afford priority to close relatives of any deceased former holder. Consequently, it concludes that Allan B. Corderman's application was properly granted, and has now dismissed Essen's petition for reconsideration. (FCC)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the NS9RC repeater of the North Shore Radio Club serving Highland Park, Illinois.

(5 sec pause here)

**

RADIO LAW: FCC RETURNS W8WX TO MICHIGAN SKYWARN GROUP

The FCC says that the callsign W8WX has been the property of a Michigan Skywarn group since 1999 and it has now returned to that group. This, after another ham tried to get it for a similar named group in Ohio. Burt Hicks, WB6MQV, is here with the rest of the story:

--

Way back on January 28, 1999, the Commission granted the W8WX call sign and club station license to the Lucas County Skywarn in Temperance, Michigan. Hermon R. Kibler, WD8ABZ, was identified as the club station trustee.

About 9 years later on March 19, 2008, Becky Eby, KC8ZNX, filed an application requesting that the license be amended to show her as the calls trustee and that the club's mailing address of the club be changed to one in Toledo, Ohio.

The FCC granted that application on March 19, 2008. After learning about the change on June 2nd 2008, WD8ABZ filed objections claiming that he was still the trustee for W8WX. He asked that the license be restored to him.

So, on June 30th, 2008, the FCC asked Eby to prove that she had been designated as the new trustee of W8WX. Eby replied on July 12th, 2008, that she was asked to be the trustee of the call by an officer of the club on January 29, 2008 at a meting of the Lucas County Skywarn. She also provided the meeting minutes and other documentation. Eby also told the FCC that she had been a member of Lucas County Ohio Skywarn since 2005, but the documents submitted show that the Lucas County Skywarn in Ohio was established on January 29, 2008.

On August 4, 2008, Kibler told the FCC that the Lucas County Ohio Skywarn did not and has not ever had anything to do with the Lucas County Michigan Skywarn. This past January Kibler filed an application to renew the license for W8WX and restore it to his name and address. On March 6, 2009, Eby amended that application to show her name and address. Kibler objected to the amendment on March 18th.

Now the FCC has found that Eby was not authorized to change the club trustee and address of W8WX. As a result, W8WX was restored to the Lucas County Michigan Skywarn radio club with Kibler as trustee. At airtime its unknown if Eby plans to file an sort of an appeal.

For the Amateur Radio Newsline, I'm Burt Hicks, WB6MQV.

--

And there is a rather interesting sidebar to this story. It seems that there is no Lucas County in Michigan. Temperance Michigan, to where the W8WX call is assigned, is just across the state line from Lucas County Ohio. The town of Temperance in Monroe County, Michigan. Confusing, isn't it? (FCC Order on Petition for Reconsideration, adopted April 15, 2009.)

**

HAMVENTION NEWS: A PREWIEW OF FORUMS TO DREAM ABOUT

The Dayton Hamvention is less than a week away its time to take a peak at what attendees will be able to expect. Of coarse all of the big

names in ham radio manufacturing will be there to show the latest and greatest gear. And those in the massive Flea Market will have the oldest and boldest of ham radios historical equipment up for sale.

But a good number of attendees consider Hamvention a learning experience and for 2009 they will not be disappointed. Michael Kalter, W8CI, is a Hamvention spokesman who recently was interviewed by Hap Holly, KC9RP, of RAIN:

--

Kalter: (Audio report only. Please download the MP3 version of this weeks newscast at www.arnewsline.org to hear it.)

--

In all, Kalter says that there will be some 45 different forums for those who come to Hamvention to learn. All they have to do is get there and dream. More with Michael Kalter, W8CI is on line at www. Therainreport.com. (RAIN, ARNewsline(tm))

**

HAMVENTION NEWS: ARNEWSLINE AT HAMVENTION 2009

And less we forget to mention, we of Amateur Radio Newsline will also be at Hamvention 2009. In addition to gathering news for upcoming reports we will again be hosting the annual Ham Radio Town Meeting. This year's topic is titled "A Lifetime of Careers." It will show how becoming a ham as a teen or pre-teen affected the lives and adult careers of several well known radio amateurs. In reality, its really a story of how ham radio can open up doors to success that no other hobby can.

We will be holding this years Ham radio Town Meeting on Saturday, May 16th from 11:45 a.m. to 2 p.m. in Hamvention Meeting Room 2 at the Hara Arena. Among this years speakers is the broadcast engineer who brought frequency coordination to major league sports. Also, with us will be the ham who helped the movie character "ET" to "phone home" and a career aviator who has operated around the globe.

There will also be a special appearance by ham radio's own Mr. Audio, Bob Heil, K9EID. Bob will explain why he is kind of the poster child for amateur radio and how the hobby made him the successful inventor and businessman he is today.

So come and enjoy a few hours with us learning how being a kid ham can lead to a life of success as an adult. Also, if you have children of your own, bring them along to hear some inspiring words on how their lives might benefit as well.

Again, that's on Saturday, May 16th from 11:45 a.m. to 2 p.m. in Hamvention Meeting Room 2 at the Hara Arena for this years Ham Radio Town Meeting. We hope to see many of you there. (ARNewsline(tm))

**

RESCUE RADIO: PACKETEERS TO HOLD GOLDEN PACKET EVENT

Packet operators and VHF rover stations will attempt the first ever Appalachian Trail Golden Packet event on Sunday, July 26th. The goal is to relay packet text messages the full 2000 mile length of the Appalachian Trail using 14 packet relay stations carried to the tops of some of the highest peaks in the Eastern United States.

This long linear demonstration will hopefully show the power of packet radio to re-constitute emergency communications into an area where normal communications capabilities can easily be lost. It will also demonstrate how easily a ham radio data network can be established using nothing more than a typical APRS mobile radio installation that's driven to the highest available spot in any given area.

More information about the Appalachian Trail Golden Packet event is on line at www.aprs.org. (WB4APR)

**

RADIO POLITICS: MIGNON CLYBURN TO BE NOMINATED AS FCC COMISSIONER

President Barack Obama has announced he intends to nominate Mignon Clyburn to the commission. The daughter of one of the most powerful members of Congress, House Majority Whip James Clyburn, Mignon Clyburn is in her 11th year serving as a South Carolina public service commissioner..

According to the commissions Web site, it has regulatory jurisdiction over investor-owned electric and gas utility companies; water and wastewater companies, telecommunications companies, motor carriers of household goods, hazardous waste disposal, and taxicabs. She is a 1984 graduate of the University of South Carolina with a Bachelor of Science degree in Banking, Finance and Economics.

Prior to coming to the South Carolina Public Service Commission she was publisher and general manager of the now-defunct "The Coastal Times," This was an African-American weekly newspaper in Charleston, South Carolina.

If confirmed by the Senate, she would fill the Democratic seat being vacated by Jonathan Adelstein, who's headed to the Rural Utilities Service in the Agriculture Department to help roll out broadband in areas away from major metropolitan areas. (Published reports, FCC web)

**

RADIO LICENSING: HAM TRAINING AT RIVERSIDE COUNTY CA HOMELESS SHELTER

Ham radio will be taught in a California homeless shelter beginning on June 4th. This according to Chris Kahn, KG6KZP, who will be the instructor for the course with assistance from Radio School's Gordon West, WB6NOA.

Chris tells Newsline that it all began when some of the shelter staff members approached him about getting their Amateur service tickets. The shelter, which is in Riverside County, California, also serves as an Emergency Operations Center serving several communities including the region surrounding Palm Springs.

Chris says that while the class is primarily for those volunteering and working at the shelter, he is opening it up to anyone who wants to get their entry level license. This includes those living at the shelter.

If you live in or near the area and want to take part in this training or know someone who wants to get a ham license, feel free to call Chris Kahn at (760) 327-8577. Or you can contact him by e-mail to chriskahnkg6kzp (at) yahoo (dot) com. (KG6KZP)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: SANDY DONAHUE, W4RU - S.K.

A longtime friend of the Amateur Radio Newsline and an ex-officio member of our Young Ham of the Year Award team has become a silent key. This with word that Nelson Sandy Donahue, W4RU, passed away in his sleep early on May 4th.

We first met Sandy in the mid 1980's. He was still WA4ABY back then and called asking if someone from Newsline could come and speak at a ham radio convention in Atlanta. One that he was spearheading for the Georgia Tech Radio Club.

Our Producer Bill Pasternak, WA6ITF, flew in and the two quickly became close friends. And so it was that when the Young Ham of the Year Award presentation ceremony moved to its permanent home at the Huntsville Hamfest, Sandy offered to get there early to make sure all was ready for the arrival of each years young ham award winner. As such he became the unofficial greater for the award program and more than once footed the entire cost for all attending the dinner for the years young honoree.

But Sandy's service to ham radio was not limited to assisting us. First licensed at age 15, Sandy Donahue served as ARRL Georgia Section Manager from 1997 to 2001. He became the League's Southeastern Division Vice Director in 2002 and has held that position ever since. In fact, Sandy spent the last weekend of his life manning the ARRL booth and representing the ARRL at the Birmingham, Alabama hamfest. It

was a labor of love that W4RU was devoted to.

A few years ago after retiring form his job at an Atlanta TV station and suffering some health issues, Sandy relocated to the town of Dothan, Alabama. It was a place that he once described to WA6ITF as being the exact opposite of what Atlanta was. He said that Dolthan was a nice, quiet, peaceful and a good place to live. And it was in his adopted hometown of Dolthan that Sandy became a Silent Key at age 63.

Sandy Donahue, W4RU, was a very special friend to many of us here at the Amateur Radio Newsline. Because of this, his memory will live on with us, and with all of those whose lives he touched with his positive outlook on life.

Graveside services for Sandy Donahue, W4RU, were to be held at 4 PM at Sunset Memorial Park, 1700 Barrington Road, Midland City, Alabama. An special memorial service will be held in conjunction with the Atlanta Hamfest on June 6, 2009 at 1 PM. (ARNewsline with information also provided by the ARRL and WA4AW)

**

HAM RADIO IN SPACE: ARISS AT 25 CERTIFICATE

Turning to ham radio space related news, if you heard or contacted the ham radio station on board the I-S-S using any of its modes, between November 30, 2008 to January 15, 2009 you qualify to receive an ARISS 25th Year Commemorative Certificate. To get one, please send a QSL with all of the normal information and note the ARISS mode of operation. Also, whether the contact with you was receive only or two-way. On the outside of the QSL envelope, please include the words "25th Anniversary Certificate" and include a self addressed stamped envelope large enough to accept an 8.5 by 11 inch certificate and includes the proper postage. Please refer to www.ariss.org for addresses where to send your QSL and for additional details. (ARISS)

**

THE SOCIAL SCENE: MARYLAND FM ASSN MEMORIAL DAY HAMFEST

Turning to the ham radio social scene, word that the Maryland F.M. Association will be holding its annual Memorial Day Hamfest on Sunday, May 24th. The venue is the Howard County Fairgrounds, in West Friendship, Maryland from 8 am to 1 p.m. with setup beginning at 6 am. All times are local Eastern U-S. More is on-line at www.marylandfm.org (WA3MNN)

**

EMERGING TECHNOLOGY: NEILSEN SAYS TWITTER HAS MORE QUITTERS THAN JOINERS

Ham radio has nothing to fear from the Twitter instant messaging social network. The Chicago Tribune reported on May 1st reported on a recent

Neilsen Online survey that found the number of people leaving Twitter after just one month outnumber the new arrivals by a margin of 3 to 2.

David Martin is Nielsen's vice president of primary research. He says that if Twitter's user retention rates don't do better than the current 40 percent, the service simply won't be able to grow into the Internet social networking giants such as MySpace and Facebook.

According to Neilsen, in March, Facebook saw 69.2 million unique users, representing 41 percent of the U.S. Web audience. MySpace had 55.9 million, or 33 percent. But despite its initial rapid growth Twitter, lagged far behind, at 13.9 million users and 8.2 percent.

No reason was given to explain the massive defection from Twitter but Neilsen's Martin says that if 60 percent continue to quit from one month to the next, the inability to replace defectors suggests a natural limit to growth with Twitter. He expects for it to max out at about 10 percent of the U.S. Internet audience.

As to ham radio, while nobody does regular research on the retention rate in the hobby, it appears to be well above 85 to 90 percent, month to month. (RW, Chicago Tribune, others)

**

NAMES IN THE NEWS: W0CP INDUCTED INTO CE HALL OF FAME

Some names in the news. First up is former ARRL Rocky Mountain Division Director Walt Stinson, W0CPP. He is among industry leaders receiving honors this year from the consumer electronics industry. This as he is named as an inductee into the 2009 Consumer Electronics Hall of Fame.

In addition to his years of service to ham radio, W0CP is president and co-founder of the Denver Colorado based Listen Up audio/video specialty chain and also co-founded the Professional Audio Video Retailer's Association in 1979. ListenUp Corporation employs over 100 people and operates three consumer electronics stores in Colorado, an e-commerce website, a design center, a professional showroom, and a repair center. In addition the company designs, installs, and services everything from simple stereo systems to home theaters, large scale public address systems, board room multi-media systems, networks, automation, lighting control, telephones, and security.

Also being inducted this year is Dr. Irwin M. Jacobs. He was the co-founder of Qualcomm Corporation and the man who led the commercialization of CDMA technology. Also recognized for their contributions to communications and consumer electronics are the team of Karl Hassel and Ralph Mathews. They were the founders of the Chicago Radio Laboratory, which later became Zenith Radio.

They and the other inductees will be honored at a ceremony during CEA's Industry Forum in Phoenix, Arizona, this fall. (EIA)

**

NAMES IN THE NEWS: VK5ZAI RECEIVES CHRIS JONES AWARD FOR DEDICATION TO ARISS

And congratulations to Tony Hutchison, VK5ZAI on his selection as this years recipient of the Chris Jones Award. This Australia based prize honors the memory of the late Chris Jones VK2ZDD whom the Wireless Institute of Australia describes as a radio amateur who was dedicated to the advancement of the service and whose unfailing courtesy and genuine friendliness is fondly remembered by all who knew him.

Tony Hutchinson was chosen based on his eight years of dedication to providing ground to space communications to the International Space Station for contacts with children in classrooms around the world. VK5ZAI serves as both the ARISS Coordinator for the Asia Pacific Region and Wireless Institute of Australia's ARISS Coordinator as well. (WIA)

**

WORLDBEAT: FOUR YOUNG HAMS NAMED WINNERS OF RADIO ARCALA ESSAY CONTEST

Last February that the team at Radio Arcala, OH8X, launched an essay contest. One aimed at getting some fresh ideas from today's youth, and their elders o boost recruitment into to the ranks of amateur radio.

There were numerous entries and now the multinational jury has picked the winners with first place going to a 19-year-old from the U-K named Mark Dumpleton, 2-E-Zero-N-C-G.

Two US hams, John Scott Anderson, KC9OQO, and Brian Wood, W0DZ, finished in second and third place respectively. Argentinean Diego Salom, LU8DX was recognized for his submission of the best Spanish language piece.

You can read Dumpleton's article and his interview at www.radioarcala.com. It can be found at the screen button marked "Young People Terms." (GB2RS, Southgate)

**

WORLDBEAT: MALAYSIA KEEN ON HAM RADIO AS TEACHING TOOL

Malaysia's Star On Line newspaper has just published a story on how students are improving their English skills using Amateur radio. According to the news article, students were introduced to the world of ham radio when they were given the opportunity to listen to a live conversation between astronauts from the International Space Satellite. One 15 year old student commented that she was amazed to hear the astronauts talking to each other through such a small radio. (Malaysia Star)

**

RADIO EXPERIMENTS: UK TO VE MARCONI DAY SUCCESS

A big success for Marconi Day 2009. Jeramy Boot, G4NJH, reports from Nottingham in the U-K:

--

This year, on Marconi Day, a Marconi official station using Marconi equipment completed a radio contact that was similar to those Marconi himself achieved many years ago.

During the late hours of Friday 24th and the early hours of Saturday 25th April, GB4FPR was operated from the Fort Perch Rock Marine Radio Museum in the Wirral. Using a newly obtained 501kHz to 504kHz Notice of Variation license, they managed a transatlantic QSO on 502kHz with a station in St. John's, Newfoundland. The operators used Marconi marine equipment and Morse and received a 539 report from V01MRC.

It was a crossband QSO with GB4FPR transmitting 1 watt ERP on 502kHz and receiving the Canadian station on 3566kHz.

--

And this historic note: Fort Perch Rock from there the U-K Marconi station operated for this event was first built as a coastal defense battery during the Napoleonic era. This, to protect the Port of Liverpool. G-4-N-J-H says that it is open all year round and features museums, exhibitions and of coarse a tea-room. Definitely a nice place from where to call a CQ. (GB2RS)

**

DX

In DX word that JA1NLX, will be active as 3D2YA from Mana Island in Mamanuca Group between June 29th and July 3rd. Listen out for him on 80 through 10 meters using CW and RTTY. QSL via his home callsign, by the Bureau or direct with an SASE.

AH2Y and WX8C will be active from Guam as AH2Y during the CQWW WPX CW Contest that takes place May 30th to the 31st. QSL via Logbook to the World or direct to HL1IWD.

K8AQM, reports that the QSL route for the V63TR 2008 operation is no longer K5ZM. From this point on, QSL V63TR only to K8AQM.

LA9QNA will be active as JW9QNAfrom the JW5E club station in Svalbard between July 17th to the 22nd. Activity will include entries in the

North American RTTY QSO Party and the CQ World Wide VHF Contest. QSL via LA9QNA.

Members of the Scandinavian YL Radio Amateurs report that they are planning an expedition to a part of remote but still accessible part of Norway. The operation will take place after the groups meeting near Oslo slated September 3d to the 6th. More information is on-line at www dot slyra dot is.

Herbert Aeby, HB9BOU, is now the single, official, coordinated source for 4U1UN QSL cards. He has all available log books, both the old paper and more recent computer logs. He and his team are reported to provide a very conscientious QSL service. His address is good in the Callbook and on most on-line call directories.

Their plans are to get a group of YL operators (and possibly their OM) to activate the Longyearbyen radio station from Svalbard between September 6-13th. They have already received the callsign JW1SYL for the operation.

Lastly IW0HEX has told the Ohio Penn DX newsletter that his callsign appears to have been pirated. He says that that he has been receiving QSL cards via the bureau for portable 5Z4 operation from August 2008 on 30 meter CW. He tells the O-P-D-X that he has never been in Kenya and this is someone abusing his callsign. He wont be returning QSL cards to anyone who sends them to him for that non-existent operation.

(Above from various DX news sources)

**

THAT FINAL ITEM: THE OLD VS NEW IRC

And finally this week, for those who like to stockpile International Reply Coupons or IRC's for QSL'ing purposes, listen up. This information is for you. Graham Kemp, VK4BB, of the WIA News, has the details:

--

The current IRC will expire at the end of year. Unlike the old style coupons, the current types all have an expiration date giving them a maximum life of 3 years. Even if you purchased a current IRC today, they will still expire on December 31, 2009.

Ken, ZL2HU, advises us on the following information from the International Postal Union in Geneva:

"The current issue (Beijing 2) IRC may be exchanged up to 31 December 2009 (date printed on coupon). In principle, Beijing 2 coupons will no longer be sold from 31 August 2009.

"The new international reply coupon (Nairobi model) is due to go on sale from 1 July 2009, and will be valid for exchange until 31 December

2013."

Ken states, "So make sure you aren't holding any of the Beijing 2 coupons at the end of this year."

For the Amateur Radio Newsline, I'm GFraham Kemp, VK4BB, in Australia.

--

To see what the new International Reply Coupon looks like, go to the U-R-L found at http://www.upu.int/news_centre/2008/en/2008-08-08_irc.shtml (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2009 Amateur Radio Newsline Young Ham of the Year Award is now open. Complete details are on our website at www.arnewsline.org Just scroll down to the words "2009 YHOTY Nominations Now Open" and click for more information and an official nominating form.

Also, due to travel by Newsline's volunteers to Dayton, next weeks newscast will be released one day early on Thursday, May 14th. Look for it on line and on the phone then.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

==> ARRL GRASSROOTS LEGISLATIVE ACTION COMMITTEE SOLICITS MEMBER SUPPORT
FOR HR 2160

One of the biggest challenges that amateurs face is antenna
restrictions
-- those implemented by local governments and those originating from
deed restrictions and building development covenants. As many hams
know,
the FCC's PRB-1 limited preemption order
<http://www.arrl.org/FandES/field/regulations/PRB-1_Pkg/prb-1.pdf>
offers amateurs some relief when facing zoning and building
restrictions; however, PRB-1 does not extend to include covenants,
```

conditions and restrictions (known as CC&Rs). These deed and property use restrictions strongly and negatively affect the ability of Amateur Radio Service licensees to perform valuable emergency and disaster communications. Finding a method to extend the PRB-1 protections is a key component of the ARRL Legislative Action Program <http://www.arrl.org/govrelations/laprog-faq.html>.

On April 29, Congresswoman Sheila Jackson-Lee (D-TX) introduced House Bill HR 2160 -- the Amateur Radio Emergency Communications Enhancement Act of 2009 <http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1>. If enacted into law, HR 2160 would instruct the Secretary of Homeland Security to undertake a study and report its findings to Congress within
180 days. The study would spell out uses and capabilities of Amateur Radio communications in emergencies and disaster relief. The study shall:
* Include recommendations for enhancements in the voluntary deployment of Amateur Radio licensees in disaster and emergency communications and disaster relief efforts.
* Include recommendations for improved integration of Amateur Radio operators in planning and in furtherance of the Department of Homeland Security initiatives.
* Identify unreasonable or unnecessary impediments to enhanced Amateur Radio communications -- such as the effects of private land use regulations on residential antenna installations -- and make recommendations regarding such impediments.
* Include an evaluation of Section 207 of the Telecommunications Act of 1996 (Public Law 104-104, 110 Stat 56 [1996]).
* Recommend whether Section 207 should be modified to prevent unreasonable private land use restrictions that impair the ability of amateurs to conduct, or prepare to conduct, emergency communications by means of effective outdoor antennas and support structures at reasonable
heights and dimensions for the purpose in residential areas.

The bill does not automatically extend PRB-1 to include CC&Rs, but it takes a first big step in that direction by determining the extent that things such as CC&Rs impede the Amateur Service in performing public and
emergency service communications.

HR 2160 has been assigned to the House Committee on Energy and Commerce.
Getting the bill out of committee is the first major hurdle to overcome -- and that is where ARRL members play an essential role. As part of a phased campaign, members of the ARRL's Legislative Action Committee and Division Directors sent letters to some ARRL members earlier this week; these members reside in a congressional district whose Member of Congress serves on that committee. The next phase will include all ARRL members.

This first set of members was encouraged to send letters expressing their support of HR 2160 to their congressional representative via Chwat
& Company, the League's Washington legislative consultant. Due to security measures imposed on mail sent to congressional personnel, representatives from Chwat will hand deliver the letters to the respective Member of Congress.

"Getting HR 2160 passed is going to be a challenging process -- and every ARRL member needs to be involved," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "The actions this week by the Grassroots Legislative Action volunteers are just the first step in our journey into getting the bill signed into law."

Amateur Radio operators across the US repeatedly demonstrate their commitment to public service and emergency communications. Through their
work with Homeland Security activities, state and local Emergency Management offices, as well as with numerous private agencies, Amateur Radio operators make a difference. HR 2160 can go a long way toward assisting thousands of amateurs who are restrained unreasonably by CC&Rs, but it will take a concerted effort by all amateurs for this effort to be successful.

For more information on HR 2160 or the Legislation Action Program, please contact Henderson via e-mail <reginfo@arrl.org>.

==> FCC RELEASES REDACTED BPL CASE STUDIES AFTER ARRL FOIA REQUEST

Earlier this month, the FCC released the redacted portions of the studies on which they relied with regard to its Broadband over Powerline
(BPL) rulemaking in 2004 after ARRL filed an Freedom of Information Act request <http://www.arrl.org/news/files/BPL_FOIA_Request033109.pdf> on March 31 for the studies. In October 2007, the US Court of Appeals for the District of Columbia Circuit heard ARRL's case against the Commission <http://www.arrl.org/news/stories/2007/10/25/102/>, stating, among other things, that the FCC not only withheld the internal studies until it was too late to comment, but had yet to release portions of studies that may not support its own conclusions regarding BPL. The FCC claimed that the studies were "internal communications" that it did not rely upon in reaching its decision to adopt the BPL rules. In its April 2008 ruling, the Court ordered the FCC to release the studies <http://www.arrl.org/news/stories/2008/04/25/10064/>.

In its decision, the Court agreed with the ARRL that the FCC had failed to comply with the Administrative Procedure Act (APA) <http://biotech.law.lsu.edu/Courses/study_aids/adlaw/> by not fully disclosing for public comment the staff studies on which it relied and that "there is no APA precedent allowing an agency to cherry-pick a study on which it has chosen to rely in part." Writing for the three-judge panel of Circuit Judges Rogers, Tatel and Kavanaugh, Judge Rogers summarized in the Court's decision that "The Commission failed

to
satisfy the notice and comment requirements of the Administrative Procedure Act ('APA') by redacting studies on which it relied in promulgating the rule and failed to provide a reasoned explanation for its choice of the extrapolation factor for measuring Access BPL emissions." The Court concluded that "no precedent sanctions such a 'hide and seek' application of the APA's notice and comment requirements."

Judge Tatel agreed with Judge Rogers, saying, "[I]n this very case the Commission redacted individual lines from certain pages on which it otherwise relied...there is little doubt that the Commission deliberately attempted to 'exclude [ ] from the record evidence adverse to its position'"

After almost a year after the Court's decision, the FCC had done "literally nothing" about releasing the complete studies <http://www.arrl.org/news/stories/2009/03/04/10685/>. When President Obama came into office in January 2009, new Freedom of Information Act (FOIA) guidelines <http://www.state.gov/m/a/ips/> were put in place. Using these new guidelines, the ARRL filed an FOIA request on March 31 for the studies. The FCC responded to the FOIA request and released the unredacted studies the last week of April.

A look at the unredacted studies show that the FCC knew BPL was not a point source, but these same studies in redacted form show just the opposite -- information proving BPL was not a point source was deleted. In one study concerning Main.net's BPL system, the FCC clearly disregarded information provided by a BPL provider's Chief Technical Officer, considering the point -- "[i]f distance scaling were based on distance to the pole ground wire rather than the nearest part of the BPL
system, measurements would have passed with 1 dB margin at the selected quasi-peak measurement location" -- as "invalid" <http://www.arrl.org/news/files/Redacted1.pdf>.

Another unredacted study from 2003 in Allentown, Pennsylvania, plainly showed that BPL was not a point source, noting: "NOT A POINT SOURCE. Emissions exhibit no noticeable decay 230 m down from the coupler." In the redacted version, this information was deleted, but all other information, including a graph, was left intact <http://www.arrl.org/news/files/Redacted2.pdf>.

A study regarding Access BPL showed the same thing, but all information had been redacted from the file, leaving just a blank page. The unredacted study concluded that "The tested overhead PLC devices do not act as point sources. Emission from line shows virtually no decay 230 m from coupler. Differential two-wire signal injection affects the polarization of radiated emissions from overhead devices" <http://www.arrl.org/news/files/Redacted3.pdf>.

"Comparing the redacted and unredacted documents will take some time," ARRL Chief Executive Officer David Sumner, K1ZZ, said, "but these three sets of pages...show exactly what prompted Judge Tatel to say what he did. We are continuing to analyze all the documents and we'll see just what has been going on."

==> ARRL SOUTHEASTERN DIVISION VICE DIRECTOR SANDY DONAHUE, W4RU (SK)

The ARRL is sad to report that Southeastern Division Vice Director Sandy
Donahue, W4RU, of Dothan, Alabama, passed away on May 4. He was 63.
Donahue, an ARRL Life Member, served as Vice Director since January 2002
and as Georgia Section Manager from 1997-2001. In his professional life,
Donahue worked at a television station in Atlanta for almost 25 years before retiring.

Licensed for almost 50 years, Donahue received his first call sign -- WA4ABY -- at age 15. Exhibiting a lifelong commitment to public service throughout his amateur career, he always supported the ARRL and the Amateur Radio Service. Donahue was a fixture at every major hamfest in Southeastern Division -- and many across the country -- as well as many of the smaller ones in his area, promoting the ARRL. He spent the weekend of May 2-3 at the BirmingHamfest 2009 <http://www.w4cue.com/fest.html>.
Former Southeastern Division Director and current ARRL Honorary Vice President Frank Butler, W4RH, appointed Donahue as an Assistant Director
in 1982. "We spent hours and hours together at the ARRL table at so many
hamfests and conventions," Butler recalled. "Sandy became my Vice Director in 2002, and in the next six years, I got to really know him. Over the past 26 years, we must have sold more a ton of ARRL books, study guides, operating aids, pins, patches and stickers. Sandy was always promoting the League to hams, encouraging them to become active members of the ARRL. He took great pride in the number of people who joined the ARRL through him."

Butler said that after a hard day's work at the ARRL booth, "all Sandy ever wanted was a good dinner! He loved to eat, and he showed me many fine places to do that, from Atlanta to Birmingham, to Orlando to Miami!I'm glad we got to do that again the last weekend of his life -- at the
BirmingHamfest 2009."

Current Southeastern Division Director Greg Sarratt, W4OZK, fondly remembered Donahue: "I was happy to say that I spent this past weekend with Sandy where he spent the last day of his life doing what he loved -- in the ARRL booth, representing the ARRL at the Birmingham, Alabama hamfest, catching up with old friends. Sandy was, as usual, in rare form
all weekend, joking and having a good time."

Sarratt said that on Sunday, May 3, "Breakfast began with Sandy surrounded by a group of friends, where he, as usual, did his dead level
best to get the best of me with a joke. On this occasion, he managed to succeed, and, in fact, he continued to enjoy this until we parted ways at the conclusion of the hamfest. Sandy could relate to all hams, both old and young. He -- and his sense of humor -- will be sorely missed."

ARRL Chief Executive Officer David Sumner, K1ZZ, said that even before Donahue sought elective office in the ARRL, "Sandy was a fixture at conventions and hamfests, promoting the League and supporting the association in any way he could. Sandy thought of the ARRL as his family, and he was an important part of it."

Jeff Beals, WA4AW, was a long-time friend of Donahue's. "I've known Sandy for more than 25 years," he told the ARRL. "He was very, very devoted to Amateur Radio, especially the public service side: Emergency Communications, traffic handling and helping out wherever and whenever he could. We had a lot in common." Beals currently serves as an Assistant Section Manager and Affiliated Club Coordinator in the ARRL's Southern Florida Section.

"Sandy had developed an interest in community theatre these past couple of years," Beals said. "He had been involved in a few productions with The Featured Players group <http://www.freewebs.com/featuredplayers/> in
Dothan."

ARRL Technical Relations Manager Brennan Price, N4QX, said that Donahue was one of the three ARRL Volunteer Examiners who administered his first
license exam back in 1997: "He was helpful after the exam as well, always eager to share his experience with a variety of Amateur Radio activities with me and other impressionable young hams at the Georgia Tech Amateur Radio Club. While I suspect that his stories were sometimes
accompanied by a degree of exaggeration for dramatic effect, I enjoyed them and will miss them."

According to Beals, a graveside service will be held at 4 PM on Saturday, May 9 at Sunset Memorial Park, 1700 Barrington Rd, Midland City, Alabama. An additional service will be held on June 6 at 1 PM in conjunction with the Atlanta Hamfest at Jim Miller Park in Marietta, Georgia. For more information, please contact Beals via e-mail <wa4aw@arrl.net>.

==> DX ACTIVITIES ABOUND AT ARRL EXPO AND NATIONAL CONVENTION

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, reports that plans for a plethora of DX activities at the ARRL EXPO -- part of the 2009 ARRL National Convention at the Dayton Hamvention -- are wrapping up <http://www.arrl.org/expo>. "We are excited about the activities that will be taking place," he said. "Visitors to the EXPO

will see a lot of activities relating to DX, including an expanded International Amateur Radio Union (IARU) <http://www.iaru.org/> area." The National Convention will take place May 15-17 at Hara Arena, located
near Dayton, Ohio.

The IARU area, led by incoming IARU President Tim Ellam, VE6SH, will feature each of the three IARU Regions. The Deutscher Amateur Radio Club
(DARC) <http://www.darc.de/>, representing Region 1, will be running a world flag identification contest throughout the show. ARRL, representing Region 2, will sponsor a RUFZ <http://www.rufzxp.net/> CW copying competition throughout the event. The Japan Amateur Radio League
(JARL) <http://www.jarl.or.jp/English/0-2.htm>, representing Region 3, will be on hand to check applications for the IARU's Worked All Continent (WAC) and 5-Band WAC awards <http://www.iaru.org/wac/>. According to Patton, they will check QSL cards and issue the award certificates on the spot.

"The 2009 ARRL National Convention marks the first time we have offered the WAC and 5-Band WAC awards on the spot," Ellam said. "It is definitely exciting to be able to walk away with your award certificate in hand." To be eligible for WAC, applicants must submit QSL cards (no photocopies, please) confirming contacts with at least one other amateur
in each of six continents: North America, South America, Asia, Europe, Oceania and Africa. The 5-Band WAC award recognizes amateurs who have made confirmed contacts with these continents on 80, 40, 20, 15 and 10 meters.

JARL representatives will also check applications for certain JARL awards (AJD, WAJA, JCC, JCG, ADXA and ADXA-Half) and issue them at the convention. JARL staff members Masa Ebisawa, JA1DM, and Hiro Tamama, JA1SLS, will check applications for other JARL awards at the JARL corner; certificates for these awards will be mailed from JARL headquarters. Ebisawa and Tamama will be glad to answer questions about JARL activities, as well as the reciprocal licensing procedures.

Applicants for JARL awards do not need to have the QSL cards present; a list showing the call signs of stations worked, date, band and mode (or other data required by each award) of the contacts is sufficient. A statement making an oath that the QSL cards of the contacts listed are in the possession and that the items are correctly listed should be attached to the application. Applicants may use a DXCC Record Sheet for their QSL card list. The JARL award fee is $16. Check out the JARL Web site for more information about JARL awards
<http://www.jarl.or.jp/English/4_Library/A-4-2_Awards/Award_Main.htm>.

ARRL staff and DXCC Card Checkers will offer full DXCC card checking and
award applications as always, and will also be able to check

applications and QSLs for the Worked All States (WAS)
<http://www.arrl.org/awards/was/> and the VHF/UHF Century Club (VUCC)
<http://www.arrl.org/awards/vucc/> awards.

Visitors to the ARRL EXPO will be able to check out the Logbook of the
World (LoTW) "Call Sign Lookup." This nifty program will allow anyone
to
see how many times LoTW users have submitted their call sign to the 222
million QSO log database! ARRL staff will also be able to assist with
LoTW signup and problems throughout the weekend. For those who have not
yet signed up to use LoTW, bring a copy of your license to show to
staff
and they will be able to help expedite the sign-up process
<http://www.arrl.org/lotw>.

For the first time ever, ARRL members will be able to drop off their
QSL
cards to be sent through the ARRL Outgoing QSL Bureau
<http://www.arrl.org/qsl/qslout.html>. If you have QSLs that you would
like to send through the ARRL Outgoing QSL Bureau (your QSLs going to
foreign stations --no US-US QSLs please), you can save the shipping
cost
to ARRL by bringing them to Dayton and the League will transport your
cards to the Bureau in Newington.

In order to take advantage of this exciting benefit, all of the
standard
QSL Bureau rules must be followed: Cards must be sorted by DXCC
country;
they must go to countries where a bureau exists, and you must be an
ARRL
member to use the Outgoing QSL Bureau. Patton said that hams utilizing
this service do not need to box the cards, but they should be wrapped
with rubber bands; ARRL will weigh the cards on-site in the ARRL EXPO
area.

The rates are $5 for the first .5 pounds of cards or portion thereof.
Keep in mind that approximately 75 cards weigh .5 pounds. The rates
increase to $10 for one pound, and then $5 for each additional
half-pound. For example, a package containing 1.5 pounds of cards
should
include the fee of $15. A package of only 10 cards or fewer costs only
$1.50, 11-20 cards are $2.50 and 21-30 cards are $3.75. Members can pay
for this service via check, cash or credit card.

Why not make 2009 your year to go to Dayton? Where else can you
experience all the fun and excitement of the ARRL EXPO, the 2009 ARRL
National Convention and the Dayton Hamvention under one roof? It's not
too late to make plans to join us in Dayton May 15-17.

==> OREGON HAMS PARTICIPATE IN STATEWIDE DISASTER DRILL

The State of Oregon conducted a full-scale week long exercise April 24-30, simulating a 9.2 magnitude earthquake on the Cascadia Subduction Zone <http://www.pnsn.org/HAZARDS/CASCADIA/cascadia_zone.html>. According to Tillamook County Emergency Management Director Gordon McCraw, WX7EM, if an earthquake struck the zone, it would cause "major destruction" from the Cascade Mountains all the way to the West Coast. Instead of focusing on the actual disaster, the exercise instead concentrated on the 72 hours after the event. This, officials said, would put the primary focus on life-saving response and debris removal, as well as mass-casualty and short-term recovery.

The Cascadia Subduction Zone -- a very long sloping fault that stretches
from mid-Vancouver Island to Northern California -- separates and connects the Juan de Fuca Plate and North American Plate. The Zone is creating new ocean floor off the Washington and Oregon coasts; as more material wells up along the ocean ridge, the ocean floor is pushed toward and beneath the continent.

"The simulation -- codenamed Cascade Peril -- included a major tsunami striking the coastline," McCraw said. "Such an event would result in a severe disruption to local utilities, including electricity and phone services, so local Amateur Radio operators were called upon to relay message traffic from the Tillamook County Sheriff's Office Command Center to the Incident Command Team. From there, officials evaluated the
needs request and forwarded the traffic on to the Regional Facility that
had been set up at a National Guard Base near Cannon Beach, Oregon. Emergency Management officials then consolidated these requests and sent
them to the State Emergency Management Office in Salem."

McCraw said that officials participating in Cascade Peril expected that if this were an actual event, roads would be affected, so as part of the
simulation, the US Coast Guard dispatched a helicopter to the Tillamook Airport. There it picked up three Tillamook area Amateur Radio operators
and flew them to Camp Rilea National Guard Base in Warrenton, about 65 miles north of Tillamook.

At Camp Rilea, the hams established communications on 2 meters and Winlink between all facilities. "Amateurs relayed message traffic on voice, and many new hams used Winlink for the first time, having received their license only a couple months prior to the exercise," McCraw said. "In Tillamook County, we used 11 hams at two locations. Four Tillamook hams at Camp Rilea participated with hams from neighboring Clatsop County. These hams sent and received a total of 37 messages on Friday and 32 messages on Saturday before the exercise was terminated around noon."

In the months leading up to the exercise, McCraw said Tillamook County installed amateur stations at the Tillamook County Sheriff's Office -- home of the Emergency Operations Center and the back-up 911 center -- and at the primary regional 911 center in downtown Tillamook, where the Incident Command Team operates during disasters. "Because of the excellent service the Amateur Radio community provided during the December 2007 storm events that saw a severe disruption of landline and cell phone service in many coastal communities, including Tillamook County, Emergency Management officials installed the Amateur Radio stations at these facilities," McCraw said. "Both the county and the state recognized the capabilities Amateur Radio offered and they provided some of the equipment needed to install these stations."

McCraw said that Tillamook County has been called the most "disaster rich" county in Oregon: "This past November, December and January, Tillamook County experienced three floods and a severe snow event that resulted in Oregon Governor Ted Kulongoski declaring these areas disaster zones. As has now become standard practice during activation of
the Incident Command Team, Amateur Radio operators were on the scene, attending all briefings and manning the stations until the event was terminated."

ARRL District Emergency Coordinator for Oregon's District One David Kidd, KZ7OZO, told the ARRL that Tillamook County is "very lucky" to have Gordon McCraw, WX7EM: "Not only is Gordon the Emergency Coordinator
(EC) for the County ARES unit, but he is now the County Emergency Management Director after serving as a Senior Deputy since his arrival in Oregon. Gordon brings his vast experience in law enforcement and emergency management to the county from his time spent working in both fields during Hurricane Katrina in New Orleans. This is important since Tillamook County has been the focal point for several severe weather events in the recent past. Gordon takes is job very seriously and has his people train hard so they are ready for the real thing."

Kidd said that McCraw -- appointed as EC in April 2007 -- has helped to build a very effective unit "from scratch" -- the county had not had an ARES unit for more than 10 years before McCraw's appointment.

"Tillamook County is a rural county and volunteers are an absolute necessity to get the mission accomplished here," McCraw concluded, "and Amateur Radio operators are at the top of that list. I consider them amateurs in name alone."

==> NOTED QST AUTHOR, DXPEDITIONER LEE BERGREN, W0AR (SK)

Albert "Lee" Bergren, W0AR (ex-W9AIW, W0AIW), of Kansas City, Missouri, passed away May 1 after a brief illness. He was 93. An electronics engineer, author, designer and advisor with special accomplishments in the field of antenna and radio amplifier design, Bergren led or participated in many of the first Amateur Radio DXpeditions.

In 1956, Bergren and a team of five amateurs activated Socorro Island, XE4A, in 1956 <http://p1k.arrl.org/cgi-bin/topdf.cgi?id=38695&pub=qst>. Prior to this activation, the island had only seen Amateur Radio activity when a Spanish-speaking radio operator with a temporary Mexican
weather station had a limited number of contacts on 40 meters phone. In 1959, Bergren also activated the Seychelles Islands as VQ9AIW in 1959. In 2002, he was inducted into the CQ DX Hall of Fame as Member #41 <http://www.cq-amateur-radio.com/dxhof.html>. Other than keeping up with
his friends on the air, DX was always Bergren's focus in Amateur Radio. After the bands opened up after World War II, he received DXCC #191 for Mixed Mode and DXCC #124 for voice in 1948. According to the June 1965 issue of QST, Bergren earned DXCC Honor Roll with 313 countries.

In 1963, Bergren developed the multi-element cubical quad antenna, and later that year, QST published his article "The Multielement Quad" <http://www.arrl.org/members-only/tis/info/pdf/6305011.pdf>. The antenna
had a driven element, reflector and two directors. Horizontal crossarms were broken by insulators to minimize coupling to the antenna. Continuous wire loops with no stubs were used for each element. In a June 2002 QST article, Bergren recalled "The First Field Day" in 1933 <http://p1k.arrl.org/cgi-bin/topdf.cgi?id=102850&pub=qst>, remembering that back then, only portable stations were allowed to participate.

Together with Bill Bishop, W0UF (SK), Bergren owned and served as President of Radio Industries, a company that manufactured the Loudenboomer linear amplifier and antenna rotator in the early 1960s <http://www.qsl.net/la5ki/louden.htm>. The company was also known for two-way 30 mc radios used for village communication during the Vietnam War and two-way 160 mc communication radios for railroads and pipeline controls that they designed and manufactured. Bergren and Bishop sold the company to Hallicrafters in the mid-1960s.

ARRL Youth Editor Duncan MacLachlan, KU0DM, knew Bergren well. "Lee was an amazing man with an amazing story," MacLachlan said. "He taught me much in the two years I knew him, and even at 93 he left too soon. Lee spent 78 years in ham radio, dedicating his time, talent and treasure to
the hobby. He will be sincerely missed in the Kansas City amateur community, especially among QCWA Chapter 35 and Kansas City DX Club. Lee
was the greatest man one could be, and he now belongs to the ether."

Bergren was a Life Member of the ARRL and the Quarter Century Wireless Association (QCWA). He co-founded the Kansas City DX Club in 1952 and the Mid-Continent Chapter 35 of QCWA in 1967. Bergren is survived by his
wife Betty. A memorial service is planned for 10:30 AM Tuesday, May 5 at
the Lutheran Church of the Resurrection, 9100 Mission Rd, Leawood,

Kansas. Donations may be made to the American Heart Association.

==> FCC AFFIRMS VANITY CALL SIGN RULES

The FCC dismissed a petition filed by Richard Essen, N6CX (ex-AB3IQ), of Silver Spring, Maryland, regarding the issuance of a vanity call sign to Allan Corderman <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-997A1.pdf >. In its decision, the FCC said that Corderman's application for his new call sign was valid and the call sign was "properly granted" by the FCC.

On December 22, 2006, Winfield Brantley of Myrtle Beach, South Carolina, surrendered his call sign -- W3ZD -- when the FCC approved his application for a new call sign. On December 10, 2008, Allan Corderman, WB1EFN, of New Orleans, Louisiana, applied for W3ZD, stating he was a close relative of a former holder of the call sign. Section 97.19(c)(3) of the FCC rules regarding vanity call signs state that while a surrendered call sign is not available to the vanity call sign system for two years, certain relatives of the deceased former holder or clubs (in certain circumstances) may apply for the call sign in the two year "grace period" <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.19.pdf>. Corderman stated in his application that he was the son of Roy C. Corderman, now deceased, and a former holder of W3ZD.

In January 2009, Richard Essen, N6CX (ex-AB3IQ), of Silver Spring, Maryland, petitioned the FCC, asking that the Commission reconsider Corderman's application for W3ZD, saying that the application should not have been granted because the exception in the vanity call sign system's rules apply only to close survivors of the most recent person to hold the call sign, and not to close relatives of any deceased prior holder.

The FCC disagreed with Essen's petition, saying that "[w]hen the Commission adopted Section 97.19(c)(3), it stated that it was granting priority to 'close relatives of deceased holders,' and did not say that the priority applied only to close relatives of certain deceased holders. The rule has always been interpreted to afford priority to close relatives of any deceased former holder."

According to Section 97.19(c)(3), "Except for an applicant who is the spouse, child, grandchild, stepchild, parent, grandparent, stepparent, brother, sister, stepbrother, stepsister, aunt, uncle, niece, nephew, or in-law, and except for an applicant who is a club station license trustee acting with the written consent of at least one relative, as

listed above, of a person now deceased, the call sign shown on the license of [a] person now deceased is not available to the vanity call sign system for 2 years following the person's death, or for 2 years following the expiration of the license grant, whichever is sooner."

==>SOLAR UPDATE

Tad "Sunshine trickles on the floor" Cook, K7RA, this week reports: A Solar Cycle 23 spot appeared for two days -- April 29-30 -- in an area that soon rotated out of view. Sunspot numbers were 15 and 12, but for the last seven days, we haven't seen any spots. This may end soon -- we get the advance word because of the STEREO mission <http://stereo.gsfc.nasa.gov/where.shtml>, which is gradually able to see more and more of the sun not visible from Earth. On May 5-6, the STEREO B satellite was able to see an eruption from an active region around the eastern edge of the Sun, outside of our view. If sunspots emerge, they will be Solar Cycle 24 spots, due to their relatively high latitude. Sunspot numbers for April 30-May 6 were 12, 0, 0, 0, 0, 0 and 0 with a mean of 1.7. The 10.7 cm flux was 69.4, 68.5, 68.3, 68.6, 68, 68 and 68.7 with a mean of 68.5. The estimated planetary A indices were 3, 5, 5, 5, 4, 2 and 6 with a mean of 4.3. The estimated mid-latitude A indices were 2, 2, 3, 2, 2, 2 and 6 with a mean of 2.7. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought
to you by John Clare's "May" <http://www.poemhunter.com/poem/may-2/>.

==>IN BRIEF:

* This Week on the Radio: This week, look for another running of the NCCC Sprint Ladder on May 8. The FISTS Spring Sprint is May 9. On May 9-10, look for the SBMS 2 GHz and Up WW Club Contest (local time), the CQ-M International DX Contest, the VOLTA WW RTTY Contest, the Nevada Mustang Roundup and the 50 MHz Spring Sprint. The SKCC Weekend Sprint is
May 10. Next week is the Feld Hell Sprint on May 16. The EU PSK DX Contest, His Majesty King of Spain Contest (CW) and the Manchester Mineira All America CW Contest are May 16-17. The Run for the Bacon QRP Contest is May 18 and the NAQCC Straight Key/Bug Sprint and QRP Minimal Art Session are May 21. All dates, unless otherwise stated, are UTC. See
the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Station Web page

<http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, May 24, 2009, for these online course sessions beginning on Friday, June 5, 2009: Amateur Radio Emergency Communications Level 1; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* No ARRL Audio News on May 15: Due to staff attendance at the ARRL National Convention and Dayton Hamvention, there will be no ARRL Audio News on May 15. The ARRL Letter will be distributed that day. ARRL Audio News will resume regular distribution on May 22.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole
or in part in any form without additional permission. Credit must be
given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):
letter-dlvy@arrl.org
==>Editorial questions or comments: S. Khrystyne Keane, K1SFA,
k1sfa@arrl.org

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly
from ARRL HQ. To subscribe, unsubscribe or change your address for
e-mail delivery:
ARRL members first must register on the Members Only Web Site
<http://www.arrl.org/members/>. You'll have an opportunity during
registration to sign up for e-mail delivery of The ARRL Letter, W1AW
bulletins, and other material. To change these selections--including
delivery of The ARRL Letter--registered members should click on the
"Member Data Page" link (in the Members Only box). Click on "Modify
membership data," check or uncheck the appropriate boxes and/or change
your e-mail address if necessary. (Check "Temporarily disable all
automatically sent email" to temporarily stop all e-mail deliveries.)
Then, click on "Submit modification" to make selections effective.
(NOTE: HQ staff members cannot change your e-mail delivery address. You
must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these
sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter
will
be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur
Radio Club: Visit Mailing Lists@QTH.Net
<http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL
cannot assist subscribers who receive The ARRL Letter via this
listserver.)

The Ohio/Penn DX PacketCluster
DX Bulletin No. 908
BID: $OPDX.908
May 11, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, K3AIR, K3ZO, N3SL, NG3K, N4AA & QRZ DX, WW5L, K8YSE, N8OFS, W0AR, A35RK, CWJF Group, DK8JB, DL1EKC, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA3BHK, F5NQL & UFT, G3PSM, HA0HW, I1JQJ/IK1ADH & 425 DX News, LZ1HA, OH5FFT, ON8VM, Pete's-DX-Newsdesk, PY4WAS, RA3AUU, RSGB IOTA Web Site, VA3RJ & ICPO, VE9NC and VHF-DX-Portal (MMMonVHF) for the following DX information.

** SPECIAL NOTE FROM EDITOR (By KB8NW): There will not be a OPDX Bulletin next week. I will be attending the Dayton HamVention. "IF" I receive a major announcement, I may send something out late Sunday or Monday. However, PLEASE continue to send your DX information. You never know what I might do.... 73 de Tedd KB8NW
P.S. Hope to see you at the HamVention Dayton at the NODXA Hospitality Suite at the Crown Plaza (See below)!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-May, through Sunday, 10th-May there were 213 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V4, V5, V8, VE, VK, VP2E, VP2M, VP2V, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2009 MMAA CW CONTEST. If you are not attending the Dayton HamVention, you may want to be active in the CWJF's 2009 Manchester Mineira All America CW Contest, May 16-17th. This year's event is mainly for stations in North and South America. However, in 2010 it will be world-wide. For more details and rules on this Brazilian MMAA CW Contest, visit their Web site at: http://www.powerline.com.br/cwjf
ADDED NOTE: Look for Alex, PY2WAS, to activate a rare Brazilian State outside and during the MMAA CW Contest. Activity will be from Macapa, Amapa State, in the Amazonic Region of Brazil. He will be using the special callsign PQ8W. He will be there between May 15-17th. Activity outside of the contest will be on 160-10 meters using CW and SSB. QSL via PY2WAS, direct or by the Bureau.

3A, MONACO (IPA Op). Gab, HA3JB (SU8BHI), will be active as 3A/HG3IPA between September 23-30th. Activity will be good for the Hungarian International Police Association Award (HA-IPARC Award). For details on the award, visit: http://www.ha3jb.com
He also plans be an entry in the 2009 CQ DX RTTY Contest (September 26-27th). Also, a new online log search is available at: http://www.ha3jb.com/onlinelog
Those who send for a QSL, please write your E-mail address on your card, and he will advise you by E-mail when your QSL arrives. QSL via HA3JB: Gabor Kutasi, H-8601 Si=F3fok, P.O.Box 243, HUNGARY, EUROPE.

3Z11, POLAND (Special Event). Members of the Polish Amateur Radio Association (PGA-C PZK) are now active as 3Z11EQSLCC until May 12th. Activity is to celebrate the 11th anniversary (May 11th) of eQSL.cc. Activity over the past weekend was on 40/20 meters CW/SSB. QSL via eQSL.cc or SP2FAP.

5V7, TOGO. Werner, DL9MBI, is now active as 5V7PM from some miles outside the capital city of Lome (approx. 2 miles from the sea) until May 30th. Activity over the past weekend was on 20 meters, SSB, RTTY and PSK. QSL via his home callsign by the bureau. For direct cards, please send QSL cards to: Werner Peter Mueller, Plattenberg 2 1/2, D-84508 Burgkirchen, GERMANY (w/SAE and two green stamps. Otherwise the answer will be via bureau).

7X, ALGERIA (Special Event/Ham Meet). Members of the Algerian Radio Amateur Association (A.R.A) and Djelfa Radio Club (7X2VFK) will activate the special event callsign 7X2DD during the International Algerian Sahara HAM Meeting (June 15-21st). Activity will be on all bands/modes, and a special diploma will be issued instead of a QSL card.

A3, TONGA (Update). Paul, A35RK, informs OPDX that Dave, A35KL, has left Vava'u (OC-064) for Tongatapu (OC-049), but he will not be on the air from there. He adds, "Dave has my broken FT-450, and he sold me his K3, which saved my radio-life here. He returns stateside next Tuesday."
Look for A35RK/p to be active from OC-064, on 80-17 meters, CW and SSB,

using an Elecraft K3 and a G5RV antenna. You can take a look at Paul's holiday QTH at: http://www.bayviewtonga.com
Paul ends his E-mail by informing us, "I seem to have forgotten to bring some critical USB interface cables, so RTTY will not be possible unless I can find a work-around. All is well. Vava'u is beautiful."

CS6, PORTUGAL (New CT Island). The Algarve STAR DX Team is planning to activate another new island in the southern part of Portugal on May 24th. They plan to use the callsign CS6A. It is a private island (Ilhas em Grandes Barragens - Large Dams Islands was mentioned) and this will be the first time the owner has authorized activity! Currently, there is a small problem to get to the island. A small bridge to the island is down and landing via boat is very very difficult. More details are forthcoming. Watch their Web page at: http://algarvedx.com

DAYTON HAMVENTION ACTIVITIES (Reminders).....
* Contest Super Suite - May 13-16th, 7pm-??? at the Crowne Plaza, Dayton (Downtown), OH; 2nd floor - Miami Ballroom.
First Night - Hosted by Contest University (CTU). CTU Check-in from 8:00-10:00 PM. 10:30 PM Pizza Party sponsored by
Contest University 2009. Web site at:
http://contestsupersuite.com
Second Night - Hosted by The Mad River Radio Club (MRRC), Frankford Radio Club (FRC) and North Coast Contesters (NCC). 50th Anniversary Celebration of CQ WorldWide Multi Multi Category. All are invited for the Special Celebration Party in Miami and Beckel Ballrooms at 10:30 PM with "Wings" from Quaker Steak and Lube! And pizza too!
Third Night - Hosted by The Mad River Radio Club (MRRC), Frankford Radio Club (FRC) and North Coast Contesters (NCC) with a 11:00 PM Pizza Party sponsored by the Potomac Valley Radio Club (PVRC).
Fourth Night - Hosted by The Mad River Radio Club (MRRC), Frankford Radio Club (FRC) and North Coast Contesters (NCC) with a 11:00 PM Pizza Party sponsored by the Yankee Clipper Contest Club (YCCC).

* DX HOSPITALITY SUITE. The Northern Ohio DX Association (along with Janeen Hire, W8ZET) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel on Thursday, Friday and Saturday evenings (Look for signs!). All DXers/Contesters are welcome. Munchies and refreshments will be available. Come and meet the members and friends of NODXA.

* The 24th annual SWODXA DX Dinner will be Friday evening, May 15th, at the Crowne Plaza Hotel, located in Dayton City Center. Their speakers will be John Stanley/K4ERO, and Ruth Stanley/WB4LUA. This husband and wife team travel the globe installing, maintaining and training personnel for religious international shortwave stations. They have been to over 60 DXCC entities and operated from more than

12 of them. John has written many technical articles in the ham journals (with one in the April 2009 issue of QST), is a recipient of the 2007 Doug DeMaw Technical Excellence Award and is an ARRL Technical Advisor, having contributed many pieces to the ARRL Handbook.

* Topband Dinner on Friday evening, May 15th, at the Barnsider Restaurant, (Near Hamvention Arena), 5202 N. Main Street (Route 48 just north of Needmore Ave), Dayton, Ohio.

* The Contest Dinner will be held on Saturday night, May 16th, at 6:30 PM, at the Crowne Plaza Hotel (Official Contest Hotel), 5th and Jefferson Streets (Next to the Convention Center), Dayton (Downtown), Ohio, in the VAN CLEVE BALLROOM. Details at: http://www.contestdinner.com

* ANTENNA, DX AND CONTEST FORUMS AT THE CONVENTION
May 15th - Antenna Forum at HARA Arena 2:30-5:00 p.m. Room 1
Moderator: Tim Duffy, K3LR
Eric Scace, K3NA - "Loop Array Runs Circles Around The Beverage"
Dr. DaveLeeson, W6NL - "Thoughts on Antenna Positions, Sloped Ground and Foregrounds",
Rob Sherwood, NC0B - "Effective Low Band Antenna for Small Lots"
Don Daso, K4ZA - "K4ZA's Tips, Tricks and Toolbox"
May 16th - Contest Forum at HARA Arena 9:15-11:15 a.m. Room 1
Moderator: Doug Grant, K1DG
Joerg Jaehrig, DJ3HW - "The Deutscher Amateur Radio Club Contest Program and WAE-60 Celebration"
Rol Anders, K3RA, and Vic Gauvin, K1PY - "A Tale of Two Winning Field Days - W3AO 23A and W2RDX 3A"
Pete Smith, N4ZR - "Skimmer - One Year Later"
Toni Linden, OH2UA - "Xtreme Contesting at Radio Arcala, OH8X"
May 16th - DX Forum 2:45-5:00 p.m. Room 1
Moderator: Jay Slough, K4ZLE. Assistant Moderators: Pete Meyer, N0FW and Tom Kissner, W8WGT
Simone Bizzarini, IZ0BTV - E44M PALESTINE DXpedition
Speakers TBD - K5D Desecheo Island DXpedition
Josh Fisher, W4WJF - VK9DWX Willis Island DXpedition
"Frosty" Frost, K5LBU - African DX Safaris
DX Forum sponsored by SW Ohio DX Association and Yaesu Vertex. There will be a Yaesu FT-2000 with PEP raffled off at the end of the DX forum. You do not have to be present to win. Tickets for a chance on the FT-2000 are available at the forum, or may be ordered at the same time you purchase your DX dinner tickets. SWODXA Web page at: http://www.swodxa.com

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following operations are approved for DXCC credit:
J20SE - Djibouti; 2009 Operation
A52DT - Bhutan; 2009 Operation

EE2, SPAIN. Members of the Ondarroa Group will be active as EE2W during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via EB2BXL.

EG3, SPAIN (Special Event/Tribute). Members of the Amire, DX Association Barcelona, Digital EA Federation, Radio Club Barcelona, Radio Club del Valles, Quixotes Radio Club International and ARMIC will activate EG3EN during the 2009 MERCE HAM RADIO event on May 16-17th. Activity is a special tribute to Jaume, EA3ENA, and to celebrate the 30th anniversary of the radio event. QSL via EA3RKR. For more details, visit: http://www.qrz.com/callsign?callsign=EG3ENA

ET, ETHIOPIA. Peter, DM2BBN, who will stay in Addis Abeba, is active as ET3BN for the "next years". Activity will be on CW/SSB and using a wire pyramid for 80m, Quad antennas for 30/17/12/20/15/10m and a log-periodic for 6m. He is not active on 160 and 40 meters right now. QSL direct to: Dr. Peter Haferkorn, PO Box 150194, Addis Ababa, Ethiopia.

IOTA NEWS.....
EU-039. Operators Jean-Jacques/ON7EQ, Mich/ON8DM, Claude/ON7TK and Carine/ON7LX will be active as F/0T3T from Ile Grande, Chausey Islands (DIFM MA-004, WLOTA 0424) for the RSGB IOTA Contest (July 25-26th). QSL via ON7EQ, direct or by the Bureau.

EU-043. A team of eight Swedish operators will be active as 7S6W from Vinga Island, off the coast of Gothenburg, Sweden, between May 14-17th. Activity will be on 80-2 meters using four stations on the air. QSL via SM6WET, direct or by the Bureau, following QSL instructions at: http://www.qrz.com/callsign/7S6W

NA-029. Gregg, VE3ZZ, will be active as VY2Z from Prince Edward Island (CISA PE-001) during the RSGB IOTA Contest (July 25-26th) as a Single-Op/? entry. QSL via his home callsign, direct or by the Bureau.

OC-268. Fuadi, YB7IM (ex-YFMI), and some friends will be active as YE7M from Payung Payungan Island in the Laut Kecil Islands Group, May 22-24th. The team will depart from Banjarmasin City on May 20th, and head to an empty restricted area in Laut Kecil Islands on Payung Payungan Island between E 115' 48" - E 115'49" and S 4'22" - S 4'23". There is an old Light-house in the middle of the island, which was built in the colonial era in Indonesia. No lighthouse reference number was provided. Activity will be on 40/20/17/15/10 meters using CW and SSB. Suggested frequencies are:
CW - 7023, 14040, 18098, 21040 and 28040
SSB - 7080, 14260, 18150, 21260 and 28360 kHz
The QSL Manager is YB7KNV: PO Box 7, BANJARMASIN 70000, SOUTH KALIMANTAN INDONESIA. Web site: http://ye7m.blogspot.com/

J48/SV8, GREECE (IOTA Op). Laci, HA0HW, will once again be active as J48HW and SV8/HA0HW from Thassos Island (IOTA: EU-174, GIOTA: NAS-037, MIA: MG-124, WLOTA: LH-4186, QRA: KN20HS) between May 28th and June 6th. He will operate mainly CW, with some SSB, RTTY and PSK31 as well, on the HF bands (mainly on 40, 30, 20 and 17 meters) and on 6 meters. His activity will include the CQ WPX CW Contest (May 30-31st) as J48HW. His rigs are a FT-840 with a MOS-FET amplifier and an IC-706 (for 6m only) with monoband

Gps and dipoles on fishing poles. QSL via his home callsign, direct or by the HA Bureau.

KP2/WP3, U.S. VIRGIN ISLANDS (NA-106). Jaime, WP3A, will be active as KP2B from St. Croix during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Low-Power entry. QSL direct to EA7FTR.

LY7, LITHUANIA. Members of the Kaunas University of Technology will be active as LY7A during the CQ WPX CW Contest (May 30-31st) as a Multi/Multi entry. QSL via the LoTW or LY2ZO.

LZ50, BULGARIA (Special Event). Look for special event station LZ50BNT to be active through the end of the year (between May 1st-December 31st). Activity is to celebrate the 50th anniversary of Bulgarian National Television, the national public television service of the Republic of Bulgaria. Operations will be on all bands and modes. A special event QSL card (double format) will be sent to all stations who send their QSL card to QSL Manager LZ1HA, direct or by the Bureau.

MD4, ISLE OF MAN (EU-116). Operators David/G3NKC, Peter/G4MJS, Martin/G4XUM, Lionel/G5LP, Michael/G7VJR and Mark.2E0NCG will be active as MD4K during the RSGB IOTA Contest (July 25-26th) as a Multi entry. QSL via G3NKC.

N8, UNITED STATES (USI and OSPOTA Op). Ed, N8EQJ, will be active as N8EQJ/p from Kelly's Island (USI OH-001L, Erie county, Ohio), for the OSPOTA (Ohio State Parks On The Air) Contest on September 12th (1600-2400z). Activity will be on 80/40/6 meters. QSL via his home callsign, direct or by the bureau.

OF5, FINLAND (Special Event). Members of "The Club of Fives RY" (OH5AA) will be active as OF5POPOV from the library of Kotka on May 14th. Activity is to celebrate 150th anniversary of the birthday of Alexander Popov -- a remarkable person in Finnish radio history. QSL via OH5VX, direct or by the Bureau.

OH0, ALAND ISLAND. Operators Norbert/DJ7JC, Ulrich/DJ9IE, Detlef/DK3QZ, Marcus/DL1EKC and Rein/PA0R will be active as OH0EC in the upcoming CQ WPX CW Contest (May 30-31st). The team members will be individually active between May 24th and June 3rd signing OH0/homecall. The operation will be mainly CW with some 30/17/12m activity. QSL OH0EC via DL1EKC, and for the individual operators via their respective home callsigns. All QSLs are OK via Bureau.

PACIFIC TOUR (IOTA Op). Steve, 9M6DXX (G4JVG), will active as FK/G4JVG from Noumea (OC-032), New Caledonia, between May 22nd and June 3rd, and as G4JVG/VK4 from North Stradbroke Island(OC-137), Australia, between June 7-9th. Activity will be holiday style while celebrating his 25th wedding anniversary with Eva, 9M6EVA. Operations will be SSB only, using 100 watts into "fishing rod" verticals for 40/20/17 meters and possibly 15 meters. QSL both operations via Tim, M0URX, direct, by the Bureau or LoTW.

QSL INFO AND NEWS.....

DON'T QSL VIA THE 3RD U.S. BUREAU (More!). Fred Laun, K3ZO, Manager NCDXA/ARRL Third U.S. Call Area QSL Bureau, reports that the following "should not" be QSLed to the 3rd Bureau:
4L2M - K3PD is a Silent Key. QSLs should be sent: Russian stations (via UA9LP); for Ukraine stations (via UT7QF) and everybody else via EA7FTR.
5U5U - W3HNK is NOT the QSL Manager. QSL direct to 5U5U.
6V6U - K3IPK does not wish to receive bureau cards. QSL only direct.
6W/K3IPK - K3IPK does not wish to receive bureau cards. QSL only direct.
7P8SR - NY3N is a Silent Key, but his XYL Nonie requests that all cards be sent direct with "sufficient return postage". QSL cards should be sent to: Nonie Shankweiler, 16522 Rainbow Lake Road, Houston, TX 77095, United States.
9Y4VU - W3EVW is a Silent Key. QSL via direct to 9Y4VU.
AO3K - NOT an ITU USA assigned callsign (USA ITU block is AA-AL). QSL via EA3GHZ.
CO6XN - N3ZOM is the QSL Manager, but does NOT accept Bureau QSL.
CT9M - W3HNK is NOT the QSL Manager. QSL Manager is CT3EE.
DU9RG - W3HNK is NOT the QSL Manager. DU9RG has detailed QSL instructions on his QRZ.com listing.
EA9EU - W3HNK is NOT the QSL Manager. The QSL Manager is EA5KB.
EX2T - W3HNK is NOT the QSL Manager. EX2T handles his own cards.
EX9A - W3HNK is NOT the QSL Manager. QSL via UA3DPX, direct or via the Russian Bureau. Others have reported success -- with some delay -- from DF8WS.
FM1HN - K3PD is a Silent Key, the new QSL Manager is NI5DX.
FM5WE - K3PD is a Silent Key, the new QSL Manager is K4FJ.
KB3LTB/KH2 - The real home callsign for this license is JH1MPQ.
KH2/N3MU - The real home callsign of the license is JA3CEK.
KH2/KI3DNN - The real home callsign of the licensee is JI3DNN.
KH2/K3UY - The Manager for KH2/K3UY is UA3DX.
KH8/K3UY. The QSL Manager is RA3AUU.
KH8/NS3A - NS3A is the USA callsign of YU3AA (ex-YZ7AA).
KP3/NP3/WP3 - This is a reminder that the 3rd Bureau does not handle cards for these stations unless they happen to have a QSL Manager in the USA third call area. Puerto Rico has its own Bureau.
LT0H - K3IRV is NOT the QSL Manager. QSL via EA7FTR.
LY4L - W3HNK is NOT the QSL Manager. QSL direct to LY4L.
N3YS/KH0 - QSL via the real home callsign for N3YS which is JE1SYN.
NP3CW - QSL Manager is EB7DX.
NP3X - W3HNK is NOT the QSL Manager. QSL via EA7FTR.
P33W - W3HNK is NOT the QSL Manager. The Manager is RA3AUU.
SO8A - W3HNK is NOT the QSL Manager. QSL via SP8YB.
TT8PK - W3HNK is NOT the QSL Manager. QSL Manager is F4EGS.
TU2XZ - N3SL is NOT the QSL Manager. QSL direct.
UT4UO - W3HNK is NOT the QSL Manager. QSL direct to UT4UO.

V26B - WT3Q is NOT the QSL Manager. KA2AEV has been acting as
V26B QSL Manager for a while, but he has now also informed
the W2 Bureau that he does not want V26B bureau cards.
VU2NKS - W3HNK is NOT the QSL Manager for VU2NKS. QSL direct or LoTW.
WH2V - QSL Manager is JF2VFN.
WK3D/AH0 - Cards should go to JF2MBF, the licensee's real home callsign.
WP3F - WP3F has changed his callsign to KP4EE. QSL Manager is
OK1DOT.
XE1V - W3HNK is NOT the QSL Manager. XE1V handles his own cards, but
his QRZ.com page says "no QSLs via Bureau."
XW1B - W3HNK is NOT the QSL Manager. The QSL Manager is E21EIC.
YO2LEA - K3PD is a Silent Key. YO2LEA handles his own cards.
Z31VJ - N3SL and W3HC are not the QSL Managers. QSL Z31VJ via direct
or the Z3 Bureau.
ZB2/AA3SN - The real home call of the license is G4KLF.
ZP5AZL - W3HNK is NOT the QSL Manager. ZP5AZL handles his own cards.
QSL direct or via the Paraguayan RCP Bureau.
ZS6C - K3PD is a Silent Key. ZS6C handles his own cards.

Fred states that for the QSLs which were received, the only recourse
(for most cards) are to forward such cards to their following perspective
QSL Bureau.

PIRATE ALERT! Colin, G3PSM, reports: "An email just received from the
Secretary General of the Nigerian Amateur Radio Society states that
5N/LZ1QK is not licenced in accordance with the Nigerian Telecommunica-
tions Act of 2006 and is therefore a pirate. Incidentally it is mandatory
in Nigeria to join the National Society before you can obtain a licence!"

FS/WW5L & PJ7/WW5L QSL STATUS. Tom, WW5L, reports: "All cards received
so far for FS/WW5L and PJ7/WW5L, part of the 'Buddies in the Caribbean'
DXpedition have been answered (before the postage rate increase). This
includes both stateside and DX Airmail cards. To those who failed to
enclose even an SAE, your postage and an envelope was paid for by
generous 1-5 USDs donations by your fellow hams who enclosed SASEs. I
wish to express my thanks to the many who included more than just an
SASE it was greatly appreciated. Sorry about the delay in getting the
cards out, but my HP laptop (that had gone with me to 7P8 and C91 in
2003 and 2006) power supply finally gave up the ghost, but a nearby
computer repair facility WAS able to at least transfer the HD to a
portable hard drive and save the logs. Also thanks to Ed Longhi, W5VP,
of Datamatrix developer and distributor of Prolog 2K, my logging program
for the time on the phone he gave me in retrieving everything off the
external hard drive. I know I can ask some really dumb questions. Ed,
your assistance with my phone calls for help all in one afternoon
I'm sure were frustrating. But it's nice to see a software developer
take the time to walk klutzes like me through the retrieval and printing
of everyone's QSL label."

QSL OR5EU via the UBA Bureau or direct to: E.C.A.R.C., Avenue Hebron 91,
B-1950 Kraainem, BELGIUM. Activity was by the European Union Amateur

Radio Club in Brussels on May 9th, to celebrate Europe Day (or "Schuman Day"). This date is the remembering of the Schuman Declaration of May 9th, 1950. More details at URL http://europa.eu/abc/symbols/9-may/euday_en.htm

TA7KI QSL INFO: For the 2009 A.R.I. International DX Contest (May 2-3rd, 2009), operator was TA3J/7. QSL Manager is TA3YJ. You can see the TA7KI log on: http://dx.qsl.net/cgi-bin/logform.cgi?ta7ki
QSL direct cards [only SASE and 1 IRC with your QSL card, no green stamps please] or by the bureau. SWL QSL cards are OK. No eQSL. The TA3YJ QSL Service is at: http://www.aydogmus.gen.tr/ta3yj/qslservice.htm

YB0DPO & YB0ECT QSL STATUS. Mike, K3AIR, reports: "This morning (May 9th) I mailed out several hundred QSLs for the two YB0 stations I manage, YB0DPO and YB0ECT. If you've been waiting for a card, you should receive it in the next few days to week, depending on your local mail service. All direct requests received through yesterday (May 8th, 2009) have been answered. Bureau mailings to follow shortly. I apologize for the delays in getting some of these out. Work and family obligations have for the most part kept me off the air for the last two years and left little time for ham radio related activity. Hopefully that is now changing."

QSLS VIA LOTW: 5K0T, LQ7D (2002-2008), LW9DA (1996-2007), V31A (1990/1991), V31DX (1990-1991), VK9GMW, VK0HM (1969-1970), VQ9CQ (10/90-04/91), VQ9HB (12/89-05/90), VQ9SS (1991), VS6DX (1979-1989) and XX9DX (1983-1990)
ADDED NOTE: TL0A was listed last week which was an error.

QSLS RECEIVED VIA MAIL: 4K0CW, 5U7JB, 5V7BR, A7/M0FGA, AH0BT, CE1KR, CE8SFG, CO6XN, ER4DX, FK/JK1FNL, FM/KL7WA, FS/W3FF, HP3TA, J88DR, JA1XGI/VK9X, JT1CO, K5D, OH0R, OM8A, PY0FF, PZ5TT, T88NF, VP8DLQ, VP9KF, YI9KT and YS4M

QSLS RECEIVED VIA THE BUREAU: 9U0A, AN0EB, CU2DX, DL1CC, DR1A, E7/OE1EMS, E77DX, EE1TR, EH6R, ER1BF, ER1DA, ER1OA, ER2ID, ER3KS, ER3R, ER4DX, ER5DX, ER570C, ER7HQ, ER9V, ER0WW, EV1R, GI2BX, HB0/DK9TN, IA5IG, IM0/IK0FMB, IR3P, IV3SKB, JD1BMM, JE1LET, K5RC, LA/OE9ICI, LA1ONA, LA2008TSR, LY3X, LY4Y, LY600W, LY775W, MD0CCE, OH0/PA3BAG, OY/LA9SN, OY9OY, RT6A, RW1ZW/1, RW3SY, S57AL, SM6BGG, SV0JD/SV8, TF/LA9SN, TM0GP, UT7QF, VC3O, VE7WY, VO1MX, VP8YLH, W1UE, XU7ADE and YN2BQ

SILENT KEY. Albert L. "Lee" Bergren, W0AR, became a Silent Key "SK" at the age of 93 on May 1st. Lee was an accomplished electronics engineer, author, designer and advisor with special accomplishments in the field of antenna and radio amplifier design. He was co-founder of Radio Industries of Kansas City. He was inducted into the National DX Hall of Fame in 2002. Lee developed the multi-element cubical quad antenna and published his results in a seminal article in QST Magazine in 1963. Lee was an advisor and mentor to young engineers and radio enthusiasts and was co-founding member of the Kansas City DX Club, the Mid-Continent Chapter 35 of QCWA, and was a Life Member of the American Radio Relay League. OPDX and its readers would like to send out our deepest sympathy to the family and

friends of W0AR.

SOLAR CYCLE 24 TO PEAK IN MAY 2013. An international panel of experts led by NOAA's Space Weather Prediction Center reports Solar Cycle 24 will peak in May 2013 with 90 sunspots per day, averaged over a month. Excerpts from a report NOAA press release states, "If the prediction proves true, Solar Cycle 24 will be the weakest cycle since number 16, which peaked at 78 daily sunspots in 1928, and ninth weakest since the 1750s, when numbered cycles began.....The panel also predicted that the lowest sunspot number between cycles-or solar minimum-occurred in December 2008, marking the end of Cycle 23 and the start of Cycle 24. If the December prediction holds up, at 12 years and seven months Solar Cycle 23 will be the longest since 1823 and the third longest since 1755. Solar cycles span 11 years on average, from minimum to minimum." Read this interesting report at: http://www.spaceweather.com/headlines/y2009/08may_noaaprediction.htm?PHPSESSID=9c1qmjl4b4mfl0v00d2pvm1od5

SU8, EGYPT (LH Op). Said, SU1SK, and several other SU operators will be active as SU8LH from the first Egyptian Lighthouse DXpedition on Ras El-Bar Island in the Dumyat zone in northern Egypt between August 1-9th. Look for SU8LH to participate in the special event ILLW International Lighthouse-Lightship Week. Activity will be on the HF bands, as well as 6 meters, SSB and CW modes. QSL via SU1SK. Look for updates to be posted at: http://www.qsl.net/su1sk/Links.html

TK, CORSICA. YL Eva/HA3FRE and Tomi/HA4DX will be in Corsica between May 16-23rd with a Hungarian tourist group. They will be active during the evening hours and nights. The QTH will be Ersa, near Tollari, Cape Corse (IOTA: EU-014, MIA: MCO-001, QRA: JN43QA). They will signing TK/homecall. Activity will be on 40 and 30 meters, CW mostly. QSL via their home callsigns, direct or by the HA Bureau.

VK7, AUSTRALIA. Chris, G0WFH, will be active as VK7ACG from Tasmania between October 19th and November 17th. Activity will be mainly on SSB and the lower frequencies. Chris states that he will use a 60 ft. vertical for 160/80/40 meters, a beam for 20/15/10 meters and an Inverted V dipole for 17/12 meters. QSL via his home callsign, direct or by the Bureau, and eQSL is also "OK".

VK9N, NORFOLK ISLANDS (OC-005). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) will be active as VK9AAA between July 22-29th. The HARAOA Group plans to have 3-4 stations on the air, and plan to be active on 160-6 meters using CW, SSB and RTTY. They plan to take part in the RSGB IOTA Contest (July 25-26th) during their stay. Equipment to be used are ICOM radios into Spiderbeams, verticals and dipoles. Current operators mentioned are: Tommy/VK2IR (Team Leader), Chris/VK3FY (Co-Leader), Peter/VK3FGRC (Team Member/Webmaster) and Keith/VK3FT (Team Member). QSL via W3HNK. More details and updates are available at: http://vk9aaa.blogspot.com

WRTC-2010 ANNOUNCED. Some details of the 2010 World Radiosport Team Championship (the Olympic's of contesting) were released this past week. The WRTC-2010 will take place near the Russian capital of Moscow between July 8-12th, 2010. There will be 50 teams to compete from all over the world. All competitors will be located in the same geographical area within 40 x 30 km where height differences are not bigger than 40 meters. All competitor locations will be separated at least 500 m from each other. The event will be hosted by the "Soyuz Radioljubiteley Rossii" - Russian National Amateur Radio Society. For more details, visit the WRTC-2010 Web page at: http://www.wrtc2010.ru

XL/XM/XN/XO, CANADA (Special Prefixes). The following prefixes are being used by Canadians until the end of May: VE=XM, VA=XL, VO=XN and VY=XO. The special prefixes are for celebrating the 50th anniversary of the opening of the St. Lawrence Seaway. Look for Paul, VE9NC, to operate as XM9NC on digital and SSB modes on 20, 40 and 80 meters. QSL is via VE9NC. XM3NOO is also actively using the special prefix. QSL via VE3NOO. ADDED NOTE: In February and March of 2010, Canadians will use VX=VE, VG=VA, XK=VY and XJ=VO. These special prefixes will be used to promote the 2010 Winter Olympics Games in Canada.

YM3, TURKEY. Yasar, TA3D, will be active as YM3D during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band entry. QSL via TA3D.

ZK2, NIUE (Update/OC-040). Chris, ZL1CT (GM3WOJ), will be active as ZK2V as early 0700z, May 17th through June 20th. He is already traveling north in ZL in preparation for departure next week. If the weather cooperates, he will land in Niue on Saturday afternoon, May 16th - which is early Sunday UTC. He states that this 5 week DXpedition is not a "Holiday DXpedition" but it aims to give as many stations their first QSO with ZK2 as possible. This is the cyclone season, so operation may be interrupted by electrical storms. Resources are limited, so activity will be mainly on 80/40/20/15 meters using CW and SSB, with some 30/17/12 meter activity and RTTY. Planned operations include entries in the 2009 ARRL CW and Phone Contests. He is told that he will have Internet access from his QTH. If so, his plans are to upload logs to LoTW on a daily or every other day basis. More details and Chris's online logs will be available on his DXpedition's Web page at: http://www.zk2v.com
A photo QSL is planned and obviously will come after the completion of the DXpedition, so please be patient. QSL via N3SL. Donations will be greatly appreciated.

1994. SPECIAL NOTICE: No Newsline Prefeed Script or Audio This Week For Newscast 1657

Newsgroup: rec.radio.amateur.misc
Date: 2009-05-13 05:44:17 UTC
From: "William M. Pasternak" <newsline@ix.netcom.com>
Message-ID: <5.2.0.9.2.20090512223044.02e6e708@popd.ix.netcom.com>
Source record: 6608
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

Hello,

Because of our travel to the Dayton Hamvention there will be no prefeed to you of this weeks upcoming newscast #1657.

Don Wilbanks, AE5DW, is producing and will be posting it to our website http://www.arnewsline.org sometime late Thursday and you are welcome to download the files from there. Don does not have this distribution list as it exists only on my PC and a backup flash drive.

I will do a feed to this list when I return late Sunday night (actually early Monday Morning May 18th.)

Note: If you do decide to download the files from our website, please wait until you see the newscast number 1657 at the top of our home page.

RE: Dayton: We will be hosting the Ham Radio Town Meeting beginning at 11:45 a.m. EDT in Meeting Room 2 at the Hara Arena. Hope to see some of you in Dayton at Hamvention 2009.

73 de Bill Pasternak, WA6ITF Editor, etc. ARNewsline, Inc.

1995. Time to write Congress... HR2160

Newsgroup: rec.radio.amateur.misc
Date: 2009-05-13 13:03:49 UTC
From: ARRL NE Section <memberlist@www.arrl.org>
Message-ID: <20090513125003.6555030491@www.arrl.org>
Source record: 6609
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

HR 2160 is important legislation for Amateur Radio. It is proposed: To promote and encourage the valuable public service, disaster relief, and emergency communications provided on a volunteer basis by licensees of the Federal Communications Commission in the Amateur Radio Service, by undertaking a study of the uses of amateur radio for emergency and disaster relief communications, by identifying unnecessary or unreasonable impediments to the deployment of Amateur Radio emergency and disaster relief communications, and by making recommendations for relief of such unreasonable restrictions so as to expand the uses of amateur radio communications in Homeland Security planning and response.

ARRL Seeks Member Support for HR 2160

To support HR 2160 -- The Amateur Radio Emergency Communications Enhancement Act of 2009 -- the ARRL is asking its membership to contact their members of the US House of Representatives with a request to become co-sponsors of this significant piece of legislation.

"Getting a bill successfully through Congress is a formidable task -- one that is going to require the involvement of every ARRL member," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "Working with our Washington consulting firm Chwat & Co, we are laying a dynamic approach that will allow us to make our case most effectively. We have developed a strategy to maximize our impact when dealing with each member of Congress."

Since the anthrax scare that followed the 9-11 attacks, all incoming mail to Congress is delayed anywhere from four to six weeks while it is screened. This means using normal US Mail is no longer an effective method of letting Congress hear your voice. While e-mail is convenient, it is not effective, due to the large volume of e-mail that each Congressional office receives.

"To ensure that ARRL members' letters are quickly and expediently received by Congress, our strategy is to ask ARRL members send their letters directly to Chwat & Co," said Henderson. "Chwat's staff will sort the letters by Congressional district and hand-deliver them to the appropriate House offices, providing a direct point of contact with the Congressman and their staff. This personal contact gives us the chance to provide not only letters from constituents, but information from the ARRL on why this legislation is important."

The ARRL has provided a sample letter for League members to personalize and send to their Congressional representative. "Personalized letters

make a better impression than a standard form letter or petition," Henderson explained. You can find the name and address for your Congressman on the ARRL Members Only Web page.

Once personalized, ARRL members should send their letter to Chwat & Co using one of three methods:

As a signed attachment to an e-mail

As a signed fax to 703-684-7594

As a regular letter to:

John Chwat,

Chwat & Co

625 Slaters Lane

Suite 103

Alexandria, VA 22314.

If you choose to e-mail your letter, please send it as an attachment to the e-mail instead of it being the text of the e-mail. This allows the letter to be easily printed and delivered. Should you decide to draft your own letter supporting HR 2160 instead of editing the sample, Henderson asked that you please remember a couple of things:

- Identify the bill by number and title: HR 2160 -- The Amateur Radio Emergency Communications Enhancement Act of 2009

- Keep the letter brief and on topic -- one page at the most

- Ask them to consider becoming a cosponsor

- Thank them for their consideration

"Simple is better when making this kind of request to a representative," said Henderson. "They and their staff are looking to gauge interest and support for the Bill. A lengthy letter that strays off-topic can detract from the focus of asking for support for the legislation."

Should you decide not to send your letter to Chwat & Co but directly to your Representative, it is still important that you send a copy of your correspondence to Chwat & Co. This allows them to discuss accurately with the Congressman and their staff the amount of support for the bill in each individual district. "There is strength in numbers," Henderson added.

Besides bill sponsor Representative Sheila Jackson-Lee (TX-18), the ARRL is fortunate to already have six additional members of Congress who have signed on as co-sponsors of HR 2160 -- Madeleine Bordallo (Guam), Brett Guthrie (KY-02), Mary Jo Kilroy (OH-15), Zoe Lofgren

(CA-16), Blaine Luetkemeyer, (MO-9) and Bennie Thompson (MS-02).

"We congratulate ARRL Division Director Jim Weaver, K8JE, and his grassroots legislative action team in Kentucky for securing the support of Representative Guthrie -- the first new co-sponsor of the bill," Henderson said. "It shows that our grassroots effort can work!"

You may be asking yourself "What should I do if my Representative has already signed on as a co-sponsor for HR 2160?" The answer is simple: Thank them for their support. If your Congressman is one of those listed as a co-sponsor, please send them a letter thanking them for their support. Use the same contact information for Chwat & Co. "It is important to convey your appreciation to your Representative when they sign on as a co-sponsor or support the bill," Henderson explained. "That simple 'thank you' may help open the door the next time their help is needed."

Once you have prepared and sent your letter supporting HR 2160, your job is not over: Feedback is an important part of the process. "What your Congressman has to say in regards to your contact can provide the ARRL with important information as we try to push our bill forward," Henderson noted. "This feedback can possibly help us identify potential new support for the bill or a weakness in the legislation we may need to address."

When you receive a response from your Congressman, please forward a copy to the Regulatory Information Office at ARRL Headquarters via e-mail or hard copy to Regulatory Information, ARRL, 225 Main St, Newington, CT 06111.

"HR 2160 presents the Amateur Radio Service with a unique opportunity -- but also carries with it the important responsibility of making your voice heard," Henderson summarized. "HR 2160 stands as the first step in trying to address the long standing problem of extending the protections afforded Amateur Radio operators under PRB-1 to deed restrictions and covenants. To be clear, passing HR 2160 is not going to achieve that goal right away. But it will help lay the ground work by assessing the impact such restrictions have on our ability to train for and respond to disasters and other emergencies."

Your consideration and support are solicited.

Thanks!

Art

said
ARRL Regulatory Information Manager Dan Henderson, N1ND. "Working with our Washington consulting firm Chwat & Co, we are laying a dynamic approach that will allow us to make our case most effectively. We have developed a strategy to maximize our impact when dealing with each member of Congress."

Since the anthrax scare that followed the 9/11 attacks, all incoming mail to Congress is delayed anywhere from four to six weeks while it is screened. This means using normal US Mail is no longer an effective method of letting Congress hear your voice. While e-mail is convenient, it is also not effective, due to the large volume of e-mail that each Congressional office receives.

"To ensure that ARRL members' letters are quickly and expediently received by Congress, our strategy is to ask ARRL members send their letters directly to Chwat & Co," said Henderson. "Chwat's staff will sort the letters by Congressional district and hand-deliver them to the appropriate House offices, providing a direct point of contact with the Congressman and their staff. This personal contact gives us the chance to provide not only letters from constituents, but information from the ARRL on why this legislation is important."

The ARRL has provided a sample letter for League members to personalize and send to their Congressional representative <http://www.arrl.org/news/files/DearMemberOfCongressHR2160.doc>. "Personalized letters make a better impression than a standard form letter or petition," Henderson explained. You can find the name and address for your member of Congress on the ARRL Members Only Web page <http://www.arrl.org/members-only/>.

Once it has been personalized, ARRL members should send their letter to Chwat & Co using one of three methods:
* As a signed attachment to an e-mail <arrl@chwatco.com>
* As a signed fax to 703-684-7594
* As a regular letter to John Chwat, Chwat & Co, 625 Slaters Ln, Suite 103, Alexandria, VA 22314

If you choose to e-mail your letter, please send it as an attachment to the e-mail instead of having it be the text of the e-mail. This allows the letter to be easily printed and delivered. Should you decide to draft your own letter supporting HR 2160 instead of editing the sample, Henderson asked that you please remember a couple of things:
* Identify the bill by number and title: HR 2160 -- The Amateur Radio Emergency Communications Enhancement Act of 2009
* Keep the letter brief and on topic -- one page at the most
* Ask your congressional representative to consider becoming a cosponsor
* Thank them for their consideration

"Simple is better when making this kind of request to a representative,"

said Henderson. "They and their staff are looking to gauge interest and support for the bill. A lengthy letter that strays off-topic can detract
from the focus of asking for support for the legislation."

Should you decide not to send your letter to Chwat & Co but directly to your Representative, it is still important to send a copy of your correspondence to Chwat & Co. This allows Chwat to discuss accurately with the Congressman and their staff the amount of support for the bill in each individual district. "There is strength in numbers," Henderson added.

Aside from bill sponsor Representative Sheila Jackson-Lee (TX-18), the ARRL is fortunate to already have six additional members of Congress who
have signed on as co-sponsors of HR 2160 -- Madeleine Bordallo (Guam), Brett Guthrie (KY-2), Mary Jo Kilroy (OH-15), Zoe Lofgren (CA-16), Blaine Luetkemeyer, (MO-9) and Bennie Thompson (MS-2).

"We congratulate ARRL Great Lakes Division Director Jim Weaver, K8JE, and his grassroots legislative action team in Kentucky for securing the support of Representative Guthrie -- the first new co-sponsor of the bill," Henderson said. "It shows that our grassroots effort can work!"

You may be asking yourself "What should I do if my Representative has already signed on as a co-sponsor for HR 2160?" The answer is simple: Thank them for their support. If your Congressman is one of those listed
as a co-sponsor, please send them a letter thanking them for their support. Use the same contact information for Chwat & Co. "It is important to convey your appreciation to your Representative when they sign on as a co-sponsor or support the bill," Henderson explained. "That
simple 'thank you' may help open the door the next time their help is needed."

Once you have prepared and sent your letter supporting HR 2160, your job
is not over: Feedback is an important part of the process. "What your Congressman has to say in regards to your contact can provide the ARRL with important information as we try to push our bill forward," Henderson noted. "This feedback can possibly help us identify potential new support for the bill or a weakness in the legislation we may need to
address."

When you receive a response from your Congressman, please forward a copy
to the Regulatory Information Office at ARRL Headquarters via e-mail <reginfo@arrl.org> or hard copy to Regulatory Information, ARRL, 225 Main St, Newington, CT 06111.

"HR 2160 presents the Amateur Radio Service with a unique opportunity
--
but also carries with it the important responsibility of making your
voice heard," Henderson summarized. "HR 2160 stands as the first step
in
trying to address the long standing problem of extending the
protections
afforded Amateur Radio operators under PRB-1 to deed restrictions and
covenants
<http://www.arrl.org/FandES/field/regulations/PRB-1_Pkg/prb-1.pdf>. To
be clear, passing HR 2160 is not going to achieve that goal right away.
But it will help lay the ground work by assessing the impact such
restrictions have on our ability to train for and respond to disasters
and other emergencies."

==> FCC RESUMES ENFORCEMENT ACTIONS

On May 13, the FCC posted the first list of enforcement actions
<http://www.fcc.gov/eb/AmateurActions/Welcome.html> since Laura Smith
took over as FCC Special Counsel. The 11 RFI-related letters to energy
providers were sent between February 18 and April 1, 2009, and the 7
warning letters to individuals were sent between February 18 and March
30, 2009.

==> SCIENTISTS PREDICT SOLAR CYCLE 24 TO PEAK IN 2013

At the annual Space Weather Workshop held in Boulder, Colorado last
month <http://www.swpc.noaa.gov/sww/index.html>, an international panel
of experts led by NOAA's Space Weather Prediction Center (SWPC)
predicted that Solar Cycle 24 will peak in May 2013 with 90 sunspots
per
day on average. If the prediction proves true, Solar Cycle 24 will be
the weakest cycle since Solar Cycle 16, which peaked with 78 daily
sunspots in 1928, and ninth weakest since the 1750s, when numbered
cycles began.

The panel predicted that the lowest sunspot number between cycles --
the
solar minimum -- occurred in December 2008, marking the end of Solar
Cycle 23 and the start of Solar Cycle 24. If December's prediction
holds
up <http://www.arrl.org/news/stories/2008/01/07/100/>, at 12 years and
seven months Solar Cycle 23 will be the longest since 1823 and the
third
longest since 1755. Solar cycles span 11 years on average, from minimum
to minimum.

An unusually long, deep lull in sunspots led the panel to revise its
2007 prediction that the next cycle of solar storms would start in
March
2008 and peak in late 2011 or mid-2012. The persistence of a quiet sun
also led the panel to a consensus that Solar Cycle 24 will be what they
called "moderately weak."

Although the peak is still four years away, a new active period of Earth-threatening solar storms will be the weakest since 1928. Despite the prediction, the scientists said that Earth is still vulnerable to a severe solar storm. Solar storms are eruptions of energy and matter that
escape from the Sun and may head toward Earth, where even a weak storm can damage satellites and power grids, disrupting communications, the electric power supply and GPS. A single strong blast of "solar wind" can
threaten national security, transportation, financial services and other
essential functions.

The most common measure of a solar cycle's intensity is the number of sunspots -- Earth-sized blotches on the sun marking areas of heightened magnetic activity. The more sunspots there are, the more likely it is that solar storms will occur, but a major storm can occur at any time.

"As with hurricanes, whether a cycle is active or weak refers to the number of storms, but everyone needs to remember it only takes one powerful storm to cause huge problems," said NOAA scientist Doug Biesecker, who chaired the panel. "The strongest solar storm on record occurred in 1859 during another below-average cycle." The 1859 storm shorted out telegraph wires, causing fires in North America and Europe and sent readings of Earth's magnetic field soaring. It also produced northern lights so bright that people read newspapers by their light, he
said.

Biesecker cited a recent report by the National Academy of Sciences that
found if a storm that severe occurred today, it could cause $1-2 trillion in damages the first year and require four to 10 years for recovery, compared to the $80-125 billion of damage that resulted from Hurricane Katrina
<http://www.nap.edu/nap-cgi/report.cgi?record_id=12507&type=pdfxsum>.

The Space Weather Prediction Center is part of the National Weather Service and is one of the nine National Centers for Environmental Prediction. It is the nation's official source of space weather alerts, watches and warnings. SWPC provides real-time monitoring and forecasting
of solar and geophysical events that impact satellites, power grids, communications, navigation and many other technological systems.

==> PR-101 COURSE INTRODUCED AT ARRL NATIONAL CONVENTION

The ARRL Public Relations Committee unveiled the new ARRL's PR-101 <http://www.arrl.org/catalog/?item=0133> course today at the 2009 ARRL National Convention at the Dayton Hamvention. The course -- designed to give hams a quick course in public relations activities -- was quickly snapped up by ARRL Section Managers, Public Information Coordinators (PIC) and Public Information Officers (PIO) to bring back to their home

sections.

According to ARRL Media and Public Relations Manager Allen Pitts, W1AGP,
the ARRL Public Relations Committee conducted a formal survey in December 2008 that confirmed what had long been suspected: Almost half of the people acting as PIOs have no training at all; others had "some training" or "very little training." Because of the importance of public
relations to the future of Amateur Radio, Pitts said that the PR Committee felt it needed to do something to raise the level of skills and training of these volunteers.

Using the skills of experts in various aspects of public relations, Pitts, assembled a team to create a basic course that will provide volunteer PIOs with the basic skills and expectations that a PIO needs to know. While remaining a basic level course, PR-101 covers everything from the basic news release to Web sites and video work.

"This course is geared toward PIOs and others interested in Public Relations," Pitts said. "While the course is voluntary, all ARRL PIOs are strongly encouraged to take the course."

Overall goals for the course are:
* To clarify the role of the PIO in the Field Organization.
* To establish a base set of expectations (job description) for a PIO to
fulfill, and peer pressure to do the job well.
* To establish, teach and verify that course graduates have the common basic skill set needed to accomplish expectations set forth in the PIO job description.
* To create a pool of trained PIOs who can be confidently called upon to
represent Amateur Radio in their region during breaking news events.
* To create a spirit of pride in being a trained and active PIO.
* To increase the productivity of PIOs and resultant positive media coverage.

"There is a critical need to offer public relations training that addresses the 21st century media landscape," said ARRL Public Relations Committee Chairman Bill Morine, N2COP. "Since the last revision of the "ARRL PIO Handbook" in the mid 1990s
<http://www.arrl.org/pio/handbook/>, domination of coverage has shifted from newspapers, magazines and broadcast stations to cable, satellite and Internet media outlets. The decentralization of media means there are many more ways and formats from which the public can access information. The PR-101 course will point ARRL PIOs in the direction where they can best take advantage of opportunities in both traditional and emerging media."

The course is available on CD-ROM. People can complete it on their own schedule; when finished, it guides them to the Web for the final exam.

"Participants who successfully complete the exam will be directed to a special area where they can create, print and save a certificate of completion," Pitts said. "It also automatically notifies ARRL staff with
the name and call sign of the graduating student, allowing a list to be kept of PIOs with known skills."

PR-101 course contributors include Bill Morine, N2COP; Don Carlson, KQ6FM; Walt Palmer, W4ALT; Kevin O'Dell, N0IRW; Jim McDonald, KB9LEI; Ted Randall, WB8PUM; Harold Kramer, WJ1B; Jeff Beiermann, WB0M; Brennan Price, N4QX; Pat Mullet, KC8RTW; Mike Langner, K5MGR, and Kent Sievers.

PR-101 <http://www.arrl.org/catalog/?item=0133> is available on the ARRL
Web site for a cost of $19.95.

==> LOOK FOR THE JUNE ISSUE OF QST IN YOUR MAILBOX

The June issue of QST -- our annual Field Day issue -- is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting, the upcoming issue of QST has something for just about everyone.

Go ahead and experience the great outdoors this Field Day, June 27-28. Make your Field Day a success -- have you registered with the Online Field Day Locater Service yet? This great feature allows you to promote your site so others looking for a Field Day site near them can find you!Check it out on the ARRL Field Day Web page <http://www.arrl.org/fieldday>. You might also want to take a look at five tips that will let you get the most out of your Field Day. From logging to safety to fun, make this your best Field Day ever!
Howard "Skip" Teller, KH6TY, says that digital modes aren't only for SSB. He encourages readers to try one on FM in his article "A Sound Card
Interface for FM Transceivers." Check out the article by Alan Bloom, N1AL "A Lightweight Homemade Keyer Paddle," and make some Morse magic with this light and easy-to build paddle. If you're looking to "hear" the stars, why not "Build a Homebrew Radio Telescope" using instructions
by ARRL Education and Technology Program Coordinator Mark Spencer, WA8SME.

June is a great month for radiosport, with both the ARRL June VHF QSO Party and Field Day. While Field Day is more of an operating event than a contest, it is modeled after a contest in that points are earned for making contacts. ARRL Contest Branch Manager Sean Kutzko, KX9X, takes a look at Field Day and points out that the annual event is a great training ground for contesters. In "This Month in Contesting," Kutzko gives pointers on how to maximize fun for both operators and clubs. The results of the 2008 ARRL 160 Meter Contest and the 2008 ARRL November Phone Sweepstakes are in. Did you top your score from last year? How did

your closest rival do? Also, find out about upcoming contests in
Contest
Corral.

QST Assistant Editor Steve Sant Andrea, AG1YK, reviews the ICOM IC-7200
HF and 6 meter transceiver. According to Sant Andrea, "The IC-7200 is a
compact, easy-to-operate HF and 6 meter transceiver that offers many
features for voice, CW and digital mode operating. Rugged,
water-resistant packaging makes it attractive for portable and
emergency
stations." Check out the review on the Micro-Node International
IRLP/EchoLink node, also in the June issue.

Of course, there are the usual columns you expect in the June QST:
Hints
& Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more.
This month also features Amateur Radio World and the ARRL VEC Volunteer
Examiner Honor Roll. Look for your June issue of QST in your mailbox.
QST is the official journal of ARRL, the national association for
Amateur Radio. QST is just one of the many benefits of ARRL membership.
To join or renew your ARRL membership, please see the ARRL Web page
<http://www.arrl.org/join>.

==> ARRL PUBLIC RELATIONS COMMITTEE HONORS PIOS

When the ARRL Public Relations Committee, led by Bill Morine, N2COP,
met
in April 2009, they discussed the recognizing those ARRL Public
Information Officers (PIO) and Public Information Coordinators (PIC)
whose actions are exemplary. From that meeting, The PIO Excellence
Award
came into being. This award is given when the committee believes an
ARRL
PIO has gone above and beyond in ensuring that the role of Amateur
Radio
is explained to media and the public, especially in unanticipated
situations in the field.

"While not of the same level as other PIO awards such as the Leonard or
McGan Awards," said ARRL Media and Public Relations Manager Allen
Pitts,
W1AGP, "these recognitions are a way to say 'thank you' to people who
put in the extra effort to make us all look good in a bad situation."

Public Information Officer Joe Gadus, KD5KTX, of Porter, Texas, was
commended for taking the lead to ensure that the media knew about the
efforts of ARES and local amateurs who helped at Points of Distribution
(PODs) in the Houston area following Hurricane Ike last year
<http://www.arrl.org/news/stories/2008/09/16/10338/?nc=1>. Hams in
Harris County supported at least six PODs who provided communications
between the National Guard units at the PODs and the Harris County
Office of Emergency Management to coordinate the delivery and resupply

of food, water and MREs (meals ready to eat) to the victims of Hurricane
Ike. Most of the participating amateurs were also victims of the storm],
having suffered property losses and power outages.

ARRL Santa Clara Valley Section Public Information Coordinator Bill Moffitt, AE6GS, of San Jose, California, was recognized for reporting to
the Emergency Operations Center in Santa Cruz
<http://www.arrl.org/news/stories/2008/06/18/10166/>. While there, he worked with the Santa Cruz County PIO to clarify the role of Amateur Radio. Volunteers from Santa Cruz ARES provided a vital layer of communications to support firefighters, law enforcement, Red Cross and even animal control during the Martin fire in the hills above Santa Cruz
over Father's Day weekend in 2008. Pitts said that the committee took into account that Moffitt took time away from his job to handle this situation.

Public Information Officer Steve Sanders, KE7JSS, of Hillsboro, Oregon, was praised for taking the lead to ensure that media in the Pacific Northwest knew about the vital role Amateur Radio played in supplying emergency communications
<http://www.arrl.org/news/stories/2007/12/05/100/>. After other forms of
communications were compromised in December 2007 by fierce storms, flooding and mudslides ravaged the area and shut down roads and highways, including Interstate 5. Other infrastructure, such as telephone lines and electricity, were obliterated.

Pitts said that due to the actions of these amateurs, many media outlets
ran stories about the response of Amateur Radio operators in each situation. "The role of the PIO is far more than club newsletters, or even press releases. Being at the right place at the right time, presenting our story to the media, is critical to the future of Amateur Radio. These three hams went above and beyond to ensure that our story was told in a way that was easy to understand in a critical situation."

==> EXPLORE RADIO SCOUTING AT THE 2009 ARRL NATIONAL CONVENTION

Of the many exciting displays in the ARRL EXPO
<http://www.arrl.org/expo> at the 2009 ARRL National Convention at the Dayton Hamvention <http://www.hamvention.org/>, the Scout Radio Outpost is eagerly anticipated by youth and adults alike. According to Brian Walker, K9BKW, Scout Leaders will again be reaching out to ham radio operators to encourage them to provide Amateur Radio opportunities to Boy Scouts back in their home towns. Walker and a team of Scouters will host the Outpost, answering questions and provide amateurs with resources about Radio Scouting.

"Ham Radio has such a huge impact on the quality of a Scouting program. >From bringing Scouts around the world together, to providing event communications and safety, to building a Scout's foundation to become America's future technicians, engineers and scientists. You, the local elmer willing to help out, can really make a difference by getting involved with your local Scout organizations," said Walker, an Eagle Scout, past Scoutmaster, District Commissioner and currently Venturing Crew 272 Advisor (WB9SA).

At the Outpost, amateurs can learn how to teach the Radio merit badge <http://www.scouting.org/boyscouts/advancementandawards/meritbadges/mb-R
ADO.aspx> and help their local Scouts participate in Scouting's largest annual event, the Jamboree on the Air (JOTA) <http://www.arrl.org/scouts/jota/>. "Each October, more than half a million Scouts around the world talk to each other via Amateur Radio," Walker said. "We will show hams Tips on how they can let Scouts in their
hometowns participate in this exciting on-the-air event."

Matthew Murphy, KC8BEW, of BSA's Muskingum Valley Council said that hams
visiting the Outpost can also learn about a new program being developed for 2010's 100th birthday of the Boy Scouts of America: "Scout Camps on the Air (SCOTA) promises to be a fun way for hams to help encourage Amateur Radio operations at Scout camps and other large Scouting events.
Murphy is coordinating the SCOTA program <http://kc8bew.net/scota.html>.

Walker said that last year's Radio Scouting booth was well received. "Scouts and Scouters from around the world stopped by to share experiences and exchange ideas," he said. "Ham Scouters involved in the 2008 effort are excited to be sharing space with the ARRL and are hoping
to make this year's activity an even greater success. So stop by the ARRL display area and visit the Scout Radio outpost to learn how you can
help interested Scouts to become the next generation of hams."

==>NATIONAL HUURICANE CENTER's WX4NHC SETS ON-THE-AIR STATION TEST

The annual WX4NHC On-the-Air Station Test from the National Hurricane Center (NHC) in Miami will take place Saturday, May 30, from 1300-2100 UTC. "The purpose of this annual Station Test is to test all of our radio equipment, computers and antennas using as many modes and frequencies as possible. This is not a contest or simulated hurricane exercise. New equipment and software will be tested, and we will also conduct some operator training," said WX4NHC Assistant Amateur Radio Volunteer Coordinator Julio Ripoll, WD4R.

Ripoll said that WX4NHC also will be testing new computers and software,

as well as conducting operator training. "NHC Director Bill Read, KB5FYA, will be at WX4NHC, making contacts," he said. WX4NHC will be on the air on HF, VHF and UHF, plus 2 and 30 meter APRS. Suggested SSB frequencies are 3.950, 7.268, 14.325, 21.325 and 28.525 MHz, +/-QRM; WX4NHC reports that they will mostly be on 14.325 MHz and will make announcements when they change frequencies. WX4NHC also will be on the VoIP Hurricane Net 1700-1900 UTC (IRLP node 9219/EchoLink WX-TALK Conference) and on South Florida area VHF/UHF repeaters and simplex; APRS and e-mail will also be monitored.

Stations working WX4NHC exchange call sign, signal report, location and name plus a brief weather report, such as "sunny," "rain" or "cloudy." Non-hams may submit their actual weather using the On-Line Hurricane Report Form. QSL to WD4R and include a self-addressed, stamped envelope.
Do not send cards to the NHC. Due to security measures, no visitors will
be allowed at NHC during the test.

==>SOLAR UPDATE

Tad "The new leaves laugh in the Sun" Cook, K7RA, this week reports: After weeks of little or no sunspots, it is nice to have something to report. Following multiple false starts, quick-fading spots and knots of
magnetic activity which never progressed into actual darkened sunspots, new sunspot group 1017 emerged on Wednesday, May 13. The daily sunspot number was 12, and the next day the size of the group approximately doubled, raising the sunspot number to 18. This is a Cycle 24 sunspot group. Sunspot numbers for May 7 through 13 were 0, 0, 0, 0, 0, 0, and 12 with a mean of 1.7. 10.7 cm flux was 69.5, 70.8, 72.3, 71.8, 71.9, 73.9, and 73.8 with a mean of 72. Estimated planetary A indices were 10,
13, 6, 4, 4, 2 and 3 with a mean of 6. Estimated mid-latitude A indices were 7, 12, 6, 3, 2, 0 and 2 with a mean of 4.6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page
<http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought
to you by Sara Teasdale's "May"
<http://www.poetry.com/LovePoems/lovepoem.asp?id=206>.

==>IN BRIEF:

* This Week on the Radio: This week, the Feld Hell Sprint is on May 16. The EU PSK DX Contest, His Majesty King of Spain Contest (CW) and the Manchester Mineira All America CW Contest are May 16-17. The Run for the

Bacon QRP Contest is May 18 and the NAQCC Straight Key/Bug Sprint and QRP Minimal Art Session are May 21. Next week is the NCCC Sprint on May 22. The MI QRP Memorial Day CW Sprint is May 25-May 26 and the SKCC Sprint is May 27. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Station Web page
<http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, May 24, 2009, for these online course sessions beginning on Friday, June 5, 2009: Amateur Radio Emergency Communications Level 1; Radio Frequency Interference; Antenna Design and
Construction; Ham Radio (Technician) License Course; Analog Electronics,
and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct
communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for
their personal schedule. Mentors assist students by answering questions,
reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is
no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page
<http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* No ARRL Audio News on May 15: Due to staff attendance at the ARRL National Convention and Dayton Hamvention, there will be no ARRL Audio News on May 15. ARRL Audio News will resume regular distribution on May 22.

* Former Kentucky Section Manager Dave Vest, KZ4G (SK): Former Kentucky Section Manager Dave Vest, KZ4G, of Ashland, passed away April 27, 2009.
He was 75. Vest served as Section Communications Manager/Section Manager
from April 1981-March 1983. He also served as the first ARRL Section Traffic Manager in Kentucky prior to serving as Section Manager.

According to current Kentucky Section Manager Jim Brooks, KY4Z, Vest supported numerous Amateur Radio groups in the Kentucky-Virginia-West Virginia area. He was a past president of the River Cities Amateur Radio
Association and the Tri-State Amateur Radio Association and a founding member of the Bluegrass Chapter of the Quarter Century Wireless Association. "Dave promoted Amateur Radio throughout his life and elmered countless newcomers into the hobby," Brooks said.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast"
compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!): letter-dlvy@arrl.org
==>Editorial questions or comments: S. Khrystyne Keane, K1SFA, k1sfa@arrl.org

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective.

(NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will
be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net
<http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Amateur Radio Newsline(tm) Report 1657 - May 15 2009

The following is a closed circuit advisory. Ladies and gentlemen here's Amateur Radio Newsline Support Fund Administrator Andy Jarema, N6TCQ.

--

The great thing about Amateur Radio is that your level of involvement can be anything you choose- you can be an avid DX'er or just a casual repeater user. Run your fingers to the bone on packet or RTTY, be heavily involved with emergency work, or not even get on the air for a while. The hobby will still be there.

That's why we, the volunteer staff at Amateur Radio Newsline, love what we do- it's ever changing, ever evolving. Unfortunately, the realities of bringing you these weekly newscasts don't change that much.

We've done our best to try to shave down the fixed expenses- what it costs for internet service, how we can best use a combination of land- and wireless-based phone services, to hold these to a minimum. We've even done away with tape in our newsgathering and editing- everything's software and solid-state.

My backup solution to try would be to instruct our Producer, Bill Pasternak, WA6ITF, to only report on the news that automatically comes into our news bureau, as other news services do. But that defeats why it is that so many of you tell us that you love our service- that we bring you the voices of the newsmakers, and those special stories that just don't get reported. That's what makes us unique in Amateur Radio reporting.

Please help us keep these newscasts on the air, doing what we do best. You can contribute via PayPal on our website, arnewsline.org, or at our Arcadia California address given at the end of the newscast. We thank you for your support.

I'm Andy Jarema, N6TCQ, and now on to the news.

--

Thank you Andy. That ends the closed circuit advisory with Amateur Radio Newsline report number 1657 with a release date of Friday, May 15th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams take a break from the rotten economy and head to Hamvention 2009, a NASA research panel says that Solar

Cycle 24 will be low on sunspots, a ham will be the first ever European commander of the International Space Station and find out how to float your tower problems away on this Hamvention weekend Amateur Radio Newsline(tm) report number 1657 coming your way right now.

BREAKING NEWS: HAMVENTION(r) 2009 IS HERE

Motion pictures have the Oscars. Broadway has its Tony awards and Television its Emmys. And for ham radio the big event is Dayton:

--

W8CI: "Its an absolutely fantastic event. It has so many fleas market spaces that it would take you an entire day to go through everything in the Flea Market. And the entire six building complex is completely filled with inside exhibits. We have forums based on all the different types of amateur radio and what a great place to get eyeball to eyeball with people you have not seen all year. So it's a pretty exciting event for amateur radio."

--

That's spokesman Michael Kalter, W8CI, who recently was interviewed by Hap Holly, KC9RP, of RAIN regarding what to expect at this years Dayton Hamvention. And as the doors of the Hara Arena open on Friday, May 15th, upward of 25,000 hams from around the world are expected to be there for what's become known as the Show of Shows in amateur radio. And why not. This year Dayton offers just about everything, especially if only you are a ham who is willing to dream digital. Again, Michael Kalter, W8CI:

--

W8CI: "Our theme is DREAM. That stands for 'Digital Radio Enabling Amateurs to do More.' So the focus this year in our forums will be more on digital forms of communications.

"We are excited about that. We think that part of amateur radio is continuing to grow and become more interesting. We have a lot of people within the amateur radio community who are involved in it."

--

And how is the nations faltering economy affecting ham radio? Kalter says that the forces that have caused banks to fail and at least one auto maker to go under have not affected pre opening sales. In fact, 2009 looks like it could beat out 2008:

--

W8CI: "This year we have more inside exhibitors and Flea Market exhibitors signed up than we did last year. Our ticket sales are stronger than they were last year and that's always a concern, especially when you hear all the doom and gloom about the economy. But we are truly pleased that people are going to come and we want to put on a great show for them."

--

Hamvention 2009 closes on Sunday, May 17th. We will have a complete roundup of all the highlights on next weeks Amateur Radio Newsline report. (ARNewsline(tm) with audio supplied by RAIN)

**

FUTURE PROPAGATION: EXPERT PANEL EXPECTS WEAK SOLAR CYCLE 24

An international panel of experts led by NOAA's Space Weather Prediction Center anticipates that a new active period of solar storms reaching Earth will be the weakest since 1928 and its peak is still four years away. This, after a very slow start to Solar Cycle 24 last December.

According to a report posted to the VHF Reflector, the panel predicts Cycle 24 will peak in May of 2013 with a daily sunspot number of only 90. If this forecast proves true, Solar Cycle 24 will be the weakest since number 16, which peaked at 78 daily sunspots in 1928. It will also be the ninth weakest since the 1750s, when counting the numbered cycles began.

But that's not all. The panel also believes that the lowest sunspot number between cycles occurred in December 2008. It says that period marked the end of Cycle 23 and the start of Cycle 24. If the prediction holds up, at 12 years and seven months Solar Cycle 23 will have been the longest since 1823 and the third longest since 1755. Solar cycles span 11 years on average, from minimum to minimum.

The most common measure of a solar cycle's intensity is the number of Earth-sized blotches on the suns surface. These are the so-called sunspots and they mark areas of heightened magnetic activity. The more sunspots there are, the more likely it is that solar storms will occur.

The persistence of a quiet sun has since led the panel to a consensus that the next cycle will be "moderately weak." As a rule of thumb, fewer sunspots mean a lot less DX for hams to work. NASA funds the prediction panel. (VHF Reflector via K0SQ)

**

HAM RADIO IN SPACE: EUROPEAN HAM TO BECOME ISS COMMANDER

Frank De Winne, ON1DWN, is set to become the first European Space Agency astronaut to oversee the International Space Station.

De Winne is currently at Russia's cosmonaut training center outside of Moscow. He will leave there later this week and fly to neighboring Kazakhstan, where a Soyuz rocket is being prepared to carry him, Russian cosmonaut Roman Romanenko and Canadian Space Agency astronaut Robert Thirsk, VA3CSA, to the orbiting space outpost. That launch is currently scheduled for May 27 .

The arrival of these three space adventurers which will bring the total number of crew on the I-S-S to six for the first time. For the first four months De Winne, who is from Belgium, will be a Flight Engineer as a member of the Expedition 20 Crew. With the next crew rotation ON1DWN will take over as Commander of Expedition 21 and will serve in that position until his return to Earth in November. This will mark the first time that someone other than a Russian or an American has held that post. More is on-line at http://news.bbc.co.uk/1/hi/sci/tech/8037431.stm and at http://www.southgatearc.org/news/november2008/frank_de_winne.htm (Southgate)

**

ENFORCEMENT: UNLICENSED BROADCAST BUST IN WYOMING

An unlicensed broadcaster in Cheyenne, Wyoming, is off the air. This after the FCC issues an order for it to cease and desist operation or face prosecution that could put its operator behind prison bars. Jim Davis, W2JKD, has more:

--

Michael Stugelmayer said agents from the Denver FCC Enforcement Bureau ordered him to turn off his 95.5 MHz FM signal because it was in violation of the agencies rules. Federal agents, acting on an anonymous tip, issued Stugelmayer a "Notice of Violation" for broadcasting without a license. It also said that it took the action because Stugelmayer transmitter was emitting spurious signals that could present a safety hazard to the operation of aircraft in the area.

Stugelmayer told a local newspaper that he started broadcasting in 2003 after growing tired of listening to commercial radio while cruising downtown Cheyenne. He still could face a fine up to $100,000 and spend a year in jail for the violation. The FCC might also place a set-aside on his ham radio license when it comes time to renew in a few weeks on May 26th.

Stugelmayer told the newspaper that the buildings owner gave him permission to erect a waterproof antenna on the rooftop and set up his gear inside an unfinished attic space. If this proves true, then that owner could also face charges for aiding an unlicensed station to operate from his premises.

--

As previously reported, assessing fines from property owners who make space available for unlicensed transmitters is another enforcement tool in the FCC's growing arsenal. This, to take unlicensed broadcasters off the air and make it harder for them ever to return. (Billings Gazette, FCC)

**

RADIO LAW: FCC ADMITS VANITY CALL MISTAKE AND REASSIGNS W9CQ CALL

The FCC has modified the amateur service club station license for the QRQ CW and Contest Group by changing the call sign from W9CQ to KC9MWH and the call of the Falls Amateur Radio Club from K9RHH to W9CQ. This as the agency admits that it made a mistake in the way the call was assigned under the vanity call program. Sound confusing? Here's the back story.

According to an FCC news release when a call sign associated with an amateur service station license that expires, is canceled due to the licensee's death, or is surrendered, revoked, set aside, or voided, is not available to the vanity call sign system for reassignment to another amateur station for two years. Certain licensees, including close relatives of a deceased former holder of the call sign and club station trustees acting with the written consent of such a relative, are exempt from the two-year waiting period.

Paul Kent,W9CQ, died on January 1, 2006, so the call sign was due to become available to the vanity call sign system on January 2, 2008. The application of Robert C. Moldenhauer for call sign W9CQ was granted in 2007 because Moldenhauer stated that he was Kent's in-law. Later that year, the Commission granted an application from Moldenhauer to modify his license to show a different call sign. This resulted in his license for call sign W9CQ being surrendered and canceled. Moldenhauer also informed the Commission's Enforcement Bureau that he had surrendered call sign W9CQ after realizing that he was related to a different Paul Kent and therefore was not eligible for the call sign prior to the end of the two-year waiting period.

Falls, now known as the Wisconsin Amateur Radio Club filed an application for W9CQ on January 2, 2008. It was dismissed by the FCC on the grounds that the call sign was not available because it was less than two years since Moldenhauer had surrendered it. Falls filed a petition for reconsideration, arguing that the call sign should have been made available to the vanity call sign system on January 2, 2008 because Moldenhauer had not been eligible to hold it in the first place.

While the petition was pending, the QRQ group submitted its application to modify its license by changing the call sign from KC9MWH to W9CQ. That action was granted on June 10, 2008 and Falls filed an appeal.

Now after weighing all of the information and evidence before it, the FCC has concluded that it made a mistake in assigning W9CQ to the QRQ CW and Contest Group. The agency says that had the procedures of the vanity call sign system been followed, W9CQ would not have been available when QRQ submitted its application. As such the FCC says that it would be in the public interest to modify the QRQ's amateur station club license by replacing call sign W9CQ with its prior KC9MWH call. It also says that the Falls application should be granted, and call sign W9CQ assigned to it. The FCC adds that it regrets any inconvenience that this error has caused the QRQ CW and Contest Group. (FCC)

**

RADIO LAW: SUPREME COURT SIDES WITH FCC IN CBS WARDROBE MALFUNCTION CASE

The U.S. Supreme Court has ordered a federal appeals court to re-examine its ruling in favor of CBS Corporation in a legal fight over entertainer Janet Jackson's so-called on the air wardrobe malfunction. This, with an eye at having the lower court re-institute a fine against the broadcast entity.

On Monday, May 4th the high court on directed the 3rd U.S. Circuit Court of Appeals in Philadelphia to consider reinstating the $550,000 fine that the Federal Communications Commission imposed on CBS. This over Jackson's breast-baring performance at the 2004 Super Bowl football championship.

Last year, the appeals court threw out the fine against CBS, saying the FCC strayed from its long-held approach of applying identical standards to words and images when reviewing complaints of indecency. The FCC appealed that decision to the Supreme Court.

The order follows the high courts earlier that narrowly upheld the FCC's policy threatening fines against even one-time uses of curse words during live broadcasts. (Published news reports)

**

RESCUE COMMUNICATIONS: WHITE HOUSE TO JOIN SOCIAL NETWORKING SITES

The White House is going broadband and joining the popular social network sites of Facebook, MySpace and Twitter. This, as a part of its campaign to obtain more insight from the citizenry on matters of national urgency like the current swine flu outbreak.

A spokesman says that access to these sites will be added the features to its main Web page, whitehouse.gov. Initially, the materials placid on the social networking sites will contain information about combating swine flu, but they will be updated with information on other topics as

time goes by.

White House New Media Director Macon Phillips explained that the administration will not be able to reply individually to those who send messages via Facebook, MySpace or Twitter. However, people who join these groups can speak to one another, and the White House staff can see what they're saying. (RW)

**

HAM RADIO ON THE NET: QRZ.COM BANS INTERNET TROLLS

The giant QRZ.COM ham radio website has banned Internet trolls from its cyberspace location.

According to Wikipedia.com, an Internet troll, or simply a troll is someone who posts controversial, inflammatory, irrelevant or off-topic messages in an online community. This, with the primary intent of provoking other users into an emotional response or to generally disrupt normal on-topic discussion.

According to QRZ owner Fred Lloyd, AA7BQ, until now the site has dealt with trolling on a case-by-case basis. However Lloyd says that it has become apparent that a concrete policy statement is needed. Therefore, effective immediately, QRZ's policy on trolling will be to ban first time offenders for 90 days, and repeat offenders permanently.

Lloyd notes that an policy of intolerance towards trolling is common in major online communities like MySpace, and others. He then asks rhetorically as to why QRZ should be any different? In his front pager posting he answers by saying that it wont be any different on QRZ. He also advises readers to prepare to say goodbye to a few of what he terms as the wise-guys who have contributed nothing but misery and discord to an otherwise enjoyable web experience. (AA7BQ via QRZ.COM)

**

NAMES IN THE NEWS: TWO FROM UP NORTH

Some names in the news from up North. First is Derek Hay, VE4HAY, who has been appointed as Radio Amateurs of Canada's Midwest Region Director. This, to fill the position left vacant by the resignation of former director Devon Racicot, VE5DWR.

According to RAC President Bob Cooke, VE3BDB, Hay brings a wealth of experience to the directors seat. He will serve in the position until a formal election can be conducted in the region.

Also from Radio Amateurs of Canada President is the announcement that Jim Fisher, VE1JF, had been appointed as Chairman of the Low, Medium and High Frequency Band Planning Committee. Fisher takes over from Bob Nash, VE3KZ, who resigned after holding the position for the last several years. (RAC)

**

NAMES IN THE NEWS: ZS2ACP AND ZS6NK HONORED FOR METEOR SCATTER WORK

Andre Botes, ZS2ACP and Paul Smit, ZS6NK, have been given the prestigious Icom Excellence Award for their work on VHF meteor scatter. The pair is credited with holding the first 4 meter Meteor Scatter contact made outside of Europe as well as setting the meteor scatter record and distance record in South Africa. This is the premier award of the South African Radio League. It 2009 recipients were announced at the society's recently held annual general meeting. (Southgate)

**

RADIO HONORS: ATLANTA HAMFEST MEMORIAL TO HONOR MEMORY W4RU

And a special memorial service celebrating the life of Sandy Donahue, W4RU, will be held in conjunction with the Atlanta Hamfest on Saturday, June 6th.

As reported last week, the 63 year old Donahue who served as ARRL Southeastern Division Vice Director since 2002 passed away in his sleep early on May 4th. He was buried on May 9th in Midland City, Alabama not far from his adopted hometown of Dolthan.

One of the best liked and most respected hams in our lifetime, Donahue was best known for his lifelong commitment to public service through ham radio and promoting the service to anyone who would show even the slightest interest. A ham since he was 15, he also supported many ham radio youth related activities including serving as an unofficial liaison and greater for the Newsline sponsored Young Ham of the Year Award.

W4RU spent most of his life in Atlanta, Georgia, before retiring to Dolthan, Alabama. His many lifelong friends in the Atlanta area wanted their own chance to say a final farewell to him.

For additional information and directions to the memorial and the hamfest please contact Jeff Beals, WA4AW. His e-mail is wa4aw (at) arrl (dot) net. (WA4AW)

**

BREAK 2

Celebrating Hamvention 2009, from the United States of America we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: INSTANT CHARGE BATTERY

Well, you wont find it at Dayton, at least not yet but a new form of battery is being developed with what's being called instant charging. Jeff Clark, K8JAC, reports:

--

Materials researchers at the Massachusetts Institute of Technology have announced that they have developed a new form of LiON battery. One could discharge and recharge in seconds rather than hours.

Gerbrand Ceder is a Professor of Materials Science and Engineering at MIT. Along with his graduate student he discovered a way to build LiON batteries with a performance level more like that of Ultra Capacitors. These are caps that store less energy but can store and release it very quickly.

If commercialized, this new breed of LiON battery would allow future hybrid cars to rapidly recharge. It could also lead to improvements in portable two way radio as well as new consumer and industrial products.

--

It will be some time before a battery like this is available commercially. (Science Daily)

**

THE SOCIAL SCENE: MARYLAND FM ASSN MEMORIAL DAY HAMFEST

Turning to the ham radio social scene, the Maryland F.M. Association will be holding its annual Memorial Day Hamfest on Sunday, May 24th. The venue is the Howard County Fairgrounds, in West Friendship, Maryland from 8am to 1pm with setup beginning at 6am. All times are local Eastern U-S. More is on-line at www.marylandfm.org (WA3MNN)

**

WORLDBEAT: UK HAM TO LEAD DISCUSSION OF 500 kHz PROPOSAL AT ARC 2011

In news from around the world, the Radio Society of Great Britain's President, Colin Thomas, G3PSM, will lead key discussions at the 2011 World Radio Conference. Thomas has been appointed C-E-P-T Lead Coordinator for the 500kHz proposal, which is Agenda Item 1.23, at the conference. His appointment is rather unusual in that agenda item coordinators are normally selected from regulatory agencies or governing administrations. (GB2RS)

**

WORLDBEAT: INDIA SEEKS 40 METER EXTENSION AND PERMANENT FREQS ON 30 AND 6

The Amateur Radio Society of India, on behalf of all of that nations hams has made a formal application to India's Department of Telecommunications for the new 40 Meter band segment to be allocated to

the amateur community. Requests have also been made for permanent allocation of frequencies in the 6 meter and 30 meter bands. These spectrum parcels were previously given to India's ham community on a short term basis, but later withdrawn.

**

WORLDBEAT: MELBOURNE AND PERTH GO DULL TIME DAB+

Commercial radio stations in Melbourne made history on Monday, May 11th. That's when they begin broadcasting the first permanent DAB+ digital radio services on the east coast of Australia.

Joan Warner is the chief executive officer of Commercial Radio Australia the industry body that has driven the move to digital radio. He is quoted as saying that the 11th was another milestone for the industry in Australia following the switch on of DAB+ digital radio in Perth about two weeks ago.

(CRA, WIA)

**

DX

In DX, word that DM2BBN, will be living in Ethiopia for the next years and is operational on 80 through 6 with the exception of 160 or 40 meters. QSL direct to Dr. Peter Haferkorn, PO Box 150194, Addis Ababa, Ethiopia.

And the United Kingdom's Barry Amateur Radio Society will be active as GB-100-BP from Sully, Wales on until May 31st. The special callsign celebrates 100 years of British Petroleum. QSL via GW0ANA.

YS1G will be on the air from El Salvador through May 23rd operating mainly on CW. QSL via G3TXF. The log entries will be electronically uploaded to Logbook to the World.

5H1HP and 5H1MS will be active from Zanzibar Island from May 16th to June 2nd. The pair will operate 2 meter EME and meteor scatter with some additional activity on the HF bands and 6 meters. QSL this operation via DL2NUD and DL9MS respectively.

OT4R, is going to spend his vacation operating portable HI7 from the Dominican Republic. He will be there through May 30th on 20, 15 and 10 meters with a preference for 14 point 300 MHz. QSL as directed by the operator

Lastly, listen out for ZL1CT who will be operating as ZK2V from Niue Island through June 20th. Activity will be mainly on the 80, 40, 20 and 15 meter bands using CW and SSB. There may be some WARC band and RTTY activity as well. QSL via N3SL

**

THAT FINAL ITEM: FLOAT IT AWAY

And finally this week, the story of a tower that needed a new home but no way to get it there. Well no way until a couple of hams came along. Jim Linton, VK3PC, has the rest of the story:

--

An amateur radio tower stood in the backyard of a suburban home long after the resident radio amateur became a silent key. His widow wanted it removed but with house extensions over the years it seemed to be a very expensive proposition indeed.

It could lifted out by a crane that would require the cutting of power lines, permits, insurance and other hassles, or maybe a helicopter was an option. Either way it was going to be far too costly.

Along come a couple of radio amateurs who used their ingenuity to solve the problem. The tower was put on the ground, fitted with brackets on to which were mounted empty 44-gallon drums. Through an opening in the rear fence and then slid into a creek.

Just like Davie Crockett and Daniel Boone the radio amateurs paddled the floating tower downstream to a location accessible by vehicle and loaded it onto a trailer. A win-in situation for the widow who was pleased to see the tower gone and for a ham who acquired it for transplanting in a new location.

For the Amateur Radio Newsline, I'm Jim Linton, VK3PC.

--

The bottom line to all of this? That's simple. When you have a problem that seems insurmountable, simply call on a ham. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2009 Amateur Radio Newsline Young Ham of the Year Award is now open. Complete details are on our website at www.arnewsline.org Just scroll down to the words "2009 YHOTY Nominations Now Open" and click for more information and an official nominating form.

For now, with Bill Pasternak, WA6ITF, at the editors desk from Hamvention 2009, I'm Don Carlson, KQ6FM, saying 73 and we thank you for

listening.

Amateur Radio Newsline(tm) Report 1658 - May 22 2009

--

READERS OF TEXT VERSION ONLY - PLEASE NOTE

As you should be aware, Amateur Radio Newsline is prepared for the "spoken" rather than the "written / printed" word. Because of our on-scene coverage of the 2009 Dayton Hamvention, this weeks newscast is very audio intensive. From experience we know that there is no way that a literal transcript of the words of those we have interviewed can bring to you the emotion in their voices and that of their presentations. (The only direct quotes are those of our reporters and FCC officials on regulatory issues.)

For that reason, we are providing only one-line summaries of what many speakers at Hamvention 2009 had to offer. Instead of just reading this weeks newscast, we urge you to go to our website at www.arnewsline.org, download the mp3 file, sit back and enjoy a vicarious trip to the concluded 2009 Dayton Hamvention. We believe that it will be a far more enjoyable experience than merely scanning across printed words.

Thank you, ARNewsline, Inc.

--

Amateur Radio Newsline report number 1658 with a release date of Friday, May 22nd, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Dayton calls and thousands enjoy the ham holiday weekend. Also, the FCC says the price of a vanity call has to go up, the WB6X tower case in California has a happy ending, a pro amateur radio antenna measure proceeds in Arizona and we all get to meet Laura Smith, the new ham radio rules enforcer at the FCC. All this on an extended four section Amateur Radio Newsline(tm) report number 1658 coming your way right now.

(Billboard Cart Here)

**

Sound: (Gary Johnston, KI4LA, talks about the opening of Hamvention and the bargains he has already found.)

--

That's Gary Johnston, KI4LA, who is not only the ARRL Great Lakes Division Vice Director but also one of thousands of hams from around the world elated at being at Hamvention 2009 as the doors opened at the Hara Arena on Friday, May 15th. And in a reversal from what's usually the case, just about every seasoned observer that we got the chance to interview believed that Hamvention Friday was the best opening day ever and also the best business day of the three day ham radio holiday weekend. Chip Margelli, K7JA of Heil Sound is a longtime attendee at Dayton. We caught up with Chip midday through opening day:

--

Sound: (Chip Margelli, K7JA, describes opening day at the Heil Sound booth.)

--

A similar view was given us by Joe Schroeder, W9JUV. Joe, now with Radio Bookstore is the former editor of the old H-R Report and has seen and reported on many ham radio shows. We spoke to him just before closing of the exhibit hall on Saturday afternoon:

--

Sound: (Joe Schroeder, W9JUV, talks about Friday vs Saturday traffic at the Radio Bookstore booth.)

--

Its no secret that many hams travel to Dayton to see what the big three manufacturers of ham radio gear will be offering for sale and nobody was disappointed. We spoke with representatives of Icom, Kenwood and Vertex Standard Yaesu and let each one extol a bit about their latest goodies:

--

Sound: (Representatives of Icom, Kenwood and Yaesu / Vertex Standard describe the gear that they are featuring this year.)

--

Icom, Kenwood, Vertex Standard Yaesu seemed to have good foot traffic. The same can be said for Ten-Tec and Elecraft which appeared to always have a crowd of people playing with radios and keeping the company representatives peppered with questions. Bob Heil, K9EID, of Heil sound says that business in audio alley was also quite brisk:

--

Sound: (Bob Heil, K9EID, talks about business at his booth.)

--

This years Hamvention also served as the 2009 ARRL National Convention and it also reported good foot traffic through its Expo area. Great

Lakes Division Vice Director Gary Johnson, KI4LA tells us what the League had in place to welcome members and non-members alike:

--

Sound: (Gary Johnston, KI4LA, describes ARRL Expo area.)

--

The ARRL will likely be happy to know that the pundits and bloggers are saying that the League did a very good job with its Expo area this year.

As to the outdoor flea market? What can you say. It's a world unto itself where with a little work and a lot of walking an attendee can find just about everything under the sun and then some. One only had to stand in front of the Hara Arena by and watch the gate to the Flea Market area to get an idea of what people were buying. One convention go'er seemed to be very happy dragging out a rather old Hallicrafters SX-28 receiver made in the 1930's followed by a guy holing what appeared to be a potted plant. Amateur Radio Newsline's Henry Feinberg, K2SSQ, was able to stroll through the Flea Market and has some thoughts:

--

Feinberg: "They lucked out on the weather. With only very brief periods of showers on Friday and Saturday mornings the flea-marketeers were out in style.

"The outside vendors are people who usually bring their own merchandise. There's the '- get this stuff out of the closet and don't come back with it' group. Then there are the flea-market gypsies who you find at every swap-meet with neat displays of radio shack needed items.

"And there are the commercial vendors. Of course Mendelson's was the biggest as usual."

"Of course there are the club tables with groups of hams who pool their items on a group table. The pickings were all out there and you just had to go and find what you wanted.

"The crowds were a little bit thinner this year, but it was (still) an interesting meander."

--

And for those not aware, Henry Feinberg is a bit of an expert on the Dayton Hamvention Flea Market. Back in 1982 he was commissioned by Hollywood producer Steven Spielberg to design the umbrella communicator used in the movie E T The Extraterrestrial. Henry found many of the parts used in that device in the Hamvention Flea Market, so you might say that Dayton helped E-T to phone home.

We will have more Hamvention related news later on in this weeks Amateur Radio Newsline report. (ARNewsline(tm))

**

RADIO LAW: FCC WANTS VANITY CALL FEE INCREASE

Turning to other news, the cost of getting a vanity callsign will likely be going up. This as the FCC releases a Notice of Proposed Rulemaking and Order in MD Docket 08-65 on May 14th. It seeks to raise fees for Amateur Radio vanity call signs.

Currently, a vanity call sign costs $12.30 and is good for 10 years. The new fee, if the FCC plan goes through, will be $13.40 for 10 years. That' s an increase of $1.10 for the license period. The FCC is authorized by the Communications Act to collect vanity call sign fees to recover the costs associated with the vanity call sign program. (ARRL)

**

RESTRUCTURING: NEW LOW FREQUENCY ALLOCATION IN JAPAN

Meantime, across the Pacific word that amateurs in Japan have been given access to a 3.1 kHz wide band segment between 135.7 and 137.8 kHz. Only CW or narrow bandwidth data transmission less than 100Hz may be used in the new band. (Southgate)

HAMVENTION 2009 - THE FCC FORUM AND AN INTRODUCTION TO LAURA SMITH

Back to news from Hamvention 2009, the FCC made news at its forum. This as FCC rules man Bill Cross, W3TN, of the Wireless Mobility Division and the new Special Counsel enforcing Amateur Radio rules, Laura Smith, fielded some rather interesting questions. These ranged from the repeater owners responsibility of keeping unruly hams off of their systems to the legality of transmitting music on the ham radio bands as digital files.

Dealing with the issue of purging unwanted users from a repeater where the user won't obey the licensee's rules, Bill Cross says its all a matter of the licensee adhering to the Commissions regulations pertaining to repeater operation that's first and foremost:

--

Cross: "When the repeater rules were written many years ago, one of the things the Commission was asked to do was to specifically put in the rules authority to limit stations to using the repeater. And, in Section 97.205 where we have the rules on repeaters it says limiting the repeater to certain users is allowed.

"That certainly is a way that you can control a repeater. And it doesn't matter what the station is, the licensee is responsible for it.

"If it's a club trustee or an individual that has (holds) the license on the repeater, we certainly can contact them because of what's going on with one of the users. We can also contact the user. But you do have an absolute obligation to control that machine, and if it means limiting the use to certain users, the Commission's rules provide for that. And I'm not particularly surprised when someone (a user) gets a notice (from a repeater licensee) that says '-we don't want you to use the machine anymore."

--

Cross also reiterated what many of his predecessors have said in the past. That being no repeater license holder is under any obligation to repeat user stations that he does not wish to retransmit:

--

Cross: "One of the common misunderstandings is that amateur radio repeaters are not common carrier systems. There is no duty to serve on a non-discriminatory basis.

"If you want to limit it (access to a repeater) to people in a DX club, that's fine. If you want to limit it rush hour messages that are going to be traffic related or mobiles get priority, that's fine.

"You put the repeater up. Its yours to run and (its) your obligation to control it and limiting it is allowed."

--

As to the question on whether or not music in data format can be transmitted on the ham bands, well the question was long but Laura Smith's answer was short:

--

Questioner: "We have just been talking about what's allowed-does that mean for example that it is OK and that the FCC would not hinder say MP3 music traffic over a repeater. The digital world opens up a whole new world. It's a hornets nest in terms of what can you do or what can you not do.

"I would argue that the MP3 file as transmitted across a repeater is not music. Its is simply bits that when sequenced properly turn into music."

Smith: "We'll let you be the test case." (Laughter from audience.)

Questioner: "I'm frequently the test case."

--

And speaking about Laura Smith, to say that she has been well received by the ham radio community might be the understatement of Hamvention 2009. Even though she's not a licensed amateur the crowd in meeting room 2 took to her as if she not only already held an Extra class license but also had just completed DXCC. One of the reasons may have been her opening hear heart about who she was and about the values of life in which she believes:

--

Laura Smith tells story about her dad, as a police officer having to arrest her then teenage uncle for prank.

--

The general consensus among those who attended the FCC forum was that Laura Smith is more than an asset to the FCC. More important is that she is a truly welcome addition to the amateur radio community even if she's not yet a ham.

The FCC forum ran just a bit over an hour and many topics were covered. Hap Holly, KC9RP, will be airing excerpts from the FCC forum for the next several weeks on his RAIN Report. Its on-line at www.therainreport.com and by phone at 773-358-7845. (ARNewsline(tm))

**

RADIO LAW: A BIG WIN IN PALMDALE CA

Some good news in the ham radio legal arena. This with word that the court decision in the long-running Alec Zubarau, WB6X, tower case is now final. This, after the City of Palmdale, California, allowed the appeal period to expire without challenging the ruling. Bruce Tennant, K6PZW, reports:

--

A judge hearing the case ordered the city to reinstate an improperly revoked building permit for a crank-up tower that had been issued to WB6X. Zubarau, who was represented by ARRL Volunteer Counsel Leonard Shaffer, WA6QHD, may now request a permit for an antenna to go on the tower.

Notable in the ruling is the court's description of Palmdale's actions as an abuse of discretion by the City Council. It says that the city's decision to eliminate the tower directly violates the express requirements of California's PRB-1 equivalent statute. It also said that WB6X neighbors' various unsubstantiated complaints do not constitute substantial evidence.

And in a related item, local hams in the Palmdale area have also noted that, since the WB6X legal victory, city personnel have made no further

mention of the harsh, controversial proposed antenna ordinance amendment that the city threatened to impose late last year. One that would have effectively outlawed ham radio within that city.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Most believe that if Palmdale had proceeded that such a law would have been ruled illegal and in violation of both state law and PRB-1 and likely would have cost the city millions of dollars in taxpayer revenues to fight in court. (SW Div. Communicator, others)

**

RADIO LAW: ARIZONA PRB-1 LIKE MEASURE PASSES HOUSE VOTE

Meantime, in neighboring Arizona, ARRL Section Manager Tom Fagan, K7DF, reports that Assembly Bill 2514 has passed that states lower house after a procedural final vote and is on its way to the state senate. Unlike other PRB-1 equivalent measures signed into law in 26 other states, this one includes limited preemption of private deed restrictions commonly known as Conditions, Covenants and Restrictions or CC&R's.

Opposition to the measure is already mounting. As expected it is primarily from a coalition of home owners' associations and their lobbyists. Thankfully, the Arizona ham community has a long and very well documented record of public service through ARES, RACES and other organizations to bolster its argument for passage of the bill

It should be noted that a similar bill has made it this far in each of the past several years, only to be killed in a senate committee. But the chairmanship of that committee has changed hands, so it is uncertain how it will fare this year. (SW Div Communicator)

HAMVENTION 2009: THE HAM RADIO TOWN MEETING

Back to our coverage of Hamvention 2009, one of the most welcomed visitors this year was space adventurer and entrepreneur Richard Garriott, W6KWQ. Richard is the son of Astronaut Owen Garriott, W5LFL,

who back in the early 1980's was the first ham radio operator to come on the air from Earth orbit. Richard stopped by the Newsline sponsored Ham Radio Town Meeting to share some thoughts on his recent trip to the International Space Station and the part ham radio played while he was on-orbit:

--

Richard Garriott, W5KWQ, describes being surprised by the number of stations wanting to talk to him while he was on-orbit on the ISS.

--

This years Town Meeting was about careers that came about because of ham radio. Another speaker was Steve Mendelsohn, W2ML, who explained how being a radio amateur put him in a limousine with the president of the United States:

--

Steve Mendelsohn, W2ML, describes being out on a motorcade radio remote for CBS radio and having to repair a microphone for then U.S. President Gerald Ford.

--

That incident lead Steve to a long and successful career with CBS radio and later with the ABC Television network. Steve was also a pioneer in repeaters and repeater coordination. That knowledge gained from ham radio lead him to bring frequency coordination to major televised sporting events nationwide.

And then there's the story of Mitch Wolfson, DJ0QN, from Munich, Germany. In his case the career has been lifelong because the Dayton Hamvention is where he met the lady who became his wife:

--

Mitch Wolfson tells the story of coming to Dayton for Hamvention and by chance meeting the woman who would become his wife.

--

Its amazing where becoming a ham as a teen or pre-teen can lead you and those attending this years Ham Radio Town Meeting got to hear some of the most interesting. More on Hamvention 2009 at the end of this weeks newscast. (ARNewsline(tm))

**

ENFORCEMENT: UNCERTIFIED WIRELESS MICS BRING $7000 NAL TO SENNHEISER ELECTRIC

The FCC has issued a Notice of Apparent Liability for Forfeiture and Order to Sennheiser Electronic Corporation in the amount of seven

thousand dollars. This for what the Commission says was the company's willful and repeated violation of Section 302(b) of the Communications Act and Section 2.803(a) of the Commission's rules by marketing of unauthorized radio frequency devices.

In July 2008, the Enforcement Bureau Spectrum Enforcement Division began an investigation into Sennheiser's marketing of wireless microphones. In a letter of inquiry dated August 15, 2008, the Division instructed Sennheiser to provide specific information regarding the manufacture, marketing, and the certification status of the wireless microphone systems it sells. In its September 15, 2008, response Sennheiser indicated that, while preparing its response, it discovered that one of its wireless microphones did not have a valid certification.

By another letter of inquiry dated February 9, 2009, the FCC sought further information regarding the uncertified wireless microphone that Sennheiser referenced in its first response. Sennheiser responded by telling the FCC that within the past year, it manufactured and sold units of an uncertified wireless microphone in the United States. It also stated that it has discontinued marketing the device in the United States. Sennheiser noted that the device was assigned several model numbers according to the frequencies on which it operates and claimed that the company inadvertently allowed a pending application for certification to lapse. This, while its marketing department assumed the application had been granted.

But the FCC says that a violation has occurred and that Sennheiser must be penalized for it. It notes that Sennheiser admits that it manufactured and sold units of the non certified wireless microphone in the United States within the past year. As such it is issuing the $7000 Notice of Apparent Liability for Forfeiture to Sennheiser. The company is expected to file an appeal. (FCC)

**

RADIO LAW: DTV TRANSLATORS APPROVED

The FCC has released its order establishing a new class of translators that will help stations fill in Digital TV coverage gaps in their current service areas. The FCC says that a total of 14 stations have submitted 20 applications for the translators, and eight requests for temporary translators. As expected, the commission will not allow the translators on channels 52 to 59. This is spectrum that is being cleared for use by advanced wireless services. (FCC)

THE SOCIAL SCENE: MARITIME DX FORUM IN NOVA SCOTIA IN AUGUST

The 6th Annual Maritime DX Forum sponsored by the Halifax Amateur Radio Club takes place the weekend of August 7th . The venue is the Rosaria Centre of Mount St. Vincent University in Halifax, Nova Scotia. Speaker include such DX notables as Marti Laine, OH2BH, Joe Taylor K1JT, George Nicholson N4GRN, and others. Registration materials can be downloaded from the HARC Web site at www.halifax-arc.org or by e-mail to ve1qd (at) rac (dot) ca. (HARC)

**

NAMES IN THE NEWS: CQ INDUCTS NEW MEMBERS TO ITS HALLS OF FAME

CQ magazine today announced its 2009 Hall of Fame inductees, welcoming 15 new members into the CQ Amateur Radio Hall of Fame, two new members of the CQ DX Hall of Fame and one new member of the CQ Contest Hall of Fame.

The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio. The CQ Contest and DX Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways.

A full list of the inductees has been published at www.cq-amateur-radio.com and several other ham radio news websites. Formal induction's to the CQ Halls of Fame took place at the contest and DX dinners at last weeks Dayton Hamvention. (CQ)

**

NAMES IN THE NEWS: KA3HDO GIVEN ARRL PRESIDENT'S AWARD

American Radio Relay League President Joel Harrison, W5ZN, presented former Amateur Radio on the International Space Station Chairman Frank Bauer, KA3HDO with the ARRL President's Award. This award is voted on by the Board of Directors and given out every 7 or 8 years to honor someone's outstanding work. Bauer was recognized for his dedication to ham radio space related operations including his long tenure with the ARISS program. (ARISS)

**

RADIO SCIENCE: DTV CONVERTERS MAKE FOR BETTER ANALOG RECEPTION

A study conducted by Smith Geiger shows that seventy-five percent of over-the-air analog viewers polled said they received a better quality picture across all their channels after getting a digital converter box.

The survey of households about 2000 households that rely on converter boxes to make digital television signals available on their older analog sets. It was commissioned by the National Association of Broadcasters which says that the study found 47% of respondents said they had seen a major improvement in off-air TV reception. In addition, 54% said they were receiving more channels. Only 8% said they were receiving fewer.

No technical parameters of the consumer receiver and converter boxes were included in the press release. However it is very likely that the converter boxes are far newer technology and have more sensitive front end RF amplifiers and lower noise 1st mixers than those built into the television receivers.

And a reminder that all viewers without cable or satellite or a digital ready television receiver will need a converter box to watch full-power TV stations after the June 12 digital conversion date. Many radio clubs nationwide are assisting the FCC in educating the public on the digital conversion process. (RW, ARNewsline(tm))

**

ON THE AIR: THE 2009 WX4NHC ON THE AIR STATION TEST

The annual WX4NHC On-the-Air Station Test from the National Hurricane Center in Miami takes place Saturday, May 30th from 1300 to 2100 UTC. The purpose of this annual Station Test is to test all of the National Hurricane Center radio equipment, computers and antennas using as many modes and frequencies as possible. This is not a contest or simulated hurricane exercise. New equipment and software will be tested, and the centers staff will also conduct some operator training.

Stations working WX4NHC should exchange call sign, signal report, location and name plus a brief weather report, such as "sunny," "rain" or "cloudy." Non-hams may submit their actual weather using the On-Line Hurricane Report Form. If you want a commemorative card, please QSL to WD4R and include a self-addressed, stamped envelope. (ARRL)

**

DX

In DX, word that DL6NDK, with DL6LI, and DL9GTI will activate the Aland Islands from May 23rd to the 29th. They plan to work mainly in CW on 80 through 2 meters using several wire and vertical antennas. Also listen out for DL6LI using in PSK31. QSL's go via bureau or direct.

AH2Y and WX8C will be active from Guam as AH2Y during the CQWW WPX CW Contest that takes place on the 30th and 31st of May. QSL via Logbook to the World or direct to HL1IWD.

And G0TSM will operate portable SV5 from Dodcanese until June 3rd. He will be using CW and SSB and wants to focus mainly on 6 and 12 meters QSL to his home call.

Lastly, A team of Greek operators will be active as C4SV from Cyprus through May 29th. QSLs direct or via bureau to SV2DGH.

(From various DX news sources)

**

THAT FINAL ITEM: A LAST LOOK AT HAMVENTION 2009

We end this weeks newscast with a retrospective look at Hamvention 2009. With it, here's Jack Parker, W8ISH:

--

Once you get past the glitz of the new antennas, the radiant radio dials and the latest in ham radio software a world of wonderful and weird artifacts greet you in the outdoor flea market. There you will find acres of classic amateur radio equipment and other special items.

One enterprising seller was pushing the latest in used cattle prods. Drop in a couple new batteries and you are all set to zap your way through life. Just past the shirt, jacket and hat tent you could pick up some mighty fine perfume for the lady. They even had deodorant for men.

Saturday afternoon rain showers forced hundreds of hams back inside Hara Arena. People stood shoulder to shoulder and wheel to wheel to make their new equipment purchases. Many mobile hams in wheel chairs and on scooters found it difficult to cruise the arena floor. It would have taken a cattle prod to move through the crowd.

After standing in line a while to view a new piece of equipment, the crowds continued to grow. Right along with the heat and humidity. Thoughts of returning to the perfume table outside became a good idea after all.

Whether you were after an old part for your radio project, something digital and high tech for the ham shack or even taking in new found knowledge in one of the many forums, you will have to agree, there's nothing in the world like the Dayton Hamvention. We hope to see you there again.

Reporting for Amateur Radio Newsline, this is Jack Parker W8ISH.

--

To which we add our sincere thanks to the Dayton Hamvention for its ongoing support of amateur radio and to past General Chairman Noel Mc Kewon, WB8QQC, and his wife Marilyn, KA8OVD, for the hospitality that they afforded the visiting Amateur Radio Newsline staff.

We will see all of you again at Hamvention 2010. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, Australia's WIA News and the 2009 Dayton Hamvention, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

And this before we go. With only one week to go until its May 30th closing date so far there have been very few valid nominations submitted for this years Newsline Young Ham of the Year Award. As such, the likelihood is that the 2009 award will not be presented because there is no basis by which our judging committee can formulate a decision.

>From our own collective backgrounds we know that there is one and only one hope for the future survival of amateur radio and that future lies with the youngest members of our community. That's the reason that we created the Young Ham of the Year Award back in 1986. But only you can spend the precious few minutes it takes to nominate a worthy young ham for an award that has come to signify the best of the best among the younger members of our hobby

The rules are simple. A nominee for Young Ham of the Year must be age 18 or younger and a resident of the United States, its possessions States or any of the Canadian provinces. He or she must hold a valid Amateur service license issued by the United States FCC or Canadian telecommunications regulator Industry Canada.

Also, a candidate should be someone who has done something outstanding as an Amateur Radio operator. Perhaps it was something special he or she did for his community through the Amateur service. Maybe it was some outstanding achievement that led to an improvement in amateur radio in his or her area. Or perhaps he or she was successful in recruiting a lot of new hams. Whatever it was or is, we want to hear about it.

To make a nomination, go to www.arnewsline.org and scroll down to the words 2009 YHOTY Nominations Now open, download the form, fill it in, attach data proving the claims made in the nomination and sent it regular U.S. mail to us at Amateur Radio Newsline, Young Ham of the Year, 28197 Robin Avenue, Saugus California 91350. And do not under any circumstances send your nomination certified, registered or by any other method that requires a receipt signature, There is nobody to sign for it and it will be returned to you. Just send it regular U-S mail and pray that the postal Gods deliver it.

As an alternative, you can scan and e-mail it to us at our regular electronic address of newsline at arnewsline dot org. Either way, the nominating period closes at midnight on Saturday, May 30th and we hope that we can report next week that the judging and 2009 YHOTY award will be able to proceed. We will let you know.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

** SPECIAL NOTE FROM EDITOR (By KB8NW): The Dayton HamVention was again another enjoyable event for DXers and Contester. There seems to be more activities for DXers/Contesters this year than in past years. The DX and Contest suites, as well as the Contest University (CTU), and both the DX and Contest Dinner Banquets were really busy and well attended. If you have not heard, the SouthWest Ohio DX Association (SWODXA) presented two (not the usual one) "DXpedition of the Year" awards to: K5D Desecheo Island DXpedition (2009) and the VK9DWX Willis Island DXpedition (2008). By the way, both operations presented excellent presentations during the SWODXA DX Forum at the convention. There were other presentations during the SWODXA DX Forum (E44M Palestine DXpedition and K5LBU's African DX Safaris) and all were excellent programs. Just one last thing about Dayton, thanks to all who attended the NODXA Hospitality Suite. It was great meeting everyone and it seems NODXA will be having the suite again next year. Hope to see you there next year.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 15th-May, through Friday, 22nd-May there were 210 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7X, 8P, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2,

KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP8, VP9, VR, VU, XE, XU, XX9, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V8, TUNISIA. Alex, GM0DHZ, who was active from the "Radio Club Station of Tunisian Scouts" in Sousse between January 15th-February 6th and November 27th-December 18th in 2007, informs OPDX that he is expected to go back late this year. Operations from 3V8-land is not definite. Stay tuned!

4J/4K, AZERBAIJAN. Members of the Federation of Radio Sports of Azerbaijan plan to undertake a DXpedition into the Nagorno Karabakh area (4J/4K) between May 28th and June 1st. The team will use the callsigns 4K3K and 4J0K. The DXpedition is timed to be an entry in the CQWW WPX CW Contest (May 30-31st). Please be aware that the mentioned callsigns are only legal to operate in the assigned Nagorno Karabakh area. No other callsigns are issued for the named territory by the Ministry of Communication of Azerbaijan. Any other callsigns are considered illegal. The QSL Manager for this DXpedition is RW6HS.

4L, GEORGIA. Vaho, 4L8A, will be active during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Single-Band (20m)/High-Power entry. QSL via K1BV, by the Bureau or direct.

4U1W/4U30, AUSTRIA (Special Event). The Vienna International Amateur Radio Club station, 4U1VIC, will be active using the following special event callsigns as follows:
4U1WED - During June to celebrate World Environment Day
4U30VIC - Between July and December to celebrate the Vienna International Centre's (UN building in Vienna) 30th anniversary.
QSL via 4U1VIC: Amateur Radio Club, Vienna International Centre, P.O. Box 500, A-1400 Vienna, AUSTRIA.
PLEASE NOTE: For DXCC purpose, all (including 4U1VIC) counts as Austria (OE).

5H2, TANZANIA. Win, DK9IP/KH7CD, will be active as 5H2WK from Arusha between May 28th and June 5th. Activity will be a holiday style, so his operations will be limited. However, Win will try to be active during the CQWW WPX CW Contest (May 30-31st). QSL via DK9IP.

6W, SENEGAL. Al, F5VHJ, will be active as 6W1RY during the CQ WW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ.

7X, ALGERIA (Update/Special Event Callsign Change/Ham Meet). Members of the Algerian Radio Amateur Association (A.R.A) and Djelfa Radio Club

(7X2VFK) will activate the special event callsign 7U2ISM during the International Algerian Sahara HAM Meeting (June 15-21st). A number of stations will be on the air on 160-10 meters using CW and SSB with some sporadic RTTY and BPSK. A special diploma will be issued instead of a QSL card. QSL via 7X2DD. To see the diploma and other info, visit: http://www.qrz.com/db/7U2ISM

8Q, MALDIVES. Giulio, IW3HVB, will be active as 8Q7GP from Ari Atoll between May 27th and June 4th. Activity will be mainly 40/30/20 meters using SSB and PSK31. If the propagation is good, he will also try to operate on 17/15/12/10 meters. Suggested frequencies are:
SSB - 7057, 14267, 18137, 21267, 24957 and 28567
PSK31 - 7036.2, 10139.2, 14070.2, 180109.2, 21070.2, 24927.2 and 28120.2 kHz
Giulio will use an Elecraft K3 w/100 watts and multiband vertical antenna by I1UJX. QSL via IW3HVB, by the bureau or direct.

A3, TONGA (Update). Paul, A35RK, informed OPDX early last week that he has been having big S-9+ power line noise problems. He states, "It was bad while Dave, A35KL, was here, and it has gotten worse. The local power company crew came out here yesterday (May 11th) and tightened up alot of loose pole hardware and worked on a nearby transformer, but there was no improvement. They said that they would come back again another day. Let's hope so. It's truly a credit to the excellent noise reduction features of the Elecraft K3 that I am making any contacts at all under these conditions. I have been listening for EU contacts on 20/CW at about 0700z everyday, but I haven't had much luck. I will continue to try. Bad condx have been generally poor. I will probably be extending my visit here until mid-June. I'll let you know of the exact cut-off date after I make return reservations to Ha'apai. April and May logs will go to W7TSQ and LoTW on June 1st. The June to-date log will go out on the day I leave here."

AH0, MARIANA ISLANDS. Hiromitsu, JR2SCJ, will be active as AH0AA from Saipan, Northern Mariana Islands (OC-086) during the CQ WPX CW Contest (May 30-31st) as a Single-Op/Low-Power entry. QSL via JR2SCJ.

AN INTERVIEW WITH UA4WHX. Wolf, OE1WHC, of the "Documentary Archives Radio Communication" in Austria, conducts an interesting 14 minute interview with well-known DXpeditioner Vlad, UA4WHX, at: http://www.dokufunk.org/amateur_radio/personalities/index.php?CID=6065&lang=EN

CQ ANNOUNCES 2009 HALL OF FAME INDUCTEES. The following was received while your editor was attending the Dayton HamVention, and it was also announced during the DX and Contest dinner banquets: "(Dayton, OH - May 15, 2009) CQ magazine today announced its 2009 Hall of Fame inductees, welcoming 15 new members into the CQ Amateur Radio Hall of Fame, two new members of the CQ DX Hall of Fame and one new member of the CQ Contest Hall of Fame. The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The 2008 inductees (listed alphabetically) are:

Baker, Bill, W1BKR - President Emeritus, WNET-TV (Thirteen), New York PBS flagship station.
Barton, Loy - Developed class B plate modulation, primary method of modulating tube transmitters for decades.
Bauer, Frank, KA3HDO - NASA Chief Engineer for Exploration Systems; International Chairman, Amateur Radio on the International Space Station (ARISS), 1996-2009; AMSAT VP Human Space-flight, 1991-2009.
Bridges, William, W6FA - Laser pioneer; developed first "noble gas" lasers (argon, krypton, xenon) and the dominant modulation system for feeding data into fiber-optic cables; Professor Emeritus of Engineering at CalTech.
Fernandez Martin, Fernando, EA8AK - Member of the European Parliament, representing Spain; former President of the Government of the Canary Islands, former President of URE (Spanish IARU organization).
Floyd, George, WA4DGA (SK) - Author of "Scratchi" column in CQ over four decades. An engineer and executive at General Electric, he also wrote the "Lighthouse Larry" column in GE employee newsletters.
Haseltine, Eric, AB3DI - Former Associate Director of National Intelligence for Science and Technology; former Director of Research, National Security Agency; former Executive Vice President of Research and Development, Walt Disney Companies.
Hollingsworth, Riley, K4ZDH - Former Special Counsel for Amateur Radio, Federal Communications Commission. "Cleaned up" the ham bands after 15 years of neglect by the FCC.
Kilby, Jack - Inventor of the integrated circuit, which revolutionized electronics, including amateur radio equipment.
Krischke, Alois, DJ0TR - Prolific German author of antenna books. Rothammels Antennenbuch, a 1000-page reference showing virtually every amateur radio antenna ever designed, is in its 12th edition.
Maxwell, Walt, W2DU - Antenna designer (specializing in spacecraft communications) and author.
Miller, Lt. Gen. Thomas, K4IC (SK) - Deputy Chief of Staff for Aviation, USMC (1975-79) - in charge of all Marine Corps aviation; "father" of short-takeoff & vertical landing (STOVL) aviation in the USMC. Close friend of Sen. John Glenn; quietly watched out for amateur radio interests on Capitol Hill.
Morgan, Wilse, WX7P - Conducted first amateur radio license exam session under the Volunteer Examiner program in 1984; helped get VE program approved; also designed innovative antennas.
Parise, Ron, WA4SIR (SK) - Astronaut and active ham in space. First ham to operate packet radio from space and pioneered "telebridge" concept for making more frequent school-shuttle contacts possible. Also helped develop Radio JOVE, educational program for monitoring natural radio signals from Jupiter.
Whitehead, Clay, W6WW (SK) - First Director of the White House Office of

Telecommunications Policy in the 1970s; reshaped America's
television landscape by bringing competition to the domestic
satellite market and making it feasible for cable companies
to distribute their own programming via satellite.

The CQ Contest and DX Halls of Fame honor those amateurs who not only
excel in personal performance in these major areas of amateur radio
but who also "give back" to the hobby in outstanding ways.

The 2009 inductee to the CQ Contest Hall of Fame is:
The Rev. Paul Bittner, W0AIH - Paul's contest station near Eau Claire,
Wisconsin, is known in Midwestern contesting circles
simply as "The Farm." Spreading across 120 acres, Paul's
farm grows a wide variety of antennas as well as regular
crops of new contesters. Paul constantly seeks out and
trains new contesters at his multi/multi station and
welcomes visiting hams from around the world. He was
nominated by the Minnesota Wireless Association.

The 2009 inductees to the CQ DX Hall of Fame are:
Neville Cheadle, G3NUG - Nominated by both the Chiltern
DX Club and the Southeastern DX Club, Neville this year
is celebrating his 50th anniversary in amateur radio.
During that time he has confirmed 366 DX countries and
nearly 1000 islands. As founder of the Five Star DX
Association, Neville has been instrumental in organizing
four major DXpeditions which have involved more than 90
hams from 14 different countries and have accounted for
over a half million radio contacts! Neville is also the
co-author of DXpeditioning Behind the Scenes, a handbook
for hams on planning, setting up and operating successful
DXpeditions.

Tom Harrell, N4XP - Tom has confirmed 361 DXCC entities, holds 9-band
DXCC, 5-band Worked All Zones and WPX awards for SSB, CW
and mixed-mode. Tom has also operated from 19 different
DXCC entities, including two DXpeditions on which he was
Team Leader and three on which he was co-Team Leader. Most
recently, he served as Director of Off-Island Support for
the BS7H operation from Scarborough Reef, providing regular
news reports for the DX community. Tom was nominated by
the German DX Foundation.

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled
for the contest and DX dinners, respectively, at the Dayton Hamvention.�"

E7, BOSNIA-HERZEGOVINA. Operators Ranko/E70R, Vlado/E70T, Radomir/E74IW,
Zoka/E76C, Braco/E77DX and Rob/E77E will be active as E7DX during the
CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via E77E.

GEOPARKS WEEKEND. Plenty of stations are expected to be active in the
Geoparks Communication Weekend May 23-24th. Geopark stations are suggested

to operate around or close to the following frequencies: 3680, 7080, 14180, 21180 and 28480 kHz. Several Geopark certificates and awards are available. Just to mention a couple:
UK Geopark certificate: To qualify, working GB6GEO will be an instant qualifier, or ANY two other Geopark stations (not including GB6GEO).

YO (Romania) Geopark Award - The CS Silver Fox issued an award for all who make 100 points working with GEO stations (each 20 points) + any station from HD county who give GEO after report (ex. YO2ARV 579/GEO). They give 10 points. Award period is between May 23rd and December 30th, 2009. For more info, please E-mail: cssilverfox@yahoo.com

HV, VATICAN. Members of Saronno ARI section will be active from HV5PUL, the amateur radio station at the Pontifical Lateran University, on June 1st and 3-4th. Activity will be on the HF bands and 6 meters using CW, SSB and RTTY. Operators mentioned are: Andrea/IZ2LSC, Giovanni/I2OGV, Ivano/I2RFJ, Giuseppe/I2ZBX and Romeo/IK2DJV. QSL direct to:HV5PUL, c/o Pontificia Universita Lateranense, 00120 Vatican City State.

IOTA NEWS.....
AS-098. A group of Turkish radio amateurs activated Karaada Island in the Aegean Sea this past week between May 17-21st, using the special callsign TC098A. Operators were Pavel/OK1MU (TA2ZAF), Slavek/OK1TN, Franta/OK1DF (7X0RY), Zdenek/OK1FIA and Onda/OK1CDJ. Activity took place on 40-10 meters and VHF (locator KM36RX). QSL via OK2GZ, by the Bureau, direct or via their Web page at: http://www.okdxf.eu/expedice/tc098a/en/

AS-137. Operators Rene/DL2JRM, Mee/BD4TQ, Meng/BD4TT (YL) and Dale/BA4TB were expected to be active from Dayang Shan Island, May 22-24th. Activity is to be on all bands using CW, SSB and the Digi-modes. Operators will sign homecall/5. QSL via their home callsigns.

EU-028. Mauri, IZ5OVP, will be active as IA5/IZ5OVP from Elba Island (IIA LI001, MIA MI-022), May 24-25th. QSL via his home callsign, by the Bureau or direct.

EU-042. Thomas, DH1TS, will be active as DH1TS/p from Amrum Island between now and May 28th. QSL via his home callsign, bureau is preferred.

EU-048. Thomas, DL5MO, will be active as F/DL5MO from Groix Island (DIFM AT-012, WLOTA 0050) between June 29th and July 10th. Activity will be holiday style with operations mainly on 40/30/20 meters. QSL via DL5MO, direct or by the Bureau.

EU-054. Operators Salvetti/IW2MZX, Andrea/IZ2AJE, Vincenzo/IZ2GLU and Fabio/IZ2GMT will be active as IF9E from Levanzo Island (IIA TP-009, MIA MI-050, WLOTA 1918), May 21-24th. Activity will be on 80/40/20/15/10 meters using CW, SSB, RTTY and PSK31.

QSL via IZ2GLU, direct and by the Bureau.

EU-078. Operators George/EC2ADN and Christian/EA3NT will be active as EG3FI from Formigues Island, June 6-7th. This will be the first activation of Formigues Island since this island was added to the EU-078 group. Christian submitted all the necessary documents to be added. QSL via EA3NT, direct or by the bureau.

EU-121. Operators Robert/GI0NCA, Rudo/OM5FM and Vlado/OM7CA will be active as EI/homecall from Arranmore Island between May 25-29th. Activity will be on 80-10 meters using CW, RTTY and SSB. Operations will take place from Arranmore lighthouse (ARLHS IRE-002; WLOTA 1189) . QSL via their home callsign, direct or by the Burea.

EU-122. Members of Kilmarnock and Loudoun ARC (GM3YS/GM0ADX/GM7A) will be active as GI3YS from Rathlin Island (WLOTA 0039), Northern Ireland during the RSGB IOTA Contest (July 25-26th). Operators mentioned are: Allan/GM3OZB, Barry/GM3YEH, Steve/GM4OSS, John/GM0DJG and Gordon/MM0BIM. QSL via MM0DHQ, Bureau is preferred.

EU-155. Members of the Terre D' Argine Radio Team (TDART) will activate Scanno di Piallazza (IIA FE-001, Loc JN64ES) between May 31st and June 1st. Operators will sign homecall/P4. The team includes the following: Sergio/IK4JPR, Vanni/IK4RUX, Franco/IK4GLV, Gianni/IZ4ISX and Giuseppe/IZ4CCO. Activity will be on 40-6 meters using CW and SSB. QSL via their home callsigns, direct or by the ARI Bureau.

EU-172. Look for operators Harry/PA1H and Nico/PA7PA to be active as OZ/homecall from Lango Island (FY-019 and NOT EU-029!!!) between July 25th and August 1st. Lango Island belongs to the Langeland Island group, and there is only one house on the island. So it is a unique location situated in "The Lindelse Nor". Activity will be on 160-10 meters using SSB and the Digi-modes. They also plan to be active during the RSGB IOTA Contest (July 25-26th). There may also be some VHF operations. QSL via their home callsign, by the bureau or direct (QRZ.com addresses).

NA-127. Members of the Halifax Amateur Radio Club will be activating Briar Island (CISA NS 011) as VE1FO/p between Friday evening May 22nd through Sunday evening, May 24th. The team includes six couples: Dick/VE1AI and Sandra, Scott/VE1QD and Sue, Howard/VE1DHD and Jean, Gary/VE1RGB and Bev, Ken/VY2RU and Ella/ VE1PEI, and Frank/VE1FHW and Carol/VE1CBW. Activity will be from the Brier Island Lodge <www.brierislandlodge.com> on 80/40/30/20/17/15 meters using CW and SSB. QSL via VE1DHD, by the Bureau or direct to: Howard Dickson, Halifax Amateur Radio Club, PO Box 663, Halifax, N.S. B3J 3T3, CANADA. PLEASE NOTE: QSLs outside USA and Canada, send one IRC, or 2 USDs.

QSLs from USA, do NOT send a SASE with a U.S. stamp on it!
You may send SASE with the proper amount of Canadian postage,
or 1 IRC or 1 USD. Cards without proper postage will be answered
via the bureau. EQSL.cc and bureau cards will be fully supported,
but they are not currently registered at eQSL.cc.

JT1/JT4, MONGOLIA (Update). A research team (Scott/KC0KHA, Dave, Gabor,
and Terry) is currently in JT-land on a Mongolian Vertebrate Parasite
Project (MVPP). The team has been assigned two club callsigns for two
different regions in Mongolia. While in Ulaanbaatar (and north of the
Gobi region), they will use the callsign JT1N. In the Gobi region they
will use the callsign JT4N. Their host in Ulaanbaatar is Naran, JT1BV.
It is recommend to watch 20 meters (14190 kHz after 1030z). At the end
of May, they will be doing field work in and around the Gobi Gurvan
Saikhan National Park in southern Mongolia through August. QSL via KC0KHA.
Read about their MVPP at: http://lamarck.unl.edu/mongolia/

KH4, MIDWAY ISLAND. Co-leaders Tom/N4XP and Dave/WB4JTT have posted the
following press release (Number 3 -- dated May 13, 2009)(edited):
"Arrangements and plans are moving along without difficulty for the
scheduled operation date of October 9-19th, 2009. We would like to announce
the addition of three new members, Carlos/EA1IR, Craig/K9CT and Oscar/EA1DR
to the team. Carlos, Craig and Oscar come to us with DXpedition experience,
and we look forward to having them as members of the team.
Numerous equipment suppliers and manufacturers are on line with their
support. When you deal with these companies or individuals please take a
moment and thank them for providing support to not only this DXpedition but
to all DXpeditions. Currently Acom, Heil, Rig Expert, The Battle Creek
Group, WX0B, Cable Experts, ELLI Print, QRZ-DX, The Daily DX, IZ2KTZ,
W8AEF, and W6SZN are providing equipment or support of some type.
The team would like to thank NCDXF, The Colvin Award, Southwest Ohio
DX Association, The German DX Foundation, INDEXA, The Southeastern DX
Club, The Lone Star DX Association, The Danish DX Group and others for
their generous donations. You may also contribute, and we will appreciate
your support. Contributions can be forwarded several ways, via the
<www.midway2009.com> web site using Pay Pal, credit card or U.S. Mail.
All contributions are noted on the web site and depending on the level
of support will be noted on the DXpedition QSL.
Many of the team members will be at Dayton and look forward to seeing
you. Please say hello when you see a member sporting the Blue NCDXF T
shirt with the K4M call walking around.
Two additional official web site features announced last month - The
Midway Memorabilia Store and the DX poll are being well received. Take a
look at the poll and see where your needs stand in regard to the rest of
the DX world.
This month we are highlighting three more team members. You can read
all their history at (Meet the ops part II):
http://www.midway2009.com/meettheops2.html "

KL7, ALASKA (IOTA/LH Op). Don, N6IC, will be heading north to visit his
family in Alaska and will be active as N6IC/KL7 from Douglas Island

(NA-041, USI AK-018S, WLOTA 3106) between now and May 30th. Look for activity ONLY during the day. QSL via his home callsign.

KP2, U.S. VIRGIN ISLANDS. Ann/KP2YL and Brian/KP2HC will be back on St. Croix, June 1-30th. Listen for them doing CW and SSB on 160-6 meters. June is 6m season in the Caribbean, and Brian will be monitoring that band. St Croix is IOTA NA-016 and grid FK77. QSL direct ONLY (information is available on QRZ.com).

LX, LUXEMBOURG. Operators Lars/DF1LON, Mike/DF3VM, Willfried/DF4PD, Chris/DL7CS, Robin/K4VU and Philippe/LX2A will be active as LX7I during the CQWW WPX CW Contest (May 30-31st) as a Multi-2 entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

MJ, JERSEY (EU-013). Operators Babs/DL7AFS and Lot/DJ7ZG are now active from here as MJ/homecall until May 27th. Activity is on 80-6 meters using SSB, RTTY and PSK. Over the past week QSNs show heavy activity on 30/17/10 meters. QSL via bureau to DL7AFS. Their online logs as well as more info can be found on their Web page at: http://www.qsl.net/dl7afs
ADDED NOTE: Look for them to be active as J79ZG from Dominica in October.

NEW OFFICERS FOR 2009-2010.....
Members of the French CW Society the Union Francaise des Telegraphistes (UFT) have elected the new officers for the year 2009-2010 as follows:
President : Vincent Ortega, F5MJV
Vice-President : Francis Fagon, F6ELU
Treasurer : Gerard Toussaint, F6ICG
Assistant Treasurer: Maurice Mathieu, F5IYU
Secretary : Bernard Irigoyen, F5HEW
Trustees : XYL Evelyne Terrail/F5RPB, XYL Claudine Declef/F5JER, Frederic Bossu/F5INL, Jean-Claude Mercier/F6JOE and Paolo Paravagna/F8ENY.

Members of the Strange Radio Team (SRT) have announced their new team:
Oreste, IZ8EDJ : President, responsible and organizer of DX Convention
Francesco, IZ7AUH: Vice-President & Webmaster
Francesco, IK8WEJ: Vice-President and responsible for SRT special calls
Marco, IZ7DOK : Vice-President & Event Manager
Christine, I0OCD : Secretary & International Public Relations
Fabio, IZ7CRW : Moderator Forum lists (SRT-FORUM / SRT-DX)
Federico, IW1QN : 50 MHz Memorial Day Contest Manager

QSL INFO AND NEWS.....
OA4O via direct or by the Bureau
TC2009UC via: P.O. Box 73, Karakoy 34421, Istanbul, TURKEY
TC2ATAM via TA1KB
YS1G via G3TXF or LoTW

9V1YC QSL STATUS. Randy, W5UE, reports that "James' (9V1YC), QSL Manager Joe, N5ID, has been suffering from an extended illness and has been in the hospital or rehabilitation for several months unable to respond to QSL requests. As a result I am temporarily taking over answering Joe's

backlog of requests. The priority will be direct requests, and I will get to bureau requests as time allows. I have all of James' logs and received an initial large batch of unopened direct requests from Joe's QTH and have blanks for 9V1YC so processing of those will begin this week. I will also be answering N1YC/VK9X and 9V9HQ requests once I have the blank cards. I will be receiving more from Joe over the next few weeks, so please continue to be patient. Please note that at this time this is a TEMPORARY change. PLEASE DO NOT update any QSL manager databases or routes as a result of this note. In the interim please feel free to direct any email queries about your 9V1YC status directly to me. Also, I will be updating status from time to time on my web page at <http://w5ue.net>. James and Joe both apologize for any inconvenience this has caused and appreciate your understanding. Please continue to keep Joe in your thoughts and prayers. 73"

NEW QSL ROUTE. Buzz, NI5DX, is now the QSL manager for Juma, A71BU. Juma has had his new callsign for only a week. He has already sent Buzz his up-to-date log. QSL cards will need to be designed and ordered. Please allow approximately 6-8 weeks before the first A71BU cards are sent out. A71EM and A92GT card requests still go to EA7FTR.

MJ4K QSL STATUS. Dave, G3NKC, informs that the QSLs have finally been received from printer on May 15th; all requests were printed the same day and were either posted the same day or the next day. He states, "I will turn all new direct requests around as fast as possible; usually within a week (usual rule apply with return postage). Users can apply for MD4K or MD6V QSLs at the same time; I don't mind!"

NOT THE QSL MANAGER. Bill, K0DEQ, reports that some sources report that K5FI is QSL manager for OD5GR, but an E-mail from K5FI asserts in the strongest possible terms that he is "NOT" the QSL Manager for OD5GR or anyone else. K5FI would appreciate help in correcting this misinformation. OD5GR is actually a PIRATE station.

TS7C QSL STATUS. It has been reported that about 2000 cards direct requests received up to May 10th were put in the mail by Sylvain, F4EGD, the QSL Manager. The Bureau cards are scheduled to be handed over to the French REF-Union Bureau in Tours during the second half of May.

Chris, HA5X/HG5XA, reports: "The VK9GMW log has now been uploaded to LoTW. We have also started uploading logs to eQSL.cc. On that system there was a little problem with the ADIF upload and the RST field of some CW QSOs got corrupted, and thus currently read '59' instead of '599', but we hope to get support from the eQSL team to get that fixed."

VK9LA QSL STATUS. Bill, VK4FW, informs on May 22nd: "2 days ago I approved the design and print of the cards, so I expect to possibly have them here in 10 days or so. Meantime anyone looking at the OQRS service will find it is not working properly along with other parts of the Web site. This is due to hackers getting into <www.odxg.org>. We hope to have the site back up ASAP."

ZL7T QSL STATUS. Lee, ZL2AL, reports: "I am processing the cards at the moment and the first batch will go out June 1st, next batch June 15th and the June 30th for the last batch which will bring us up into 'current' status. Thanks for all your kind comments in the cards."

QSLS VIA LOTW: 3D2NB, 4V4JR, 5X1NH, 7Q7BP, 8P5A, AY7X, BX5AA, C6APR, C91TX, D4C, DV1JM, E74A, FM5KC, G3YYD, IM0/IK0FMB, KH7X, PR8ZX, PY0FF, SP3RBG, T27A, UA0FDX, VP8KF and VK9GMW

QSLS RECEIVED VIA MAIL: 3D2OU, 3W9JR, 4S7NE, 5T5JA, 5U7JB, 6W1SE, 9A6M, 9L0W, A52DT, C31CT, CT3/DJ7RJ, CW5W, EK6TA, ER0WW, ES1QD, ET3JA, FG/K9NW, FS/W3FF, FS/WW5L, FW5ZL, FK/G3TXF, H40MS, H7/K9NW, HC8N, HH4/K4QD, J6/W5JON, JD1BLK, JD1BLY, JT1DN, K5D, KH0PR, KL7J, KL7Y, OD5NJ, ON/N4ZC, OX2A, RW0CN, SV9/DJ7RJ, T27A, T27OU, T30XX, T31DX, T33ZZ, TS7C, V31FB, V63PR, V63TR, V63ZM, VK4/G3TXF, VK9/G3TXF, VK9AA, VP2V/K9NW, VP5T, VP6TD, VP8YLB, VP9KF, VX8X, XU7MDY, XW1B, YB1BA, YJ0TXF, ZC4VJ and ZL7/SP8BQJ

QSLS RECEIVED VIA THE BUREAU: 4O7A, 5L2MS, 5N3CPR, 8S5A, 9H3YM, 9U0A, 9X/ON4WW, C6APR, CU2AF, CU2JT, DL1DTC, E51NOU, E73KW, FJ/SP7VC, HB0/DJ2MX, HP2/CX2AM, J3A, J6/DL7AFS, KP4SQ, OE6HXQ, OK5R, P40W, T33WW, TI5N, TU2/F5PTM, UU6JJ, V31YN, VC3A, VK9DNX, YU2000A and YU4WU

SV9, CRETE. Dimitris, SV9COL, will be active from Heraklio (EU-015, GIOTA KRS-005, MIA MGC-005, WLOTA 1400) during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Lower-Power entry. QSLs are "OK" via LoTW.

TI9, COCOS ISLAND. Henry, TI2HMG, is trying to put together another operation to TI9 which will take place in February of 2010. If you are interested in being part of the DXpedition, send an E-mail to: ti2hmg@qsl.net
Look for updates and details on: http://www.qsl.net/ti2hmg/cocos.htm

TO4G, GLORIOSO ISLAND. Didier, F5OGL, has announced dates for an upcoming operation this year. His press release states that a ham radio team of 3-4 military operators along with two reporters/journalists from SIRPA (French Forces Public Relations and Informations Services) will be landing on Glorioso Island by July 9th and will stay there up to July 28th. He states that the video reporting team will be there to make several video footages/ documentaries with the main video being the DXpedition itself. Activity will be on 160-6 meters using numerous modes such as CW, SSB, RTTY, PSK and possibly other digital modes. Three stations are planned to be on the air. All the equipment is going to be loaned by the F6KOP team and CDXC President F4AJQ. The callsign will not be announced until the operation, but it was mentioned there could be more than one callsign. The leader and QSL Manager is Didier, F5OGL. Webmaster is Rafik, F5CQ. Other operators mentioned are: Freddy/F5IRO (TO4E), Yves-Michel/F5PRU, Jean-Claude/F5TLM and if possible Philippe/F4EGS and Jean-Marc/F5RQQ. They are currently looking for sponsors. They hope to have an online log which can be updated daily during the operation. More information is forthcoming. Look for updates on their Web page at: http://glorieuses2008.free.fr

TX5, AUSTRAL AND MARQUESAS ISLANDS. Les, SP3DOI, reports that a a Polish group of four ham radio amateurs (Jan/SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and himself) together with their guest Michel, FO5QB, will activate Tubuai Island (OC-152) in the Austral Island group between September 28th and October 12th, as well as Nuku Hiva Island (OC-027) in the Marquesas Islands group between October 16-22nd. Callsigns applied for are TX5SPA (Austral) and TX5SPM (Marquesas). Their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. Both countries rank 21st and 19th respectively on the most wanted list in that area, but they do not intend to ignore the stations from other continents. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe PSK31).
PLEASE NOTE: Operators would like to emphasize that all the costs of the DXpeditions are covered entirely by its participants. They do not accept any sponsors, and are going there for their own pleasure, using their own money. The QSL Manager for their DXpeditions is going to be Wojciech, SP9PT. For more details and update, go to: http://fo2009sp.pl

TZ, MALI. Operators Ed/W0SD and Arliss/W7XU have decided to forsake the Caribbean this summer and instead will be heading here for the 6 meter Sporadic E season. Their DXpedition callsign will be TZ6EI. Arliss has recently returned from Mali with the license in hand. The primary focus will be 6 meters on 50.103 MHz. There are some HF operations planned for late night non-Sporadic E hours. The dates of the operation will be from June 26th through July 5th. Due to the lack of an internet connection, no online logs are planned. The grid square will likely be IK52 or IK62. Ed informs OPDX readers, "Please just send us your RST/RS signal report. We do not need your grid square. We have lost many contacts in the past on six meters as signals have faded out before we get a report, so it is very wise to concentrate on sending 'JUST' our signal report!" QSL via W7XU.

V2, ANTIGUA AND BARBUDA (Update). Jimmy, W6JKV, will be active as V29JKV from Antigua (NA-100, WLOTA 1118) between June 24th and July 3rd. Activity will be on the HF bands, but his focus will be on 6 meters (Grid FK97). He has a very good location and will use a large antenna with power. QSL via his home callsign in Austin, Texas.

V3, BELIZE (Postponed). Operators Terry/W6WTG (V31UR) and his XYL Sharon/N2OWL (V31WL), who were expected to be active from Caye Caulker (NA-073 and Grid EK57) between July 21-29th and be an entry in the 2009 RSGB IOTA Contest (July 25-26th), have postponed their trip due to the Swine Flu problem. For more info and updates, see Terry's Web page at: http://www.w6wtg.com

VP9, BERMUDA. Yuri, VE3DZ will be active as VE3DZ/VP9 during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Low-Power entry. He is expected to be there between May 23-31st. Activity outside of the contest (before) will be focused on RTTY/SSB/CW, low bands and 30/17/12 meters. QSL via VE3DZ.

VR2009, HONG KONG (Special Event). Members of the Hong Kong Amateur Radio DX Association (HARDXA) will use the special event callsign VR2009EAG

between July 1st and December 31st, to promote the Hong Kong 2009 East Asia Games. Operations will be primarily on the HF bands from 40-10 meters and VHF on 6 meters. The modes used will be primarily SSB, RTTY, PSK31 and SSTV. QSL Manager VR2XMT: Charlie Ho, PO Box 900, Fanling Post Office, Hong Kong. There will be no e-QSL or LoTW. To see QSL cards, go to: http://www.qrz.com/vr2009eag

XU7, CAMBODIA. Tom, KC0W/ZD7X, is expected to be active as XU7XXX during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Low-Power entry. QSL via KC0W, direct only.

YI, IRAQ. John, WT4M (aka YI9TM), informs: "Sorry for the bad news, but YI9TM is QRT until further notice. Nothing wrong, just an operational requirement... Will advise when I will be back on-the-air! Please pass the word.... 73"

YN, NICARAGUA (Update). Eric, K9GY, will be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Low-Power entry. He will be there between May 28th and June 1st. Outside of the contest, look for some activity on 6 meters. QSL via his home callsign, direct or by the bureau.

ZF, CAYMAN ISLANDS. Members of the Missouri DX/Contest Club and possibly other operators will be active as ZF2SX during the CQWW RTTY Contest (September 26-27th). Operators mentioned are Jim/W4JO, Ron/K4SX and guest op Rob/W6BO. More details are forthcoming. QSL via K4SX.

ZK2, NIUE (Update/OC-040). Chris, ZL1CT (GM3WOJ), is now active as ZK2V through June 20th. Resources are limited, so activity will be mainly on 80/40/20/15 meters using CW and SSB, with some 30/17/12 meter activity and RTTY. Planned operations include entries in the 2009 ARRL CW and Phone Contests. He is told that he will have Internet access from his QTH. If so, his plans are to upload logs to LoTW on a daily or every other day basis. More details and Chris's online logs will be available on his DXpedition's Web page at: http://www.zk2v.com
A photo QSL is planned and obviously will come after the completion of the DXpedition, so please be patient. QSL via N3SL. Donations will be greatly appreciated.

==> THE 2009 ARRL NATIONAL CONVENTION AND DAYTON HAMVENTION: THREE DAYS
OF FUN, FELLOWSHIP AND FESTIVITIES

When Hara Arena closed its doors on Sunday, May 17 after three days as
the 57th annual Dayton Hamvention <http://www.hamvention.org/> came to
an
end, many agreed that this was one of the best Hamventions in recent
memory. With so much to do -- including close to 50 hours of forums and
the world-renowned flea market, as well as vendor tables that seemed to
stretch for miles -- the arena floor was filled with excitement.

Held in conjunction with Hamvention, the 2009 ARRL National Convention
was the largest exhibit at the event <http://www.arrl.org/expo>. At the
```

ARRL EXPO, hams had the opportunity to do some kit building, pick up the latest League publications and Field Day T shirts, get a little competitive at the IARU table and drop off DXCC cards, as well as meet ARRL Officers, Directors and staff members.

One of the highlights of both the National Convention and the Hamvention was private astronaut Richard Garriott, W5KWQ <http://www.arrl.org/news/stories/2009/02/21/10660/?nc=1>, son of Owen Garriott, W5LFL. In 1983, Owen Garriott was the first ham to make QSOs from space while aboard the space shuttle Columbia. Richard, a guest of the ARRL and AMSAT <http://www.amsat.org/> at Dayton, told convention crowds about his journey to the International Space Station (ISS) <http://www.nasa.gov/mission_pages/station/main/index.html>. Ever gracious, he spent time with ARRL Youth Editor Duncan MacLachlan, KU0DM <http://www.arrl.org/news/stories/2008/10/21/10395/>, in addition to speaking and signing autographs at the ARRL EXPO area, the ARRL Youth Lounge, and ARRL and AMSAT forums. Garriott also spoke at a Saturday afternoon forum, telling how he fulfilled his lifelong dream of experiencing space travel. Combining Amateur Radio and spaceflight, he had QSOs with more than 200 hams while on the ISS.

The busiest place in the ARRL EXPO was definitely the kit building area. Led by ARRL Test Engineer Bob Allison, WB1GCM, with assistance from QEX Editor Larry Wolfgang, WR1B, and ARRL Instructors, hams (and non-hams, too!) sat down in front of a circuit board and soldering iron to build either a 24 hour clock or electronic keyer. "We saw a lot of people of all ages -- including a large number of kids -- coming over to build," Allison said. "A large majority had never built a kit before. They were so excited to be able to build something that they can use immediately." He pointed out that ham parents brought in their non-licensed children to build kits: "The little ones had a blast, and the parents were so proud that their kids are getting interested in Amateur Radio through the kit building projects."

The ARRL National Convention offered an expanded IARU exhibit area this year. Led by new IARU President Tim Ellam, VE6SH, and Vice President Ole Garpestad, LA2RR, the booth was staffed by representatives from the three IARU Regions: The Deutscher Amateur Radio Club (DARC) <http://www.darc.de/> from Germany represented Region 1 <http://www.iaru-r1.org/>, the ARRL represented Region 2 <http://www.iaru-r2.org/> and the Japan Amateur Radio League (JARL) <http://www.jarl.or.jp/English/0-2.htm> represented Region 3 <http://www.iaru-r3.org/>.

"It was exciting to see how many people came over to visit with us," Ellam said. "With the JARL processing applications for the IARU's Worked All Continent (WAC) <http://www.iaru.org/wac/> and 5-Band WAC awards, there was a steady flow of amateurs here." In addition to the WAC awards, the DARC sponsored a world flag identification contest and the ARRL offered a RUFZ <http://www.rufzxp.net/> CW copying competition throughout the event.

"It's certainly well known that hams from all over the world come to Dayton for the Hamvention," said ARRL International Vice President Rod Stafford, W6ROD. "We truly had an international flavor in the ARRL EXPO, though, as this was the first time that we had representatives from all three IARU regions in the IARU booth. We were glad to see many hams stop by and visit with IARU representatives from all corners of the globe."

A massive forum schedule was one of the key features of the Dayton Hamvention. In keeping with this year's theme -- DREAM: Digital Radio Enabling Amateurs to do More -- there were numerous forums featuring digital radio. ARRL Publications Manager and QST Editor Steve Ford, WB8IMY, presented a forum on digital contesting. Tying in with this, Shelby Sommerville, K4WW, led a forum on RTTY, both from the operations side and from the contesting side. ARRL Southeastern Division Director Greg Sarratt, W4OZK, piloted a multi-level forum on D-STAR.

According to ARRL Technical Editor Joel Hallas, W1ZR, there were close to 35 new products featured at Hamvention. From a 2 meter transverter module for the Elecraft K3 to a traditional hexagonal five band Yagi from DX Engineering to antenna tuners from Ten-Tec and Palstar, there was definitely a wide variety of the latest in ham radio gear to satisfy even the most hard-to-please ham.

For more on the 2009 ARRL National Convention and Dayton Hamvention -- including a look at some of the new and exciting products -- check out the July issue of QST. The 2010 Dayton Hamvention is scheduled for May 14-16.

==> FCC LOOKS TO RAISE VANITY CALL SIGN FEES FOR SECOND CONSECUTIVE YEAR

The FCC released a Notice of Proposed Rulemaking and Order (NPRM) on May 14 seeking to raise fees for Amateur Radio vanity call signs <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-08-126A1.pdf>. Currently, a vanity call sign costs $12.30 and is good for 10 years; the new fee, if the FCC plan goes through, will go up to $13.40 for 10 years, an increase of $1.10. The FCC is authorized by the Communications Act of 1934 (as amended) to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term. Instructions on how to comment on this NPRM are available on the FCC Web site <http://www.fcc.gov/cgb/consumerfacts/howtocomment.html>.

The vanity call sign fee has fluctuated over the 12 years of the current program -- from a low of $11.70 in 2007 <http://www.arrl.org/news/stories/2007/08/31/105/> to a high of $70 (as first proposed in the FCC's 1994 Report and Order). In 2007, the Commission lowered the fee from $20.80 to $11.70. The FCC said it anticipates some 15,000 Amateur Radio vanity call sign "payment units" or applications during the next fiscal year, collecting $201,000 in fees from the program.

The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term. The first vanity call sign licenses issued under the current Amateur Radio vanity call sign program that began in 1996 came up for renewal three years ago.

Those holding vanity call signs issued prior to 1996 are exempt from having to pay the vanity call sign regulatory fee at renewal, however. That's because Congress did not authorize the FCC to collect regulatory fees until 1993. Such "heritage" vanity call sign holders do not appear as vanity licensees in the FCC Amateur Radio database.

Amateur Radio licensees may file for renewal only within 90 days of their license expiration date. All radio amateurs must have an FCC Registration Number (FRN) before filing any application with the Commission. Applicants can obtain an FRN by going to the ULS <http://wireless.fcc.gov/uls/> and clicking on the "New Users Register" link. You must supply your Social Security Number to obtain an FRN.

The ARRL VEC <http://www.arrl.org/arrlvec/> will process license renewals for vanity call sign holders for a modest fee. The service is available to ARRL members and nonmembers, although League members pay less. Routine, non-vanity renewals continue to be free for ARRL members. Trustees of club stations with vanity call signs may renew either via the ULS or through a Club Station Call Sign Administrator, such as ARRL VEC.

League members should visit the "ARRL Member Instructions for License Renewals or Changes" page <http://www.arrl.org/fcc/memberlicenseinstructions.html>, while the "Instructions for License Renewals or Changes" page covers general renewal procedures for nonmembers <http://www.arrl.org/fcc/licenseinstructions.html >. There is additional information on the ARRL VEC's "FCC License Renewals and ARRL License Expiration Notices" page <http://www.arrl.org/arrlvec/renewals.html>.

License application and renewal information and links to the required forms are available on the ARRL Amateur Application Filing FAQ Web page <http://www.arrl.org/FandES/field/regulations/application-filing-faq.html>. The FCC's forms page also offers the required forms <http://www.fcc.gov/formpage.html>.

==> TAKE AN INSIDE LOOK AT THE ARRL REGULATORY INFORMATION DEPARTMENT

Hams always seem to have questions on how to interpret FCC rules and regulations. The ARRL's Regulatory Information Department (RID) -- led by Dan Henderson, N1ND -- is the first point of contact at ARRL Headquarters for such situations. The ARRL does not maintain its own legal department, so the RID provides answers to these types of questions, providing ARRL members with accurate information about the rules and regulations that govern the Amateur Radio Service. Its goal is to provide radio amateurs with the information they need to operate their stations safely, legally and appropriately.

RID handles hundred of e-mails and phone calls each month that ask for information on correctly interpreting Part 97, as well as other federal, state and local regulatory matters. According to Henderson, the most frequently asked questions concern FCC frequency allocations, the ARRL Band Plan and whether a particular activity is permitted on the amateur bands. "The most frequent areas of concern to members are antenna and tower issues, including questions about CC&Rs (deed covenants, conditions and restrictions) and PRB-1," Henderson said. PRB-1 is the FCC ruling that states that local and state governments must make reasonable accommodation when an amateur wishes to erect antennas and towers.

The RID is responsible for a wide range of regulatory related areas and activities at ARRL Headquarters. It maintains a close working relationship with other departments at HQ, particularly the Membership and Volunteer Programs Department concerning issues related to the ARRL Field Organization and emergency communications. The RID acts as a liaison to ARRL Official Observer (OO) Coordinator Chuck Skolaut, K0BOG, on matters related to interference and on-the-air operating abuses. The office also works with the ARRL Volunteer Examiner Coordinator (VEC) staff on issues such as international operating requirements, the vanity call sign program and license renewals. It also maintains regular contact with FCC staff on Amateur Radio enforcement issues, rule interpretations and questions. The RID also administers the Division-level Legislative Action Programs list server and serves as a resource for list members.

For amateurs who need the services of an attorney in their area to deal with Amateur Radio issues, the RID manages the Volunteer Counsel (VC) program <http://www.arrl.org/FandES/field/regulations/local/vci.html>. The VC program maintains an up-to-date list of attorneys capable of representing amateurs involved in antenna or RFI disputes. These attorneys provide members with an initial consultation when they need to address legal issues. The RID also maintains the Volunteer Consulting Engineer (VCE) database <http://www.arrl.org/FandES/field/regulations/local/vcei.html> that refers members to ARRL VCEs in their area. VCEs provide assistance to amateurs who may need to meet structural requirements set forth by local zoning authorities.

Henderson, along with his staff of colleagues, volunteers and professional associates, provides expertise, knowledge and outstanding service to League members and to Amateur Radio. Find out more about the ARRL's Regulatory Information Department on the RID Web site <http://www.arrl.org/FandES/field/regulations/index.html>.

==> "THE DOCTOR IS IN" THE ARRL LETTER

This week, ARRL Letter readers are in luck! The ARRL's very own Doctor, author of the popular QST column "The Doctor Is IN," answers a question from his mailbag:

Question -- Mario Bedard, VE2FZH, of St-Andre de Kamouraska, Quebec, Canada, asks: Is an antenna tuner of any use in a receiving system with a long wire or dipole antenna? If not, should I disable it while strictly receiving?

The Doctor Answers -- This is one of those "that depends" kind of questions. A mismatched receive antenna will result in a reduction of both signal and atmospheric noise reaching your radio. If the atmospheric noise is much stronger than the internal noise in your radio, the resulting signal-to-noise ratio will be almost the same, even though the signal will be weaker. It is often the case -- especially on 20 meters and above -- that the external noise may not dominate and you won't hear weak signals that you might have heard with the tuner properly tuned.

It is somewhat more complicated with a transceiver with an internal automatic tuner. There may be no way to adjust it without transmitting, especially a problem if listening outside the amateur bands. That means that in listening mode -- unless it remembers the settings for each band -- you may have a mistuned tuner. That can be much worse than no tuner. If it's easy to bypass the tuner, try it each time and see which is better.

Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org>;; or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST, the official journal of the ARRL.

==> W1AW, W1HQ RECEIVE INSPECTIONS, NEW ANTENNAS

The antennas and towers at the Hiram Percy Maxim Memorial Station, W1AW <http://www.arrl.org/w1aw.html>, and W1HQ, the Laird Campbell Memorial HQ Operators Club <http://www.arrl.org/news/stories/2008/02/13/101/?nc=1>, received their semi-annual inspection on May 12. In addition to the inspections, new equipment was also installed on the W1AW antenna farm.

"Each year, W1AW and W1HQ get two antenna and tower inspections, one in the spring and one in the fall," explained ARRL Test Engineer Bob Allison, WB1GCM. "Sometimes Matt Strelow, KC1XX, and Andrew Toth of XX Towers will also do some antenna work during the inspections."

Strelow and Toth replaced the az-el rotators located on the satellite tower -- originally installed back in 1997 -- with a newer model. According to W1AW Station Manager Joe Carcia, NJ1Q, the older rotators were replaced due to signs of wear and fatigue after many years of use.

"The North tower received a new satellite turnstile antenna," Carcia said. "This turnstile antenna will be used in conjunction with our satellite weather fax receiver. This receiver is in use in the main area of W1AW and will allow visitors to see real-time pictures received from various weather satellites. XX Towers also replaced a coaxial pigtail on the 23 cm satellite antenna."

A new side-arm atop the 120 foot tower will allow vertical wire antennas to be hoisted to the top when the antennas are in use, accommodating the hoisting of W1AW's new 160 meter vertical antenna. Carcia said that this will come in handy during contests or other operating events.

In addition to 160, verticals for 80 and 40 meters may also be supported by the new halyard. "We will soon be installing an extensive ground radial system for the new antenna," Carcia said. "Look for W1AW during the next 160 meter contest!"

Strelow and Toth also inspected the W1HQ antennas that reside on top of the ARRL Headquarters building <http://www.arrl.org/news/stories/2008/08/19/10267/?nc=1>. According to Allison, the SteppIR antenna <http://www.steppir.com/> made it through the winter in good shape and all mounting bolts were checked and tightened.

==> MAY SECTION MANAGER ELECTION RESULTS ANNOUNCED

In the only contested Section Manager race this spring, Mel Parkes, NM7P, of Layton, was re-elected as the Utah Section Manager with 480 votes. His opponent, Lauri "Mac" McCreary, KG7C, of Lehi, received 147 votes. Parkes, who has held the Section Manager's post since 1999, begins his sixth consecutive two-year term of office on July 1. Election ballots were counted on May 19 at ARRL Headquarters.

In the San Joaquin Valley Section, Dan Pruitt, AE6SX, becomes Section Manager on July 1 when he takes the reins from Charles McConnell, W6DPD. Both live in Fresno. Pruitt was the only nominee for this upcoming new term of office. He has held Public Information Officer and Emergency Coordinator appointments since 2005.

McConnell decided not to run for another term of office after having served seven years as Section Manager. Prior to his term as Section Manager, he served as ARRL Pacific Division Director for four years, from 1990-1993; he was also Pacific Division Vice Director in 1989. In 1976, McConnell became the Section Communications Manager, serving for 13 years.

The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next terms of office beginning on July 1: Bob Beaudet, W1YRC (Rhode Island); Jim Cross, WI3N (Maryland-DC); John Dyer, AE5B (West Texas); Joe Giraudo, N7JEH (Nevada); Richard Krohn, N2SMV (Northern New Jersey), and Al Shuman, K1AKS (New Hampshire).

==>SOLAR UPDATE

Tad "How bright the sunbeams" Cook, K7RA, this week reports: Do sunspots matter? Many of us are surprised at how good conditions can be with zero sunspots; the weak solar wind and lack of flares and geomagnetic events likely have something to do with it. Many times during the more active solar periods, sunspots were welcomed, but then some event associated with the higher solar activity would make conditions difficult, disrupt

the ionosphere and increase absorption. For example, look back to the fall of 2003 bulletins via the index <http://www.arrl.org/w1aw/prop/2003-index.html>. In addition to the text, note the sunspot numbers and A index listings at the end of each bulletin. There were plenty of sunspots, but if you look at bulletin ARLP038 in September, or ARLP044 through ARLP049 around November, there were huge events that drove the planetary A index to 189 during one week and 162 the next. This is hard to imagine today. Over the near term, it looks like more quiet conditions. We had a nice seven day run of sunspots, but do not know when they will return. Sunspot numbers for May 14-20 were 18, 12, 15, 13, 14, 11 and 0 with a mean of 11.9. The 10.7 cm flux was 73.9, 73.7, 74.2, 74, 72.9, 72.3 and 71.5 with a mean of 73.2. The estimated planetary A indices were 8, 2, 5, 3, 4, 5 and 4 with a mean of 4.4. The estimated mid-latitude A indices were 8, 2, 3, 2, 2, 2 and 4 with a mean of 3.3. Geophysical Institute Prague reports quiet conditions should prevail May 22-28. NOAA and the US Air Force predict solar flux settling back to 70, then rising again June 5-17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Johann Wolfgang von Goethe's "May Song" <http://www.online-literature.com/goethe/2653/>.

==>IN BRIEF:

* This Week on the Radio: This week, the NCCC Sprint is on May 22. The MI QRP Memorial Day CW Sprint is May 25-May 26 and the SKCC Sprint is May 27. Next week is the CQ WW WPX Contest (CW) and Kids Roundup on May 30-31. Look for the ARCI Hootowl Sprint on May 31 (local time). All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, June 7, 2009 for these online course sessions that begin on Friday, June 19, 2009: Antenna Modeling and Radio Frequency Propagation. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing

assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>;.

* League Headquarters Closed Monday, May 25: ARRL Headquarters will be closed Monday, May 25 in observance of the Memorial Day holiday. There will be no W1AW code practice or bulletin transmissions that day. ARRL Headquarters will reopen Tuesday, May 26 at 8 AM EDT. We wish everyone a safe and enjoyable holiday weekend!

* W1AW/8 QSL Cards: W1AW Station Manager Joe Carcia, NJ1Q, reports that the QSL card for the W1AW/8 Special Event station at the 2009 ARRL National Convention at the Dayton Hamvention has yet to be designed and printed. "Once we have the cards in hand, all W1AW/8 QSL requests received at W1AW will be processed," Carcia said. "It just might take a few months, so please be patient." QSL via W1AW, 225 Main St, Newington, CT 06111.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org/>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org/> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for

e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

==> THE 2009 ARRL NATIONAL CONVENTION AND DAYTON HAMVENTION: THREE DAYS
OF FUN, FELLOWSHIP AND FESTIVITIES

When Hara Arena closed its doors on Sunday, May 17 after three days as
the 57th annual Dayton Hamvention <http://www.hamvention.org> came to an
end, many agreed that this was one of the best Hamventions in recent
memory. With so much to do -- including close to 50 hours of forums and
the world-renowned flea market, as well as vendor tables that seemed to
stretch for miles -- the arena floor was filled with excitement.

Held in conjunction with Hamvention, the 2009 ARRL National Convention
was the largest exhibit at the event <http://www.arrl.org/expo>. At the
ARRL EXPO, hams had the opportunity to do some kit building, pick up the
```

latest League publications and Field Day T shirts, get a little competitive at the IARU table and drop off DXCC cards, as well as meet ARRL Officers, Directors and staff members.

One of the highlights of both the National Convention and the Hamvention was private astronaut Richard Garriott, W5KWQ <http://www.arrl.org/news/stories/2009/02/21/10660/?nc=1>, son of Owen Garriott, W5LFL. In 1983, Owen Garriott was the first ham to make QSOs from space while aboard the space shuttle Columbia. Richard, a guest of the ARRL and AMSAT <http://www.amsat.org/> at Dayton, told convention crowds about his journey to the International Space Station (ISS) <http://www.nasa.gov/mission_pages/station/main/index.html>. Ever gracious, he spent time with ARRL Youth Editor Duncan MacLachlan, KU0DM <http://www.arrl.org/news/stories/2008/10/21/10395/>, in addition to speaking and signing autographs at the ARRL EXPO area, the ARRL Youth Lounge, and ARRL and AMSAT forums. Garriott also spoke at a Saturday afternoon forum, telling how he fulfilled his lifelong dream of experiencing space travel. Combining Amateur Radio and spaceflight, he had QSOs with more than 200 hams while on the ISS.

The busiest place in the ARRL EXPO was definitely the kit building area. Led by ARRL Test Engineer Bob Allison, WB1GCM, with assistance from QEX Editor Larry Wolfgang, WR1B, and ARRL Instructors, hams (and non-hams, too!) sat down in front of a circuit board and soldering iron to build either a 24 hour clock or electronic keyer. "We saw a lot of people of all ages -- including a large number of kids -- coming over to build," Allison said. "A large majority had never built a kit before. They were so excited to be able to build something that they can use immediately." He pointed out that ham parents brought in their non-licensed children to build kits: "The little ones had a blast, and the parents were so proud that their kids are getting interested in Amateur Radio through the kit building projects."

The ARRL National Convention offered an expanded IARU exhibit area this year. Led by new IARU President Tim Ellam, VE6SH, and Vice President Ole Garpestad, LA2RR, the booth was staffed by representatives from the three IARU Regions: The Deutscher Amateur Radio Club (DARC) <http://www.darc.de/> from Germany represented Region 1 <http://www.iaru-r1.org/>, the ARRL represented Region 2 <http://www.iaru-r2.org/> and the Japan Amateur Radio League (JARL) <http://www.jarl.or.jp/English/0-2.htm> represented Region 3 <http://www.iaru-r3.org/>.

"It was exciting to see how many people came over to visit with us," Ellam said. "With the JARL processing applications for the IARU's Worked All Continent (WAC) <http://www.iaru.org/wac/> and 5-Band WAC awards, there was a steady flow of amateurs here." In addition to the WAC awards, the DARC sponsored a world flag identification contest and the ARRL offered a RUFZ <http://www.rufzxp.net/> CW copying competition throughout the event.

"It's certainly well known that hams from all over the world come to Dayton for the Hamvention," said ARRL International Vice President Rod Stafford, W6ROD. "We truly had an international flavor in the ARRL EXPO, though, as this was the first time that we had representatives from all three IARU regions in the IARU booth. We were glad to see many hams stop by and visit with IARU representatives from all corners of the globe."

A massive forum schedule was one of the key features of the Dayton Hamvention. In keeping with this year's theme -- DREAM: Digital Radio Enabling Amateurs to do More -- there were numerous forums featuring digital radio. ARRL Publications Manager and QST Editor Steve Ford, WB8IMY, presented a forum on digital contesting. Tying in with this, Shelby Sommerville, K4WW, led a forum on RTTY, both from the operations side and from the contesting side. ARRL Southeastern Division Director Greg Sarratt, W4OZK, piloted a multi-level forum on D-STAR.

According to ARRL Technical Editor Joel Hallas, W1ZR, there were close to 35 new products featured at Hamvention. From a 2 meter transverter module for the Elecraft K3 to a traditional hexagonal five band Yagi from DX Engineering to antenna tuners from Ten-Tec and Palstar, there was definitely a wide variety of the latest in ham radio gear to satisfy even the most hard-to-please ham.

For more on the 2009 ARRL National Convention and Dayton Hamvention -- including a look at some of the new and exciting products -- check out the July issue of QST. The 2010 Dayton Hamvention is scheduled for May 14-16.

==> FCC LOOKS TO RAISE VANITY CALL SIGN FEES FOR SECOND CONSECUTIVE YEAR

The FCC released a Notice of Proposed Rulemaking and Order (NPRM) on May 14 seeking to raise fees for Amateur Radio vanity call signs <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-08-126A1.pdf>. Currently, a vanity call sign costs $12.30 and is good for 10 years; the new fee, if the FCC plan goes through, will go up to $13.40 for 10 years, an increase of $1.10. The FCC is authorized by the Communications Act of 1934 (as amended) to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term. Instructions on how to comment on this NPRM are available on the FCC Web site <http://www.fcc.gov/cgb/consumerfacts/howtocomment.html>.

The vanity call sign fee has fluctuated over the 12 years of the current program -- from a low of $11.70 in 2007 <http://www.arrl.org/news/stories/2007/08/31/105/> to a high of $70 (as first proposed in the FCC's 1994 Report and Order). In 2007, the Commission lowered the fee from $20.80 to $11.70. The FCC said it anticipates some 15,000 Amateur Radio vanity call sign "payment units" or applications during the next fiscal year, collecting $201,000 in fees from the program.

The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term. The first vanity call sign licenses issued under the current Amateur Radio vanity call sign program that began in 1996 came up for renewal three years ago.

Those holding vanity call signs issued prior to 1996 are exempt from having to pay the vanity call sign regulatory fee at renewal, however. That's because Congress did not authorize the FCC to collect regulatory fees until 1993. Such "heritage" vanity call sign holders do not appear as vanity licensees in the FCC Amateur Radio database.

Amateur Radio licensees may file for renewal only within 90 days of their license expiration date. All radio amateurs must have an FCC Registration Number (FRN) before filing any application with the Commission. Applicants can obtain an FRN by going to the ULS <http://wireless.fcc.gov/uls/> and clicking on the "New Users Register" link. You must supply your Social Security Number to obtain an FRN.

The ARRL VEC <http://www.arrl.org/arrlvec/> will process license renewals for vanity call sign holders for a modest fee. The service is available to ARRL members and nonmembers, although League members pay less. Routine, non-vanity renewals continue to be free for ARRL members. Trustees of club stations with vanity call signs may renew either via the ULS or through a Club Station Call Sign Administrator, such as ARRL VEC.

League members should visit the "ARRL Member Instructions for License Renewals or Changes" page <http://www.arrl.org/fcc/memberlicenseinstructions.html>, while the "Instructions for License Renewals or Changes" page covers general renewal procedures for nonmembers <http://www.arrl.org/fcc/licenseinstructions.html >. There is additional information on the ARRL VEC's "FCC License Renewals and ARRL License Expiration Notices" page <http://www.arrl.org/arrlvec/renewals.html>.

License application and renewal information and links to the required forms are available on the ARRL Amateur Application Filing FAQ Web page <http://www.arrl.org/FandES/field/regulations/application-filing-faq.html>. The FCC's forms page also offers the required forms <http://www.fcc.gov/formpage.html>.

==> TAKE AN INSIDE LOOK AT THE ARRL REGULATORY INFORMATION DEPARTMENT

Hams always seem to have questions on how to interpret FCC rules and regulations. The ARRL's Regulatory Information Department (RID) -- led by Dan Henderson, N1ND -- is the first point of contact at ARRL Headquarters for such situations. The ARRL does not maintain its own legal department, so the RID provides answers to these types of questions, providing ARRL members with accurate information about the rules and regulations that govern the Amateur Radio Service. Its goal is to provide radio amateurs with the information they need to operate their stations safely, legally and appropriately.

RID handles hundred of e-mails and phone calls each month that ask for information on correctly interpreting Part 97, as well as other federal, state and local regulatory matters. According to Henderson, the most frequently asked questions concern FCC frequency allocations, the ARRL Band Plan and whether a particular activity is permitted on the amateur bands. "The most frequent areas of concern to members are antenna and tower issues, including questions about CC&Rs (deed covenants, conditions and restrictions) and PRB-1," Henderson said. PRB-1 is the FCC ruling that states that local and state governments must make reasonable accommodation when an amateur wishes to erect antennas and towers.

The RID is responsible for a wide range of regulatory related areas and activities at ARRL Headquarters. It maintains a close working relationship with other departments at HQ, particularly the Membership and Volunteer Programs Department concerning issues related to the ARRL Field Organization and emergency communications. The RID acts as a liaison to ARRL Official Observer (OO) Coordinator Chuck Skolaut, K0BOG, on matters related to interference and on-the-air operating abuses. The office also works with the ARRL Volunteer Examiner Coordinator (VEC) staff on issues such as international operating requirements, the vanity call sign program and license renewals. It also maintains regular contact with FCC staff on Amateur Radio enforcement issues, rule interpretations and questions. The RID also administers the Division-level Legislative Action Programs list server and serves as a resource for list members.

For amateurs who need the services of an attorney in their area to deal with Amateur Radio issues, the RID manages the Volunteer Counsel (VC) program <http://www.arrl.org/FandES/field/regulations/local/vci.html>. The VC program maintains an up-to-date list of attorneys capable of representing amateurs involved in antenna or RFI disputes. These attorneys provide members with an initial consultation when they need to address legal issues. The RID also maintains the Volunteer Consulting Engineer (VCE) database <http://www.arrl.org/FandES/field/regulations/local/vcei.html> that refers members to ARRL VCEs in their area. VCEs provide assistance to amateurs who may need to meet structural requirements set forth by local zoning authorities.

Henderson, along with his staff of colleagues, volunteers and professional associates, provides expertise, knowledge and outstanding service to League members and to Amateur Radio. Find out more about the ARRL's Regulatory Information Department on the RID Web site <http://www.arrl.org/FandES/field/regulations/index.html>.

==> "THE DOCTOR IS IN" THE ARRL LETTER

This week, ARRL Letter readers are in luck! The ARRL's very own Doctor, author of the popular QST column "The Doctor Is IN," answers a question from his mailbag:

Question -- Mario Bedard, VE2FZH, of St-Andre de Kamouraska, Quebec, Canada, asks: Is an antenna tuner of any use in a receiving system with a long wire or dipole antenna? If not, should I disable it while strictly receiving?

The Doctor Answers -- This is one of those "that depends" kind of questions. A mismatched receive antenna will result in a reduction of both signal and atmospheric noise reaching your radio. If the atmospheric noise is much stronger than the internal noise in your radio, the resulting signal-to-noise ratio will be almost the same, even though the signal will be weaker. It is often the case -- especially on 20 meters and above -- that the external noise may not dominate and you won't hear weak signals that you might have heard with the tuner properly tuned.

It is somewhat more complicated with a transceiver with an internal automatic tuner. There may be no way to adjust it without transmitting, especially a problem if listening outside the amateur bands. That means that in listening mode -- unless it remembers the settings for each band -- you may have a mistuned tuner. That can be much worse than no tuner. If it's easy to bypass the tuner, try it each time and see which is better.

Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org>; or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST, the official journal of the ARRL.

==> W1AW, W1HQ RECEIVE INSPECTIONS, NEW ANTENNAS

The antennas and towers at the Hiram Percy Maxim Memorial Station, W1AW <http://www.arrl.org/w1aw.html>, and W1HQ, the Laird Campbell Memorial HQ Operators Club <http://www.arrl.org/news/stories/2008/02/13/101/?nc=1>, received their semi-annual inspection on May 12. In addition to the inspections, new equipment was also installed on the W1AW antenna farm.

"Each year, W1AW and W1HQ get two antenna and tower inspections, one in the spring and one in the fall," explained ARRL Test Engineer Bob Allison, WB1GCM. "Sometimes Matt Strelow, KC1XX, and Andrew Toth of XX Towers will also do some antenna work during the inspections."

Strelow and Toth replaced the az-el rotators located on the satellite tower -- originally installed back in 1997 -- with a newer model. According to W1AW Station Manager Joe Carcia, NJ1Q, the older rotators were replaced due to signs of wear and fatigue after many years of use.

"The North tower received a new satellite turnstile antenna," Carcia said. "This turnstile antenna will be used in conjunction with our satellite weather fax receiver. This receiver is in use in the main area of W1AW and will allow visitors to see real-time pictures received from various weather satellites. XX Towers also replaced a coaxial pigtail on the 23 cm satellite antenna."

A new side-arm atop the 120 foot tower will allow vertical wire antennas to be hoisted to the top when the antennas are in use, accommodating the hoisting of W1AW's new 160 meter vertical antenna. Carcia said that this will come in handy during contests or other operating events.

In addition to 160, verticals for 80 and 40 meters may also be supported by the new halyard. "We will soon be installing an extensive ground radial system for the new antenna," Carcia said. "Look for W1AW during the next 160 meter contest!"

Strelow and Toth also inspected the W1HQ antennas that reside on top of the ARRL Headquarters building <http://www.arrl.org/news/stories/2008/08/19/10267/?nc=1>. According to Allison, the SteppIR antenna <http://www.steppir.com/> made it through the winter in good shape and all mounting bolts were checked and tightened.

==> MAY SECTION MANAGER ELECTION RESULTS ANNOUNCED

In the only contested Section Manager race this spring, Mel Parkes, NM7P, of Layton, was re-elected as the Utah Section Manager with 480 votes. His opponent, Lauri "Mac" McCreary, KG7C, of Lehi, received 147 votes. Parkes, who has held the Section Manager's post since 1999, begins his sixth consecutive two-year term of office on July 1. Election ballots were counted on May 19 at ARRL Headquarters.

In the San Joaquin Valley Section, Dan Pruitt, AE6SX, becomes Section Manager on July 1 when he takes the reins from Charles McConnell, W6DPD. Both live in Fresno. Pruitt was the only nominee for this upcoming new term of office. He has held Public Information Officer and Emergency Coordinator appointments since 2005.

McConnell decided not to run for another term of office after having served seven years as Section Manager. Prior to his term as Section Manager, he served as ARRL Pacific Division Director for four years, from 1990-1993; he was also Pacific Division Vice Director in 1989. In 1976, McConnell became the Section Communications Manager, serving for 13 years.

The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next terms of office beginning on July 1: Bob Beaudet, W1YRC (Rhode Island); Jim Cross, WI3N (Maryland-DC); John Dyer, AE5B (West Texas); Joe Giraudo, N7JEH (Nevada); Richard Krohn, N2SMV (Northern New Jersey), and Al Shuman, K1AKS (New Hampshire).

==>SOLAR UPDATE

Tad "How bright the sunbeams" Cook, K7RA, this week reports: Do sunspots matter? Many of us are surprised at how good conditions can be with zero sunspots; the weak solar wind and lack of flares and geomagnetic events likely have something to do with it. Many times during the more active solar periods, sunspots were welcomed, but then some event associated with the higher solar activity would make conditions difficult, disrupt

the ionosphere and increase absorption. For example, look back to the fall of 2003 bulletins via the index <http://www.arrl.org/w1aw/prop/2003-index.html>. In addition to the text, note the sunspot numbers and A index listings at the end of each bulletin. There were plenty of sunspots, but if you look at bulletin ARLP038 in September, or ARLP044 through ARLP049 around November, there were huge events that drove the planetary A index to 189 during one week and 162 the next. This is hard to imagine today. Over the near term, it looks like more quiet conditions. We had a nice seven day run of sunspots, but do not know when they will return. Sunspot numbers for May 14-20 were 18, 12, 15, 13, 14, 11 and 0 with a mean of 11.9. The 10.7 cm flux was 73.9, 73.7, 74.2, 74, 72.9, 72.3 and 71.5 with a mean of 73.2. The estimated planetary A indices were 8, 2, 5, 3, 4, 5 and 4 with a mean of 4.4. The estimated mid-latitude A indices were 8, 2, 3, 2, 2, 2 and 4 with a mean of 3.3. Geophysical Institute Prague reports quiet conditions should prevail May 22-28. NOAA and the US Air Force predict solar flux settling back to 70, then rising again June 5-17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Johann Wolfgang von Goethe's "May Song" <http://www.online-literature.com/goethe/2653/>.

==>IN BRIEF:

* This Week on the Radio: This week, the NCCC Sprint is on May 22. The MI QRP Memorial Day CW Sprint is May 25-May 26 and the SKCC Sprint is May 27. Next week is the CQ WW WPX Contest (CW) and Kids Roundup on May 30-31. Look for the ARCI Hootowl Sprint on May 31 (local time). All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, June 7, 2009 for these online course sessions that begin on Friday, June 19, 2009: Antenna Modeling and Radio Frequency Propagation. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing

assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* League Headquarters Closed Monday, May 25: ARRL Headquarters will be closed Monday, May 25 in observance of the Memorial Day holiday. There will be no W1AW code practice or bulletin transmissions that day. ARRL Headquarters will reopen Tuesday, May 26 at 8 AM EDT. We wish everyone a safe and enjoyable holiday weekend!

* W1AW/8 QSL Cards: W1AW Station Manager Joe Carcia, NJ1Q, reports that the QSL card for the W1AW/8 Special Event station at the 2009 ARRL National Convention at the Dayton Hamvention has yet to be designed and printed. "Once we have the cards in hand, all W1AW/8 QSL requests received at W1AW will be processed," Carcia said. "It just might take a few months, so please be patient." QSL via W1AW, 225 Main St, Newington, CT 06111.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for

e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

"niothing" is what?

A typo?

Yet you took Stagger Lee to task for a typo?

Don't you proof read your posts first, Woger?

Apparently not.

To pass this test, submit five dollars and two KFC boxtops.

And answer these, true or false.

Them there little electron thingies run up and down wires both ways for Alternating Current. They only go one way for Direct Current.

Those little electron things get light bulbs all excited and make the wire element glow. If you unscrew the bulb the electron thingies have nowhere to go and the light bulb done goes out and your chickens are left in the dark.

One wire carries the little electrons from a fuse box and the other wire takes them back to the fuse box. If you touch the wires together the electron thingies get excited and make sparks. This can ketch yer hog pen on fire if you ain't careful.

AC/DC is two different sexes. One likes wimmen and t'other likes sheep.

Congratulatons! You are now a licensed electrician in the State of West Virginia.

2010. Just so you know the difference

Wrong again, Lardass.
The Test Fee is $50.00.

The exam consists of 50 questions on the National Electric Code and 6 calculations for the Journeyman level, which is what Roger holds. Oh, and it expires June 30 of each year, not in May as you tried to pass off as part of your ignorance earlier.The renewal fee is $50 per year, as well. Journeyman level can supervise up to 3 apprentices on the job site.
YOU couldn't even hold down that pizza delivery "job."

<Poor ignorant Lardass Lloyd Davies, he couldn't make it on his own and had to move back to Belle Plaine to mooch of his parents.>

Amateur Radio Newsline(tm) Report 1659 - May 29 2009

Ladies and gentlemen, with some thank-you's to our generous listeners who support these weekly newscasts here's our Support Fund Administrator Andy Jarema, N6TCQ:

--

In the Merry Month of May of last year we heard via PayPal from Michael Scheliga, Daryl Stout; Scott Currier- Haverville, MA; Rory Shaffer- Roebling, NJ; Thomas Home- Takoma Park, MD; Murray Hunt- Odenton, MD, David Carter- Washington, D.C.; Jesse Lindley- Greensboro, NC; Robert McClintock, N3RZI & KB3PHI in Franckville, PA; Robert Harlan- Mansfield, OH; Robert Mallory- KD8HXT, North Canton, OH; Paul Vinoski- Fisher, WV; Doug Papciak- Tucker, GA; James Drenthe in Galesburg, MI, who is a regular contributor; Wayne Strickland- W9BBB, Chicago.

Also from Illinois, John Leonard- W9JBL in De Kalb; Joseph Kratky- KA9KBU in Hickory Hills; James Langsted- Golden, CO; Lee Dusbabek- WR7NV, Las Vegas, NV; David Billeci- WA6UHA, San Francisco.

Also from California, Russell Williams- W6OHM in Latrobe; Matt Sturtz- Broomfield ; Roy Hepp- Carpinteria; Frank Brand- Tujunga.

And finally, and through the magic of PayPal, Mitchell Wolfson- DJ0QN, Unterschleissheim, Germany. That was fun! Got to exercise my schprechen ze Deutch!

That's quite a list, but you have to remember that most of those contributions were on the order of $10-$20, and this was right after a major capital campaign.

It costs almost $1000 a month to gather the news and put these newscasts on the air. And right now, things are pretty grim. Please do what you can to keep these newscasts on the air by logging onto our website and going to our PayPal secure contribution link, or contacting us at our Arcadia support fund address given at the end of this newscast.

For now, I'm Andy Jarema, N6TCQ, and thank you.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1659 with a release date of Friday, May 29th, 2009 to follow in 5-4-3-2-1.

The following is a QST. The FCC tells AB2PP that it will not invoke PRB-1 to save his tower, three new ham radio cubesats are on-orbit and FCC rules enforcer Laura Smith speaks out on malicious interference. Find out the details on Amateur Radio Newsline(tm) report number 1659 coming your way right now.

(Billboard Cart Here)

** RADIO LAW: FCC AGAIN REFUSES TO INVOKE PRB-1 TO ASSIST YONKERS NY HAM

There has been another setback for Thomas R. Morrison, AB2PP. This, in his fight with the city of Yonkers, New York, to keep his tower and antenna. A tower that the city wants torn down. Henry Feinberg, K2SSQ, is here with the latest:

--

This is the third time Thomas Morrison, AB2PP, has sought assistance from the FCC in this matter. In 2006, he filed a request with the Commission, asking for a declaratory ruling regarding the tower but the FCC denied his request in January 2007. At that time the agency told Morrison that it would not intervene. It noted that PRB-1 permits the local authority to determine what constitutes a reasonable accommodation to a radio amateur based on what the city sees as its legitimate purposes, policies and concerns.

Morrison appealed again ib December 2008. On March 27 of this year the FCC notified him that it was again denying his reconsideration request concerning his antenna support. In that petition, Morrison again requested the Commission rule that the City of Yonkers did not provide reasonable accommodation in its building permit requirements as defined in PRB-1. But the FCC simply did not agree.

So Morrison tried again. In an e-mail dated this past April 15th he asked the FCC for reconsideration of its letter dated March 27th letter which declined to act on his request. This time Morrison asked the FCC find that the building permit requirements of the City of Yonkers do not comply with the Commission's policy regarding local regulation of amateur radio facilities.

But the FCC says it will not do that. It stated that it has already once said that PRB 1 does not cover his situation. Also that the fact that Yonkers had subsequently denied Morrison's request for a special use is not an appropriate matter for Commission involvement.

In this appeal Morreison had also claimed that he agreed that he would not to use the antenna until the City Planning Board has approved the structure. This, in order to settle the criminal case against him without incarceration, But he also said that that local authorities overstepped their jurisdiction by demanding this stipulation. As such he claimed that the city encroached upon the sole authority of the FCC to act in matters regarding radio transmission. Morrison claimed that this development warranted Commission action.

But the FCC appears to want no part of this case. Its reply to Morrison is short and quite to the point. We quote:

"The stipulation recites that it was agreed to by the parties. You indicate in your petition for reconsideration that you did not agree to this condition. If in fact you did not agree to it, you should raise the matter with the criminal court."

The bottom line is that the FCC will not will not come to Morrison's assistance because the agency does not see its intervention as a relevant issue in his particular case. This is because Yonkers is not depriving him of having an antenna and getting on the air, but just telling him that he cannot have the kind of tower and antenna system that he wants.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ, in New Jersey.

--

The FCC's unofficial advice to AB2PP appears to at least suggest that he either fully comply with the city of Yonkers demands or to settle it in court. The complete text of the FCC dismissal order on Morisson's request is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-1123A1.txt (FCC)

**

HAM RADIO IN SPACE: THREE NEW MICRO CUBSATS LAUNCHED

Three new ham radio microsats have been launched and are now on-orbit. The three tiny birds are identified as PHARMASAT-1, HAWKSAT-I and POLYSAT CP6. All three were launched on Tuesday, May 19th from the NASA Wallops Flight Facility in Virginia.

PHARMASAT-1 is from Santa Clara University. Its transmitting on 437.465 MHz in AX.25 data protocol at 1200 bits per second. HAWKSAT-I was the work of the Hawk Institute for Space Sciences. Its on 437.345 MHz. Last but by no means least is POLYSAT CP6 sponsored by the California Polytechnic State University. Its on 437.365 MHz with 1200 bit per second data in AX.25.

Web reports indicate that good signals have been received from Pharmasat-1 and from Polysat CP6. (ANS)

**

RESTRUCTURING: NEW RADO REGS FOR HAMS IN PORTUGAL

Portugal has some new rules that its ham radio community must follow. For example, while establishing a communication an amateur must identify both station's call signs at the beginning and at the end of any transmission and at the end of a SQO session.

But that's not all. If the station is a mobile or out in the field, the amateur in control must identify each transmission with the station's call sign, followed by the word "mobile" or "portable." He also must transmit the present geographic location of the station in each transmission.

Visiting hams also have new rules to follow. Anytime a foreign amateur establish communications within the Portuguese territory under a "CEPT" license, the original station's call sign must be preceded by the proper regional prefix.

Approval of the new rules by Portugal's telecommunications regulator ANACOM took place on March 2nd but only became effective on June 1st. (CT1ETL)

**

RESTRUCTURING: SLOVAK STATIONS GAIN 4 METERS

Slovak stations have access to the pan-European or 70 MHz band. As of May first Slovak stations have privileges in the band segment from 70.250 to 70.350MHz with a maximum of 10 watts E-R-P. Only one caveat: Each Slovak station must apply for special permission to operate in the new 70 MHz. ham radio spectrum. (Southgate)

**

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9AA Repeater serving Evergreen Park, Illinois.

(5 sec pause here)

**

ENFORCEMENT: SOCAL HAM WARNED TO STAY OFF SAN DIEGO REPEATER

A California ham has been ordered by the FCC to stay off of a San Diego area repeater or face some harsh penalties from the FCC. Bruce Tennant, K6PZW, reports:

--

In her March 30th letter to Cory M. Herttua, N6HHT, of La Mesa, California, new FCC Special Counsel Laura Smith noted that the owner and trustee of the K6JSI system had requested, by letter dated February 25, 2009, that Herttua refrain from use of this repeater. Smith's letter claims that the written request was issued as a result of Herttua failure to follow operational rules set forth by the licensee and control operator of the repeater that he was obliged as a user to obey.

Smith's letter to N6HHT did not stipulate what licensee imposed rules Herttua was accused of violating. Only that that the Commission

expects him to abide by the license holders request that he stay off of the K6JSI repeater. Also that he obey any similar demands to cease operations on any other repeaters by any other repeater licensees, control operators or trustees.

Herttua was also told that his use of K6JSI repeater after receipt of the FCC letter could subject him to some severe penalties. This could include a fine or a modification proceeding to restrict the frequencies upon which he may operate. It could even lead an outright revocation proceeding initiated against his amateur radio license.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

You might remember our report last week from the Dayton Hamvention where FCC rules man Bill Cross, W3TN, said that a repeater licensee has an absolute obligation to control his machine even if it means limiting the use to certain operators. As such banning unwanted users is an accepted practice for a licensee to use to meet the requirements for positive system control. The full text of the FCC letter to Herttua can be read at http://www.fcc.gov/eb/AmateurActions/files/Hertt09_05_07_5109.html (FCC)

**

ENFORCEMENT: LAURA SMITH ON MALICIOUS INTERFERENCE

Now that FCC Special Counsel Laura Smith has settled into her new job, a lot of hams are wondering how she views the problem of malicious interference and how it will be handled under her aegis. At the recent Dayton Hamvention FCC Forum, she tackled that question:

--

Smith: "We get a lot of malicious interference complaints. In fact that' s the bulk of the complaints that I get.

"Unfortunately these are a little more difficult to handle because malicious interference is a gray area, meaning what is it? What does it mean? And its based on the facts of the case.

"What I have to do is to take the information from you and determine if those facts of those circumstances at that given time was malicious interference.

"If it was, we can do a phone call for a one-time deal. Or we can do e-mail or some kind of letter in each one of these.

"Remember, enforcement is all about facts and when you give me the facts, then I can go forward and work out what we are going to do about the problem."

--

Smith believes that most malicious interference complaints can be resolved. For the more egregious ones there are far more severe penalties that she can and will invoke. (ARNewsline(tm))

ENFORCEMENT: BRAZIL CRACKS DOWN ON SATELLITE PIRATES

Brazil, working with the U.S. intelligence has begun a crack down on pirate operators who have been using an abandoned United States military satellite system for their own personal use.

The FLTSATCOM which is an acronym for the Fleet Satellite Communications System was a constellation eight non-encrypted communications satellites launched between 1978 and 1989. These were replaced in the 1990's by a newer and more secure satellite system, but two of the old birds remain operational. This was discovered by pirate radio operators in Brazil about a half decade ago, but no action was taken until the U-S discovered the illegal operators and filed complaints to Brazil.

Now, Brazil has undertaken an enforcement campaign called "Operation Satellite" In it, Brazilian police use coordinates provided by the U.S. Department of Defense and confirmed by Brazil's telecommunications authority to raid locations of suspected satellite pirates.

Among those already caught and charged have been university professors, electricians, truckers and farmers. The suspects face up to four years and jail, but are more likely to be fined if convicted.

According to one article the abandoned birds were left operational in case they were needed in emergency situations. The growing amount of pirate activity from Brazil has made them unusable for that purpose. Its not known if the United States might simply de-orbit the remaining birds to put an end to the pirate operations. (Published reports)

** SAFETY: HAM KILLED IN TRAFFIC MISHAP A United Kingdom ham has been killed and another injured in a tragic road accident. On Sunday, May 24th, Ian Firby G7VCG and Peter Rushton G7PMZ, were involved in an collision that clamed Rushton's life and caused Firby to be rushed to a hospital by air ambulance. The accident took place on the M 61 motorway near the town of Bolton. A 28 year old man was arrested at the scene. He is currently in police custody on a charge of dangerous driving. Firby and Rushton are both members of the Oldham Amateur Radio Club. In a statement, club president Geoff Oliver, G0BJR, said that Rushton's death is a huge loss not only to the club but to him on a personal level as well. (Southgate) **

LISTENING NEWS: HISTORIC STATION LEAVES THE AIR

An AM-radio station synonymous with Northeastern Pennsylvania, is off the air and likely will not be back.

WARM spent the last 50 years broadcasting news, music and sports to the community most recently on 590 KHz. According to published reports. the station went dark in mid-April and has been silent ever since.

Sam Liguori who hosted a Saturday polka show. He said the station's transmitter had failed, describing it as a major technical problem that would cost a lot of money to repair. According to FCC rules, if the station fails to broadcast for 12 consecutive months, its license will be cancelled. (RW)

RADIO GEAR: NEW FIRMWARE FOR IV-7800 AVAILABLE FOR DOWNLOAD

IC-7800 owners, this one is for you. Revision 2.20 is a new firmware update for the IC-7800 on the English homepage of the Icom Inc. website. The firmware update will improved transmit function in sending transmit memory contents in operation in the RTTY and PSK mode when using an external keypad, an improvement in sending voice memory in SSB mode and CW memory keyer contents in the CW mode using external USB keyboard and programmable custom band-edge frequencies.

With the latter update installed, a user of the IC-7800 will hear a beep when tuning out of, or into the programmed Amateur Radio band. This is especially important to sight impaired or blind hams who will be able to be certain that they are transmitting inside on an appropriate frequency or band.

The firmware update is available to IC-7800 owners at www.icom.co.jp/world/support/download/firm/IC-7800/2_20/index.html (Icom, Southgate)

NAMES IN THE NEWS: NM7P RE-ELECTED UTAH SM

In the only contested ARRL Section Manager race this spring, Mel Parkes, NM7P, of Layton, was re-elected as the Utah Section Manager . Parkes garnered 480 votes while his opponent, Lauri "Mac" McCreary, KG7C, received only 147. Ballots in this election were counted on May 19th at ARRL Headquarters. (ARRL)

**

HAM TECHNOLOGY: VK3RTV ATV REPEATER GOING DIGITAL

An ambitious project to convert the Australian VK3RTV amateur television repeater to all digital operation is underway down-under. This to bring one of the worlds longest running fast scan amateur television relay devices into the digital age.

The VK3RTV A-T-V analog system was established in 1977 to service Melbourne area. The new and improved digital VK3RTV will soon be on air using the DVB-T transmission standard. DVB-T is a terrestrial version of the digital broadcasting standard and can be received on commonly used household Set Top Boxes and digital television sets in many parts of the world.

The transition of VK3RTV from analog to digital is being primarily funded by Amateur Radio Victoria. It has spent $3,300 on the project so far. The Wireless Institute of Australia has now donated $1000 to aid in the conversion process. (WIA)

**

RESTRUCTURING: UHF CB MAY EXPAND IN AUSTRALIA

The Australian Communications and Media Authority is raising the possibility that the nations current 40 channel UHF Citizens Band may be increased accommodate up to 60 channels. An expansion would require a reduction in the simplex channel bandwidth from 25kHz to 12.5kHz and a lifting slightly of the band's upper frequency limit.

The proposals require new transceivers programmed to automatically switch between 12.5kHz and 25kHz as required. However some 25 kHz channels would be retained for the existing eight repeater pairs , emergency pair as well as the 22 and 23 telemetry and tele-command channels.

The Australian UHF Citizens Band band began in the late 1970s. Ast that time the government's plan that it would be the only CB band in Australia and everyone would switch from 27MHz AM and SSB to UHF FM. Because of the popularity of 27 MHz C[-B worldwide and the low cost of A-M transceivers that conversion did not happen. (WIA News)

HAM RADIO IN SPACE: NEW VENUE FOR AMSAT UK SPACE COLLOQUIUM

AMSAT-UK has announced a change of venue for the 2009 Colloquium. The annual gathering will now take place at the Holiday Inn Hotel at Guildford, which is close to the University of Surrey.

The Colloquium will take place July 25th and 26th. Planners say that there will be presentations on all the latest amateur satellite happenings and developments.

Also on site will be the RSGB's demonstration vehicle GB4FUN. It will also be there to show its satellite operations capability.

Full details of booking arrangements can be found on the AMSAT UK web site. That's in cyberspace at www.uk.amsat.org. (AMSAT-UK)

**

HAM HAPPENINGS: INTERNATIONAL LIGHTSHIP AND LIGHTHOUSE WEEKEND

A total of 135 registrations have been received from 18 countries have already been received by the organizers of International Lightship & Lighthouse Weekend. Many more are expected before the event takes place on the weekend of August 15th and 16th.

Now in its 11th year this annual activation event run by the Ayr Radio Group of Scotland. It says that there was a record 406 registrations last year with the top countries being Australia and Germany.

For more information including guidelines, an online entry form and a list of entrants, visit the International Lightship & Lighthouse Weekend update website. Its on-line at www.illw.net. (VK3PC)

**

WORLDBEAT: INDIA ISSUES ARDF COMMEMORATIVE STAMP

Lion Ajoy, VU2JHM, tells Newsline that a new stamp honoring Amateur Radio Direction Finding has been released in India. According to VU2JHM the event was celebrated at the 10th A-R-D-F in Bangalore where a special cover and a special Postal Cancellation ceremony was held. With a bit of searching you can find a scan of the new stamp on line at the ham radio stamp collecting URL found at www.ea1ax.es/home2.htm (VU2JHM)

**

WORLDBEAT: TAKING AMATEUR RADIO INTO SOUTH AFRICAN SCHOOLS

The South African Radio League is working with the Sci Bono Science Discovery Centre and the Gauteng Provincial Department of Education to take amateur radio into high schools. This in association with the present Class B syllabus for the Grade 10 and 11 Electrical Technology curriculum.

The project will involve 82 schools and 88 teachers in the province. The plan is to train teachers to qualify as radio amateurs by the end of the year and to introduce the revised Electrical Curriculum to Grade 10 learners from 2010. (SARL)

DX

F5MCC portable TH, and possibly TK5XN, will be on the air from Corsica until 11th June. They also plan to activate several lighthouses. QSL for F5MCC go via his home call and TK5XN via F2YT either direct or through the bureau.

8N5I will be on the air from Shikoku Island until 15th June. QSL via JARL bureau.

N6IC is heading north to visit his family in Alaska and will be active portable KL7 from Douglas Island. Listen out for him only during the day. QSL via his home callsign.

DK9IP will be active as 5H2WK from Arusha, Tanzania through June 5th. Activity will be a holiday style, so his operations will be limited. QSL via DK9IP.

Lastly, members of the Algerian Radio Amateur Association and Djelfa Radio Club will activate the special event callsign 7X2DD from June 15th to the 21st. This, during the International Algerian Sahara HAM Meeting. Operations will be on all bands and modes. A special certificate will be issued instead of a QSL card.

(From various DX news sources)

THAT FINAL ITEM: THANK YOU DARA

And finally this week, a very special thank you to those wonderful folks at the Dayton amateur Radio Association and the Dayton Hamvention for their ongoing support of these newscasts. And sometimes their support comes in a rather unexpected way. Our producer Bill Pasternak, WA6ITF, was just about to begin last Saturday's Ham Radio Town Meeting when he received a big surprise from DARA President Steve Coy, K8UD and past-President, Jim Simpson, WB8QZZ. Here's Steve Coy:

--

K8UD: "We want to recognize the fine work that Bill has been doing on Newsline. As President of the Dayton Amateur Radio Association it is my pleasure to offer you a $500 check to help keep Newsline going and continue on the excellent presentation that you have with that program.

"We try to give back to the ham radio community and we do appreciate your attendance today and we hope you will continue on for many many years in the future. And again, have a great Hamvention-"

WA6ITF: "Just let me say to DARA, to Steve and to Mr. Simpson over here -thank you and it will go to a worthy cause because this is what keeps the newscasts coming your way. Thank you very much. Thank you."

--

Our thanks to DARA and the Dayton Amateur Radio Association for their ongoing and generous support of Amateur Radio Newsline. And our thanks to all of you who also support our all volunteer efforts to bring you the news of ham radio each week. It's because of you that we feel what we do as volunteers is worthwhile. (ARNewsline)

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 22nd-May, through Friday, 29th-May there were 207 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J8, JA, JD/m, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. Hrane, YT1AD, will be active as 3V9A during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via YT1AD.

4L, GEORGIA. Gia, 4L4WW, will be active as 4L0A during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via EA7FTR.

7P8, LESOTHO. Ivan, UR9IDX, is expected to be (or is) in Lesotho and has received the callsign 7P8R. His length of stay is unknown, as well as his plans for operations (bands/modes) as this was being written. QSL direct only to: Ivan Borzenko, P.O. Box 85, Mari, Mariupol-31, 87531, UKRAINE.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQWW WPX CW Contest (May 30=31st) as Single-Op/All-Band/High-Power entry. QSL via NN1N.

8Q, MALDIVES. Just a reminder that Nobby, G0VJG, will be active as 8Q7CQ between June 1-15th. This will be a limited operation because Nobby will be on his honeymoon (and he thanks his wife for putting up with him and the QRM). Activity will be from Kuredu Island (AS-013) mainly HF SSB but some 6 meters. QSL via Owen, G4DFI. Visit his Web page at: http://g0vjg.piczo.com/?cr=5

8Q, MALDIVES. Tom, PF4T, will be active as 8Q7TB from the Island of Embudu between June 8-24th. Activity will be on 40 and 20 meters using SSB with a FT-897 and G5RV antenna. QSL direct to PF4T or by the Bureau via PA0LEY. For more details on QSL info, see QRZ.com. Also, visit his Web page at: http://8q7tb.pf4t.nl

C4, CYPRUS. Look for Andy, LZ2HM, and possibly others to be active as C4I during the CQWW WPX CW Contest (May 30-31st) as a Multi/? entry. QSL via LZ2HM.

C4, CYPRUS. Operators Valentin/5B4AGM, Alex/5B8AD and Oleg/UA9CDV will be active as C4N during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via W3HNK. Visit the contest station's Web page at: http://www.c-4-n.com

CY0, SABLE ISLAND (Attention Topbanders). Randy, N0TG, informs OPDX that the CY0 Sable Island Dxpedition team will incorporate the famous "Battle Creek Special" antenna for 160 meters as well as 80/40m. This was made possible by the generous loan program coordinated through George, W8UVZ. The team thanks this special group for their support for not only for their CY0 operation, but for the many DXpeditions down through the years. The dates of the DXpedition are October 19-26th. operators are Randy/N0TG, Ron/AA4VK and Murray/WA4DAN. Visit their Web page at: http://www.cy0dxpedition.com

DX BULLETIN READER PROGRAM. An interesting program written by Alex, VE3NEA, called "DX Bulletin Reader 1.0" (for Windows 95/98/ME/NT4/2000/XP) is a tool for viewing, archiving and searching the DX news bulletins. The following publishers/bulletins are currently supported:

Ohio/Penn DX Bulletin DX Newsletter
425 DX News The Daily DX
425 DX Calendar WAP Antarctic Bulletin
ARRL DX Bulletin I.C.P.O. Bulletin
Bulletins not listed above and non-periodical publications can be added as "Other". The software is FREEWARE and is available at: http://www.dxatlas.com/BullRead/

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following operation is approved for DXCC credit:
7Z1CQ - Saudi Arabia; Current Operation
If anyone had this operation rejected in a DXCC application, send an E-mail to dxcc@arrl.org to be placed on the list to have your account updated.

E51, SOUTH COOK ISLANDS. Nigel, G4KIU, is now active as E51SC from the Island of Rarotonga (OC-013). He has moved to the South Cook Islands and is expected to be on 80-10 meters mainly on SSB, RTTY, PSK31 and with some CW. He was heard this past week on 20 meters PSK31 between 0330-0630z. Direct QSLs are to be sent to: Nigel Peacock, P.O. Box 880, Rarotonga, Cook Islands (via New Zealand). Please send a SAE, plus 2 USDs or 2 new style IRCs. Any direct cards received without the above items will be returned via the Bureau. Bureau QSLs go to: E51SC via G4KIU/RSGB. **IMPORTANT** There is no QSL Bureau in the Cook Islands. Cards without G4KIU on them will NOT be received. Please "DO NOT" send direct cards to any G4KIU address in England - they will NOT arrive. All E51SC contacts will be loaded to LoTW about once a week. He does not use e.QSL at all.

EI09, IRELAND (Special Event). Members of the Galway Radio Experimenters Club are now active using the special event callsign EI09VOR until June 6th. Activity is to celebrate the Volvo Ocean Yacht Race which takes place in Galway, Ireland. Look for both CW and SSB operations. Over the past week activity has been on 30/20/17 meters. Operators will be operating from Mutton Island Lighthouse. QSL via EI8DD. For more info, visit their Web page at: http://www.galwayradio.com

EN50, UKRAINE (Special Event). Members of the Rivne DX Club (UT1KWA) will be active as EN50KSR between June 1st and July 5th. Activity is to celebrate the 50th anniversary of the Rivne speedway. QSL via UT1KY: P.O. Box 85, Rivne, 33027, UKRAINE. Visit their Web page at: http://radio-rivne.rv.ua/?lng=en

FS, ST. MARTIN. John, K9EL, will be here on a family vacation between June 4-12th, and will be operating whenever possible. He will be using an IC7000 and verticals for 80-10 meters and will be operating CW, SSB and RTTY. Please QSL to his home callsign; Bureau cards are "OK". ADDED NOTE: John informs OPDX, "I have already received a few E-mails asking me to try 6m, so I will build a vertical or dipole when I get there and try 6m as well. Next time I'll bring a yagi...."

HF70/SN70/SO70, POLAND (Special Event). Look for members of the Polish Radio Amateur Associated (PZK) to activate the following special event

stations during the 70th anniversary of the beginning of World War II.
The "NO MORE WAR" stations will be on the air during various times between
September 1st and October 6th. The following stations are:
HF70NMW (by SP6ZDA) SN70N (by SP2CA) SO70R (by SP4NDU)
SN70NMW (by SP4JCP/SN4L) SN70O (by SP8NFZ) SO70E (by SP4JAE)
SO70NMW (by SP3ZIR/SN3B/SQJPV) SN70M (by SP9KN) SO70W (by SP5PPK/
SN70R (by SP2YRY/SP2UUU) SQ5NAE)
HF70N (by SP5KDK/SQ7HNT) SN70E (by SP1MWF) SO70A (by SP9YGD)
HF70O (by SP2LQP) SN70W (by SP2LNW)
HF70M (by SP8MI) SN70A (by SP2KMH/SQ2MMS)
HF70R (by SP4ICP)
HF70E (by SP5X) SO70N (by SP2AYC)
HF70W (by SP2KDS/SQ2BXI) SO70O (by SP9KAJ/SP9CLU)
HF70A (by SP5PSL/SP5JXK) SO70M (by SQ9JKD)

IOTA NEWS.....
EU-048. Francois, F5JNE, will be active on Belle-Ile-en-Mer (DIFM
AT-15, WLOTA L-078) between June 16-24th. Activity will be
CW only on 40 and 20 meters, mainly in the evenings. QSL
via F5JNE, direct or by the French REF Bureau.

EU-048. Jean-Pierre, F6ITD, will be active as homecall/p from Belle-Ile
between June 20-28th. Activity will be on the HF bands (no
17/12m) on SSB only. QSL via F6ITD.

EU-064. Operators Pierre/F5AAR and Alain/F5OZC will be active as
homecall/p from Yei Island between June 3-5th. Activity will
be on 80-10 meters using CW and SSB. QSL via their home
callsigns.

EU-064. The F6KOP team will defend its World IOTA Champion 1st place
title for the 3rd time in this year's RSGB IOTA Contest (July
25-26th) from Noirmoutier Island as Multi-Single/Mixed/24H/
Low-Power entry. Callsign will be TM7C. Operators mentioned
are: Bernard/F9IE, Serge/F6AML, Jean-Paul/F8BJI, Flo/F6CWU,
Pascal/F5JSD and Maurice/F5NQL. Bruno/F5AGB and John's/F5VHQ
participation is pending. QSL Manager is Flo, F5CWU. QSL
either direct or through the French REF-Union Bureau (Please
only this bureau).

EU-090. Operators Wolfgang/OE3WGC and Gert/OE3ZK will be active as
9A/homecall from Palagruza Island (ACIA IC-901, CIA-33, IOCA
CI-084, MIA MC-284) and lighthouse (CLHA CLH-100, ARLHS CRO-012,
TWLHD WLH 9A-046, WLOTA 0057) between May 30th and June 6th.
Activity will be on CW, SSB and RTTY. QSL via their home
callsigns, the Bureau is preferred.

EU-095. Operators Robert/F5HTR and Roger/F5LKW will be active as
homecall/p from Riou Island on June 8th. They will travelling
in a kayak and will be active as QRP on 40 meters. Listen to
7032 kHz. QSL via their home callsigns.

NA-029. Operators Gregg/VE3ZZ and Noel/VE2BR will once again operate from Prince Edward Island (CISA PE-001) on July 15-27th, using the VY2TT superstation. During the IOTA Contest (July 25-26th), they will operate as VY2Z (QSL to VE3ZZ) and outside the contest as VE3ZZ/VY2 and VE2BR/VY2. QSL via their home callsigns, direct or via the Bureau.

NA-129. John, VE8EV, will use the special callsign VC8B for the Banks Island DXpedition, July 24-27th. Operations will be from Sachs Harbour, NT. Activity will be only SSB, mostly on 20 meters which, aurora permitting, should be open round the clock. He will watch for openings on 15 and 10 meters as well. He does not anticipating any problems unless there is a delay for weather, likely fog, which is common that time of year. QSL via VE8EV, direct (SAE and IRC or 2 greenstamps) or by the Bureau. Online QSL requests and a log search will be available after the operation. Look for updates at: http://ve8ev.blogspot.com/search/label/IOTA

NA-223. (Update/Date Change) Members of the Russian Robinson Club will be active as KL7RRC from Ogliuga Island, Alaska, between June 14-19th. Regular suggested IOTA frequencies (14.040/14260 etc). Operators mentioned are: Yuri/N3QQ and Johnny/KE7V. QSL via: RU/EUROPE - Yuri/UA9OBA and US/JA/SA Dick/N7RO. Watch for updates on: http://www.na-234.com/contact_chuginadak_expedition.html

SA-071. (Update/Change In Callsign) Members of the Sao Paulo Association of Radioamadores (APRE) will be active as PR2R (not PT2T as previously mentioned) from Ilha da Moela (DIB SP-06, DFB SP-07, ARLHS BRA 043, TWLHD WLH PY-031, WLOTA 1335, WW Loc. GG65UW) between June 11-14th. Activity will include operations from blockhouses, islands and lighthouses of the State of Sao Paulo. Operators include Irineu/PY2IAB, Marcelo/PY2OMT, Thiago/PY2TLB, Joao/PY2TI, Claudio/PY3NZ, Felipe/PU2OVA, Filipe/PU2TEA and Thiago/PU2TJQ. Operations will be on 80-2 meters, SSB only. QSL via PY2OP, direct or by the Bureau. For more info, go to: http://www.apre.com.br/moela

K5, UNITED STATES (Update - HF/6m/Grid/LH/USI Op). Just a reminder that the members of the "EL58 Grid Activation Group" will be active as K5N between May 29-31st (1700-1700z). Activity will be from the sandy beach facing the Gulf of Mexico in Grid Square EL58hx, ARLHS USA 1101 under the "Visual Site Rule" and a New USI Island (USI LA105S - Burwood Island, LA) (South West Pass). The operation will be mainly 6 meters and HF. They will have 2 stations on 6m and one on HF using SSB/CW. Operating frequencies on 6m are: 50.100/CW, 50.150/SSB and 50.315 Meteor Scatter. QSL via: Joey Fierro II, 1054 Cajun Ln, Magnolia, MS 39652. Operators mentioned are: Al/WA4EWV, Bill/K5YG, Bob/WN2E, Bruce/N5SIX, Daniel/KE5KDM, Danny/N5OMG and Marshall/K5QE. Visit their Web pages at: http://www.kcvhfgridbandits.com/kc_vhf_grid_bandits_018.htm http://w4abc.com/K5N.html

MUSEUM SHIPS WEEKEND EVENT. The "2009 Museum Ship Weekend Event" is sponsored by the "Battleship New Jersey Amateur Radio Station" and will be held next weekend, between 0000z June 6th, and 2359z June 7th. As this was been typed, some 76 museum ships are participating. For an up-to-date listing of participating museum ships, frequencies and details on a certificate which is available, please visit:
http://www.nj2bb.org/museum/index.html
Activity will be on all HF bands, 80-10 meters, using CW, SSB and PSK31. Some ships will also use Amplitude Modulation (AM) with either their ships original equipment or modern equipment.

NEW AWARD AVAILABLE. Francis, F6FQK, informs OPDX that a new TP2CE Radio Club diploma is now available called: "Council of Europe Radio Amateur Club Award". Complete rules and photos are available on:
http://ewwa.free.fr

OH0, ALAND ISLAND (Possibly OJ0). Manuel, CT1BWW (SWL CT0783), will be active as OH0/CT1BWW between July 26th and August 7th. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via CT1BWW, direct or by the Bureau. Manuel may be active as OJ0/CT1BWW from Market Reef on August 1st. For more info, visit Manuel's interesting Web page at:
http://www.geocities.com/oh0ct1bww

PA6, NETHERLANDS (Special Event). To celebrate the reopening of a 800 year old church tower (after its renovation) in Noordwijk, look for PA6JEROEN to be active between June 4-14th on HF and VHF. The old church is called "Oude of St Jeroenskerk" (in English: Church of St. George). Actual operations from the church tower will take place on two Fridays, June 5th and 12th. Pictures of this tower can be viewed on:
http://picasaweb.google.nl/jaap.pa7da/OudeOfStJeroenskerkTorenbezoekNoordwijk#
Please QSL only via the Bureau to PA7DA. ADDED NOTE: Jeroen (St. George) was a Monk from Scotland and arrived at the Noordwijk (Nortgho) in 847. In 857, he built a Chapel on the place of this Church and did bring Christianity to the people in the western part of Holland and West Friesland. Later he had been killed by the Normans!

PY2, BRAZIL. Alex, PY2SEX, from Sao Paulo, will be active during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Single-Band (40m)/ Low-Power entry. He wil use a 2 element yagi and a FT-950 w/100w. QSL via his home callsign, by the Bureau, direct (see QRZ.com) or LoTW.

PZ, SURINAME. Mike, AJ9C, will be active from between October 22-29th. His callsign will be announced when it is assigned. He is expected to be active on 160-6 meters using CW, SSB and RTTY, as well as an entry in the CQWW DX SSB Contest (October 24-25th). QSL to his home callsign with SASE/USD(s) for return postage.

QSL INFO AND NEWS.....
9J2QQV INQUIRY. OPDX has been asked to inquire if anyone knows where Ryuji, JO7QQV, is and if anyone has received their 9J1QQV QSL.

QSL TC098A via OK2GZ (Bureau or direct). Operators OK1MU, OK1DF, OK1FIA and OK1CDJ were active from Karaada Island (AS-098) for 59 hours and

made 11,183 QSOs. More info, photos and an online log are available at:
http://www.okdxf.eu/expedice/tc098a/en/

QSLS VIA LOTW: 9U0A, EY8MM, HL2FDW, KH6ND/KH5, NL7Z, PY0FF, SP4K,
YS1G, ZK2V and ZP6CW

QSLS RECEIVED VIA MAIL: 4U1UN, 4V4JR, 5N/LZ1QK, 8Q7HN, 9L1DX, A61Q,
BD7NWF, CS2C, CY9SS, FK/G3MXJ, J88DR, PY0FF, S51CK, SU1SK, SU9BN,
TA1HZ, TS7C, US0KW, VK9N/G3MXJ, VK0BP, VP8/LZ1UQ, YJ0MXJ and Z29KM

QSLS RECEIVED VIA THE BUREAU: 3V8SS, 4W6AAV, 6L0NJ/4, 8R1K, 9G5A/P,
A5100A, C91CW, CE3BFZ, CE0Y/LA6IKA, CE0Z/DL2AH, E51WWA, ER3ZW, FJ/SP3IPB,
FJ/SP6IXF, FO/AP2SOI, H44MS, HL0LPM/3, J28JA, MJ/F5CWU, MJ0LON,
MM/DH5JBR/P, OX/G3TXF, P29KN, PJ6/K2KW, T32CXX, TS7C, V31XX, V73PX,
VI5PN, VK9ALH, VP8YLB, YI9RKB, YK9SV and ZD7X

TA7, TURKEY. Operator Berkin, TA3J, will be active as TA3J/7 and TA7KI
from Erzincan City (KM99RS) between May 26th and June 2th. Activity will
be on all bands using CW, SSB and the Digital modes. QSL via TA3YJ,
QSL Service at: http://www.aydogmus.gen.tr/ta3yj/qslservice.htm

TC2, TURKEY. Members of the Turkish group called TCSWAT (Special Wireless
Activity Team) is proud to inform upcoming operations from TC4X. The
Finnish-Turkish Friendship Consortium station operating from Alanya,
Turkey, will be once more on the air during the CQWW WPX CW Contest
(May 30-31st). Operator will be Pertti, OH2PM. QSL via Martti, OH2BH,
as usual.

TK9, CORSICA (EU-014). Members of the DXCiting Team will be active as
TK9X between July 25th and August 1st. Activity will be on 160-6 meters
using CW, SSB, RTTY and FM. Operators mentioned are: YL Silvia/EA1AP,
Alberto/EA1SA, John/EA3GHZ, Raul/EA5KA, Paco/EA5RU and Alicia/EA5EWM.
QSL via EA4URE, direct or by the Bureau. Visit their Web page at:
http://www.dxciting.com/tk9

U.K. TRIP. Bruce, ZL1AAO, informs OPDX that he is going on a "DXing and
nostalgia trip to the UK for ex-GM1KNP". He wants to advise DXers and
friends that he will be touring in the UK during July and August. Bruce
will be using the UK country prefixes followed by his New Zealnd callsign
(e.g. MM/ZL1AAO when in Scotland). He expects to be in Scotland, England
and Wales (as he holidays around) and hope to include some activity from
the Orkney Islands. Activity will be limited to mobile/portable operations
using a FT857D, multi-band vertical or a tuner with long-wire. Mode will
be SSB only. He will produce a special QSL celebrating his activity. Check
QRZ.com for some more details and updates when he has more specific plans.
QSL via his home callsign.

VP9, BERMUDA. Alex, W5YDX, will be active as VP9/W5YDX between June
10-24th. Activity will be holiday style (during his spare time) mainly
on 20 and 17 meters (suggested freqs. between 14140-14265 kHz) using
100 watts into a dipole. QSL via W5YDX.

WORK ALL RADIO ARCALA NETWORK STATIONS AT ONCE. Martti, OH2BH, sent out the following press release on May 22nd (edited): "You now have an opportunity to contact all Radio Arcala network stations at once: OH8X, Finland; CU2X, Azores and TC4X, Turkey. During the May 30-31st, 2009 CQ WPX CW Contest, Pasi, OH6UM, will command OH8X while CU2X will be piloted by Toni, OH2UA, and TC4X by Pertti, OH2PM. All as single operators. You may also hear Martti, OH2BH, active as CU2KG from his new residence in Ribeira Grande, Northern Azores, May 25th through June 1st. Also, new Portuguese regulations will become effective on June 1st, and this is the last run for the CU2X callsign. Resident operators can keep their original CU2 callsigns but special events, such as contests, will be issued with callsigns from the new CR1, CR2 and CQ8 series. All new licenses and/or expired residential licenses in the Azores will be issued the CT8 (1), CS8 (2) and CR8 (3), depending their license category. QSL CU2X and TC4X via OH2BH, OH8X via OH2UA."

ZD8, ASCENSION ISLAND. Dean, KJ4GNB, is now active as ZD8DC. His length of stay was not known as this was being typed. Activity so far has been on 20 meters SSB. QSL ZD8DC via KJ4GNB.

ZK2V NIUE OPERATION UPDATE. Chris, ZL1CT/GM3WOJ, provided OPDX with the following operation update: "A quick update from ZK2V - made 6100 QSOs in 9 days, which is a bit disappointing - conditions poor, especially last weekend. Made only 1 QSO on 160m and 2 QSOs on 80m, so concentrating on the higher bands. Openings to Europe are often short with weak signals, which is lowering the QSO rate, but signals from JA and the USA have been strong. Will be on RTTY tomorrow (28th May) for about 30 mins sometime between 0600 and 0800 UTC (14082 approx QSX up 8) - will do more RTTY if things work well. For the first time from Niue, I have a special permit to operate on 60m - from 0000 Niue time (= 1100 UTC) on 1st June 2009 until 0000 Niue time (=1100 UTC) on 8th June. I can transmit *only* on 5403.5 kHz (USB for USA, but CW for rest of world), but will listen on 5371.5 or another channel. The website www.zk2v.com is updated nearly every day - there is an online logsearch and all QSOs are uploaded to LoTW every few days. ZK2V is QRV for 25 more days and hoping for better propagation. QSL direct or via the bureau to N3SL (not ZL1CT)."

The following stations are expected to be active in the
CQWW WPX CW Contest (May 30-31st, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2009 CQWW WPX CW Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/wpxc2009.html (By callsign)

==> FCC'S BILL CROSS: "BEHAVE YOURSELVES!"

Bill Cross, W3TN, a staff member in the FCC's Mobility Division
<http://wireless.fcc.gov/index.htm?job=md>, and Laura Smith, FCC Special
Counsel for Amateur Enforcement, spoke at the FCC Forum on Saturday, May 16
at the 2009 Dayton Hamvention. Cross opened by explaining just where Amateur
Radio falls in the FCC's bureaucracy: "In the Mobility Division [part of the
Wireless Telecommunications Bureau <http://wireless.fcc.gov/>], we handle the
day-to-day administration of the Amateur Service and some of the rulemaking
activities that affect Amateur Radio. The Division also has staff members in
our Gettysburg, Pennsylvania office. Our Gettysburg staff handles most of
your applications and the licensing matters and deals with the Universal
Licensing System, or ULS" <http://wireless.fcc.gov/uls/index.htm?job=home>.

Cross offered some general comments on the Commission and its priorities,
then went on to discuss topics that he said "keep coming up in questions we

receive in articles that appear on Web sites and in columns in newsletters and the like. I'm not going to spend a lot of time talking about Commission decisions that have been issued, because most of these have been reported on the ARRL or other Web sites."

Cross went on to say that he does hear from Riley Hollingsworth, who retired as Special Counsel for the Spectrum Enforcement Division in July 2008; Smith replaced Hollingsworth earlier this year. Saying he received an e-mail from Hollingsworth that asked his opinion whether he should get an amplifier or 260 feet of hardline, Cross said that was an easy question to answer: "Get both! Two hundred and sixty feet of hardline. Okay. Thirty feet through the house, 30 feet out to the tower and 200 feet straight up. That sounded pretty reasonable. But then I found out that what he was thinking about was 230 feet across the back yard and 30 feet up. So, I've still got some work to do there."

As for the FCC Administration, Cross said that "the relationships between the Commissioners are very collegial." Cross pointed out that earlier this year, President Obama nominated two people to fill Commissioner vacancies: Julius Genachowski for Chairman <http://www.arrl.org/news/stories/2009/03/03/10684/?nc=1> and Mignon Clyburn <http://www.arrl.org/news/stories/2009/04/30/10795/> to fill the seat held by Jonathan Adelstein. Adelstein has been nominated to head up the Rural Utilities Service, of the United States Department of Agriculture <http://www.arrl.org/news/stories/2009/03/23/10716/?nc=1>. "The last I read was that their confirmation hearings would be held after Memorial Day, and beyond that, we really don't know what's planned," Cross told the crowd. "So maybe by the end of the summer, sometime during the summer, the Commission will be back up to its complement of five Commissioners and we will have a new Chairman, too."

RACES

Cross said that he has been getting questions concerning RACES <http://en.wikipedia.org/wiki/RACES>, asking what plans the FCC has to rejuvenate the organization. "The questions have been from a couple of FEMA guys who also happen to be hams," he said. "Now, in RACES, stations are certified by a civil defense organization and persons who hold an FCC-issued Amateur Radio operators license are certified by that civil defense organization as enrolled in it. I know that the term 'civil defense organization' is way out-of-date -- 'emergency management agencies' is probably a more current term. But the terminology used in the rules reflects that RACES was created in the Cold War era when there was a concern that everyone would be ordered off the air."

Cross pointed out that RACES "seems to be used for local, state and regional events and it is administered by FEMA. The rules require that communications transmitted in RACES be approved by the organization that certified people and that they're enrolled with. Fundamentally, RACES is there to serve whatever purpose that the emergency management agency has for it. Because the emergency management agency decides whether it has a use for a RACES group, the rejuvenation, if it is even necessary, will have to come from the local

or state organizations. They will have to get people interested in joining their groups if they have a use for them. Some of the people I have talked to in different government agencies wonder why we still have this service, given the way that emergency communications are run and managed today."

Amateur Radio and Pecuniary Interests

A topic that keeps popping up, Cross said, is business use of Amateur Radio, specifically transmitting messages on behalf of an employer. "Section 97.113 <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.113.pdf> answers this question straight on: 'No amateur station shall transmit communications for hire or for material compensation, direct or indirect, paid or promised, except as otherwise provided in these rules.' There are two exceptions. There are exceptions for teachers who are using Amateur Radio as the control operator of a station in an educational institution as part of a classroom thing and control operators of club stations in certain cases. A station is also not allowed to transmit communication in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer. There is an exception to that rule that allows you to transmit communications that are commonly referred to as "swap nets," but eBay see
ms to have reduced the need for these nets. And you're not allowed to transmit communications on a regular basis which could reasonably be furnished through other radio services."

Cross said that Section 97.113 is in the rules for two reasons: It meets a statutory requirement and it is there to protect your frequencies from becoming the business radio alternative voice overflow, or "'BRAVO Service.' Because your spectrum is so valuable, if you let users such as businesses, TV stations, the National Weather Service or other users -- be they for-profit or non-profit -- use your frequencies to meet their communications needs, your frequencies will become their frequencies. All it takes is an allocation proceeding with the FCC, and your spectrum is gone. And you will be left whining about it in Internet chat rooms."

Cross pointed out the ARRL Chief Executive Officer David Sumner, K1ZZ, "had an editorial on this on April 1, 2009 [on the ARRL Web site and in the April 2009 edition of QST] ["It Seems to Us: Keeping the 'Amateur' in Amateur Radio," page 9]. That's probably not the best day to date something, but you should read it. And I have plagiarized from that greatly because it is very elegant and spot on" <http://www.arrl.org/news/features/2009/04/01/10668/>.

The bottom line, Cross said, is "that when any of us are on the air as amateurs in the ham bands, we are not pursuing financial gain for ourselves or our employers. The 'no pecuniary principle' has been reflected in the FCC regulations since 1928. It distinguishes us from commercial services. In 1993, the Commission, at your request, dropped the 'no business communications' language and simply prohibited communications on behalf of an amateur's employer or in which the amateur has a pecuniary interest. The Commission stated that any amateur-to-amateur communications is permitted unless specifically prohibited or unless transmitted for compensation or done for the pecuniary benefit for the station control operator or his or her

employer."

Cross said that it does not matter what type of technology -- be it SSB, digital, slow scan TV or CW -- is used to transmit that communications: "It boils down to a simple four part test that you, as the control operator of the station, must ask yourself before you cause the station to transmit a message. One, is the communications expressly prohibited in the rules? For instance, is it music, is it obscenity, something like that. Two, is the communications transmitted for compensation? Whether it's paid or compensation in some other way, such as, 'If you get this message to a friend of mine who's on a sailboat in the middle of nowhere, I'll pay your light bill.' Or, 'Get this message to someplace and I'll buy you a new radio.' That's indirect compensation. Three, does the control operator have a pecuniary interest in the communications? That is, could he or she benefit financially? Stock trades on ham radio benefit you financially. And four, does the control operator's employ
er have an interest in the communications? If the answer to each of these questions is 'no,' then the communications is acceptable with the caveat that it is not on a regular basis, one which could be furnished alternatively through other radio services."

There are limits to what an amateur can do on behalf of his or her employer, Cross said, as well as limits to the extent that Amateur Radio can be used for the purpose for which other radio services were created. "'No communications on behalf of an employer' means just that," he said. "There's no exception for the 15 minutes you're on break. There's no exception for 'Gee, it's the weekend,' or there's no exception because you want to do it. If it's your employer, you cannot transmit communications on their behalf. That is a commercial communications."

Public Service Communications

The last topic Cross addressed concerned public service communications. "There's no rule about public service communications as such in Part 97, because most of the messages you transmit that you think of as public service communications are allowed by Section 97.111 <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.111.pdf>. Paragraph (a) authorizes an amateur station to transmit two-way communications including, among other things, exchanging messages with other stations in the Amateur Service and communications necessary to meet essential communications needs and to facilitate relief actions." Cross noted that most of these transmissions -- the essential communications needs and facilitating relief actions -- are two-way exchanges with messages with other amateur stations. "The rule also authorizes you to transmit one-way communications, such as transmissions necessary to make adjustments to the station -- these are your tests, your tones, tossing the carrier to s
ee what the SWR is, that sort of thing -- and brief transmissions necessary to establish two-way communications with other stations."

Cross said that the rules cover everything we do as Amateur Radio operators: "Ragchewing, DX, contests, DXpeditions, county hunting, tuning up, everything. Ninety-nine percent of our communications fall under the rules that are there."

Emergency communications, by their nature, involve an element of immediacy, immediate safety of property and life. "Reporting where damage is, what happened after a tornado goes through or where power lines are down, is certainly public service communications and it's allowed under 97.111, but it may not involve an immediate safety of life and property," Cross explained. "A bridge washed out, for example, may need a more immediate response than downed trees, and reporting that is already allowed as just two-way communications between stations. A car with occupants floating down a river is clearly an emergency situation. In cases like that, the rules already provide that at all times and on all frequencies, each control operator must give priority to stations providing emergency communications. I have never heard of a case where a ham station has come on a repeater or a frequency and said, 'I have an emergency message,' and someone said, 'Wait your turn.' That's not your style
."

Laura Smith

The Dayton Hamvention was one of the first events Smith has attended in her role as Special Counsel. Cross introduced Smith, explaining that he used to work for her and that she was "one of the best people that we possibly could get for this job, because before she came to the Wireless Bureau, she had worked in mass media. After she had been in the Wireless Bureau, Laura had been the president of a trade association in Washington. Many of the issues that come up with other entities using amateur spectrum are entities that are either in mass media services or in land-mobile services and they are basically lusting after your bands. So we are fortunate now that when someone calls up, Laura has this breadth of knowledge of not only what the amateur stuff is, but where [land-mobile and mass media services] actually really should belong. And she can counsel them very gently that they need to get licensed here and not, you know, where they think they are. This is something you don't
see. Believe it or not, this is a tremendous help to you."

He mentioned that Smith plans to stay in this position for the long haul: "So if you have any ideas about a short-timer or think you're going to get away with it, plan on about 15 years down the road. In the meantime, behave yourselves!"

Smith explained that when she took over the amateur enforcement position earlier this year, the job had changed a bit from when Hollingsworth was in the office. "This job used to be in the Spectrum Enforcement Division down in DC; it was a remote position in a DC office," she explained. "It is no longer in that Division. I am actually a Field Agent. I'm attached to the FCC Field Office, I'm in the Northeast Region and my supervisor is the Regional Director for the Northeast Region." She told the crowd that she has spent a large portion of her time going through all the files that had accumulated, about 430 cases, while the position was vacant.

She explained the different types of complaints her office receives, such as complaints dealing with criminal investigations, technical violations, harassment and language complaints, malicious interference complaints and unlicensed users.

Smith also handles RFI complaints. Saying that these complaints are "ultimately going to be the most troublesome," she explained that there are two kinds of RFI complaints. "The first type of RFI complaint I get are the ones where your neighbors are complaining about you. You guys are causing interference to their television or to their radios or their telephone. The Commission generally tells them if you are a licensed amateur operator operating in the parameters of your license, then the Part 15 device that you are causing interference to is subject to that interference, and the rules state that very clearly. We suggest that they either work with you or they get a filter; those are the two suggestions."

Smith, in cooperation with the ARRL Lab, also handles utility line interference complaints. "This one, you would think, would be easy to resolve -- the power line is causing interference, the utility will come out and fix it and everything will be fine. Not quite so easy," she explained. "Those of you that have been experiencing it for 3, 4, 5, 10, 12 years know that in fact, that is not what happens. What I am discovering is that the utilities quite simply don't know how to fix the problem. They can't identify the noise. What they will do is they will go out and will find 15 sources of noise. They will fix these 15 sources of noise and then they will come back to me with this detailed list of these 15 sources of noise that they have fixed. Yea! We're all done. No -- they haven't fixed your noise. So they don't quite understand the concept of 'Don't just run out and fix everything you see, that's irrelevant to the amateur.' The amateur wants you to fix their noise."

Smith described that the first step the utilities need to do is to go to the amateur's house and listen to the noise and determine exactly what they're hearing. "This way, when they fix it, you can ultimately figure out if you have in fact fixed their noise. I'm trying to figure out a way with the Lab as to how we can best tell the utilities that they really need to think about how their processes work and what we can do to educate them so they can get out and fix this."

Smith has also given utility companies time limits to fix the noise complaints. "I am telling them, 'If you go out and you can't fix it, every two weeks you have to report back to me in writing why you can't fix it.' Utilities are, generally speaking publicly traded companies, so what happens is that they have a Board of Directors that they answer to. Those people are not going to want them to waste time and energy writing this crazy woman in Gettysburg every two weeks a detailed report. And believe you me, if they miss their deadline, I call them and tell them 'You've missed your deadline. I need your report.' I have spoken to more heads of utilities in the last three weeks than I ever care to speak to again. They have no qualms about calling me, saying 'We can't meet the deadline.' And I explain to them that's fine, I'll just write up this nice little letter [saying] you can write your check to the federal government."

Smith suggested to the amateur community "that we as a collective -- you guys and me -- we can have a great relationship, we can do this the easy way. You guys can, in fact, follow the rules and remember that when you signed up to become an amateur, you actually committed to adhere to the Commission's

rules. I'm going to strongly suggest that you hold to that. If you don't we can do this the difficult way, and I am more than willing to do that if it comes down to it."

Questions and Answers

Cross and Smith then took questions from the audience. They concerned grandfathering Advanced class license holders to Extra class, enforcing Amateur Radio rules on stations originating outside the US, what type of internal review is required before a Notice of Apparent Liability is issued, keeping undesired hams off a repeater system, issues with D-STAR repeaters allowing Internet content to be carried on amateur frequencies and establishments that sell 10 meter radios disguised as 11 meter radios.

Smith also told the crowd why she has not yet become a licensed Amateur Radio operator: "My father-in-law is Richard Smith. He is the former Chief of the Field Operations Bureau. The Field Operations Bureau was the precursor to the Enforcement Bureau. When Dick started his career at the FCC, he worked in the LA Field Office as an engineer; one of the duties that he had while he was out there was to administer the Amateur Radio tests. His expertise just so happened to be in the Code. He is an incredible operator. And so when I decided to take this job, I did not want to run out and get my license before I took the job for a lot of reasons. Not the least of which is I felt it would be a sham -- I wasn't an amateur before I took the job, I didn't want you to think that I was selling you so short that I was going to run out and get my license to try and validate myself for this industry. Instead, I said that I would wait and take the exam later and become an amateur as I got to k

now the community. When I told the story to Dick and I said I was thinking about getting my license, he said to me, 'You will not get your license until you can pass the code part of the test.' Unfortunately, he followed that up with a caveat, which was 'I will be there to oversee the administration of the test to determine whether or not you are competent and qualified to be an amateur.' So I have to learn code -- I obviously do not know it." Smith said she plans on learning CW this summer, along with her six year old daughter.

Cross closed the forum, quipping, "For those of you who are concerned, I made sure she went by the Vibroplex booth, and we also stopped by the Begali booth. So she got to see what the minimum requirements are for proper CW."

An audio feed of the FCC forum can be found on the ARRL Web site <http://www.arrl.org/news/files/FCC-Forum-2009.mp3>.

==> ARRL DONORS GATHER IN DAYTON

More than 100 ARRL donors gathered to mix and mingle at the ARRL's Eighth Annual Donor Reception on Thursday, May 14, just prior to the 2009 ARRL National Convention and Dayton Hamvention. Hosted by the ARRL as a way to thank those who donated $1000 or more to the League in 2008, the reception -- held at the Meadowbrook Country Club -- featured a sumptuous buffet and a speech by new IARU President Tim Ellam, VE6SH/G4HUA <http://www.arrl.org/news/stories/2009/02/11/10645/?nc=1>.

"It is always great fun to see many of our good friends at the Annual Donor Reception," said ARRL Chief Development Officer Mary Hobart, K1MMH. "I have a chance to catch up with the wonderful group of people share our dedication to ARRL and Amateur Radio. In the eight years that we've been holding this event, its popularity grows and we get to meet new donors, and in some cases, their spouses and children. We look forward to hosting this evening and having an opportunity to thank key donors in person for all they do to support ARRL."

One of the highlights of the evening was the introduction of three new members of the ARRL's Maxim Society <http://www.arrl.org/development/maxim.html>: Frank Donovan, W3LPL, of Glenwood, Maryland; Tom Hutton, N3ZZ, of Cupertino, California, and Tom Porter, W8KYZ, of Avon Lake, Ohio. With the addition of these three amateurs, there are now 61 members of the Maxim Society. Maxim Society donors are those amateurs whose lifetime giving exceeds $10,000.

This elite group embodies the spirit of ARRL co-founder Hiram Percy Maxim, W1AW, who, in 1914, envisioned an organization dedicated to encouraging and developing Amateur Radio as a source of enjoyment for radio operators and as a public service to communities nationwide. Maxim Society donors nurture the legacy and leadership exhibited by "The Old Man" so many years ago. Their infectious enthusiasm and deep commitment to Amateur Radio and ARRL are evidence of their abiding loyalty. Their willingness to contribute generously to the work of ARRL is evidence of a remarkable dedication to the vision of Hiram Percy Maxim.

After a welcome from ARRL President Joel Harrison, W5ZN, ARRL CEO David Sumner, K1ZZ, introduced Ellam, whose remarks focused on the impact that the ARRL had on his introduction to Amateur Radio as a young man in Canada, telling the story of how the ARRL Handbook played a pivotal role in his effort to secure his first Amateur Radio license in 1976.

"One of the textbooks for the Amateur Radio class run by my local club was the 1976 version of the ARRL Handbook," Ellam told the group. "The club also paid for associate membership in the ARRL, Canadian Division, which had the benefit of allowing students to receive QST. When it came time to write my exam, I decided to be a rebel. Rather than using all of the approved schematics to memorize and draw for the exam, I made one change: I drew a simple key klix filter that I had memorized from the ARRL Handbook.

"Weeks later, my exam results came in the mail. I had failed. The Canadian government decided the ARRL version of the key klix filter would not work north of the border and gave me a zero. This meant I failed the entire test, with no possibility of retaking it for several months. My hopes of becoming an amateur were crushed. So off to the local office of the Department of Communications I marched, with my trusty ARRL Handbook under my arm. After a spirited debate, the person manning the desk at the office allowed me to speak to an examiner and review my results with him. He argued I had failed to draw a correct key klix filter. I showed him the one in the ARRL Handbook. He refused to accept it! I pushed the issue. We went to see the district director, who was an amateur. He took one look at the schematic and said, "This is from the ARRL Handbook -- it must be right!" and overruled the

inspector and passed me on the spot.

"I was so impressed by the power of the Handbook that I have maintained my ARRL membership to this day. By doing that, I of course received QST and through that, I became aware of the work of the ARRL and IARU."

Ellam said that it was "an honor to speak at the ARRL Donor Reception in front of so many supporters of ARRL and the Amateur Service. The IARU appreciates the support of the ARRL as the International Secretariat."

For more information on giving opportunities, please visit the ARRL Development Office Web site <http://www.arrl.org/development/>.

==> FRANK BAUER, KA3HDO, RECEIVES ARRL PRESIDENT'S AWARD

On Saturday, May 16 during the forum featuring Richard Garriott, W5KWQ, at the Dayton Hamvention, ARRL President Joel Harrison, W5ZN, presented former Amateur Radio on the International Space Station (ARISS) <http://www.rac.ca/ariss/oindex.htm> International Chairman Frank Bauer, KA3HDO, with the ARRL President's Award. Bauer, who stepped down from ARISS <http://www.arrl.org/news/stories/2009/03/25/10724/> and Radio Amateur Satellite Corporation's (AMSAT) <http://www.amsat.org/> duties this past March, served as ARISS Program Leader and ARISS International Working Group Chair. Since 1991, he served as AMSAT Vice President for Human Spaceflight Programs.

The ARRL Board of Directors voted to create the President's Award in 2003. The President's Award is to go to an ARRL member or members who "have shown long-term dedication to the goals and objectives of ARRL and Amateur Radio," and who have gone the extra mile to support individual League programs and goals. Nominations for the award come from directors and are approved by the ARRL President and the Executive Committee.

Under Bauer's leadership, Amateur Radio activities have been on human spaceflight vehicles, including NASA-sponsored ham radio activities on the shuttle, Space Station Mir and the ISS. Starting in 1983, Bauer led the Goddard Amateur Radio Club team that provided around-the clock space shuttle retransmissions from the WA3NAN club station. These retransmissions provided the international ham radio community up-to-the-minute information during the flight of Owen Garriott, W5LFL, on STS-9 <http://www.nasa.gov/mission_pages/shuttle/shuttlemissions/archives/sts-9.html> and subsequent SAREX flights. In the days prior to the Internet, these real-time bulletins and frequent orbital element updates could only be obtained through Amateur Radio.

"For well over a decade, I have been fortunate to be part of a group that has been leading international teams together to focus on Amateur Radio on the ISS," Bauer told the ARRL. "As AMSAT Vice President for Human Spaceflight since 1991, I have really worked to get this international team to work as one, focusing on Amateur Radio. It is very critical to get all the space agency partners to have a vested interest in making sure we do Amateur Radio right on the ISS. We need to keep the partnership we have with our international team in good stead."

Bauer said that through the years, the AMSAT and ARISS teams have developed a substantial amount of hardware and software systems on the ISS. "We have trained astronauts and cosmonauts to use the equipment that we have on many modules," he said. "We have two systems on the Russian module with five antennas, and two L/S band antennas on Columbus <http://www.arrl.org/news/stories/2008/02/14/101/>, with new ones going up later this year -- all of this is being done by a volunteer team. Both AMSAT and ARISS have done a tremendous job promoting Amateur Radio, allowing hams to talk with astronauts and encouraging children to pursue technical careers."

Bauer said that when a new crew of astronauts comes on board at NASA, ARISS gives them a briefing, familiarizing them with the ARISS program and Amateur Radio in general. "We are very fortunate that all of the US astronauts of late have received their Amateur Radio licenses," he said. "We emphasize to them how important it is to get their license early in their training, because as their training progresses, they get caught up in everything and it is hard to find the time to study and take the exam. From an astronaut perspective, I think it's a little easier for them to pass the test, since they know most of the theory stuff, but they do need to be trained on the rules and regulations that govern the Amateur Radio Service."

ARRL President Joel Harrison, W5ZN, said he was very honored to present Bauer with his award. "I have had the pleasurable opportunity first hand to see Frank work with the international community to ensure Amateur Radio became and remained a part of manned space flight. Frank's ability to organize all parties to consensus regarding key issues was vital to the program. The amateur community owes a great deal of gratitude to Frank for his many years of dedication to service and education."

Bauer told the ARRL that he was "proud and humbled" to receive the ARRL President's Award. "It was a total surprise, I did not expect any of this. I want to thank the ARRL leadership for this very prestigious award. And thanks to the entire ARISS volunteer team for their outstanding support and diligence in inspiring our next generation of explorers through Amateur Radio contacts between school students and crew members on the ISS."

ARRL ARISS Program Manager Rosalie White, K1STO, who, together with Bauer, served as the USA delegates to ARISS, told the ARRL she was "very happy" for her colleague and friend: "Over the years, Frank continuously gave more to the ARISS project than anyone could ever expect of one person. He put his heart and soul into ARISS because he believed in its objectives: To introduce teachers and youth to Amateur Radio and the foundation of radio science, plus provide students with a way via radio to get involved in science, technology, engineering and math."

Bauer is currently the Chief Engineer for the Exploration Systems Mission Directorate at NASA. This directorate is developing the next generation human spaceflight vehicles that will take NASA to the International Space Station (ISS) and then to the Moon, Mars and beyond. He is also providing some backup support to the Space Operations Chief Engineer who supports the space shuttle and ISS programs.

==> ARRL FIELD DAY TIPS AND TECHNIQUES THAT EVERYONE CAN USE

Many amateurs treat ARRL Field Day (June 27-28) as a contest, even though it isn't one <http://www.arrl.org/fieldday>. But if your idea of Field Day fun is to go for the highest score possible, ARRL Contest Branch Manager Sean Kutzko, KX9X, offered the following suggestions at the ARRL Field Day Forum at the 2009 Dayton Hamvention.

1) You will get many more stations in your log by calling CQ than by tuning the dial and answering CQs; however, if you're calling CQ and not getting any replies, keep calling. Most major contesters call CQ for several minutes at a time before giving up. Giving up after three or four CQs is giving up too soon.

2) Keep your CQs short and to the point: "CQ Field Day, CQ Field Day, Whiskey-One-Alfa-Whiskey, Field Day." Wait about 5 seconds between CQs -- this gives stations enough time to answer you.

3) Use standard phonetics. "Cute" phonetics don't always get through and they can confuse newer operators.

4) When working a station, you should give your exchange information only once and keep it simple. "Whiskey-One-Alfa-Whiskey, copy three Foxtrot Connecticut, QSL?" If they didn't get all of the exchange, they will ask for a repeat.

5) If you are running a pileup: Once you have pulled a call out of the pileup, give your exchange information first. Here's an example: "Whiskey-One-Alfa-Whiskey, copy 3F Connecticut, QSL?" Don't ask for the calling station's information first -- this will reduce any sense of rhythm and timing in the pileup.

6) If you get a pileup of stations and can't make out an entire call, listen for one letter and ask for it specifically: "The station with Delta only, go ahead."

7) When you get the other station's information, keep your acknowledgment simple. "QSL, thanks, QRZ Field Day from Whiskey-One-Alfa-Whiskey."

8) Find a comfortable pace for you and maintain that pace. You will tire quickly if you are screaming into the microphone or trying to work stations too quickly. This leads to inefficiency.

9) Use a headset with a boom microphone and a foot switch -- this frees up your hands to log QSOs. Writing or typing with a mike in your hand slows you down.

10) Go for as many bonus points as you possibly can. Numerous opportunities exist, from copying the Field Day message to sending traffic to using natural power for QSOs.

These tips should help maximize your score on Field Day. Remember: No matter how you choose to enjoy Field Day, maximize your fun, however you define it.

==> THE ARRL TRIPLE PLAY AWARD: A WORLDWIDE EVENT!

The ARRL Triple Play Award (TPA) -- introduced January 1, 2009 <http://www.arrl.org/news/stories/2008/12/05/10490/> -- is available to all amateurs worldwide who confirm QSOs with each of the 50 states on voice, CW and digital modes via Logbook of the World (LoTW) <http://www.arrl.org/lotw>. Not even six months since its inception, the Triple Play Award has been awarded to 269 hams around the world.

The first recipient was Dave Strout, W2YC, of Williamstown, New Jersey. Strout achieved this milestone on January 15. The very next day, Jeff Wheeler, W7JW, of Plymouth, Michigan, received TPA #2.

But the TPA is not limited to US hams. On February 11, Scotland's Cris Henderson, GM4FAM, was the first ham outside the US to receive the TPA award, #158. Jose Vicente Pinto, YV6BTF, of Venezuela, received TPA #163, making him the first South American amateur to achieve the award. Hams in many countries, such as Brazil, France, Belgium, Spain, Germany, Poland, Colombia and Mexico, have claimed the Triple Play Award.

"An side effect of the Triple Play Award has been the increased issuance of basic Worked All States (WAS) <http://www.arrl.org/awards/was/> awards for Phone, CW, Digital and Basic modes," said ARRL Awards Manager Bill Moore, NC1L. "Comments on the Triple Play Award have been very positive, reflecting a renewed interest in the challenge -- and of course, the fun! -- that ARRL awards continue to provide. The Triple Play Award is the first of what we hope to be many more LoTW-only awards in the future."

The Triple Play Award is a one-time award -- once you have made the required 150 confirmed contacts via LoTW, you're done. "Even so," ARRL Chief Executive Officer David Sumner, K1ZZ, said, "there are many possible variations on the theme. You can try to be the first (or at least the first on your block) or you can set your own pace. Think it's too easy? Limit yourself to QRP while operating your favorite mode (or all three). Maybe you prefer to be the quarry; it will quickly emerge which states are the most difficult to find, offering opportunities to earn the gratitude of your mates by activating the ones you can get to with your portable or mobile rig."

If you haven't yet begun trying for the Triple Play Award, why not start? There are still quite a few State QSO Parties this year, and the DX contest season starts in a few months. According to Sumner, contesters are among the most loyal devotees of LoTW. Once you begin, you might find that the pursuit can be terribly addictive.

The rules for the Triple Play Award state that two-way communication must be established on the amateur bands with each state on each mode (the District of Columbia may be counted for Maryland). There is no minimum signal report required. Contacts must be made from the same location, or from locations no two of which are more than 50 miles apart. Club station applicants must include their club name and call sign of the club station or trustee on their application. The Triple Play Award will be issued on sequentially numbered certificates, starting with #1, as determined by the time stamp of the electronic application as submitted via LoTW. There are no endorsements for this award.

Contacts made through repeater devices or any other power relay method may not be used for WAS confirmation (a separate WAS award is available for satellite contacts). All stations contacted must be land stations; contacts with ships, anchored or otherwise, and aircraft, cannot be counted. The only exception to this rule is permanently docked exhibition ships (such as the Queen Mary) and other historic ships will be considered land based.

Triple Play Award applicants who reside in the US must be ARRL members to be eligible to receive the award. DX stations do not need to be ARRL members. All bands -- with the exception of 60 meters -- may be used in pursuit of the Triple Play Award.

==> HAM RADIO DIY AT MAKER FAIRE

Ham radio demonstrations and displays are in the works for Maker Faire, May 30-31, the world's largest do-it-yourself (DIY) festival <http://www.makerfaire.com/>. This year, the festival will take place at the San Mateo County Expo Center in California. According to ARRL Sales and Marketing Manager Bob Inderbitzen, NQ1R -- who is attending the fair along with dozens of San Francisco Bay Area hams -- this annual event showcases the country's best innovations in science and technology, engineering, arts and crafts, food and music. "It's no surprise that such an event has captured the attention of the ham radio community. Do-it-yourself, or DIY, has always been a signature of the Amateur Radio Service," he said.

Inderbitzen said that this year's Maker Faire theme -- ReMake America: Building a Sustainable Future -- is based on President Obama's call to action to participate in a new era of DIY. "The Amateur Radio community fits this mold perfectly," Inderbitzen said. "Hams represent the very best of service-to-country and community. We're both doers and makers of things."

A large exhibit area at Maker Faire is planned to help spotlight ham radio. The Foothills Amateur Radio Society is the primary sponsor of the Amateur Radio exhibit, but volunteers from many participating ham radio clubs and other related groups -- including the Silicon Valley Amateur Television Group, the Palo Alto Amateur Radio Association, the Mad Scientist Amateur Radio Club, the Kings Mountain Amateur Radio Club, the Burlingame Red Cross, BAERS Ham Cram and Ham Radio Outlet are going to be there, as well. The coordinating effort is being lead by ARRL Santa Clara Valley Assistant Section Manager Michael Pechner, KI6QNZ, of Palo Alto.

Inderbitzen said that the exhibit will include equipment demonstrations, a basic radio station setup intended for beginners, home brew project displays, an emergency communications van, live amateur television demonstrations and ham radio and radio control planes, as well as a demonstration pairing APRS <http://www.aprs.net/> and model rocketry. Club representatives will be on hand to discuss public service opportunities and to assist newcomers with information for getting started in Amateur Radio. Teachers and students who attend the Maker Faire on May 29 will get to see ham radio educational demonstrations on the day before the official Faire opening.

Started in California in 2006, Maker Faire is held annually in San Mateo, California and Austin, Texas. Maker Faire is supported by Make Magazine,

craftzine.com and O'Reilly Media. Additional details about ham radio at Maker Faire, including special event operating frequencies, are posted on the Foothills Amateur Radio Society's Web site <http://www.fars.k6ya.org/>.

For more information on the 2008 Maker Faire in Austin, Texas, check out this article by ARRL Contributing Editor H. Ward Silver, N0AX <http://www.arrl.org/news/features/2008/06/21/10175/>.

==>SOLAR UPDATE

Tad "The marvel of Earth and Sun" Cook, K7RA, this week reports: Sunspot numbers for May 21 through 27 were 0, 0, 13, 0, 0, 0 and 0, with a mean of 1.9. The 10.7 cm flux was 71.8, 72.1, 70.4, 69.2, 68.9, 68.1 and 66.7, with a mean of 69.6. The estimated planetary A indices were 5, 5, 4, 4, 3, 4 and 3 with a mean of 4. The estimated mid-latitude A indices were 2, 4, 3, 4, 1, 2 and 2 with a mean of 2.6. Conditions have been quiet, with many days showing zeros for the planetary K index. The US Air Force and NOAA predict a planetary A index of 5 until June 3-5 when it goes to 12, then 8 for the following two days. Solar flux is predicted at 68 until June 5, when it goes to 70, then 71 June 6, and 72 for June 7-14. Perhaps we will see sunspots return during this period. Geophysical Institute Prague has a slightly different view for geomagnetic activity, predicting quiet conditions for May 29 to June 1, quiet to unsettled June 2-3 and active on June 4. For more information concerni
ng radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by William Ernest Henley's "Between the Dusk of a Summer Night" <http://www.poemhunter.com/poem/between-the-dusk-of-a-summer-night/>.

==>IN BRIEF:

* This Week on the Radio: This week, the CQ WW WPX Contest (CW) and Kids Roundup are May 30-31. Look for the ARCI Hootowl Sprint on May 31 (local time). Next week, the SEANET Contest, IARU Region 1 Field Day and the Alabama QSO Party are all June 6-7. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, June 7, 2009 for these online course sessions that begin on Friday, June 19, 2009: Antenna Modeling and Radio Frequency Propagation. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day

during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student
to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* 2009 ARRL Photo Contest Ends Soon: There's still time -- but not much -- to enter your high-resolution digital image in the 2009 ARRL Photo Contest. Entries must be received by May 31 via e-mail <upfront@arrl.org> (subject line: 2009 Photo Contest). Details appear on page 20 of the April 2009 issue of QST.

* ARRL DXCC Desk Approves Saudi Operation: ARRL DXCC Manager Bill Moore, NC1L, reports that the current 7Z1CQ operation in Saudi Arabia has been approved for DXCC credit. "If you had cards that were recently rejected for this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk and you will be placed on the list for update," Moore said. ï¿½

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW

bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

2023. NEWS ALERT: ClearChannel Bans Wall of Sound

Newsgroup: rec.radio.amateur.misc
Date: 2009-06-01 12:10:27 UTC

In light of the sentencing of Phil Specter, ClearChannel has annnounced the banning of all music produced before 1994.

"We don't want to offend anyone," a company spokesman said. "Good engineering and mixing practices are politically incorrect now."

All classic rock, oldies, classical, jazz, alternative, and 80s stations will soon be converted to rap and pop.

A coalition is forming to protest the ban. Called "West & Timberlake Fighters" (WTF), it consists of disco re-enacters, Elvis impersonators, truckers, CB operators, heavy metal fans, key-tar players, male Cher impersonators, and more.

The WTF Coalition is going to protest at ClearChannel Corporate Headquarters this Friday. Various musicians, including Survivor, Diana Ross, and Paul McCartney, will be there to fight the ban.

To our valued listeners,

I response to a number of requests we have uploaded the entire 71 minute Dayton Hamvention FCC Forum hosted by Bill Cross, W3TN and Laura Smith as an MP3 audio file to our Amateur Radio Newsline website front page.

You can download it by going to http://www.arnewsline.org, then scroll down to "Click HERE to download the entire 70 minute Dayton Hamvention FCC Forum" and follow your normal download and save procedure for your web browser.

This recording was made using a Senheisser microphone at the speakers podium connected to an M-Audio Microtrack II professional digital audio recorder. Audio processing and conversion to MP3 was accomplished using Goldwave Editor Ver 5.52. We believe you will find the audio quality superior to various other recordings of this important forum available at various websites across cyberspace.

We hope that you will find it of value.

Bill Pasternak, WA6ITF Producer ARNewsline, Inc.

2026. Amateur Radio Newsline(tm) Report 1660 - June 5 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-06-05 13:12:09 UTC
From: "William M. Pasternak" <newsline@ix.netcom.com>

Amateur Radio Newsline(tm) Report 1660 - June 5 2009

Ladies and gentlemen, with some thank you's to folks who kept Newsline in operation last sumer, hers our support fund administrator Andy Jarema, N6TCQ:

--

In June we heard from the Raleigh, NC Amateur Radio Society; The Muncie, IN Area ARC, WB9HXG; Regular contributors Joseph Bartzi, Jr., KC8DKF of Columbus, OH William Walters, WA2IBM in San Jose ; Stephen Perluss and the South Orange Amateur Radio Association in Mission Viejo.

Via PayPal there was Jim Keller, Peter Grace and Oscar Alonso of Robert Holton- Holland, MI, Martek Mississippi amd Biloxi, MS.

Samuel Woodham- Gulfport; Mark Joseph- KC9DUU in Champaign, IL ; Jarno de Haan- PA3DMI in the Neatherlands.

In the month of July including our regular contributors, we heard from the Catalina Amateur Repeater Association, AA6DP.

Via PayPal there was Taylor Valuations- Desta, FL; Adalberto Castelo- Newark, DE; Jack Haas- KB6ZBS, right here in nearby Glendora.

Many of you have written us notes or emails saying how valuable you think our service is: bringing you amateur radio news as it happens, instead of several months later in print. Just DX-peditions alone are often last-minute. You get it here, and you get it weekly.

You need to help keep these broadcasts on the air. Please write to us at our Newsline Support Fund address in Arcadia, CA, given at the end of this broadcast, or use our easy and secure PayPal donation link on our website: arnewsline.org.

I'm Andy Jarema, N6TCQ, and thank you.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1660 with a release date of Friday, June 5th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Brazil calls on its hams to help find a missing airliner, India sends hams to provide communications after a cyclone hits, an all clear on 40 meters following an Earthquake in Honduras and Ireland tells its hams that their licenses will last a

lifetime. Find out the details on Amateur Radio Newsline(tm) report number 1660 coming your way right now.

RESCUE RADIO: BRAZILLIAN HAMS HELP IN SEARCH FOR MISSNG ARLINER

Brazilian amateur radio operators were part of the search effort after Air France fight 447 disappeared enroute from Rio de Janeiro to Paris on June 1st. The Airbus A-330 passenger jet was over the Atlantic when automated systems radioed a series of technical difficulties with the aircraft before all contact with it was lost. Bill Pasternak, WA6ITF, is on our Newsroom with the latest:

--

Air France Flight 447 carried 216 passengers and a crew of 12. An airline spokesman said that shortly before the A-330 disappeared the plane sent several automatic messages reporting electrical and pressurization problems.

Andrew Sampaio, PY0FF, is one of the hams called to take part in the search. He says that shortly after contact with the plane was lost, messages were sent via amateur radio to vessels sailing the region of its last known position. These exchanges asked for any information on the disappearance of the aircraft. They also requested that ships be on the lookout for any sign of the plane.

On Tuesday, June 2nd Brazilian military reconnaissance aircraft found a 3 mile path of wreckage in the Atlantic Ocean some 400 miles from the Brazilian archipelago of Fernando de Noronha. This, the airline says confirms that Flight 447 had crashed in the sea. Ham Radio assistance in the search for Air France 447 has reportedly now been discontinued.

That's all we know right now. For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, following this story from Los Angeles.

--

At airtime its not known how many Brazilian hams were mobilized to assist in the search for the ill-fated Air France flight. (PS8RF, Southgate, other news sources)

RESCUE RADIO: INDIA'S NIAR SENDS RESCUE RADIO OPRATORS TO CYCLONE DEVISTATED REGION

A three-member team of communicators from India's National Institute of Amateur Radio has been dispatched to assist in disaster relief efforts in the city of Kolkata. This, following a government request for two way communications in the wake of Cyclone Aila..

The team of emergency trained hams arrived in the city with radio equipment on June 1st to help the state government in relief work. They were quickly requested to set up radio communications in the flood affected areas of the north and south Parganas area.

Ram Mohan, VU2MYH,is a National Institute of Amateur Radio director. He says that his organization had received a letter from the north Parganas district magistrate's office. It asked that hams and two-way radio equipment be sent to the flood-affected areas of the district to help them in conducting relief and rescue work.

VU2MYH added thatalthough more than a week has passed since the storm Aila hit, there was still speculation as to the extent of the damage that the storm and flooding had caused. As such, damage assessment in the Parganas area is needed very quickly. How long the team from the National Institute of Amateur Radio will be on site is at this moment not known. (Times of India)

**

RESCUE RADIO: AN ALL CLEAR ON 7.090

If you were staying away from 7 point 090 MHz to avoid interfering with Earthquake related emergency communications to Honduras, word that the frequency is now clear. Dr. Cesar Pio Santos, HR2P, is the IARU Region 2 Emergency Communications Coordinator. He says that 7 point 090 is no longer likely to be used for emergency communications in connection with the quakes aftermath. Dr. Santos also thanked all amateurs who refrained from using the frequency for their cooperation. (Southgate)

**

RESTRUCTURING: 40 METER EXPANSION IN SOUTH AFRICA COMES CLOSER

Expansion of the 40 meter band in South Africa band has come another step closer. This, after the board of the Independent Communications Authority of South Africa approves the revised radio regulations for publication in the Government Gazette.

A spokesperson for the telecommunications regulator says that he expects that the revised regulations will be published this week or next. According to the South Africa Radio League a special Boland Amateur Radio Club contest which will be held on the first Sunday after the new regulations have been published to celebrate. (SARL)

**

RESTRUCTURING: IRELAND GOES LIFETIME LICENSING

Ireland is issuing its hams lifetime licenses. Most licensees in Ireland by now have received letters from the regulator ComReg informing them that the lifetime licenses which will begin to be issued this month with an effective date of June 1st.

These letters reportedly came as a surprise to all as the documentation published by ComReg about the lifetime license was in the context of Experimenter Licenses. There was no discussion between ComReg and the Irish Radio Transmitters Society on this matter nor was there any indication of an intention to change to Amateur Licenses despite a meeting between the two back on February 12th at which time the possibility of a future lifetime license was discussed.

According to the Irish Radio Transmitters Society, a meeting on May 16th showed that of the nations major ham radio clubs only two were totally opposed to the idea. The others agreed that on balance the change was at worst neutral and at best beneficial.

At the conclusion of the discussion the consensus was that a letter should be sent to ComReg expressing disappointment at the lack of consultation or even notification of the change. It should also point out that all of the frequency bands in the European Common Allocations Table and ComReg's Radio Frequency Plan for Ireland which are allocated to the Amateur Service should be automatically made available under the new Amateur Radio lifetime licenses. This would result in considerable extra spectrum in the microwave region. The letter would also request ComReg to publish on its website the definition of Amateur Radio as contained in the ITU Radio Regulations. This is because that terminology highlights the self training and technical investigations aspects of amateur radio. (IRTS)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WO1E repeater serving Templeton Massachusetts.

(5 sec pause here)

**

RESCUE RADIO: ALABAMA TO HOLD ARES FM SIMPLEX TEST

The Alabama Amateur Radio Emergency Service will once again conduct an FM Simplex Exercise. One designed to encourage members to forget repeaters for an afternoon and test their range on FM simplex.

This will be a two-hour exercise on Saturday, June 13th starting at 4:00 PM and running until 6:00 PM Central time and held during the ARRL June VHF QSO Contest. This to allow ARES volunteers the opportunity to contact more distant VHF contest stations, many of whom run high power and gain antennas.

During the event, stations will exchange call signs and grid squares. Last year's event, some ARES volunteers were able to make contacts over 200 miles away.

The frequencies that will be used are 52.525 MHz on 6 meters, 146.55, 146.58 and 147.555 MHz on 2. Also being used will be 223.5 MHz on 1 and 1/4 meters and 446.0 MHz on 70 Centimeters.

Other regions might want to consider such tests. This, so as to be prepared in case a disaster takes all the local repeaters QRT. (VHF Reflector)

**

RADIO LAW: CANADIAN TOWN VOTES AGAINST HAM RADIO ANTENNA

Residents of the town of Gordon Head, Saanich, Canada have won round one in their fight to keep a local ham from re-installing a tower that his father had on the same property for many years. This, as the Saanich councilors voted to oppose the ham-radio installation even after Mayor Frank Leonard told them that radio communications is the responsibility of the Canadian federal government.

Ken Jones, VE7BLN, who wants to rebuild the tower is a volunteer with the Saanich Emergency Program. This is an organization dedicated to maintaining communications during a catastrophic event like an earthquake. Jones says that all he is trying to rebuild a tower used by his father until about 1984.

But his decision has lead to outrage among some of his neighbors who call the tower an ugly structure that they do not want next door or where they can see it from their own yards. They took their case before the council that voted to back them and deny the tower a permit.

But the battle is far from over. This is because that nations telecommunications agency Industry Canada has the final say on the 15-metre high antenna support structure. Jim Laursen, who is the Manager of Spectrum Operations for Industry Canada, told the city councilors that Jones's tower height falls within national standards. Laursen explained that this is a nationwide compromise reached after much consultation and study.

Laursen added this note that may be ringing in the ears of the Saanrich Councelors. He said -- and we quote: "It is something that people are going to have to put up with coast to coast."

Translated into simple English it means that Industry Canada really has the final word on whether or not Jones tower can go up. Depending on whether or not Industry Canada overrides the town council this hearing could be just the first step in what could turn out to be a long and drawn out legal battle in the Canadian courts. (ARNewsline(tm) adapted from Canada.com, Canada Times Colonist, eHam.net)

**

ENFORCEMENT: YOU CAN'T OPERATE THERE

The FCC has sent a Warning Notice to . George Fuhrer, Jr., KC6JXM, of Torrance, California telling him that he cannot operate on 3 point 875

MHz with a Technician class license.

According to an April 29th letter from FCC rules enforcer Laura Smith, Fuhrer was allegedly heard on that frequency back on March 29th. Smith's letter to KC6JXM notes that under the terms of his Technician Class license, that he is not authorized to use that frequency.

Smith then warns Fuhrer that that this unauthorized operation of his station must cease immediately. She tells him that continued operation could lead to enforcement action hat could include a fine, suspension of his operator privileges, or his license being revoked. Smith also notes that it could jeopardize any attempts for him to obtain an upgraded amateur radio license. (FCC)

**

ENFORCEMMENT: YOU NEED A HAM LICENSE TO OPERATE 2 METERS

Also receiving a Warning Letter from Smith is Andrew Macrae of Bozeman, Montana. In it, Smith notes that at multiple times in the last several months he has made radio transmissions in the 2 meter amateur band, even though he does not hold an Amateur service license.

Smith tells Macrae that operation of radio transmitting equipment without a valid FCC authorization is a violation of the Communications Act As such that it could bring with it some severe penalties. These include a substantial fine of up to $10,000 and seizure of the radio equipment being used. It could also lead to criminal sanctions including imprisonment.

Smith gave Macrae 10 days from the April 30th date of her letter to him to respond to her office. That date is now past. (FCC)

**

ENFORCEMENT: PROPOSED $7000 FINE FOR SELLING NON CERTIFIED 24 GHZ GEER

The FCC has issued a Issued a $7000 monetary forfeiture to Orvac Electronics, Inc., Fullerton, California. This, for marketing non-certified 2.4 GHz wireless video transmitters and wireless cameras that the agency considers to be intentional radiators.

The proposed fine is the result of a November 22, 2006, inspection of Orvac's retail store. That's where an FCC agent claims to have observed several models of uncertified wireless cameras and stand alone video transmitters on display and for sale.

Wireless video cameras and other short range 2.4 GHz video transmitters are classified as intentional radiators under the Commission's rules. As such they must be certified and labeled with an FCC I.D. number pursuant to the Commission's Rules before being offered for sale within the United States and its possessions. (CGC, FCC)

**

RADIO RECORDS: SA HAMS CLAIM 4 METER SSB METEOR SCATTER RECORD

A pair of South African hams are claiming the first ever SSB phone meteor scatter record for the 4 meter band. Andre Botes, ZS2ACP, of Port Elizabeth and Paul Smit, ZS6NK, in Polokwane say that they made the contact on May 6th at about 06:00 local lime on 70.200 MHz.

According to Smit, it took about 25 minutes to complete the phone contact with 5 by 5 signal reports both ways. He says that they were first listening on F-S-K 441 when they noticed some massive bursts of up to 8 seconds. This says Smit prompted them to try a contact on phone which occurred during the radio peak of the Eta-Aquarids meteor shower.

The 4 meter band which used to be exclusive to the United Kingdom is fast gaining favor across Europe and in some nations in the Southern hemisphere. Unfortunately for hams in most of I-T-U Region 2, those frequencies at 70 MHz are assigned to other services and will not likely be available to amateur radio anytime in the foreseeable future. Hams in the United States and Canada have long attempted crossband contacts with Europe by transmitting in the 6 meter band and listening on 4 meters and have met with some success. (SARL, ARNewsline(tm))

**

THE SOCIAL SCENE: ALGERIA TO HOST HAM SAHARA INTERNATIONAL MEETING

The Algerian Association of Amateur Radio and the Radio Club of Djelfa will be sponsoring the second International Ham Sahara International Meeting throughout the month of June. The venue is the city of Djelfa. According to organizers, every aspect of the event has been planned to make their guests from around the world welcome. More information is available from the Secretary General of the Algerian Association of Amateur Radio by e-mail to benlagha72 (at) hotmail (dot) com or to the Sahara International Ham Meeting at bodil17000 (at) yahoo (dot) fr (Via E-Mail)

**

THE SOCIAL SCENE: DENVER HAMFEST IN AUGUST IN COLORADO

The Denver Radio Club in Colorado will hold its annual hamfest on August 16th at the Jefferson County Fairgrounds in the mile high city. This popular event attracts over 600 hams from across Colorado and Southern Wyoming. Planners say that technical Seminars and VE testing will be featured at the event. For more information take your web browser to www.w0tx.org or email to drcfest (at) comcast (dot) net. (KB0A)

**

THE SOCIAL SCENE: AMSAT AND ARISS IN BALTIMORE IN OCTOBER

The 2009 AMSAT Space Symposium and ARISS Operations Team Meeting will be held on Friday, October 9th through Sunday, October 11th. The

venue is the Four Points Sheraton hotel that is on the Baltimore-Washington Airport property. More information on these twin events will be posted on the AMSAT North America and ARISS International websites as it becomes available. (ANS)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: MOHAMMED BALBISI JY4MB - SK

If you visited the Dayton Hamvention during the 1980's and early 1990's you might remember a rather friendly ham from Jordan with the callsign JY4MB. His name was Mohammed Balbisi and he came to Dayton fairly regularly to represent the Royal Jordanian Amateur Radio Society and His Majesty, the late King Hussein, JY1.

Now, we are saddened to report that JY4MB, became a Silent Key late last year. His passing was first mentioned in an article in the June issue of CQ Magazine by Stewart Gillmor, W1FK. We contacted Stew and he told us that he learned of the death of JY4MB in late 2008 on a trip to Jordan. He pegs the date as early December as he was there from the 20th to the 25th and had been told that Mohammed had become a Silent Key about three weeks earlier.

JY4MB was one of the true unsung heroes of amateur radio and the hobby never had a greater champion. As those who knew him will tell you, he lived the ham radio and shared his love of it with everyone he met. His broad smile and gentle demeanor made him a favorite among DX'ers and non-DX'ers alike. Because of this he will be missed by his many friends worldwide. (Info from W1FK)

**

HAM RADIO IN SPACE: AO-7 EXPERIENCING ECLIPSES

Turning to ham radio news from space, word that the AO-7 ham radio bird is once again experiencing short eclipses each orbit. This is preventing the 24 hour timer from switching modes. AO-7 has seems to favor Mode U/V almost exclusively during these periods. (AMSAT)

**

HAM RADIO IN SPACE: AO-51 TO BE DUAL FIELD DAY REPEATER

AMSAT says that the Oscar 51 ham radio satellite will be configured for Field Day. The bird will have dual FM repeaters with one operating on 1268.700 and 435.150 with the other on 145.920 and 435.300 MHz. No PL tone is required.

Please note that the 435.150 downlink is left hand circular polarized, and the 435.300 transmitter is right hand circular polarized. This configuration will be available for the week preceding Field Day, through the Field Day weekend. That's June 22nd to the 28th. (ANS)

**

EMERGING TECHNOLOGY: BEER WASTEWATER CONVERTED TO ELECTRICITY

>From the Newsline science page word than an innovative joint project between Australia's University of Queensland and Foster's Brewing to turn beer wastewater into electricity has won a $140,000 grant. This, from the Queensland Government's Sustainable Energy Innovation Fund.

A research fellow explained that the new technology worked by creating a microbial fuel cell, which feeds continuously on the organic materials found in the brewery wastewater, turning it into electrical power. The process also produces clean water and renewable non-polluting carbon dioxide.

The team from the University of Queensland Advanced Wastewater Management Center was one of six presented with the funding by Lindy Nelson-Carr who is the Minister for Environment. The presentation took place at Foster's Yatala brewery.

One last thought. If successful. this project may eventually bring new meaning to the words going out for an 807. (Science Daily)

**

WORLDBEAT: RADIO AND TV MARTI SEE SHARP CUTS

Since its inception many years ago, we have reported on the ups and downs of broadcast services Radio and TV Martï¿½. That's the U-S based propaganda sstations that beam broadcasts to Cuba which are routinely jammed by the Cuban government.

Now, according to news reports, Radio and Television Marti will lay off 20 percent of their workforce in a shake-up aimed at retooling the struggling stations. Thjis, in the face of a steep federal budget cuts that provide $2 point 4 million dollars less than last year..

The U.S.-funded broadcasts, aimed at breaking the information blockade on the island, will change formats in response to the proposed budget cut. Radio Martï¿½ will go to an all news format, and TV Martï¿½ will have a five-minute news update every half hour, with other programming filling the time between them.

The final goal is to eliminate 35 jobs at the combined Marti broadcasting facility while at the same time producing a faster and

more pointed newscast. (RW)

**

ON THE AIR: CELEBRATING 50 YEARS OF TV IN BULGARIA

On the bands, listen out for special event station LZ50BNT to be active through December 31st. This in celebration of 50th anniversary of Bulgarian National Television. Operations will be on all bands and modes. A special QSL card will be sent to all stations who send their QSL via LZ1HA, either direct or by the Bureau. (OPDX)

**

ON THE AIR: SPECIAL EGYPTIAN LIGHTHOUSE OPERATION

SU1SK, and several other Egyptian operators will be active as SU8LH. This as the first Egyptian Lighthouse DXpedition on Ras El-Bar Island from August 1st to the 9th. Look for SU8LH to participate in the special International Lighthouse-Lightship Week event during this operation with activity on the High Frequency bands, as well as 6 meters using SSB and CW. QSL via SU1SK. (Southgate)

**

DX

In D-X, word that 9M6DXX and 9M6EVA, are celebrating their 25th Silver Wedding anniversary with a trip to the South Pacific. 9M6DXX will be active in SSB on 40, 20 and 17 meters with some operation possible on 15 as well. QSLs via M0URX, direct, via bureau or Logbook to the World.

KP2YL and KP2HC will be back on St. Croix through June 30th. Listen for them using CW and SSB on 160 through 6 meters. June is 6 meter DX season in the Caribbean, and Brian will be monitoring that band. QSL direct only via the addressees on QRZ.com.

And don't send QSL's for OD5GR to K5FI for two reasons. First, K5FI says hes not a QSL manager for any station, anywhere. More important, its looks as if OD5GR is actually an unlicensed station, so don't hold your breath waiting to get a confirmation from him.

Keep watch for HB9OAB satellite DXpedition to Morocco as CN2AB between June 27 and July 20. Franco says he favors operation via VO-52. QSL using e-QSL or via the bureau to HB9OAB.

Lastly, F5MCC ,and possibly TK5XN have been reported as active from Corsica. QSL's for F5MCC portable TK go via his home call and TK5XN via F2YT either direct or through the bureau.

(From various DX news sources)

**

THAT FINAL ITEM: DIGITAL DELIVERY TO REPLACE FILM

And finally this week, get ready for a new communications experience. That of three dimensional digital movies coming to a big screen near you. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the details:

--

Five Hollywood studios have agreed to help pay for a part of the estimated $1 billion cost to introduce digital theater projection technology on about 20,000 movie screens in North America. The rollout across the United States and Canada, covering about half of all screens in the two nations will cost of about $70,0000 per theater screen.

Adding digital equipment is the critical first step in the technological upgrade to being able to show 3-D movies. According to The Walt Disney Company, more than twenty 3-D films are set to hit theaters through 2010, but only 873 locations in the U.S. and Canada, with a total 1,264 3three dimensional projection systems, are currently available to show them.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU.

--

Movies in 3-D were a novelty in the 1950's when audiences had to endure poor quality red and blue lens glasses to see them. Now with modern digital technology they may become commonplace and expected when you venture out to see something on the silver screen. (FutureTech)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go this quick note. As a result of numerous listener requests, we have posted the complete 71 minute recording of this years Dayton FCC Forum on our website. To find it just visit www dot arnewsline dot org and look for the words "Special Report" in red then right click on the word "here" and save the way your web browser normally does for our weekly MP3 audio newscast. The recording was made using a Senheisser microphone at the speakers podium connected to an M-Audio Micriotrack II professional flash audio recorder and is about as good as it gets. We hope you will find thins audio file of value.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW and I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening.

==> HIGH SPEED TELEGRAPHY ON THE WORLD STAGE

The October 1936 issue of QST reported on the first official "Amateur Code Speed Contest" ever held. Eugene A. Hubbell, W9ERU, took home the silver trophy with his wining speed of 52.2 words per minute. Held at the ARRL Central Division Convention that year, the contest required operators to decipher plain language text for two minute intervals that ranged in speed from 25 to 52.7 words per minute. "Only bona-fide amateurs, holding at least an amateur operator's license, were eligible" to compete in the contest, the article stated <http://p1k.arrl.org/cgi-bin/topdf.cgi?id=18072&pub=qst>.

Fast forward to 1995. Competitors from 15 countries on three continents traveled to Siofok, Hungary to show off their CW operating skills in the first IARU High Speed Telegraphy (HST) World Championship. According to Barry Kutner, W2UP, HST has long been considered a sport in Europe, especially Eastern Europe, similar to chess or an Olympic sport. Kutner was the sole US representative at the 2005 HST World Championship in Macedonia. In 2009, he is leading a team of seven this September to Obzor, Bulgaria for the Ninth High Speed Telegraphy IARU World Championship <http://www.hst2009.eu/>.

Kutner said that most of the participating IARU Member-Societies hold a national competition in their country, seeking members to field and sponsor a team to the World Championship. "In some of the eastern European countries, where they take this very seriously, there are team and/or individual coaches, too," he said. Competitors must be licensed Amateur Radio operators, except entrants in the younger categories may be SWLs. The IARU HST World Championships follow rules set forth by the IARU Region 1 High Speed Telegraphy Working Group <http://www.darc.de/referate/dx/archives/hstrules.pdf>.

In the US, Kutner said those who wish to participate in the World Championship do so at their own expense. "In past years, there has either been one -- myself in 2005 and Ilya Kleyman in 2007 -- or no US participants," he told the ARRL. "This year, we have a team!"

The US team consists of shortwave listener Brana Kleyman (category A, women 16 and younger); Kody Low, KB3RUP, and Cal Darula, K0DXC (category B, men 16 and younger); Ilya Kleyman, KE7OPG, and Ken Low, NV1P (category H, men age 40-49), and Gary Schmidt, W5ZL, and Kutner (Category I, men 50 and older). "The 2 OM categories are full," Kutner said. "But we are always looking for younger hams, especially young ladies!" There are nine categories, and each country can only send two competitors per category, for a maximum of 18 competitors.

There are three main competitive events at HST meets: Transmitting, receiving and receiving Amateur Radio call signs via RUFZxp <http://www.rufzxp.net/>; the sending and receiving portions of the competition are referred to as the Radioamateur Practicing Tests (RPT). There is also a pileup competition.

In the RPT, random letters and numbers are sent via Morse code -- five characters at a time -- at a high speed. Separate competitions are held for the reception of only the 26 letters of the Latin alphabet, only the 10 Arabic numerals or a mixed content of letters, numbers and some punctuation symbols. Competitors may choose to record the text by hand on paper or by typing on a computer keyboard. The competition starts with one minute of transmission sent at an initial speed defined for the entry category (usually 50 letters per minute for juniors and 80 letters per minute for the other age categories). After each test, the competitors' copy is judged for errors. Subsequent tests are each conducted at an increased speed until no competitor remains who can copy the text without excessive error.

The transmission tests require competitors to send five character groups in Morse code as fast as possible. Competitors send a printed message of five character groups at a specific speed that is judged for its accuracy by a panel of referees. Like the receiving tests, there are separate competitions for sending five character groups of only letters, only numbers or a mixed content of letters, numbers and some punctuation symbols.

Kutner noted that 100 letters per minute is equivalent to 25 words per minute and 100 numbers per minute is equal to 36 words per minute. The mixed category of 100 letters, numbers and punctuation is equal to 29 words per minute.

The Amateur Radio Call Sign Receiving Test uses a software program called RufzXP that generates a score for each competitor. Rufz is the abbreviation of the German word Rufzeichen-Horen that means "listening of call signs." In RufzXP, competitors listen to an Amateur Radio call sign sent in Morse code and must enter that call sign with the computer keyboard. If the competitor types in the call sign correctly, their score improves, and the speed at which the program sends subsequent call signs increases. If the competitor types in the call sign incorrectly, the score is penalized and the speed decreases. Only one call sign is sent at a time and the event continues for a fixed number of call signs (usually 50). Competitors can choose the initial speed at which the program sends the Morse code and the winner is the competitor with the highest generated score.

There is also a Pileup Trainer Test that simulates a pileup situation on the air -- numerous stations attempt to establish two-way contact with one particular station at the same time. This competition uses a software program called MorseRunner <http://www.dxatlas.com/MorseRunner/>. In this test, more than one amateur radio call sign is sent at a time via Morse code that is generated at different audio frequencies and speeds, timed to overlap each other. Competitors must record as many of the call signs as they can during a fixed period of time. They may choose to do this either by recording the call signs by hand on paper or by typing them in with a computer keyboard. The winner is the competitor with the most correctly recorded call signs.

Kutner said that each US team member practices on an individual basis, using both on-the-air and computer generated CW. As the team gears up for Bulgaria, "we are in frequent contact via e-mail, exchanging tips and ideas," he said.

HST has definitely come a long way since 1936 when Hubbell dazzled the crowds with 52.2 words per minute; competitors at the IARU HST World Championships consistently have speeds of more than 500 characters per minute -- 100 words per minute. While it's too late to join the 2009 US team, it's not too early to think about upcoming events. If you are able to copy and/or send CW at dizzying speeds, why not think about attending the next IARU HST World Championship? For more information on HST events, contact Kutner via e-mail <w2up@arrl.net>.

==> CHANGES TO ARRL VHF/UHF CONTEST RULES NOW IN PLACE

The League's Programs and Services Committee has approved recommendations made by the ARRL's VHF-UHF Advisory Committee (VUAC) <http://www.arrl.org/contests/vuac.html> to change two rules in the ARRL's VHF/UHF contest program. These changes are in effect immediately, and include the 2009 June VHF QSO Party, scheduled for June 13-15 <http://www.arrl.org/contests/rules/2009/june-vhf.html>.

The first change concerns the Limited Rover category. The ARRL Programs and Services Committee accepted the VUAC's proposal that Limited Rovers may now compete on only the four lowest frequency bands available for any given contest. For the January, June and September VHF Contests, this means 6 and 2 meters, as well as 222 and 432 MHz. For the August UHF Contest, this means 222, 432 and 902 MHz and 1.2 GHz. QSOs on other bands can be made by Limited Rovers, but they will not count toward the Limited Rover's score and will be considered a checklog. "We have already applied changes to the log-checking software that will adjust the Limited Rover's QSOs above the lowest four bands to zero-point QSOs," said ARRL Contest Branch Manager Sean Kutzko, KX9X.

The second change concerns the ARRL UHF Contest <http://www.arrl.org/contests/rules/2009/uhf.html>. For the first time, Kutzko said, the ARRL Awards Committee voted to add Club Competition to the UHF Contest, beginning in 2009. "This is something that the VHF/UHF community has been asking for for quite some time," he explained. "The VUAC made their recommendations and the Awards Committee agreed. We hope to see VHF/UHF clubs across the country help increase participation and get involved with this fun contest."

According to Kutzko, these changes come on the heels of the redesign of the June VHF QSO Party Plaque Program. "In the past," he said, "plaques in the June VHF QSO Party have been awarded for first through tenth place in any category, regardless of location. As any VHFer will tell you, there are radical differences in propagation from one part of the country to another. We decided the plaque program needed to be based on Division, just like every other plaque program that the ARRL offers, not position in the standings."

Kutzko explained that the Programs and Services Committee agreed with this recommendation and voted in favor of it: "This change in structure recognizes the Division-level competition that takes place in the June VHF QSO Party, sometimes under conditions of little to no propagation."

June VHF QSO Party plaque sponsorships are available for all entry categories in all 15 ARRL Divisions, Canada, Mexico and DX. If you or your club is interested in sponsoring a plaque ($75, including shipping charges), contact ARRL Contest Branch Manager Sean Kutzko, KX9X, via e-mail <kx9x@arrl.org> and he will help you find a plaque that's right for you or your club to sponsor.

==> JEFF BEALS, WA4AW, APPOINTED SOUTHEASTERN DIVISION VICE DIRECTOR

With the approval of the ARRL Ethics and Elections Committee, ARRL President Joel Harrison, W5ZN, appointed Southern Florida Assistant Section Manager Jeff Beals, WA4AW, as Vice Director in the Southeastern Division, effective June 1. Beals replaces Sandy Donohue, W4RU, who passed away last month <http://www.arrl.org/news/stories/2009/05/05/10805/?nc=1>.

An Extra class licensee, Beals was first licensed in the early 1960s as WN2OUK. Beals -- who splits his time between Royal Palm Beach, Florida and Dothan, Alabama -- has served as Southern Florida Assistant Section Manager since 2002. Beals has also held appointments as Section Emergency Coordinator, Affiliated Club Coordinator, Technical Coordinator, Technical Specialist and District Emergency Coordinator.

"I am deeply honored to be chosen by President Harrison to serve as Vice Director of the Southeastern Division," Beals told the ARRL. "I am looking forward to working with Division Director Greg Sarratt, W4OZK, to provide quality service and representation to the members of the Southeastern Division. I feel that my years of service in the ARRL Field Organization provide me with a unique outlook on what our members expect of our League. My ability to listen and learn from them will assist Greg and myself to provide the representation they have come to expect from the Southeastern Division."

Sarratt said that was "proud" that Beals was chosen to be the new Southeastern Division Vice-Director: "Jeff has a heart for Amateur Radio. He and I have worked together at many hamfests in the Southeastern Division and I look forward to many more. Please join me in welcoming Jeff as Southeastern Division Vice Director."

Beals said he would be "remiss if I didn't mention the many years of friendship and tutelage given to me by former Southeastern Director Frank Butler, W4RH, and Vice Director Sandy Donahue, W4RU (SK). Their years of service to the League and to Amateur Radio are much appreciated by me and the many members of the Division with whom they came in contact."

Beals was a long-time friend of Donahue's. "I knew Sandy for more than 25 years," he told the ARRL upon Donahue's passing. "He was very, very devoted to Amateur Radio, especially the public service side: Emergency Communications, traffic handling and helping out wherever and whenever he could. We had a lot in common."

Beals counts emergency communications support, liaison with served agencies, radio club liaison and support, classic Amateur Radio operation and restoration, and training of Section volunteers as just some of his Amateur Radio activities. "I am always promoting Amateur Radio and the ARRL at community events, and I attend many club meetings, functions and hamfests throughout the Division," he said. "I am a participant in a pilot project to provide membership support to members of the ARRL Southern Florida Section; this project has since grown to encompass the entire Southeastern Division." He also holds commendations from the State of Florida for his communications support during

Hurricanes Andrew, Frances, Jean and Katrina.

"During my tenure as the Southern Florida Section SEC, President Harrison appointed me to serve on the National Emergency Response Planning Committee. One of the challenges facing many of our SFL Section members -- as well as the rest of our nation -- is the ability to construct an effective antenna system in communities governed by covenants, conditions and restrictions (CC&Rs) <http://www.arrl.org/FandES/field/regulations/local/ccr.html>," Beals explained. "I am -- and always have been -- a staunch supporter of any bill in Congress, such as HR 2160 <http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1>, to effect such change in these most restrictive regulations that prevent hams from providing needed public service communications, as well as their enjoyment of Amateur Radio.

Beals is a Life Member of the ARRL, Quarter Century Wireless Association and the Antique Wireless Association; he is a Senior Grade member of the Radio Club of America and the ARRL A-1 Operator Club <http://www.arrl.org/awards/a1-op/>. He is Past President of the Fort Myers and West Palm Beach Amateur Radio Clubs and current member of the Palms West ARC, North Florida ARS, Wiregrass ARC, OOTC, the Florida and Alabama Contest Groups and the Florida East Coast DX Club.

==> FIRST 2009 ARRL TEACHERS INSTITUTE IN THE BOOKS

The week of May 25 saw the completion of the first 2009 Teachers Institute on Wireless Technology <http://www.arrl.org/FandES/tbp/ti.html>. According to Education and Technology Program Coordinator Mark Spencer, WA8SME, about half of the participants came from the host institution, the New Mexico Military Institute (NMMI) in Roswell <http://www.nmmi.edu>. "The NMMI was an exceptional venue for the Teachers Institute and the school's chaplain, Major Dan Musgrave, WD8RMG, proved to be a gracious host, as well as one of the NMMI faculty participants," Spencer recounted.

Spencer said that the Teachers Institute curriculum -- four days of intensive in-service training in basic electronics, the science of radio, bringing space technology into the classroom, microcontroller programming and basic robotics -- continues to be refined. "One participant, a Colonel, commented that the Teachers Institute far exceeded her expectations, and that she could not even imagine the amount of material that was covered during the course," Spencer said. Another participant -- a Lieutenant Colonel who is the NMMI choir and band director -- quickly made connections between the operation of the musical instruments he instructs (and his cadet students use) and the five building blocks of radio that are presented in the Science of Radio unit.

"This connection between content areas -- in this case music and electronics -- is an example of what the program and the Teachers Institutes are all about," Spencer said. "This instructor will now be in

a better position to help his students to make their own connections between the subjects they are studying in school. These connections make learning relevant."

The next two Teachers Institutes -- in Rocklin, California and in Tucson, Arizona -- are scheduled for this coming week, marking the first time that two Teachers Institutes have been held at the same time. Spencer and Teachers Institute Instructor Miguel Enriquez, KD7RPP, plan to connect the two sessions by making a satellite contact using AO27. "This will demonstrate to participants how amateurs connect with each other via satellites," Spencer explained, "making a practical demonstration of the Space in the Classroom unit."

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment covers the month of May.

The ARRL solicited support for HR 2160, the Amateur Radio Emergency Communications Enhancement Act of 2009 <http://www.arrl.org/news/stories/2009/05/12/10818>.

An ARRL Freedom of Information Act request forced the FCC to release the redacted portions of the studies on which they relied with regard to their Broadband over Powerline (BPL) rulemaking in 2004 <http://www.arrl.org/news/stories/2009/05/08/10811/?nc=1>.

The ARRL hosted their 2009 National Convention at the Dayton Hamvention on May 15-17 <http://www.arrl.org/news/stories/2009/05/16/10823/?nc=1>.

The ARRL honored those who donated more than $1000 to the League in 2008 with a reception just prior to the 2009 ARRL National Convention and Dayton Hamvention. Three new members of the ARRL's Maxim Society <http://www.arrl.org/development/maxim.html> were introduced at the reception <http://www.arrl.org/news/stories/2009/05/27/10839/?nc=1>.

The ARRL's Programs and Services Committee approved two changes to ARRL VHF and UHF contests <http://www.arrl.org/news/stories/2009/05/29/10847/?nc=1>.

The first of seven ARRL Teachers Institute on Wireless Technology took place in Roswell, New Mexico <http://www.arrl.org/news/stories/2009/06/02/10852/ >.

The ARRL Public Relations Committee honored three Public Information Officers for going above and beyond in ensuring that the role of Amateur Radio is explained to media and the public, especially in unanticipated situations in the field <http://www.arrl.org/news/stories/2009/05/14/10813/?nc=1>. The Committee also introduced the new PR-101 course <http://www.arrl.org/catalog/?item=0133> at the 2009 ARRL National Convention at the Dayton Hamvention

<http://www.arrl.org/news/stories/2009/05/15/10817/?nc=1>.

ARRL President Joel Harrison, W5ZN, presented former ARISS International Chairman Frank Bauer, KA3HDO, with the ARRL President's Award at Dayton <http://www.arrl.org/news/stories/2009/05/27/10838/?nc=1>.

W1AW and W1HQ received some new antennas during their semi-annual tower inspection <http://www.arrl.org/news/stories/2009/05/20/10827/?nc=1>.

At month's end, the ARRL had awarded 269 Triple Play Awards <http://www.arrl.org/awards/#tripleplay> since the award's inception January 1, 2009
<http://www.arrl.org/news/stories/2009/05/28/10843/?nc=1>.

The ARRL participated in the 2009 Maker's Faire in San Mateo, California <http://www.arrl.org/news/stories/2009/05/26/10835/?nc=1>.

Mel Parkes, NM7P, of Layton, was re-elected as the Utah Section Manager. Dan Pruitt, AE6SX, is the new Section Manager in the San Joaquin Valley Section. The Rhode Island, Maryland-DC, West Texas, Nevada, Northern New Jersey and New Hampshire Sections will keep their incumbent Section Managers <http://www.arrl.org/news/stories/2009/05/21/10829/?nc=1>.

The current 7Z1CQ operation in Saudi Arabia has been approved for DXCC credit <http://www.arrl.org/?artid=8964>.

==> PRESIDENT OBAMA TO RENOMINATE FCC COMMISSIONER ROBERT MCDOWELL FOR NEW TERM

On Tuesday, June 2, President Barack Obama announced that he will renominate current FCC Commissioner Robert McDowell for another term <http://www.whitehouse.gov/the_press_office/President-Obama-Announces-His-Intent-to-Nominate-Robert-McDowell-for-Another-Term-at-the-FCC/>. McDowell, a Republican, was first nominated by President George W. Bush and sworn into office in June 2006, filling the unexpired term of Republican Kathleen Q. Abernathy. McDowell, whose present term expires June 30, 2009, would need to be confirmed by the Senate. Commissioners' terms are five years long.

According to the White House, McDowell has collaborated with his fellow Commissioners to develop and establish American communications policy covering the wireless, media and Internet industries, as well as international policy matters. He has worked to create rules governing wireless auctions, establish a framework for unlicensed use of TV "white spaces" spectrum, develop incentives to encourage the development of new broadband technologies, review public interest benefits as part of the approval process of proposed corporate mergers and adjudicate enforcement proceedings.

McDowell brings to the FCC approximately 16 years of private sector experience in the communications industry. Immediately prior to joining the Commission, McDowell was a senior executive for a trade association representing competitive facilities-based telecommunications service

providers. He has served on the North American Numbering Council (NANC) <http://www.fcc.gov/wcb/cpd/Nanc/> and on the Board of Directors of North American Numbering Plan Billing and Collection (NBANC) <http://www.fcc.gov/wcb/cpd/numbering/nbc.html>.

Acting Chairman Michael Copps congratulated McDowell on his renomination, saying he was "truly delighted that he will continue on as a fellow Commissioner. Since becoming Acting Chairman several months ago, I appreciate more than ever Rob's collegiality, his openness, his creative intellect, and the deep sense of purpose he brings to his work. I especially want to thank him for all the talent and energy he has brought to our work on next week's DTV transition. He has traveled near and far to help consumers prepare and he has done an outstanding job in helping us deploy an extensive DTV Call Center operation. I look forward to our continuing work together as we tackle the many tough communications issues confronting the Commission and the country."

McDowell was graduated cum laude from Duke University in 1985. After serving as chief legislative aide to a member of the Virginia House of Delegates, he attended the Marshall-Wythe School of Law at the College of William and Mary. Upon his graduation from law school, McDowell joined the Washington, DC office of Arter & Hadden, a national law firm, now closed, that was based in Cleveland. McDowell is admitted to practice law before the courts of the Commonwealth of Virginia, the US District Court for the Eastern District of Virginia and the US Courts of Appeals for the District of Columbia, First, Fourth and Fifth Circuits, as well as the US Supreme Court. He lives in Fairfax County, Virginia on his family's farm with his wife Jennifer and their three children.

==> NASA, NOAA RELEASES NEW PREDICTIONS FOR SOLAR CYCLE 24

An international panel of experts -- led by the National Oceanic and Atmospheric Administration (NOAA) and sponsored by NASA -- has released a new prediction for the next solar cycle: Solar Cycle 24 will peak in May 2013 with a below-average number of sunspots <http://science.nasa.gov/headlines/y2009/29may_noaaprediction.htm?list1300638>. "If our prediction is correct, Solar Cycle 24 will have a peak sunspot number of 90, the lowest of any cycle since 1928 when Solar Cycle 16 peaked at 78," said panel chairman Doug Biesecker of NOAA's Space Weather Prediction Center. This report clarifies a NOAA report from May 2009 that stated that Solar Cycle 24 would bring "90 sunspots per day on average" <http://www.noaanews.noaa.gov/stories2009/20090508_solarstorm.html>.

The latest forecast revises a prediction issued in 2007 <http://www.arrl.org/news/stories/2008/01/07/100/>. At that time, a sharply divided panel believed solar minimum would come in March 2008 followed by either a strong solar maximum in 2011, or a weak solar maximum in 2012. "It turns out that none of our models were totally correct," said Dean Pesnell of the Goddard Space Flight Center and NASA's lead representative on the panel. "The Sun is behaving in an unexpected and very interesting way."

In 2007, experts varied in their predictions on when the solar cycle would peak and how strong it would be. In April of that year, NOAA, in coordination with an international panel of solar experts, predicted that the next 11-year cycle of solar storms "would start in March 2008, plus or minus six months, and peak in late 2011 or mid-2012" <http://www.swpc.noaa.gov/SolarCycle/>. In the cycle forecast issued in April 2007, half of the panel predicted a "moderately strong cycle of 140 sunspots, plus or minus 20, expected to peak in October 2011. The other half predicted a moderately weak cycle of 90 sunspots, plus or minus 10, peaking in August 2012. An average solar cycle ranges from 75 to 155 sunspots. The late decline of Cycle 23 has helped shift the panel away from its earlier leaning toward a strong Cycle 24. The group is evenly split between a strong and a weak cycle."

At a meeting of the American Geophysical Union in San Francisco in December 2007, David Hathaway of NASA's Marshall Space Flight Center, along with colleague Robert Wilson, said that Solar Cycle 24 "looks like it's going to be one of the most intense cycles since record-keeping began almost 400 years ago." They said they believe the next solar maximum should peak around 2010 with a sunspot number of 160, plus or minus 25. "This would make it one of the strongest solar cycles of the past 50 years -- which is to say, one of the strongest in recorded history." Four of the five biggest cycles on record have come in the past 50 years. "Cycle 24 should fit right into that pattern," Hathaway said.

Right now -- June 2009 -- the solar cycle is in a valley, the deepest of the past century. In 2008 and 2009, the Sun showed some of the lowest sunspot counts on record, as well as weak solar winds and a low solar irradiance, going more than two years without a significant solar flare. "In our professional careers, we've never seen anything quite like it," Pesnell said. "Solar minimum has lasted far beyond the date we predicted in 2007."

In recent months, however, Pesnell said that the Sun has begun to show some small signs of life: Small sunspots and "proto-sunspots" are popping up with increasing frequency. Enormous currents of plasma on the Sun's surface are gaining strength and slowly drifting toward its equator. Radio astronomers have detected a tiny but significant uptick in solar radio emissions. All these things are precursors of an awakening Solar Cycle 24 and form the basis for the panel's new, almost unanimous forecast.

Pesnell cautioned optimism, telling the ARRL that there is an "error bar of +/- 20." This means Solar Cycle 24's sunspot number could be as high as 110, or as low as 70. "Based upon my own personal research, I don't think we'll see 90 [sunspots in Solar Cycle 24]," he said.

When asked if such a low number foretold the beginnings of a Maunder Minimum <http://en.wikipedia.org/wiki/Maunder_minimum>, Pesnell said that a Maunder Minimum takes several cycles to appear: "Sunspots [in solar cycles] leading up to the Maunder Minimum took several cycles to disappear. I really can't predict what will happen in Solar Cycle 25.

What we're seeing now is something that looks like a sunspot, but it looks as if someone has come along and 'stomped' on it, creating a multitude of little things. We don't have a name for this and we've never seen anything like it before."

There could be more surprises, panelists acknowledge -- and more revisions to the forecast. "Go ahead and mark your calendar for May 2013," Pesnell said. "But use a pencil." -- Some information from NASA

==>SOLAR UPDATE

Tad "In the Sun he sang with cheerful heart" Cook, K7RA, this week reports: It is so great to see some real Solar Cycle 24 sunspot activity this week. Instead of a phantom that pops into view one day and is gone the next, we have sunspot 1019, which has persisted for five days so far. Emerging on Sunday, May 31, the resulting daily sunspot numbers through June 4 are 15, 23, 19, 17 and 17. This is a Solar Cycle 24 spot, and at high latitude too -- an indication of a new cycle spot. Meanwhile, the low solar wind and quiet geomagnetic conditions continue. Currently, spot 1019 is about to fade, although it is still a few days away from crossing the eastern limb to the far side. NOAA and the US Air Force expect geomagnetic conditions to continue to be quiet, and a planetary A index around 5 is predicted until June 29. Predicted solar flux values are 72 for June 5-6, then 74 on June 7-13. Geophysical Institute Prague predicts quiet geomagnetic conditions June 5-8, quiet to unsettled June 9-10 and quiet again June 11. Sunspot numbers for May 28-June 3 were 0, 0, 0, 15, 23, 19 and 17 with a mean of 10.6. The 10.7 cm flux was 67.7, 68.2, 68.5, 68.5, 72.5, 71.9 and 72.5 with a mean of 70. The estimated planetary A indices were 7, 5, 3, 3, 3, 2 and 4 with a mean of 3.9. The estimated mid-latitude A indices were 5, 4, 2, 3, 2, 2 and 4 with a mean of 3.1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by William Allingham's "A Singer" <http://www.sonnets.org/allinghm.htm#005>.

==>IN BRIEF:

* This Week on the Radio: This week, the SEANET Contest, IARU Region 1 Field Day and the Alabama QSO Party are all June 6-7. Next week is the ARRL June VHF QSO Party on June 13-15. The Asia-Pacific Sprint is June 13. The GACW WWSA CW DX Contest and the ANARTS WW RTTY Contest are June 13-14. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, June 28, 2009, for these online course sessions beginning on Friday, July 10, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* Mal Eiselman, NC4L, Wins May QST Cover Plaque Award: The winner of the QST Cover Plaque Award for May is Mal Eiselman, NC4L, for his article "Troubleshooting Radios." Congratulations, Mal! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the June issue by Tuesday, June 30.

* Operation Approved for DXCC Credit: ARRL DXCC Manager Bill Moore, NC1L, reports that the HZ1EA operation in Saudi Arabia has been approved for DXCC credit. "If you had cards that were recently rejected for this operation, please send an e-mail to the ARRL DXCC Desk <dxcc@arrl.org > and you will be placed on the list for update," Moore said. "Once completed, if you have an account in Logbook of the World (LoTW), the update will be posted to your account" <http://www.arrl.org/lotw >.

* More 2009 Field Day T Shirts on the Way: The 2009 ARRL Field Day T shirts are a huge hit <http://www.arrl.org/catalog/?item=NO-0515 >, topping demand from previous years. "While the current supply of Field Day shirts has stocked out, we expect to be re-supplied before the end of next week -- in time to fulfill all orders to clubs and individuals," said ARRL Sales and Marketing Manager Bob Inderbitzen, NQ1R. "We appreciate everyone's patience and apologize for shipping delays." This year's logo captures the spirit of Field Day in camp-like fashion. The artwork depicts a woodland outdoor scene on a green-colored shirt. The logo was designed by ARRL Graphic Arts Supervisor Sue Fagan, KB1OKW, and Senior Technical Illustrator David Pingree, N1NAS. "We've received some really nice compliments about the design -- and a couple of funny remarks asking why we left out the grizzly bear," Inderbitzen said. 2009 ARRL Field Day is June 27-28 <http://www.arrl.org/fieldday >.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):
letter-dlvy@arrl.org
==>Editorial questions or comments: S. Khrystyne Keane, K1SFA, k1sfa@arrl.org

==>ARRL Audio News: <http://www.arrl.org/arrlletter/audio/> or call 860-594-0384

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL

cannot assist subscribers who receive The ARRL Letter via this
listserver.)

Archive-name: radio/ham-radio/recruitment
Revision: 1.1 2007/09/29 18:42:47
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.
```

2029. Charly D. Miller: Advocate for Child Torture (ACT) or Emetic EMT (EM-EMT)?

Newsgroup: rec.radio.amateur.misc
Date: 2009-06-07 12:25:11 UTC
From: didacticderivative@yahoo.com
Message-ID: <22e5f0ce-2750-478d-a294-d48b6f51c532@t21g2000yqi.googlegroups.com>
Source record: 6643
Cross-posted to: soc.men,alt.hacker,rec.radio.amateur.misc,talk.politics.misc

Say their names:

Larry Sarner

Linda Rosa

Monica Pignotti

Jean Mercer (Psychology Today should be ashamed)

Charly D. Miller (Is she an EMT or an emetic?)

They operate a blog on what may be the most horrible thing: child torture.

What is their motivation?

Where is their evidence?

What are their qualifications?

Pseudoscience - Quackery - Hatred - Propaganda - Lies - Scientology - Thought Field Therapy - Atheism - Abuse - Extremism - Orgone Theory - Voting Machines

ACT = Advocates for Child Torture?
ACT = Advocating Child Torture?
ACT = Advocacy for Child Torture?

(the list goes on and on and on)

2030. A question about amateur regulations

Newsgroup: rec.radio.amateur.misc
Date: 2009-06-07 14:12:10 UTC

If a licensed amateur gets into a QSO with a station he believes to be operating illegally (for example, operating without a license or under a fraudulent ID), isn't it against the law for him to continue the QSO?

I can't seem to find a specific Part 97 paragraph which prohibits communicating with an illegal station, although memory seems to indicate that there was once such a paragraph in the rules. Thanks in advance for any pointers.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, N2OO, NG3K, N4AA & QRZ DX, W5UE, KG6D, WA6ITF, WA6TLA, W7TSQ, K8CX, K8YSE, KK0M, A35RK, CT1BOH, CT1GFK, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, F5PFP, F5PHW, I1JQJ/IK1ADH & 425 DX News, IK7JWX, ON4ZD, JI6KVR & JA IOTA News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SM5LWC, SP5UAF, UT7WZ, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4AN, YT3W and ZL4HU for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 31st-May, through Sunday, 7th-June there were 215 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H2, H3, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VP2V, VP8, VP9, VR, VU, XE, XU, XW, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5H, TANZANIA. Frans, PE1ABQ, is expected to be active as 5H1FF from Stone Town city on the Island of Zanzibar (AF-032). His equipment is a FT-950 w/100w into 3.5m vertical at 20m A.S.L. No QSNs have been reported yet. QSL via the address on QRZ.com.

5J0, SAN ANDRES ISLANDS (Update). Dennis, K7BV, will once again return to San Andres (NA-033) and be active as 5J0BV (not 5J0M as first announced) between June 18-29th (not June 19th-July 5th). He will again be concentrating on 6 meter Sporadic Es. HF bands will be activated as well. QSL direct to K7BV (not W1JJ as first announced) via the QRZ.com address. For more details and updates, visit the following Web page at:
http://www.qth.com/k7bv/caribe2009

8R, GUYANA (Update). The 6 Meter Beacon Project, Inc., (HF-50 MHz DX-pedition between June 16th and July 6th) has announced the callsigns for their operation to Guyana. According to their Web page the callsigns are:
8R1DB - Team One: Chris/W3CMP and Dave/N3DB; between June 16-26th
8R1TO - Team Two: Terry/K4RX and Ken/AC4TO; between June 27th-July 6th
QSO information is just "Signal report please, no grid squares!!!!!!"
QSL via N3DB: David Craig, 4931 Mariners Drive, Shady Side, MD 20864 (2.00 USDs & SAE [or equivalent U.S. postage] for outside US; SASE for U.S. Stations). Bureau QSLs are "OK", but slow. For updates, visit the Web page online at: http://6meterbeaconproject.org/8R2009.html
Operating frequencies will to be posted soon.

A35, TONGA. Paul, A35RK, continues to be active as A35RK/p from Vava'u Island (OC-064). He informs OPDX that there is "no definite departure date." He has also mentioned that he submitted the April/May A35RK/p log (OC-064) to Bob, W7TSQ. This log includes activity in the CQ WPX CW Contest this past weekend. As far as LoTW submissions, Bob, W7TSQ, informed OPDX that since LoTW does not show/give credit for IOTA, Paul is combining his /P log with the regular A35RK log as he is still Tonga. He also mentioned that there is a possibility that some QSOs between May 20-24th, have an error in the time. Most are probably CW contacts. Paul also informed us of the problem and states, "There appears to be a problem with the 'QSO time' element in the computer logbook entry. Some contacts appear to be exactly 'one hour off' the actual time of QSO." So, anyone with a LoTW problem or needing an IOTA card, showing OC-064, can contact Bill at: W7TSQ@AOL.COM
He can supply cards that will show the IOTA information if needed. As usual an SASE/SAE with postage (green stamps) will be answered direct. Bill states, "Bureau cards will be awhile as I probably will not send again before fall. LoTW is preferred as it is less work for me!"

ANTARCTICA WEB PAGE (Sites and Sounds). The French Polar Team's Web site continues to add a great collection of information and pictures (added with music) of the many polar stations and sub-Antarctic regions. Check out the following URLs (recently added FT5YJ--VP8DLM--CE9XX):

* Davis station: http://www.french-polar-team.fr/VK0_Davis_Station_Antarctica

CT, PORTUGAL (Field Day). The ARVM group will be operating their "Field Day" for 24 hours beginning at 1200z on Saturday, June 13th. Operations will be from Montemor Park near the city of Loures. Activity will be on CW, SSB, RTTY and TVA. For more info, go to:
http://www.arvm.org/index_fd2009.html

CT, PORTUGAL. Members of the Algarve STAR DX Team will be active as CT7/CU8AT during "Green Days", June 13-14th. Operations will be from "Parque Natural SW Alentejano e Costa Vicentina" which is valid for: DPRN FF-12 and WFF CTFF-12. Operators mentioned are: Toze/CT1GFK, Al/CT1GPQ and Mike/CT1IUA. One of the operators (to be decided later), will be active during the "Portugal Day Contest" on June 13th, from the same QTH. Look for more details on: http://algarvedx.com

DAYTON HAMVENTION FCC FORUM (Audio Available Online). Bill Pasternak, WA6ITF, Producer of ARNewsline, Inc., reports: "To our valued listeners, In response to a number of requests we have uploaded the entire 71 minute Dayton Hamvention FCC Forum hosted by Bill Cross, W3TN, and Laura Smith as an MP3 audio file to our Amateur Radio Newsline website front page. You can download it by going to http://www.arnewsline.org, then scroll down to "Click HERE to download the entire 70 minute Dayton Hamvention FCC Forum" and follow your normal download and save procedure for your web browser. This recording was made using a Senheisser microphone at the speakers podium connected to an M-Audio Microtrack II professional digital audio recorder. Audio processing and conversion to MP3 was accomplished using Goldwave Editor Ver 5.52. We believe you will find the audio quality superior to various other recordings of this important forum available at various Web sites across cyberspace. We hope that you will find it of value."

DXCC NEWS.....
* Bill Moore, NC1L, Awards Branch Manager reports that the following operation is approved for DXCC credit: HZ1EA - Saudi Arabia
If you have had this operation rejected in a recent submission, please send a note to dxcc@arrl.org to be placed on the list for an update.

Also, once completed, if you have an account in LoTW, the update will
be posted to your account.

* 2008 ARRL DXCC YEARBOOK. Bill Moore, NC1L, announced this past week on
June 2nd: "The 2008 DXCC yearbooks have arrived from the printer. The
ARRL mail room will prepare them for shipping and they should start
going out the middle of next week. You will receive the free copy if:
* A submission was received during the 2008 calendar year.
* If you did not make a submission during the calendar year, but you
were "current" on the DXCC Honor Roll for this period. (329 current
DXCC entities).
ARRL Membership is also required for the free edition. Copies are
available for purchase for 7.00 USDs (USA) and 11.00 USDs (Non-USA).
This fee includes postage."

* DXCC CARD CHECKING at the 2009 "Ham Radio" in Friedrichshafen, Germany.
Please read the complete details on how to prepare your cards and forms
at: http://www.arrl.org/blog/Century%20Club%20Awards

EM0, UKRAINE (URFF Special Event). Members of the Lviv Branch of the
Ukrainian Amateur Radio League (UARL), UR4WWE, will activate the special
callsign EM0WFF from Roztochchia Nature Reserve (URFF-020, URDA LV-32)
between June 12-14th. QSL via UT7WZ, by the bureau or direct. Information
on the "W-UR-FF" Award can be found at:
http://www.islands.org.ua/wurff/index_e.html

FO, FRENCH POLYNESIA. Phil, F5PHW, informs OPDX that he will be in Tahiti
for two years starting August 2009. Activity will be on CW/RTTY and SSB
(sometimes) on 80-10 meters. For the moment, his callsign will be FO/F5PHW.
Phil is trying and hoping to get a FO5 callsign, but he has to negotiate
it with local authorities when he is in Tahiti. Phil will be in a small
house very close to the airport. He will operate with 100 watts into a HF6
and dipole, but hopes, if possible put up a 3 elements beam in the garden.
QSL will be OK via LoTW. QSL are also "OK" via F8BPN, by the bureau or
direct. More information is available on: http://f5phw.chez.com

FP, ST. PIERRE AND MIQUELON. Operators Eric/KV1J and Tom/W8TOM will be
active as FP/KV1J from Miquelon (NA-032) during the CQWW DX SSB Contest
(October 24-25th) as a Multi-Single entry. QSL via KV1J, direct, by the
Bureau or LoTW. Operators will be there between October 20-27th. Activity
outside of the contest will be on 160-6 meters using CW, SSB, RTTY and
PSK31, generally on the highest frequency band that is open (no permission
for 60M). Visit Eric's Web page at: http://www.kv1j.com/fp/october09.html

H4, SOLOMON ISLANDS (Rare IOTA). Operators Mike/KM9D (H44MY) and Jan/KF4TUG
(H44TO) are now active as H44MY from Stirling Island (OC-162) for about
a week. Mike was heard this past weekend on 40/20 meters CW. Jan was
heard on 20/17 meters SSB. QSL via OM2SA.

IOTA NEWS.....
AS-017. Operators Mitsu/7N4AGB, Hase/JK1EBA, Shoji/JJ1JGI, JA1XEQ and
Nakayama/JA1KJW will be active as homecall/6 from Tokashiki

Island, Okinawa Prefecture, between July 7-10th. Activity
will be on 160-6 meters, but mainly on the lower bands using
CW and SSB. QSL via their home callsign, direct or by the
bureau.

AS-047. Operators Mitsu/7N4AGB, Hase/JK1EBA, Shoji/JJ1JGI, JA1XEQ and
Nakayama/JA1KJW will be active as homecall/6 from Daito Island,
Okinawa Prefecture, between June 25th and July 5th. Activity
will be on 160-6 meters, but mainly on the lower bands using
CW and SSB. QSL via their home callsign, direct or by the
bureau.

AS-117. Operators JJ2JQF and JH9UYZ will be active as homecall/0 from
Awa Island, Niigata Prefecture, between June 26-30th. Activity
will be on 160m through 70cm using CW, SSB, AM, FM, RTTY and
Satellite (1200 MHz). QSL via their home callsigns, direct or
by the Bureau.

EU-005. Members of the Bittern DX Group will once again be active as
G2B from the cliff tops in the village of Trimingham, Norfolk,
East of England region (WLOTA 1841) for the RSGB IOTA Contest
(July 25-26th). QSL via M0CNP, direct or by the Bureau.

EU-042. Harald, DF6BL, will be active as homecall/p from Langeness
Island (N-19 for the German Islands Award, WLOTA 1245) between
July 6-13th. Activity will be on all bands and modes. QSL via
his home callsign, direct or by the Bureau.

EU-067. Operators Elizabeth/K4KTG, Michael/KC6ZUS and Jonathan/KI4UOU
will be active as SV/K4KTG from Thira Island [aka Santorini]
(GIOTA SAS-102, MIA MG-125, WLOTA 0658), June 15-30th. QSL via
K4KTG.

EU-095. Operators Robert/F5HTR and Roger/F5LKW will be active as
homecall/p from Riou Island (DIFM ME-006) on June 8th. They
will travelling by kayak and will be active as QRP on 7032
kHz. QSL via their home callsigns, direct or by the Bureau.

EU-120. Members of the Wakefield and District Radio Society will be
active as GB1HI from Holy Island [aka Lindisfarne] (WAB NU14,
ARLHS ENG-224, TWLHD WLH G-011) off the Northumbrian coast,
July 10-13th. QSL via M3ZYZ, direct, by the Bureau or E-mail
QSL requests (Bureau). More details are available on QRZ.com.

EU-122. Members of Kilmarnock and Loudoun ARC will be active as GI0ADX
from Rathlin Island (WLOTA 0039), Northern Ireland, in the
RSGB IOTA Contest (July 25-26th). Operators mentioned are:
Allan/GM3OZB, Barry/GM3YEH, Steve/GM4OSS, John/GM0DJG and
Gordon/MM0BIM. QSL via MM0DHQ, by the Bureau is preferred.

EU-127. Operators Gerd/DK8NT and Horst/DL8NBM will be active as
homecall/p from a smaller neighbor island called "the Dune",
Helgoland Island (German Island Award # N-15), between June

11-17th. They state that their activity will be "something between a vacation-style and a 'serious' DXpedition". Operations will be mainly on CW, but some SSB or PSK. Using only 100 watts, they will experiment with simple wire antennas: A triple leg for 30m and up, a 40/80m double dipole for Europe, and a 40m (and maybe 80m) vertical for DX. QSL via their home callsigns, by the bureau or direct (no e-QSL).

EU-145. Nuno, CT2FPE, will be active as homecall/p from Barreta Island on June 13th between the hours of 1000-1900z. Activity is also valid for: ARLHS POR-141, Fa-14, Ai-003, DPRN FF-07, CTFF-07, DMP-0805, FAR-05, DMA-FARO and Day of Portugal Contest. QSL via his home callsign, direct or by the Bureau.

EU-165. Massimo, I0PNM, will be active as IM0/I0PNM from San Pietro Island (IIA CI-007, MIA MIS-050, WLOTA 2989), June 8-16th. Activity will be mainly PSK31 on 20 and 40 meters. QSL via his home callsign.

NA-027. George, WW4GA, will be active as WW4GA/VO1 from Newfoundland (CISA NF-001) between June 17th and July 9th. Activity will be on all bands and modes. QSL direct only to WW4GA.

NA-067. Rick, N5EYT, is expected to be active from Cape Hatteras (USI NC005S, WLOTA 3913) in Salvo, NC, no earlier than 2000z, June 7th and will finish no later than 1200z, June 15th. His activity will only be 20 meters PSK31 with a dipole (trying out his new Small Wonder Labs PSK-20). Rick mentions that he will be operating at a beach house on the west side of island. This is actually a vacation/wedding trip where his daughter's wedding will take place on June 13th, so most of his operating will be limited to earlier in the week. QSL via N5EYT, by the Bureau, direct or LoTW.

NA-079. Operators Bill/WD2E, Dave/KI4KQU and Paul/AA2C will be active as WD2E/4 from the Dry Tortugas Islands (WLOTA 0274) between June 24th and July 1st. Activity will be on all bands and modes. QSL via WD2E.

NA-112. Brian, KB9BVN, will be active from Bird Island (USI NC-012S, WW Loc. FM03RU, Brunswick County) on Sunset Beach, North Carolina, between now and June 12th. Activity will be QRP on 40 and 20 meters using CW only. His equipment is a Elecraft KX-1 and PAC-12 portable vertical antenna. He will QSL all contacts and states eQSLs are available if that is what you prefer. His son Andy, N9AWM, will be with him as well.

NA-142. Jim, AD5ZA, will be active as homecall/4 from Santa Rosa Island (USI FL-003S), Florida, on August 1st. Activity will be on 20 and 15 meters using PSK31. This activation is for PODXS 070 Club. QSL via his home callsign, direct only.

J2, DJIBOUTI. Once again members of the F6KOP Provins Club and Clipperton DX Club are planning a major operation this time to Djibouti in 2010. The callsign announced is J20C. More details are forthcoming.

IY7, ITALY (Special Event). Alfredo, IK7JWX, is now active as IY7NGM (and possibly as IY7NGM/p) through December 31st. Activity is to celebrate 100th anniversary of Guglielmo Marconi receiving the Nobel Prize in 1909. Activity will be on all HF bands and 6 meters using all modes. Alfredo was heard this past week on 40 meters CW and 20 meters RTTY/PSK31. QSL via IK7JWX.

K8CX's 2009 DAYTON HAMVENTION PHOTO GALLERY. Tom's, K8CX, 2009 Dayton Photo Gallery is now up at: http://hamgallery.com/dayton2009/ This is Tom's 13th consecutive year for the gallery, and it contains 293 photos taken at Crowne Plaza at various events and hospitality suites.

LIGHTHOUSE ACTIVITY AND NEWS.....
Operators Gabriel/LU5FZ and Juan Carlos/LU9DO will be active as CX/LU9DO from Punta del Este Lighthouse (URU-008) in Uruguay during the International Lighthouse/Lightship Weekend (ILLW), August 15-16th.

Look for La Cana Lighthouse (WLOTA 2802, Loc. FK68MK) in Guanica, Puerto Rico, to be on the air as K4G during the WLOTA Contest (July 4-5th). Activity will be on CW, SSB and RTTY. QSL via WP3MW.

MAJOR PACIFIC DXPEDITIONS (Update). After his recent trip from the Pacific, Team leader, Hrane/YT1AD confirms that an international team of 14 individuals are organizing DXpeditions for amateur radio activity from Tokelau (ZK3), Canton Island (T31 - Central Kiribati) and Wallis Island (FW) over 22 days next year (in 2010). The tentative schedule is as follows:
September 25-29th - Traveling by boat from Fiji (3D2) to Samoa (KH8)
September 29th - Loading in Apia; departing Apia to Fakaofo Atoll in the Republic of Tokelau Island group
September 30th - Arriving Fakaofo Atoll
October 1-3rd - Activity on the air from Tokelau
October 3rd - Afternoon departure from Fakaofo Atoll to the Island of Canton (Central Kiribati)
October 4th - Traveling to Canton Island
October 5th - Arriving at Canton Island
October 6-10th - Activity on the air from Canton Island
October 10th - Afternoon activity/departure from Canton Island
October 12th - Arriving at Wallis Island (FW)
October 14th - Departure from Wallis Island
October 16th - Arriving at Fiji Islands
More information will be forthcoming.

PA09, NETHERLANDS (Special Event). Fred, PA0FAW, will activate special event station PA09SHAPE between June 6th and July 3rd. Activity is to celebrate Mode Biennale, fashion month in Arnhem. QSL via PA0FAW, direct or by the Bureau. SWL cards welcome.

PORTUGUESE PREFIX CHANGES. The Portuguese local regulatory agency for the amateur radio service (Anacom) has published new legislation. There is a part in the legislation that will impact the callsign structure of Portuguese (Portugal, Madeira and the Azores) callsigns. As of June 1st, the following will be the prefix blocks allocated to each area: Each area will have four blocks (old calls under old legislation, new calls under new legislation, club calls and special calls)

Portugal Madeira
-------- -------
Block 1 - CT1, CT2, CT4, CT5 Block 1 - CT3
Block 2 - CR7, CS7, CT7 Block 2 - CR9, CS9, CT9
Block 3 - CQ0, CS5 Block 3 - CQ2, CS3
Block 4 - CQ7, CR5, CR6, CS2 Block 4 - CQ3, CQ9, CR3

Azores

Block 1 - CU1, CU2, CU3, CU4, CU5, CU6, CU7, CU8, CU9, CU0
Block 2 - CR8, CS8, CT8
Block 3 - CQ1, CS4
Block 4 - CQ8, CR1, CR2

ADDED NOTES:
Callsigns from block 1. (CT1, CT2, CT4, CT5. CT3, CU#) will no longer be issued. Current hams will keep these calls if they like or submit to a new exam to have the new prefixes (CR, CS, CT, 7,8,or 9).

New hams will have block 2 and will be issued prefixes according to category. Category 1 will have CT 7, 8 or 9, category 2 will have CS 7, 8 or 9, and category 3 will have CR# 7, 8 or 9.

Club stations will have call in block 3 (CQ0, CS5, CQ2, CS3, CQ1, CS4).

Special occasion and contest calls will have block 4 (CQ7, CR5, CR6, CS2, CQ3, CQ9, CR3, CQ8, CR1, CR2).

SPECIAL NOTE FOR CONTESTERS:
Portugal - No new prefixes. Several lost.
Madeira - One new prefix (CQ2).
Azores - New prefixes (CR8, CS8, CT8, CQ1, CS4, CQ8, CR1, CR2).

For more info, see: http://www.anacom.pt/render.jsp?contentId=944999

PACIFIC TOUR. Karl, DL2FAG, is going on another "holiday-DXpedition", this time to the Pacific and plans to operate from three locations later in the year. His tentative schedule and callsigns are as follows:
Island of Niue - He will operate as ZK2DL from Namukulu, between October 19th and November 7th. Activity will be holiday style on 80-10 meters, mainly on RTTY, PSK and SSB. IOTA is: OC-040. QSL via DL2FAG.

New Zealand - Karl states he will operate sporadically from the South Island of New Zealand, as ZL4/DL2FAG between November 8-18th. Activity will be on 40-10 meters, mainly on RTTY,

PSK and SSB. QSL via DL2FAG.

Western Samoa - Karl will end his trip as 5W0KH from Upolu between November 18-30th. Again, activity will be on 80-10 meters, mainly on RTTY, PSK and SSB. QSL via DL2FAG.

Karl states that he will be operating from all locations on the usual DX frequencies. Watch Karl's Web page for possible updates, and he will have a log search on the site (not sure if it will be active during his operations). His Web page is at: http://www.qsl.net/dl2fag

QSL INFO AND NEWS.....
With all the changes going on in the postal systems, it is time to check out Bill's, W9OL, great IRC Chart Web page. It is a great place to see who takes IRCs, green stamps and who does not. Give it a look at: http://www.qsl.net/w9ol/IRC_Chart.htm

K5D QSL STATUS: QSL Manager Bob, N2OO, reported on June 2nd, the following update:
"OQRS - We finished OQRS requests received through about May 4th.. We will resume OQRS QSL processing again shortly, and we will post the dates on the QSL Information link found at the K5D Web site www.k5d.us when we do resume. OQRS continues to be available for QSL requests. Info for OQRS can also be found on the QSL Information link.

DIRECT MAIL: We are now focusing on the direct mail in the same order as the mail was received. We are answering donors first just to be fair to those who added a little something with their QSL. We also TRY to catch notes that tell us that you contributed in advance of the operation, but we don't always catch those notes. If we miss yours, we apologize. The DIRECT MAIL processing trudges forward. So, we appreciate everyone's patience. I continue to do the log processing after which the QSLs will be mailed gradually by members of my QSL processing team. We are not doing larger bulk mailings in order to keep the cards flowing into the mail. It will surely be a few months before we can become current. It's hard to get ahead when you are still receiving some 50 pieces of mail on average every day.

As of June 2nd we have confirmed 26,353 QSOs.

LoTW UPDATE: After careful consideration, and cautious investigation into the LoTW process, I have decided that we will be able to upload CONFIRMED QSOs ONLY to LoTW. This will be done in larger sized batches as time allows while we continue to process QSLs. When the first batch is uploaded, I will post the information on the QSL Information link found at the K5D Web site www.k5d.us. I expect to do it within the next week. QRX

In the past, we just uploaded to LoTW one time about one year after the DXpedition. This was done for obvious reasons. Now that I have become familiar with how to do partial log uploads to LoTW, we should be able to satisfy those who want their QSOs in LoTW. By only uploading confirmed QSOs (in batches), we think that this is a fair compromise that is a

win/win for everyone involved. We are considering other options for the "next one". But for THIS one, this is what we will be doing. We will upload the balance of the full log in early 2010.

I ask you all to be patient! Since cards are going out in the mail frequently and in much smaller batches, you can expect to hear of people getting their cards continuously. Be assured that we are continuing the QSL operation on a daily basis. It is just going to take time.

PLEASE DO NOT CONTACT THE QSL MANAGER ABOUT QSL ISSUES. IF YOU DO, YOU WILL ONLY BE REFERRED TO THE K5D WEB PAGE FOR CURRENT QSL STATUS. WHEN THINGS CALM DOWN, I WILL BE HAPPY TO ADDRESS ANY CONCERNS. QRX. Visit www.k5d.us for all information!"
73 Bob Schenck, N2OO QSL Manager K5D Desecheo 2009

1652 INFO. Over the past weekend (June 5-7th), special callsigns were active on several different bands that were good towards the "Roskilde 1658 Award". For information on the callsigns, and upcoming operations (times and frequencies), please look at the activities calendar on the award Web site at: http://www.sk7bq.com/roskilde

QSL for OZ5FYN will be sent for all QSOs via the EDR bureau. This was a special event station active for the annual Summer Rally at Egeskov Slot (Castle) on June 7th. OZ5FYN grid locator was JO55FE, and the island reference number is EU-172. There is no Danish CASOTA reference number (for the first Castle activation).

NEW QSL MANAGER. Randy, W5UE, is now the new QSL manager for 9V1YC, 9V9HQ and N1YC/VK9X. After many years of excellent service as James' QSL Manager, Joe, N5ID, is handing over duties to Randy in order to recuperate after an extended illness in hospital. W5UE has all the logs, blank cards and pending QSL requests for all of James' callsigns, so feel free to check his Web site for periodic updates and status of QSL requests at: http://w5ue.net/qsl-w5ue.html

ADDED NOTE. Randy, W5UE, states, "It was brought to my attention that many QSL Manager Data Bases still contain entries for some of James' old calls to N5ID. Both Joe and James indicate a request hasn't been received for any of these for years, but we will continue to honor any requests that may be needed in the future... so, please update your QSL Manager Data Bases for any of the following calls from N5ID to W5UE: 9V0YC, 9V8YC, KB1CM/VR2, KB1CM/VS6, KB1CM/ZS, KH8/KB1CM, VR2/KB1CM and VS6/KB1CM. Please bear in mind all of these logs are on paper only and will require extra processing time since I'll probably have to manually print cards as well."

NOT THE QSL MANAGER. Don, N1DG, reports that he is NOT the QSL Manager for A71A. QSL A71A via A71AN ONLY.

R1FJT QSL STATUS. Jack, RW0BB (ex-R1FJT), reports that new QSL cards are being printed and you will have to wait until he receives them.

TM0M LOG ONLINE. Logs for the recent operation TM0M from Molene Island (EU-065), May 23-30th, now available at: http://users.belgacom.net/cdxg

QSLS VIA LOTW: 9M6XRO, A61AD, A61X, A61AO, D44TXI, LY8O, LY9Y, OH0Z, S58MU, T33C, TN5SN, TR8CA, UN6J, UT7UJ, VK9GMW, XE1EE, YL7X, YW4D, ZF1A and ZK2V

QSLS RECEIVED VIA MAIL: 4S7DA, 4U1UN, 5H1X, 5H3RK, 5K0T, 5N/LZ1QK, 7Q7VB, 7X0RY, 8Q7SC, 9J2FM, 9J2VB, 9K2YM, 9U0VB, A71MA, A92GR, BG4TRF, BH4QAK, C91FC, CU3AD, CW6V, D2BB, D20VB, D60VB, DV5PO, E71DX, EA8BMG, EA9CF, EA9PY, EL2AR, FM5BH, GJ0KYZ, GT4BRS, GT6BRS, H40FN, HI9/EA3BT, HI9/EA3WL, HP1AC, HV50VR, JH9FNB, K3J, K5D, KG4AS, KH6BB, KP2/K3TEJ, KP4KE, LX8RTTY, LX9SW, PY0FF, R1ANB, R1ANC, R1ANP, T32YY, T33ZZ, T8CW, T8NF, T88CI, TO5A, TR8CA, UK9AA, UN7BEW, V63PR, VK7ZE, VK0BP, VP5DF, VP8/LZ1UQ, VP8DLJ, VP8YLI, XE2HWB/XF1, YB2ECG, Z36A and Z36W

QSLS RECEIVED VIA THE BUREAU: BY4AEE, BA4ALC, BA4CH, BD4AHW, BD4ALC/4, BA4DJ, BD4DM, BD7BW, BD7YK, BT4ECNU50, BY4BHK, BY4CA, BY4HAM, CE0Y/SM6CUK, CT1DWT, CT1HIX, DL2ARD, E20WXA, EM10U, EM5HQ, FK/JK1FNL, FO5RU, HA800NAR, HB9LH, IB0CW, IK0FMB, IK1JIM, IM0S, LA6KOA, LN3C, LZ130JA, MM/DH5JBR/P, OE8XHQ, OH0/OH2DZ, OH60BH, OY/DL6RAI, R450WA, RA3CM, RA3XEV, RU3FF, SY8DX, TM0C, TM2RWC, UE3FFF/3, UE9WFJ, UN8LW, UT4EK, UT5UGR, VA7AAW, VP2MPL and ZL1BOS

SILENT KEY. Ken Holdom, ZL4HU, informs OPDX that Russell Baird, or Russ as he was commonly known, ZL4DJ, became a Silent Key (SK) on the evening of June 4th. He was a well-known DXer and fellow ham radio enthusiast. OPDX and its readers would like to send out our deepest sympathy to the family and friends of ZL4DJ. Messages can be sent to: The Baird Family, 87 Ventry Street, Alexandra, Central Otago, New Zealand. ADDED NOTE: Ken Holdom, ZL4HU, states: "WE don't have an E-mail address for messages at this time, but I am more than willing to receive messages and personally hand them to the family.

SP50, POLAND (Special Event). Memebers of the SP DX Club (The Long Distance Radio Communication Club of Poland) have activated the special event station SP50DXC through June 30th, to celebrating 50th anniversary of the SP DX Club. The station is expected to be active on all bands/modes. Operators mentioned are: Andrzej/SP7ASZ, Jerzy/SP7CVW, Krzysztof/SP7IIT, Pawel/SP7LFT and Jerzy/SP7TF. QSL via SP7DQR. All QSOs will be uploaded to LoTW. SP50DXC will also be active again later in the year at the end September during their annual meeting of the SP DX Club.

SPECIAL EVENT (13 Colonies "On the Air"). Look for special event stations from all the thirteen 1776 original colonies to be on the air between 1300z, July 1st and 0400z July 5th. A full color certificate printed on heavy card stock or parchment paper (with a map and the state flags of all the 1776 colony states) will be available to each station who works one or more or ALL of the special event stations. The thirteen 1776 original colonies (their special event callsign) are: CT (K2D), DE (K2E), GA (K2G), MA (K2H), MD (K2F), NC (K2J), NJ (K2I), NH (K2K), NY (K2A), RI (K2C), PA (K2M), SC (K2L) and VA (K2C). Activity will be on all bands (except 60m and the 30/17/12m). The Colony stations will be operating on

or near the "13" of each band (Eg. 14213, 14313, 7213, et.). Also, 2 meters and 6 meters simplex frequencies are encouraged. For this event 2 meter repeater contacts WILL be allowed. For more details and picture of the certificate, please visit their Web page at:
http://home.comcast.net/~dzabawa/ThirteenColonies.htm
Each station is to send a contact log stating the Date, UTC, Band, and callsign of each contact, along with your QSL card and 4.00 USDs (check, Money Order or Cash - to help defray printing costs). NO SASE required. They will furnish postage, certificate and 9"x12" envelope. No QSL cards will be issued - just the certificate. All award requests and payment are to be sent and made out to the KU2US-Award Manager. Address and Log Forms are available at the above Web site. Those stations submitting contacts for ALL thirteen colonies will have their certificate marked with a "Clean Sweep" in recognition of their efforts.

T30, WESTERN KIRIBATI. David, N1EMC (ex-ZK2DF), is expected to be active from here as T30DX. Complete details are forthcoming. Stay tuned.

TO4G, GLORIOSO ISLAND (Update). Didier, F5OGL, announced this past week as indicated several weeks ago, no civilian will be included in the crew which is going to Gloriosos, next month. He states, "It had been confirmed that it will be first a military mission. Nothing was possible to do to make changes in this Forces Authorities decision." He also announced the final crew/operators list: Yves Michel/F5PRU, Jean Marc/F5RQQ, Freddy/ F5IRO, Philippe/F4EGS and Sylvain/F5TLN. Didier thanks the F6KOP Provins ARC for the loan of three stations to be active on the air and a fourth that will be set up and could be used on no particular modes or bands. Didier ends his press release by saying, "Mission permitting, the crew will appear in the two major July contests, the IARU HF and the RSGB IOTA. Know that the crew, instead of maintenance jobs, has another assistance mission by the Armies Information and Public Relation group which will go to Glorioso along with us. This group is composed of an Officer, a director and a cameraman. The callsign is not known yet, but it is expected in the next days." More information is forthcoming. Look for updates on their Web page at: http://glorieuses2008.free.fr

VK, AUSTRALIA (4 LETTER SUFFIX). Eddie, VK4AN, (Father of VK4FRAJ) reports: "There is still much reluctance and confusion amongst contesters regarding VK 4-letter suffix calls... especially in CW contests! My son is probably the ONLY VK with a 4-letter suffix that operates on CW, and is VERY frustrated when contesters keep asking if his call is 2-letters or 3-letters... and one even accused him of being 'a commercial station' and refused to work him! 4-letter suffixes are issued to 'Foundation-class' hams (similar to the US novice-class). ALL Foundation class suffixes begin with an 'F' plus 3 more letters. They have a maximum of 10-watts power on 80-40-15-10m CW-SSB only and must use commercially made equipment. My son's call is VK4FRAJ. He really enjoys CW but is ready to stop contesting due to the frustration of others NOT knowing that Australia issues 4-letter suffixes!! PLEASE SPREAD THE WORD THAT VK issues 4-LETTER SUFFIXES... and that the only one that we know of that is on CW is VK4FRAJ (not VK4FJ, not VK4RAJ, not VK4FRA, not VK4FR, not VK4FRJ... etc...). 'Raj' said he

would appreciate it if contesters would listen for his QRP CW signal and to please realize that he has a 4-letter suffix (VK4FRAJ)."

VP2M, MONTSERRAT. Bill, W5SJ, will be active from here possibly as VP2MSJ (TBA), July 14-21st. Activity will be on 80m, 60m and 6 meters using CW, SSB and possibly JST. However, he will concentrate on the CQWW VHF Contest (July 18-19th) on 6 meters. His equipment is an ICOM 7000, w/250 watts, into a 5 element yagi (for 6m) and a Carolina Windom (for 80/60m). QSL via his home callsign direct with current IRC or SASE.

ZY0, FERNANDO DE NORONHA. Just a reminder that operators Anderson/PY2TNT, Fabio/PY2AAZ/AC2AC, Alex/PY2WAS and Bob/N6OX will be active as ZY0F from Fernando de Noronha Island (SA-003), from June 10-15th. Activity will be on 160-10 meters including 60/30/17/12 meters (60m under temporary licensed granted by the Brazilian Government) using CW and SSB. QSL via PY2WAS, by the bureau or direct. This DXpedition is sponsored by Spiderbeam Antennas. Also, see ZY0F on QRZ.com.

Please help me to solve my omni-d problem.... It lost 90% of the receive side.I can barely hear signals that were usually 30 over 9.but what gets me it is that I flip the switch in the back to "receive" instead of leaving it in the transceive position and use the receive jack(not the pl-259) and it receive normally.I opened it and checked the relay(contacts) and they are ok....I took a wire antenna and jumped it to the "input signal pin" of the rx mixer and the reception cames back....any ideas guys.....

I used to own an Omni D 546, and I did have some problems with it, but not a receive problem but an email to TenTech, got me going in the right direction, and actually the manual that is supplied gives a huge amount of info on fault finding etc. Perhaps you could try to find a copy?
